Re: Docket DMA-363

OFFICE RECEIVED NOV 1 1951

Mr. Carl H. Peterson, Secretary
U.S. Oil & Development Corporation
205-11 Mercantile Building
Denver 2, Colorado

Dear Mr. Peterson:

The application submitted by the U. S. Oil and Development Corporation for a loan to explore the Battle Boy mine in San Juan County, Colorado, has been reviewed by the Defense Minerals Administration.

The project as you have presented it consists of equipping the property and cleaning out old workings in order to mine ore from developed reserves. According to the regulations of the present exploration program, such work cannot be considered as exploration. In addition, the assays of the ore indicate that the mine is primarily a gold-silver property and does not contain sufficient base metals to warrant Government participation. In view of this we are unable to justify an expenditure of public funds for the project you propose. I regret, therefore, that your application must be denied.

We wish to thank you for bringing this property to our attention.

Very truly yours,

Tom Lyon

Memorandum

Re: Docket DMA-363
U.S. Oil and Development Corporation
Denver, Colorado
Geltie Boy Mine
San Juan County, Colorado
Exploration loan, $55,627
Lead, zinc, copper

To: Reports and Records Unit
Administrative Management Div.

From: Lead-Zinc Branch

Subject: Recommendation for denial of exploration loan

The application was submitted by the U. S. Oil and Development Corporation of Denver, Colorado, for a loan to explore the Geltie Boy mine in San Juan County, Colorado. Total estimated cost of the project was $55,627.

The project, as outlined by the applicant, consisted of cleaning out the Geltie Boy tunnel and laying new track, new air line, water line, and ventilating line for a distance of about 1300 feet.

The Lead-Zinc Branch originally recommended a revised exploration program, cut to $20,752, on the grounds that gold-silver ore that was blocked out in 1900-1907 when zinc was a deleterious gangue constituent could be a zinc-lead ore under present conditions, particularly in view of the known occurrence of base metal ore bodies, such as the Lark in a similar geologic occurrence in this vicinity. As the ore has long been inaccessible, and as there is no record of the zinc content, reopening the mine would be equivalent to a new exploration.

J.F.S.

The Production Expansion Division has questioned the justification for considering this as a base metal project and has recommended denial of the application on the following grounds:

(1) The Geltie Boy is a gold-silver mine. The assays submitted do not show sufficient base metal content to warrant consideration.

(2) The applicant claims that about 92,500 tons of ore are already developed.

(3) The work proposed is not exploration, but consists of equipping the property and cleaning out old workings to produce gold-silver ore.

Lauritsen

(4) The project has been rejected as a source of tungsten.

Upon reconsideration, the Lead-Zinc Branch does not consider that the case for an exploration loan is strong enough to warrant contesting the recommendation of the Production Expansion Division, particularly on such a poorly documented application as this one is. Hence the Branch agrees with the recommendation that the application should be denied. The attached letter should be sent to the applicant.

The following material is attached:

List of exhibits to conform to Form PF-103.
Answers to items requested on Form PF-103, dated May 4, 1951, with attached exhibits.
Correspondence and memoranda.
Review of application for exploration assistance.

G. E. Johnson, Acting Chief
Lead-Zinc Branch

Dear Mr. East:

Referring to our conversation in your office this morning relative to the Galtie Boy application DMA 363X.

It is noted that you have advised me that the opening of the tunnel to the Galtie Boy vein cannot be considered under the tungsten program.

The application was submitted previously as lead, and zinc proposition on a 50-50 matching basis.

For reference as to our financial ability to meet this loan on a 50-50 basis we refer you to the Central Bank & Trust Company, 15th and Arapahoe Streets, Denver, Colorado.

If our original application can be considered on a 50-50 basis for the lead, zinc and copper, and the exploration of the tungsten vein in the Galtie Boy tunnel be considered on a 75-25 basis, as suggested in the letter from Mr. Lyons, we will be glad to sign the contract to that effect.

Very truly yours,

GALTIE BOY MINES INC.

MAY 25 1951

RECEIVED
MAY 28 1951

Mr. J. H. East, Jr., Executive Officer
DMA Field Team, Region IV
230 New Customhouse
Denver 2, Colorado

Subject: DMA 363 X - Galtie Boy Mines, Inc.

Dear Mr. East:

The Galtie Boy Mines, Inc. have submitted a revised tungsten application for reopening the Galtie Boy tunnel on a 75 percent participation basis by the Government. Although this application was submitted through the Denver Office of the Bureau of Mines, and you are probably familiar with its content, we are returning it to you for consideration along with the previously referred lead-zinc proposal for the same property.

Apparently, the applicant now has 2 applications to reopen the same tunnel for different metals. The tungsten commodity committee does not believe that the Galtie Boy is a good enough prospect for tungsten to warrant an expenditure of $43,822 to open the tunnel. However, if the tunnel should be opened for other reasons and a huebnerite vein is found in the workings, a small exploration loan to explore such a vein might be considered.

The list of proposed expenditures for reopening the tunnel include taxes ($4,000) and 4 stopers ($2,440), items which do not seem required for the project. In addition, it is not clear that a mucking machine is needed unless caved areas are extensive.

Yours very truly,

Tom Lyon

INSTRUCTIONS

Read Mineral Order 5, Regulations Governing Government Aid in Defense Projects, before completing this application. Submit four signed copies of the application to Defense Minerals Administration, Department of the Interior, Washington 25, D. C., or to the nearest field executive officer thereof, with your name and address on each sheet of the application and all accompanying papers. If any question is inapplicable, or if you cannot answer it, so state on the form. Where the space provided for answer is insufficient, answer on a separate sheet, annex it to the application form, and refer to it in space for answer. If the application is approved, you will be presented with an exploration project contract on Form MF-200, for your signature.

THE APPLICANT

*1. Is applicant an individual, partnership, or corporation?
*2. If a partnership, state names and addresses of partners.
*3. If a corporation, state names and addresses of officers, directors, and five largest stockholders.
*4. Describe the mining and general business experience of (*a*) the applicant, and (*b*) the person or persons who will manage the project.
*5. Are you the owner or the lessee of the property?
6. If owner, state what claims, liens, or encumbrances, if any, are against the property.
7. If lessee, attach a copy of the lease and state if it is in good standing.

NOTE.—It will be necessary to procure and attach to the exploration project contract agreements of claimants, lienors, encumbrances and lessors subordinating their interests in the property to the interest of the Government under the contract.

8. Furnish current financial statement, showing assets and liabilities, and a profit and loss statement.
9. How much money is applicant prepared to invest in proposed project? Is it sufficient to pay your part of the cost of the project as detailed in question 23 of this application form, in accordance with the regulations on Government participation (Section 9 of Mineral Order 5)?

*If you have already answered these questions on MF-100, you are not required to answer the questions for this application.

16—64067-1

THE PROPERTY

10. (*a*) Give a description of the real property that will be in any way involved in the exploration project, including any existing mine or operating property.

    (*b*) Give the legal description of the exact parcel, plot, or area upon which the exploration is to be conducted.

    NOTE.—If both areas are the same, so state. The only obligation to repay the Government is from the net earnings from any commercial discovery made in the area specified in (*b*) above in which the exploration is to be conducted, and the expenditure of funds which may be charged as costs of the project must be limited to that area or to work necessary to perform the exploration in that area.

*11. State the present and former names of the property, if any.

*12. State, in detail, the location of the property with reference to towns, railroads, roads, shipping points, including distances and directions and kinds and conditions of roads.

*13. State source and quantity of water available for operations and its sufficiency at all seasons.
State amount of power to be used, rate per hour or other cost, and source.

*14. Describe any existing useable facilities, equipment, buildings, or structure now on the property that will be devoted to the exploration work.

15. State in detail how the ore could be shipped and how and where milled.

*16. History:

    (*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for any past suspensions of operations.

    (*b*) State briefly the known history and production of adjoining and neighboring properties.

    (*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.

*17. Production:

    (*a*) If mine is in production, furnish the following information:

	Tons per day	*Grade or analysis*	*Cost per ton*	*Net value per ton*
(1) Mining				
(2) Milling				
(3) Shipped or sold				

*18. Ore or mineral reserves: (If property is or has been operating.)

