Re: Docket DMEA 269X-B (Copper)
Contract IDM-E33
Banner Mining Company
(Copper Glance, Copper Queen & Copper King claims)
Pima County, Arizona

Mr. J. W. Townsend
Executive Officer
OME Field Team, Region III
224 New Customhouse Bldg
Denver 2, Colorado

Dear Mr. Townsend:

This will acknowledge your letter of December 22nd regarding Docket DMEA 269X-B-Copper Contract IDM-E33.

We are still not in agreement with your contract interpretation that royalties are to be assessed on the concentrates instead of the ore.

The crude ore is too low in grade to be