    (*a*) Describe the ore or mineral deposits briefly.

    (*b*) Submit available maps and assay data.

    (*c*) Give estimated tonnage and grade of each class of ore reserves.

19. State any conditions or circumstances regarding the property not sufficiently brought out by the foregoing questions.

THE EXPLORATION

20. For what mineral or minerals and for what types of deposits and ores will the exploration be conducted?

21. Describe briefly, but concisely, the proposed work and the estimated time required to complete it.

    NOTE.—The Government will not participate in a project that will require more than 2 years to complete.

22. Furnish statement of the geological basis of the project with particular emphasis on factors leading the operator to expect the finding of commercial ore bodies. This statement should be accompanied by supporting maps such as geological maps, maps of the proposed openings and assay maps, sample lists, and other pertinent data.

THE REQUIREMENTS AND COSTS

23. Tabulate in the form of an itemized statement with a sum for each item the estimated requirements and costs of the project so that the total will give the estimated cost of the project in which the Government will participate, as follows:

    (*a*) Labor, by numbers and classes (miners, muckers, millmen, etc.), with wages of each.

    (*b*) Supervisors, by numbers and positions, with salaries of each.

    (*c*) Cost of necessary repairs to existing facilities, structures, and buildings.

    (*d*) Cost of necessary installation or construction of additional facilities, structures, and buildings.

    (*e*) Cost of items of equipment, not now owned by the applicant which must be purchased for operations at a cost of $50 or more each.

    (*f*) Cost of rental for equipment which the operator proposes to rent.

    (*g*) Rental value of items of equipment which the operator now owns and which will be devoted to the work.

    (*h*) Cost of materials and supplies, including items of equipment costing less than $50 each.

    (*i*) Cost of power, water, utilities, and any other items not provided for above.

24. Furnish a time schedule of the project, stated in terms of months after project is approved, showing progress expected to be accomplished and the money expected to be spent.

CERTIFICATION

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this form and accompanying papers is correct and complete to the best of their knowledge and belief.

16—64067-1 U. S. GOVERNMENT PRINTING OFFICE

Mr. J. A. East,
Regional Director,
Bureau of Mines,
Region IV,
Old New Customs Building,
Denver 2, Colorado.

Dear Mr. East:

1. The following list of exhibits has been made in accordance with Form M-103 as issued from your office which is an application for exploration project loan pursuant to Mineral Order 5 under Defense Production Act of 1950.

Loan application for Cattle Boy group of mines in Cave Creek Basin, San Juan County, Colorado, by:

Cattle Boy Mines Inc.,
Old Mercantile Building,
1031 - 15th Street,
Denver 2, Colorado.

This application was formerly made by Walter L. Bentley, W. A. Green and Earl H. Peterson.

3. Shows the corporate's officers, directors and largest stockholders.

4. Walter L. Bentley who will be the consulting engineer has had wide experience in the mining field. He was with Kaco Co. for Kerr McGee 20 years, and with U.S. Bureau of Mines 4 years, and was with American Smelter & Refining Company for one year as resident engineer for Colorado.

5. Cattle Boy Mines Inc., are the lessees with purchase agreement. See the assignment from Walter L. Bentley, W. A. Green and Earl H. Peterson to the Cattle Boy Mines Inc; also lease from Mrs. A. A. Mason and Frank L. Rose which has been assigned by Walter L. Bentley W. A. Green and Earl H. Peterson.

7. The lease and purchase agreement from Mrs. A. A. Mason and Frank L. Rose are in good standing.

9. The Galtie Boy Mines Inc., was incorporated on April 27th 1951 with a capital stock of $50,000 worth of common stock with a par value of $1.00 per share.

10(a) The attached Federal land plats Survey No.18050 and No.18636 shows the claims covered by the leases and purchase agreements. All the claims belonging to the lease are colored in green, except one which is the Cement Creek claim which joins the Prospect Gulch Placer claim Survey No.18049.

10(b) The exploration will consist of cleaning out the sloughed material and some slight cave-ins and laying new track, new air line, water line and ventilating line in the Galtie Boy tunnel for a distance of approximately 1300 feet. The Galtie Boy tunnel is shown in red on plats Mineral Survey No. 18636 and starts on the Gold Dollar running across the Galtie Boy and ending on the Little Jack.

11. As far as we have been able to ascertain this group of mines has always been known as the Galtie Boy Mines.

12. The Galtie Boy Mines are located almost due north of Silverton Colorado about 7 miles; going from Silverton you go up the Cement Creek highway which runs approximately one mile from the portal of the Galtie Boy tunnel. There will have to be about 3/4ths of a mile of new road or rebuilding an old road which exists in order to get the ore to the highway from Galtie Boy Mine. Application has been made to Bureau of Mines under the Mine Access Road Provision.

13. There is an abundance of water in Dry Gulch Cannon, also Cement Creek and Prospect Gulch. This water is plentiful at all seasons of the year. The Southern Colorado Power Company's high line runs about a mile from the portal of the Galtie Boy tunnel. We do not anticipate any difficulty in getting the power company to run a power line to the mine for us. Of course we will have to pay for the cost of the power line.

14. As this mine has not really been operated since 1937 there are no buildings on the property that can be occupied, however we will be able to lease the cook house, dining room and some of the bunk houses at the Lark mine which is only about 2-1/2 miles by truck road at a very nominal cost.

15. The nearest tungsten mill to the property is the Vanadium Milling Company of Boulder. We expect to jig and reduce the ore as much as possible at the mine and haul it to Boulder by truck.

16(a)(b)(c) The references furnished in the application are self explanatory and complete.

17. We have no information on which to base production estimates, however we do know that a sizeable vein of tungsten was cut in the Galtie Boy tunnel as Mr. Frank Ross, T. . Valby and Harold . Williams have examined the vein of tungsten in the Galtie Boy tunnel and advise that there is a sizeable vein of tungsten.

18(a) Attached to this application is a report by J. . Barter, M.E. also one by Louis F. Schaefer, M.E. which covers these claims.

(18(b) Also Map Survey No.18350 and No.18636 which covers the entire group of claims leased by the Baltic Boy Mines Inc. Also there is a map showing the relative location of these two surveys to each other. Also profile map of Baltic Boy vein, Last Chance, Camp Bird and Little Maud veins; also the Leslie, Ohio, Steel, Boycotter and Sunshine; also map showing the relative positions of these veins to each other.

19. As stated in the application we have made a plication for the construction of access road to the Baltic Boy tunnel portal.

20. This exploration will be conducted to produce tungsten.

21. Refer to item 10 of this letter.

22. Refer to item 18(a) 18(b) of this letter.

23. See itemized list of equipment and supplies and labor needed to complete this project.

24. If this loan is allowed within the next few days and a D.O. order for equipment and supplies are allowed at the same time we feel we can get started in a very short time. If equipment and supplies are available we would be able to complete this project within from four to six months.

BALTIC BOY MINES INC. By Earl A. Peterson

April 4, 1961. Secretary

[illegible]

Application for [illegible] on [illegible] project pursuant to [illegible] Order 6, under Defense Production Act of 1950.

[illegible] Mines Inc.
211-16 [illegible] Bldg.,
Denver 2, Colorado.

Date of application, May 4, 1951.

Mineral or metal, [illegible] Tungsten,

Location of mine, [illegible], San Miguel Co. Colorado.

Estimated cost, 43,222.00

Percentage of government participation, [illegible]

Date of [illegible] 1-100 [illegible] Docket Number [illegible]

1. The former stockholders were Walter [illegible] Bentley, [illegible] Green, [illegible] and H. Peterson, at the time the application was filed. The above parties have since created under the name of Dalhie Boy Mines Inc., a Colorado corporation with offices at 211-216 [illegible] Building, Denver 2, Colorado.

2. Blank.

3. The name of the corporation officers are:
Walter [illegible] Bentley, President, 211 [illegible] 11th Ave., Denver, Colorado.
[illegible] Green, Treasurer, 1543 Columbine St., Denver, Colorado
Earl H. Peterson, Secretary, 4307 Tejon St., Denver, Colorado.
The directors are:
Walter [illegible] Bentley, 211 [illegible] 11th Ave., Denver, Colorado.
[illegible] R. Green, 1543 Columbine, Denver, Colorado.
Earl [illegible] Peterson, 4307 Tejon St., Denver, Colorado.
Elbert [illegible] Brown, 4307 Tejon St., Denver, Colorado.
James [illegible] Henderson, 500 Equitable Building, Denver, Colorado.
The five largest stockholders are:
Walter H. Bentley, [illegible] Green, Earl H. Peterson, Elbert [illegible] Brown, and James [illegible] Henderson.

4. Walter [illegible] Bentley will be the operating engineer. He has had wide experience as a mining engineer. He was with Climax in Denver for many 20 years, and with [illegible] Inc. 4 years, and was [illegible] President [illegible] for one year as President [illegible].

5. The Dalhie Boy Mines Inc., are the lessees with a purchase option. (See lease and option contract attached).

6. Land.

7. The attached leases and purchase agreements are in [illegible] form. (See attached abstracts).

8. This is newly formed corporation and have not been operating, therefore we cannot furnish financial or profit and loss statements. However we have the money to match the Government out of 75,000.00 [illegible].

9. The corporation is financially prepared to furnish its portion of the funds as requested in Section 9 of Mineral Order 6.

10 (a) See the attached federal land plats, Mineral Survey 12560 Exhibit Number 3-A-1 and 12636 Exhibit 3-A-2, the property covered by the leases and purchase agreements are shown colored in green.

10 (b) The exploration is to be conducted in the Dalhie Boy Mines which is located on the Gold Bolivar, Dalhie Boy and Little Buck mining claims as shown on Plat Mineral Survey No. 12636 Exhibit 3-A-2.

Item 23

The following is [illegible] machinery, equipment and facilities needed to open the Cattle Boy [illegible] for which we are asking a loan [illegible] the Defense Production Act through the U.S. Bureau of [illegible]. We are also asking for priority on same.

20 tons 30 lb. rails [illegible]	2,000.00
4 switches [illegible] each	100.00
600 ties [illegible] each	300.00
Rail splices for 1000 feet	[illegible]
1 air tramper complete	1,000.00
Cars (1 or 2 ton) [illegible] per car	[illegible]
Shaking machine	[illegible]
1 Jack hammer	350.00
4 Stopers [illegible] each	2,440.00
1 Leyner [illegible] each	[illegible]
Mine timber	[illegible]
Lumber for building	1,[illegible]
420 cubic feet compressor	[illegible]
40 box loads (boxes) powder	700.00
Fuse	200.00
Caps	[illegible]
3/4 mile electric power line	1,[illegible]
10 lamps, [illegible] per month, [illegible] the	[illegible]
Small tools	[illegible]
5 H.P. fan	[illegible]
1300 feet 1" water line [illegible] per ft	[illegible]
1300 feet 1-inch [illegible] [illegible]	[illegible]
1300 feet 3-1/2" air line [illegible] per ft.	[illegible]
6 hand rock drills, 1 mechanic, 1 unskilled helper, 300 shifts [illegible] month - 5 months or [illegible] at [illegible]	7,[illegible]
1 Ferryall or ambulance for transportation	2,000.00
Freight [illegible] estimated	2,000.00
1 Jeep	1,[illegible]
Cable, estimated	[illegible]
6 air hose [illegible]	[illegible]
6 water hose [illegible]	[illegible]
	$ 45,[illegible]

11. The present name of the property is the Baltic Boy group. We are informed that this group of claims have been known by that name from the time of the original location.

12. The Baltic Boy Mines are located about seven miles north of Silverton, Colorado and are about a mile from the county highway that runs up Cement Creek.

13. There is an abundance of water in the Dry Gulch canon, which runs near the Baltic Boy Tunnel portal, also there is water available in Cement Creek and Prospect Gulch. This water is plentiful at all seasons of the year.

The Southern Colorado Power Company's high line runs about a mile from the portal of the Baltic Boy Tunnel and electric power will be available at the prevailing rate.

14. There is no equipment or buildings on the property but there is a scale house and dining room and bunk houses available at the Lark Mine which is about 2-1/2 miles by road, these are available at a nominal cost.

15. The tungsten ore will be hauled by truck to Boulder, Colorado, for milling, after it has been jigged and reduced as much as possible at the mine. The Real Milling Company of Boulder, Colorado, will mill the ore.

16 (a) The former operator of the Baltic Boy Mine was Ross Mining and Milling Company, and the original locator of the Baltic Boy was Patrick Lonigan together with his brother and brother-in-law.

Frank Ross, who lives in Denver at 3510 St. Paul, phone Ekmont 3[illegible], together with his brother and uncle, for several years operated the smelter at Silverton, Colorado, and they bought the Baltic Boy property consisting of 19 patented claims for $40,000 cash from the original locators, Patrick Lonigan and his associates (Lonigan is still living at Silverton, Colorado). The Ross brothers kept on developing this property, not only the Baltic Boy vein, but they also opened up the Last Chance, Ohio, Bethel, and Boycotter. These ore bodies were opened up for the sole purpose for back log of ore for their smelter, and according to Mr. Ross and Mr. Lonigan none of the ore that was opened up was ever shipped prior to 1907, and when the panic came in the fall they closed the smelter and their mining operations. They were never able to open up again because of financial conditions. It was stated that there has never been any work done in the mine since the panic of 1907. In 1941 or during the second world war a party by the name of Harold O. Williams, 2405 20th Street, Boulder, Colorado, took a lease on part of the Baltic Boy dump for tungsten and assays from this dump are attached hereto. He discovered that the tungsten came from a separate vein where the Little Jack vein is intersected by the Baltic Boy tunnel which is approximately 50 feet from the Baltic Boy vein. And we understand from Mr. Ross that this operation was profitable.

Maps of surface as well as the underground workings are attached to the application, also attached hereto are maps and drawings of blocks of ore marked A. . . . . D. and E, of the Baltic Boy ore body as well as Last Chance, Ohio, Little Jack and Boycotter vein showing estimates of developed as well as undeveloped ore bodies.

16 (b) During 1941 Harold O. Williams and H. . . Wally worked the tungsten veins on the Ohio, Dawn of Day and Minnesota claims and shipped sizeable amount of ore from them, and at the present time they have leased the Ohio, Dawn of Day and Minnesota from us which shows their faith in these claims, since they have mined in the Boulder and Nederland districts they should know good tungsten mines.

We have also leased the Dry Gulch and Minnesota claims to Theron Nelson and George Litsey for time for tungsten. Mr. Litsey has also mined these claims before.

17. Production: We have no information on which to base production estimates.

18 (A) Refer to reports and maps.
(B) See reports and maps.
(C) Not known by claimants.

19. There is about three-fourths of a mile of truck road that will have to be rebuilt and worked. We have made application to have this done by the Bureau of Roads under the Alaska access roads provision.

20. This exploration will be subjected to reduced tungsten.

21. The proposed project is to open the Baltic Boy tunnel, which will consist of cleaning out the dirt and rock that has sloughed off of the roof and walls of the tunnel in some instances nearly closing the tunnel; laying new track and retimbering where required; putting in air pipe and making the tunnel usable for a distance of about 1300 feet. This project should not take one year to complete.

22. For geological information refer to U.S.G.S. Bulletin 1401 and 1402, page 336 and reports of J. B. Buxton, U.S.G.S. which is attached.

23. See page inserted just prior to this sheet.

24. We expect to start work as soon as the snow clears this spring, which should be by June 1, provided we can obtain the equipment and supplies necessary.

We figure the tunnel can be opened in three to six months depending on the amount of material sloughed off the roof and walls and also some small cave in that will have to be cleaned out and retimbered.

WHEREAS

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this form and accompanying papers is correct and complete to the best of their knowledge and belief.

No. 799. ASSIGNMENT OF MINING LEASE.—The Bradford-Robinson Ptg. Co., Mfrs. Robinson's Legal Blanks, Denver.

ASSIGNMENT OF MINING LEASE

THIS INDENTURE, made this 4th day of May, A. D. 19 52, between Walter W. Bentley, W.H. Green, and Carl H. Peterson the assignors and Galtie Boy Minon Inc., a Colorado corporation, the assignee,

WITNESSETH, That in consideration of One Dollar and other good and valuable considerations ~~DOLLARS~~ to the said assignors paid by the said assignee, the receipt whereof the said assignors hereby acknowledge, the said assignors hereby assign to the said assignee its executors, administrators and assigns all their right, title and interest in and to that certain mining lease between Frank L. Ross, and Mrs. M. M. Bacon, Lessor, and Walter W. Bentley, W.H. Green, and Carl H. Peterson, Lessee dated September 11, A. D. 19 50 and recorded in the records of the Clerk and Recorder of the County of San Juan, State of Colorado, in Book 175 at Page 535, of certain property situate in the County of San Juan, State of Colorado, to-wit: as shown on Federal Plats No.10050, the following claims Gold Standard, Moyatone, Del Mino, Wetzel, Sibley, Hill, J.C. Bell, Boycotter and Boycotter Extension lodes; and Mineral Survey No.10656 Little Hand, Little Hack, Gold Dollar, Galtie Boy, Last Chance, Dry Gulch, Camp Bird, Minnesota, Ohio, Dan of Day and Sunshine Lodes.

for the term of 16 months ~~years~~ of which term there now remains the unexpired residue of 8 months ~~years~~ or until January 1st 1952 with an annual extensions.

TO HOLD the same unto the said assignee, its executors, administrators and assigns for the unexpired term of 8 months ~~years~~ subject, nevertheless, to the rents, royalties, covenants, conditions and provisions therein contained.

The assignors for themselves their executors, administrators and assigns, hereby covenant with the said assignee for itself, its executors, administrators and assigns, that the covenants and agreements in said mining lease contained on the part of the lessee to be observed and performed have been up to the date hereof duly observed and performed, and that the said assigned premises are now free and clear of all liens and encumbrances, grants, leases, taxes and assignments whatsoever, made or suffered by said lessee.

The assignee for itself, its executors, administrators and assigns, covenants with the said assignors their executors, administrators and assigns, that the said assignee, its executors, administrators and assigns will during the residue of said term of 8 months ~~years~~ pay the rents or royalties reserved by, and perform the covenants contained in the mining lease therein assigned and will at all times hereafter indemnify the said assignors, their executors, administrators and assigns from and against the non-payment of the rents or royalties and the non-performance of the said covenants or any of them.

WITNESS our hand and seal this 4th day of May, A. D. 19 52

Walter W. Bentley
W.H. Green
Carl H. Peterson

CONSENT TO ASSIGNMENT

Carl H. Peterson, Lessor named in the mining lease referred to and assigned in the above written assignment, hereby consents to the assignment of said mining lease.

Lessor.

[illegible] AGREEMENT

[illegible]:

WHEREAS, the undersigned is the owner in leases and purchase agreements of that certain parcel of ground in the County of San Juan, State of Colorado described in a certain Exploration Project contracted dated _____ between Baltic Bay Mines Inc., a Colorado corporation, the lessee of said property, and the United States of America:

NOW, [illegible], the undersigned, as lessee of said property under leases dated September 11, 1950, does by these presents subordinate all of his right, title, and interest under the provisions of said lease to the right, title, and interest of the United States of America under the provisions of said Exploration Project Contract, and agrees that the lien and claim of the United States of America under the provisions of said contract shall be prior to the undersigned's rights under the terms of said lease; and

The undersigned further agrees that if said leasehold interest should be surrendered or if said lease should terminate at any time prior to the expiration of the rights of the United States of American under said Exploration Project Contract, the undersigned shall assume and does hereby assume all of the obligations under said Exploration Project Contract to make repayment to the United States of America according to the terms of said contract; and

The undersigned agrees to commit no act, nor assert any claim under judicial process or otherwise that may contravene or conflict with the prior lien and claim of the United States of America under the provisions of said Exploration Project Contract.

This undertaking and covenant shall be binding upon the heirs, successors, and assigns of the undersigned.

DATED this 4th day of May 1951.

[illegible]

By Carl H. Peterson

Carl H. Peterson, Secretary

No. 90B. MINING LEASE AND OPTION—Short Form.
—The Bradford-Robinson Ptg. Co., Mfrs. Robinson's Legal Blanks, 1824 Stout St., Denver, Colo.

THIS INDENTURE, Made this 11th day of September in the year of our Lord one thousand nine hundred and Fifty between FRANK L. ROSS

of the first part, and WALTER W. BENTLEY, W. R. GREEN, CARL H. PETERSON

of the second part, WITNESSETH, that the said party of the first part, for and in consideration of the rents, covenants and agreements hereinafter expressed to be paid, kept and performed by the said parties of the second part, has leased, let and demised, and by these presents does lease, let and demise unto the said parties of the second part, the following described premises, situate, lying and being in Red Mountain Mining District, in the County of San Juan and State of Colorado, to-wit: All of his interests (being seven and one-half percent of net production) from, of and in the Dawn of Day Lode Mining Claim, U.S. Sur. No. 18636; Camp Bird Lode Mining Claim, U.S. Sur. No. 18636; Dry Gulch Lode Mining Claim, U.S. Sur. No. 18636; Last Chance Lode Mining Claim, U.S. Sur. No. 18636; Little Maud Lode Mining Claim, U.S. Sur. No. 18636; Little Mack Lode Mining Claim, U.S. Sur. No. 18636; Minnesota Lode Mining Claim, U.S. Sur. No. 18636; Ohio Lode Mining Claim, U.S. Sur. No. 18636; Sunshine Lode Mining Claim, U.S. Sur. No. 18636; Gold Dollar Lode Mining Claim, U.S. Sur. No. 18636; Galtie Boy Lode Mining Claim, U.S. Sur. No. 18636; Boycotter Lode Mining Claim, U.S. Sur. No.18950; Boycotter Extension Lode Mining Claim, U.S. Sur. No. 18950; Cement Creek Lode Mining Claim, U.S. Sur. No. 18945; Del Mino Lode Mining Claim, U.S. Sur. No. 18950; Gold Standard Lode Mining Claim, U.S. Sur. No. 18950; J.C. Bell Lode Mining Claim, U.S. Sur. No. 18950; Keystone, Mill, Sibley and Wetzel Lode Mining Claims, all U.S. Sur. No. 18950; K & G. No. 1 and K. & G. No. 2 Placer Claims, U.S. Sur. No. 14300 and Prospect Gulc Placer Mining Claim, U.S. Sur. No.18949.

TO HAVE AND TO HOLD THE SAME, for the purpose of mining, for the term of Sixteen Months, or until January 1st, 1952; with annual extension, as hereinafter provided. From the date hereof, unless sooner terminated under any of the provisions herein contained, with no power to assign this lease or any interest thereunder, or to sublet the whole or any part of said premises except upon the written consent of the party of the first part except parties of second part may transfer to a suitable corporation for operational purposes.

And the said parties of the second part, for and in consideration of the leasing of said premises, covenant and agree with said party of the first part to commence work on said premises within a reasonable time and thereafter to work the same continuously, in a thorough and workmanlike manner, employing ~~[illegible]~~ some men underground,

ABSTRACT:

[illegible]

Extracts from

REPORT

of

J. E. BAXTER, M. E.

Mr. W. W. Zimmerman,

Have visited the San Juan Mining District, and examined the operations and properties of the Ross Mining & Milling Company. . . .

The Silverton Smelter, which the Company is operating . . . . . .

The gold properties at Dry Gulch, on Cement Creek, about a mile below Gladstone, were inspected and there is undoubtedly the makings of a large milling proposition there.

Several strong prominent veins have been opened up at various places and sufficient development work completed to furnish a tonnage to run a mill for several years. Additional tonnage can be secured by extending the tunnels as ores are extracted from the ore bodies now opened up. . . .

The mineral contents are about the same as the operating properties of the District, such as the Gold King, Sunnyside and Telluride properties. The ores should run from $10.00 to $15.00 per ton, of which gold is the predominate value. . .

With depth the other metals may increase but

Extracts from

REPORT

of

LOUIS F. SCHDANTK, M. E.

To

Mr. Timothy Hoan, President.

Pursuant to your instructions, we have made an examination and sampled the veins and workings of the Galtie Boy, Leslie and Wetzel Mines. . . Attached you will find plats, maps and assay results, to show the results obtained . . .

The two main purposes were to estimate the tonnage of mill ores available, with its probable value as mined and extracted in mill quantities . . . .

As I am advised, the Pittsburgh Office and yourself have requested the Silverton Office for information on three points,

1st, Have tonnages enough been developed to justify or require the building of a mill;

2nd, What is the average values of the ores, and

3rd, The kind and size of such a mill, if one should be provided.

The first two questions only were referred to me for consideration, and while this report may necessarily refer to other mills and milling methods, such references are only for purpose of comparison of values required, tonnages needed and usual requirements for milling operations, . . . in this district.

The property consists of three groups of mining

PHOTO-COPY
BY PICK
FOR EXTRA COPIES

REQUEST

claims, the Baltic Boy, the Leslie and the Wetzel groups, consisting of . . . on the easterly slope of the mountain, mostly in the Dry Gulch drainage side of the mountain, extending over into the Prospect Gulch slopes and crossing the Cement Creek valley, in San Juan County, Colorado.

The properties are in the Cement Basin, across the Gulch and on opposite mountain from the Gold King Mine, with the Sunnyside Mine just across the ridge or top of Bonita Mountain in the adjoining Basin. In Cement Basin are the Big Colorado, Grand Mogul, Queen Anne and other mines, which with the Gold King and Sunnyside enable a study of comparative geology, for purposes of estimating permanency of the veins, ore occurences, steadiness of values and the expectancies of future ore development. The various mines are at different stages of development or operation, and a study of these other mines, coupled with a careful examination of the workings, geology and ores of the Baltic Boy, Leslie and Wetzel groups, all aid in determining what may be reasonably expected from future operations at your properties.

Generally speaking, the geology is practically the same in all these properties, as they are all true fissure veins, in the Silverton Series of Andecites, and probably the mineralization processes with ore depositions were all made in similar manner and at same geological periods. The veins may, and do, vary in widths, lengths, relative richness of ore lenses and many minor particulars, but in the main the characteristics are similar. . . .

The technical geology, as outlined in the Governmental Reports and by many engineers, need not be repeated in this report, as you are familar with it . . . .

Referring specifically to the properties in your groups, I would say there appears to be a localized volcanic disturbed area on the west side of Dry Gulch, somewhat similar in character to other volcanic areas in the Silverton Quadrangle in the near vicinity of some of the larger mining areas, and this disturbance undoubtedly has in part caused or affected the various veins that apparently radiate or cut through that section, probably giving those veins part of their values, especially the gold values which appear from the sampling.

Five large and many small veins cut through this area, varying in directions but all leading into the

PHOTO-COPY
BY PICK
FOR EXTRA COPIES
JAN 19 1951
1015-17th
CERTIFIED

central part of Red Mountain. The most mineralized, or at least the most disturbed and shaken up part of the area is near the west ends of the Galtie Boy, Campbird, Last Chance and Minnesota claims. Probably here, or near this point, was the center of the local volcanic action, and the various veins may centralize there.

This localized volcanism is an encouraging feature, as similar areas are near the Sunnyside, Silver Lake, Camp Bird, in Savage Basin, and at other points in the San Juan Section where some of the larger producers have been found. . . . .

Five of the larger veins have been developed and our sampling and measurements were confined to the workings on these five veins, which are the Galtie Boy, Last Chance, Leslie, Boycotter and Wetzel. . . .

The GALTIE BOY Vein, which has received the most attention and been developed to a greater extent than the others, is the larger as well as the richer vein. It is a strong, continuous fissure, many places ten to fifteen feet in width, but usually five to six. Its ore should run from $14.00 to $26.00 and it could produce 100 tons per day with very little preparatory work. There is not much more that can be done in the way of development, as enough is already opened up to justify milling operations at least to the extent of determining whether it will mill successfully or not. If what is already developed should for any reason not produce satisfactory results, no good could be accomplished by opening additional tonnage.

The LAST CHANCE Vein, which crosses the Galtie Boy, is also on the Galtie Boy group, and is similar in character and mineralization. It is not quite as wide and possibly not as high in value, but it should produce [illegible] tonnage of ore running from $10.00 to $16.00

The LESLIE-OHIO Vein is a somewhat similar vein, probably four feet in average width, which also is opened up with workings sufficient to justify starting the production of mill tonnage. In addition to the gold and silver values, it carries hubnerite (tungsten) which has attracted some considerable attention to it. This will add an interesting feature to this property, and any mill should provide

of these various metals. . . . The Hubuerite (tungsten) should be also segregated and separated, so as to make a commercial product of it. . .

Milling methods used in the district vary greatly, and considerable experimental work is being carried on in an endeavor and with the expectation of increasing the percentage of saving, as well as secure the separation of the metals. . . into more commercial products. . . .

Conclusions:

The Galtie Boy, Leslie and Wetzel properties, and workings, will produce a sufficient tonnage of ore to operate a mill of from 150 to 200 tons per day.

We estimate there is a developed tonnage of over 250,000 tons, of an average value of $12.00 per ton or more.

At least 500,000 tons additional ore reserves can be secured by extending the lower tunnels of the Galtie Boy and Leslie properties, (Gold Dollar, Camp Bird and Dawn of Day Tunnels), and by extending the Wetzel Tunnel all veins will be cut at greater depth, adding more than 1,500,000 tons.

With this tonnage and these values available, a mill should be provided. . .

Further development work should be postponed until the mill is built, so production can carry future development as incidental to ore production. . .

Louis F. Shaefer,

Mining Engineer.

(NOTE: The oil flotation process was discovered several years after this report was prepared.)

the first operations should give special attention to the gold. . . . The tungsten ores (ferberite) on the Lucile property are interesting and attractive. . .

A mill will be required, as there are not sufficient copper contents or mineral values to justify shipping the crude ores to your Smelter at Silverton. . . The lead contents would be lost at the pyritic furnace, so the lead concentrates would have to be shipped to some outside smelter, but there may be copper and iron content enough to produce a concentrate which would be valuable to the smelter operations. . . .

As to what the proper milling methods should be, is a matter which should be given considerable study. . . .

J. E. Baxter,

Mining Engineer.

Extracts from a letter to the

San Juan Mining Company

by

W. L. Kinney, Mine Operator.

The formation of Treasure Mountain is the same general formation as the gold mining belt of San Juan County, San Miguel and Ouray Counties, consisting of volcanic breccia, [illegible] casing [illegible] The formation is [illegible] Gunnison and Gunnison Extension, [illegible] gold properties in this country [illegible].

Taking the property as a [illegible] water rights, situated as it is [illegible] in the [illegible] of the best mining properties in the country to-day. The San Juan Tunnel [illegible] at the apex of the mountain [illegible] both of at least 1000 feet, opening rich ore reserves. The history of all mines in San Juan County is that the ore gets better with depth. There is no question but that there will be [illegible] sufficient to keep up 1 C to [illegible] for many years to come. . . .

I would recommend the San Juan Tunnel [illegible] driven under all of the properties, that the lessees in the tunnel be [illegible] systematically. [illegible] every reason to believe that the property [illegible] one of the leading properties on the San Juan.

W. L. Kinney.

[illegible]

[illegible] Kinney was manager of the [illegible] of San Juan [illegible] for many years.

[illegible] report is interesting and quotes [illegible] reference to geology of district and its [illegible] ore tonnage and value at depth. The San Juan [illegible] near the Gold Gulch is similar geological formation.

Memorandum

To: Mr. Montag

From: Lead-Zinc Branch, D.M.A.

Subject: Access roads to the Galtie Boy, Henrietta, Lark, and adjacent mining property in San Juan County, Colo.

The attached copy of a letter of January 23, 1951, from C. H. Peterson, Secretary of the U. S. Oil and Development Corporation, mentions, on the second page, his desire to get an access road to the Galtie Boy and Henrietta Mines which the corporation hopes to open up soon. Applications are pending with the Defense Minerals Administration for exploration aid on these two projects and have been referred to the field team for further consideration. If the applicant is willing to participate in the exploration program and these two projects receive the approval of the field team, the access roads will be in order, but until these decisions are made it would appear that nothing need be done.

The applicant also mentions needed improvement of the portion of these access roads that lies between the county road and the Lark mine. To the best of our knowledge, the Lark mine was last worked in 1947. If the company is planning to reopen this mine, this portion of the access road should be eligible for Government aid at the present time. It is also mentioned that other properties tributary to this road will be opened up later. It is not evident as yet whether such development will be dependent upon Government aid or will proceed regardless of this aid.

We are forwarding a copy of the letter at this time for your information, in case the matter reaches you independently of this office.

Very truly yours,
Otto Herres

OTTO HERRES, Chief
Lead-Zinc Branch

March 28, 1951

Re: Dockets DMA-363
DMA-606

Mr. Carl H. Peterson, Secretary
U.S. Oil & Development Corporation
Suite 205-11-16 Mercantile Building
Denver 2, Colorado

Dear Mr. Peterson:

This will acknowledge your letter of March 14 concerning reference of the dockets on the Galtie Boy and Henrietta mines to the field office.

Where an applicant has proven reserves of strategic materials, Federal aid in mining can be given through procurement contracts for such materials as are in short supply. On the strength of these contracts, the applicant can obtain private financing in most instances. At present, procurement contracts are being negotiated for tungsten, copper and zinc, but because the expected supply of lead is believed to be adequate to supply defense needs during the next few years, no specific program for lead procurement has been set up.

You report reserves of ore in both the Galtie Boy and Henrietta but the information dates from about 1907 and these reserves are not now accessible. These old reports give inadequate proof as to grade of base metals to warrant procurement contracts for copper, zinc, or tungsten. On the other hand, we believe the properties may warrant exploration programs to see if they contain mineable tonnages of base metals.

The program recently approved for encouragement of exploration of strategic materials calls for participation on the part of the applicant. For zinc, lead and copper deposits it will be necessary to match Government funds on an equal basis. The details of the plan, explaining the projects that will be eligible for assistance, the terms and schedules of financing, repayment, and other pertinent information, have not yet been released. However, at your request, we are forwarding the dockets on the Galtie Boy and Henrietta projects to Mr. J. H. East, Jr., Bureau of Mines, 224 New Customhouse, Denver 2, Colorado. Mr. East can discuss your projects with you, and you may be able to come to some general conclusion as to whether you are willing to provide your share of the funds needed to carry out the proposed exploration. Any modification of your original proposal that you may wish to make will be considered. Your original estimates may have

included some mining costs. Possibly you may be able to open up the mines under this exploration program at a cost somewhat less than these original estimates. Any ore revealed could be contracted for procurement by the Government which would qualify your company for a V loan.

As soon as the necessary instructions on the exploration program are available copies will be sent to Mr. East, and you should get in touch with him at that time.

Although exploration for tungsten will probably rate a higher percentage participation by the Government, occurrences of tungsten in the San Juan Mountains are so spotty as to make exploration for tungsten alone unwarranted. Hence, your projects will be governed by the rules for lead, zinc, and copper exploration. This does not rule out consideration of a minor project that you might present later for exploring the specific separate vein which is reported to carry the tungsten in the Galtie Boy.

I trust that the steps we have taken to forward your applications in advance of clarification of the exploration program will expedite development of your properties.

Very truly yours,

OTTO MARRAS, Chief
Lead-Zinc Branch

REGIONAL DIRECTOR'S OFFICE
REGION IV
APR 2 - 1951
BUREAU OF MINES
DENVER, COLORADO

March 22, 1951

Memorandum

To: Executive Officer Field Team, Region IV
Through: Coordinating Committee and Director, Supply Division

From: Lead-Zinc Branch, D.M.A. Re: Docket DMA-363

Subject: Application of
U. S. Oil & Development Corporation
Walter W. Bentley, W. R. Green, Carl H. Peterson
205-11 Mercantile Building
Denver 2, Colorado
Galtie Boy Mine, San Juan County, Colorado

Commodity: Lead, zinc and tungsten

Review of subject docket reveals the following pertinent facts:

Mine has not been worked since 1907 except for periods in 1935 and 1941 when about 180 units of tungsten were produced from the Galtie Boy Dump.

Reserves claimed to have been developed prior to 1907 were 92,000 tons on the Galtie Boy vein and an additional 179,560 tons on other veins on the property. Data supplied with this application fail to give any suitable indication of the nature and grade of the reserves. A list of 56 samples taken from the Galtie Boy obviously in the early 1900's, gives 1-2.3% lead and 6.8-12.4 oz. silver. In all these samples the gold assays are given in decimals ranging from 0.49-0.71. It certainly would be nearer the truth if these are intended to represent dollar values rather than ounces. If not, the samples are obviously unrepresentative, according to W. S. Burbank of the Geological Survey. No zinc is mentioned in the application. Mr. Burbank believes that zinc content might be higher than lead in some of these shoots, but the specific ore bodies are not now accessible.

According to Mr. Burbank the ores of this general area are quartz veins commonly high in pyrite, with scattered bodies or chimney-like shoots of higher grade base metal sulfides with silver and gold. The ores are complex and may locally predominate in lead, zinc, copper, or tungsten. Tungsten reserves are not ordinarily mensurate, and applicant makes no specific proposal for mining tungsten which is

reported to come from a vein or veins separate from the Galtie Boy vein. However, in a later letter, copy of which is enclosed, he requests that this Galtie Boy application be taken from lead-zinc and placed under tungsten.

Applicant requests "exploration and mining loan" of $55,627 to rehabilitate mine, provide equipment, and pay all costs of placing the mine in production, including wages for 3 months, and manager's salary for 5 months.

Recommendation

It appears that this application, if it is considered in the Defense Minerals Administration program at all, will have to be considered under the exploration program, as no zinc ore is mentioned in the reserve estimates and the lead values listed are low. Mr. Burbank states that the reserves claimed are at present inaccessible, and that it will require the expenditures requested in order to open up the ore for inspection. The project appears worthy of consideration as a lead-zinc exploration, not on the basis of what is given in the application, which is very poorly presented, but on the basis of what is independently known of the mineral deposits of this general area.

If our information is correct that little can be seen on the ground, there appears to be no need for a field inspection at this time. If the applicant is willing to go along on sharing the expenses under the exploration program, there may be certain engineering phases of the proposal that might have to be investigated before the project is approved. The docket is forwarded in advance of release of the "ground rules" on the exploration program, on the assumption that the field office can orally explain enough of the exploration program to determine whether the applicant wants to proceed under this program. Application will warrant no further consideration if applicant does not want to put up his half of the expenses, though he may want to propose a modification of his original proposal.

Attached with docket is a review by W. S. Burbank; also a note from Dwight Lemmon stating that tungsten occurrences in San Juans are so spotty as to make exploration for tungsten alone unwarranted. The total project as presented does not rate the higher Government contribution for exploration allowed for tungsten, although conceivably a small sub-project might be set up to explore specifically the tungsten occurrence which is stated to be in a separate vein.

REGIONAL DIRECTOR'S OFFICE REGION IV APR 2 - 1951 BUREAU OF MINES DENVER, COLORADO

COPY

Mr. James Boyd
Chief of Mineral Defense Administration,
U. S. Bureau of Mines,
Washington, D. C.

Dear Mr. Boyd:

In December 1950 an application for a loan was filed under the Defense Mineral Act through the U. S. Bureau of Mines for the Galtie Boy mine located 7-1/2 miles North of Silverton in San Juan County, Colorado, signed by Walter W. Bentley, W. R. Green and Carl H. Peterson.

We stated in this application that a Mr. Williams had a lease on one or two claims belonging to the Galtie Boy broup and was mining tungsten, and it was for that reason we were anxious to get in touch with Mr. Williams.

In the wonderful address you made on February 3rd, at the Mining Convention, you stated that Chrome, Tungsten and Manganese have been placed in a category by themselves and therefore the first priority as to loans. Knowing that we had a large amount of tungsten in the Galtie Boy group we immediately proceeded to locate Mr. Williams and we found Harold O. Williams and his partner H. E. Walby, who operated the Dawn of Day, which is one of the Galtie Boy group, in the summer of 1941. Both of these men tell us there is more tungsten in the Galtie Boy group of mines than in any property in Boulder County and they are very anxious to get a lease from us on several of these claims, on which they have already discovered tungsten. The reason they did not continue mining this tungsten from the Galtie Boy Group is because there was a change of ownership and the new owner asked a prohibitive royalty.

We are enclosing herewith copy of letter they wrote to us addressed to U.S. Oil & Development Corporation with which Bentley, Green and Peterson are associated. This letter is self explanatory.

We therefore ask that you kindly transfer this application from the Lead, Zinc and Copper Division, which we understand is priority #2, into the Chrome, Tungsten and Managanese division, which we understood from your address carries #1 priority.

Trusting this will have your immediate attention, we remain

Sincerely yours.

C O P Y

Gentlemen:

We understand that you have a lease on the Galtie Boy group of mines at Silverton.

In 1941 we mined on the Dawn of Day mine during the summer taking out approximately $1500.00 of 60% tungsten concentrates. While we were working on the Dawn of Day we examined for tungsten ore in the Galtie Boy and found a vein some 18 inches wide in a rise 16 feet long.

We also examined on the Minnesota claim and it showed tungsten along the hanging wall. Some old fill and mill dirt prevented us making further examination.

We also examined on the Ohio claim and it has a showing of tungsten.

We would like to have a lease on the Dawn of Day, Minnesota and Ohio claims and would loke to have a refusal on some other claims you have which have tungsten ore on them, for at the present price we feel we can mine these properties at a good profit to us and also make some money for you.

Very truly yours,

Re: Dockets DMA-363
DMA-606

Mr. Carl H. Peterson, Secretary
U.S. Oil & Development Corporation
Suite 205-11-16 Mercantile Building
Denver 2, Colorado

Dear Mr. Peterson:

This will acknowledge your letter of March 14 concerning reference of the dockets on the Galtie Boy and Henrietta mines to the field office.

Where an applicant has proven reserves of strategic materials, Federal aid in mining can be given through procurement contracts for such materials as are in short supply. On the strength of these constracts, the applicant can obtain private financing in most instances. At present, procurement contracts are being negotiated for tungsten, copper and zinc, but because the expected supply of lead is believed to be adequate to supply defense needs during the next few years, no specific program for lead procurement has been set up.

You report reserves of ore in both the Galtie Boy and Henrietta but the information dates from about 1907 and these reserves are not now accessible. These old reports give inadequate proof as to grade of base metals to warrant procurement contracts for copper, zinc, or tungsten. On the other hand, we believe the properties may warrant exploration programs to see if they contain mineable tonnages of base metals.

The program recently approved for encouragement of exploration of strategic materials calls for participation on the part of the applicant. For zinc, lead and copper deposits it will be necessary to match Government funds on an equal basis. The details of the plan, explaining the projects that will be eligible for assistance, the terms and schedules of financing, repayment, and other pertinent information, have not yet been released. However, at your request, we are forwarding the dockets on the Galtie Boy and Henrietta projects to Mr. J. H. East, Jr., Bureau of Mines, 224 New Customhouse, Denver 2, Colorado. Mr. East can discuss your projects with you, and you may be able to come to some general conclusion as to whether you are willing to provide your share of the funds needed to carry out the proposed exploration. Any modification of your original proposal that you may wish to make will be considered. Your original estimates may have

included some mining costs. Possibly you may be able to open up the mines under this exploration program at a cost somewhat less than these original estimates. Any ore revealed could be contracted for procurement by the Government which would qualify your company for a V loan.

As soon as the necessary instructions on the exploration program are available copies will be sent to Mr. East, and you should get in touch with him at that time.

Although exploration for tungsten will probably rate a higher percentage participation by the Government, occurrences of tungsten in the San Juan Mountains are so spotty as to make exploration for tungsten alone unwarranted. Hence, your projects will be governed by the rules for lead, zinc, and copper exploration. This does not rule our consideration of a minor project that you might present later for exploring the specific separate vein which is reported to carry the tungsten in the Galtie Boy.

I trust that the steps we have taken to forward your applications in advance of clarification of the exploration program will expedite development of your properties.

Very truly yours,

OTTO HERRES, Chief
Lead-Zinc Branch

Dear Mr. Peterson:

We have been advised by the Defense Minerals Administration in Washington that Applications for Access Roads should be completed on the attached form DMA 105.

We are holding your application, dated February 26, pending the receipt of these forms in triplicate. We are forwarding you four copies of the form so that you may retain one copy for your files.

Sincerely yours,

J. H. East, Jr.

Mr. Carl H. Peterson
U. S. Oil & Development Corporation
Suite 205 Mercantile Building
Denver 2, Colorado

Dear Mr. Peterson:

Your letter addressed to Mr. James Boyd, dated February 12, has been referred to me for reply.

Your request for us to transfer your application DMA 363 to the Tungsten Branch will be called to the attention of that Branch.

As soon as the field office can arrange to make an inspection, your property probably will be examined in the field. At that time consideration will be given to the tungsten possibilities of the claims in your Galtie Boy group, as well as lead and zinc.

We trust that this arrangement will prove satisfactory to you.

Very truly yours,

OTTO HERRES

RE: Galty Boy Mine, Docket No. DMA-363
Henrietta Mine, Docket No. DMA-606

Dear Mr. Herres:

We are grateful for your kind letter of March 8, 1951.

You state in this letter "as soon as the field office can arrange to make an inspection your property will probably be examined in the field". We inquired at the Bureau of Mines today and they have not as yet received either one of the above applications for field examination and, as we are very anxious to ascertain whether we are going to get any assistance or government help, we would like to have these applications returned to the U.S. Bureau of Mines in Denver as soon as possible for the field work so we may know whether our applications will be approved or rejected at as early a date as possible.

You perhaps don't remember the writer but I feel I know you because my son and your son-in-law have been buddies for 25 years. I am merely stating this to identify myself so you will remember our company as an operating company and not a promotion. If we can get a little lift from the government at this time it is our intention to put five mines in operation in Prospect Basin, San Juan County, during 1951 and 1952. From August 1945 to July 1, 1949, we were constant shippers from this territory and our Lark mine produced 26,000 tons of lead, zinc and copper crude ore. In fact we were the largest shippers of lead, zinc and copper crude ore from the State of Colorado to the International at Utah.

Perhaps you wonder why we need government help at this time, fortunately or unfortunately we brought in the Pine Mountain gas and oil field 27 miles West of Casper in Natrona County, Wyoming, in 1947 and 1948. The first two gas wells we brought in averaged 60,000,000 cubic feet. We built an 8 mile pipe line connecting with the Northern Utilities main line. While we built the pipe line we brought in two good oil wells but to our sorrow the oil was black and only 14 gravity. This could be used only for fuel oil so it put us in direct competition in price with the residue oils of the refiners. According to U.S.G.S., as well as our own analusis we had one of the sweetest gases in Wyoming. We got our line completed and turned our gas into the line but a short time thereafter the line froze up and we discovered that the gas had

developed enough moisture and sulpher to cause the freeze up so we could not sell the gas without putting in a desulpherizing and dehydrating plant and rather than do that we decided to sell the field, which we have done but we had to take 95% of the purchase price out in future oil payments. Anyway we have had enough of the oil business and we are going back into the mining business which business we think we know. So if you will kindly see to it that these applications are expedited as much as possible so the field work can be done, as soon as possible, as you know the conditions w in San Juan County. The seasons are short and although we have snow equipment to keep us operating all year round we must be in operation before the snow starts this fall in order to be able to keep the roads open.

Very truly yours,

U.S. OIL & DEVELOPMENT CORPORATION

UNITED STATES
DEPARTMENT OF THE INTERIOR
OFFICE OF THE SECRETARY
Washington 25, D. C.

March 8 1951

My Dear Mr. Peterson:

This is in reply to your letter of February 21, concerning your applications for Federal aid on the Henrietta and Galtie Boy properties.

The Lead-Zinc Branch of the Defense Minerals Administration informs me that these two properties may be eligible for aid under the exploration and development program that was announced by press release on February 20. This program calls for a matching of Federal funds by equal funds to be raised privately by the applicant. The details explaining what types of proposal will be eligible for the loan, the rules governing the use and repayment of the Government funds, and other pertinent information should be ready for distribution to applicants within a very few days. Many details have had to be worked out after acceptance of the general principle of the plan.

Although some applications for aid in exploration and development were forwarded to the field office of the Bureau of Mines earlier in the winter, later applications of this type have been held in Washington when it became apparent that the plans under consideration called for substantial contributions from the applicant. It has seemed better to clear with the many applicants to see which ones will want to meet the financial commitments of the program, and which ones may want to modify their proposals. A revised list will be secured in this way on which prompt action can be taken.

I can assure you that your applications will receive attention just assoon as we are able to send you details of the program. If the program is acceptable to you, we can then send two two applications to the field team for its consideration.

The Galtie Boy application bears the docket number DMA-363 and the Henrietta is numbered DMA-606.

I trust that the explanation of the program that will be sent to you will answer most of the questions that may arise about the program. If there are further questions, please do not hesitate to call upon me.

Sincerely yours,

/s/ Oscar L. Chapman
Secretary of the Interior.

Mr. Feal

February 21, 1951.

Honorable Oscar L. Chapman,
Secretary of the Interior,
Washington, D.C.

My Dear Secretary:

I have meditated a long time whether I should trouble you with our company's difficulties, as well as my own, because with all the grief that you have on your shoulders with national matters, I have hesitated, however, I cannot resist it any longer, therefore I will apologize for having to impose upon you.

In 1945 we bought one-half interest in the Lark mine in San Juan County, Colorado, about 7-1/2 miles North of Silverton. We shipped from the Lark Mine about 26,000 tons of lead, zinc and copper ore from August 1945 until the bonuses were taken off in 1948. We took over three mines in the meantime. We have spent $60,000 in development on one mine known as the Joe & John and sank a shaft on the ore body in the Lark Mine, thinking of course, that the bonuses would be continued. As you know 83% of the mines in Colorado had to close down on account of low metal prices. We want some new equipment, and in January we put in a loan for $57,000 for the Henrietta mine, for such things as air trammers, mucking machines etc., in order to increase the tonnage per man. We have mining reports, by reliable engineers, showing that we have 350,000 tons of copper, lead and zinc ore blocked out on two sides. On the 12th day of January, 1951, we sent in a very comprehensive application, supported by reports, to the U.S. Bureau of Mines, asking for $57,000 loan through the Defense Minerals Administration and to this day we haven't received even a docket number or acknowledgment of this application. We cannot understand this because we spent a considerable amount of money and time acquiring a lot of data in support of this application. And with the acute shortage of these metals needed for defense we feel this matter should have attention. Another application was sent in by Walter W. Bentley, W. R. Green and Carl H. Peterson for the Galty Boy mine located next to the Henrietta and our other mines that the U.S. Oil & Development Corporation owns, with reports showing 92,000 tons of lead and zinc ore blocked out on two sides and with one-half million tons of inferred ore. This application was filed December 13, 1951. Since this application was filed we have learned that there is a large amount of tungsten in four of these claims and two different parties who opened up two of these deposits during the last war want to sublease these properties from us and open up two tungsten operations. On February 12, 1951, I sent information to the U.S. Bureau of Mines, Washington, D.C., returns from one shipment of tungsten from this

property in 1941, amounted to $1500 and asked that the Galty Boy application be transferred from lead, zinc and copper priority to the chrome, tungsten and manganese priority, which I understood from Mr. Boyd's talk at the convention here in Denver, would come in under priority number 1. We have not received an answer to this letter either. The same condition exists in the Galty Boy application as in the Henrietta application. We haven't heard a word since we sent tehm in and the Galty Boy application was sent to Washington, December 15, 1950, or thirty days before the Henrietta application was forwarded.

We understand nothing can be done with these applications until the property is examined by the U.S. Bureau of Mines from Denver, but we also understand that the U.S. Bureau of Mines here in Denver are helpless until these applications are turned back here to them for examination; therefore if I could impose upon your good office to see if it is possible to jar these applications loose and get them back to the Bureau of Mines here in Denver it certainly would be appreciated by the officials of the U.S. Oil & Development Corporation for the Henrietta loan, as well as by Walter W. Bentley, W.R. Green and myself for the Galty Boy loan.

Mrs. Peterson and I were unusually happy to meet you and Mrs. Chapman at the banquet on home coming day and also pleased to see you looking so well.

Mrs. Peterson joins with me in sending good wishes to yourself and family.

I am gratefully yours,

U.S. OIL & DEVELOPMENT CORPORATION

Mr. Jack East,
Regional Director,
Bureau of Mines,
Customs Building,
Denver, Colorado.

Dear Mr. East:

We are enclosing herewith a letter to Mr. Boyd in which we have asked him to change the application from the Zinc, Lead and Copper division to Chrome, Tungsten and Manganese division as we were told in his address at the Mining Convention that these three latter metals carry priority number one.

I am also enclosing herewith copy of letter written by Mr. H.O. Williams and H. E. Walby. These letters are self explanatory.

Anything you can do to expedite this matter will be greatly appreciated.

Very truly yours,

Carl H. Peterson

Carl H. Peterson,

enc:

Denver, Colorado,
February 5, 1951.

U.S. Oil & Development Corporation,
205 Mercantile Building,
Denver, Colorado.

Gentlemen:

We understand that you have a lease on the Galtie Boy group of mines at Silverton.

In 1941 we mined on the Dawn of Day mine during the summer taking out approximately $1500.00 worth of 60% tungsten concentrates. While we were working on the Dawn of Day we examined for tungsten ore in the Galtie Boy and found a vein some 18 inches wide in a rise 16 feet long.

We also examined on the Minnesota claim and it showed tungsten along the hanging wall. Some old fill and mill dirt prevented us making further examination.

We also examined on the Ohio claim and it had a showing of tungsten.

We would like to have a lease on the Dawn of Day, Minnesota and Ohio claims and would like to have a refusal on some other claims you have which have tungsten ore on them, for at the present price we feel we can mine these properties at a good profit to us and also make some money for you.

Very truly yours,

/s/ H. E. Walby,

General Delivery,
Cripple Creek, Colorado.

/s/ Harold O. Williams,

2465 - 20th Street,
Boulder, Colorado.

February 12, 1951.

Mr. James Boyd
Chief of Mineral Defense Administration,
U.S. Bureau of Mines,
Washington, D. C.

Dear Mr. Boyd:

In December 1950 an application for a loan was filed under the Defense Mineral Act through the U.S. Bureau of Mines for the Galtie Boy mine located 7-1/2 miles North of Silverton in San Juan County, Colorado, signed by Walter W. Bentley, W.R. Green and Carl H. Peterson.

We stated in this application that a Mr. Williams had a lease on one or two claims belonging to the Galtie Boy group and was mining tungsten, and it was for that reason we were anxious to get in touch with Mr. Williams.

In the wonderful address you made on February 3rd, at the Mining Convention, you stated that Chrome, Tungsten and Manganese have been placed in a category by themselves and therefore the first priority as to loans. Knowing that we had a large amount of tungsten in the Galtie Boy group we immediately proceeded to locate Mr. Williams and we found Harold O. Williams and his partner H. E. Walby, who operated the Dawn of Day, which is one of the Galtie Boy group, in the summer of 1941. Both of these men tell us there is more tungsten in the Galtie Boy group of mines than in any property in Boulder County and they are very anxious to get a lease from us on several of these claims, on which they have already discovered tungsten. The reason they did not continue mining this tungsten from the Galtie Boy Group is because there was a change of ownership and the new owner asked a prohibitive royalty.

We are enclosing herewith copy of letter they wrote to us addressed to U.S. Oil & Development Corporation with which Bentley, Green and Peterson are associated. This letter is self explanatory.

We therefore ask that you kindly transfer this application from the Lead, Zinc and Copper division, which we understand is priority #2, into the Chrome, Tungsten and Manganese division, which we understood from your address carries #1 priority.

Trusting this will have your immediate attention, we remain

Sincerely yours,
Walter W. Bentley,
W.R. Green
Carl H. Peterson,
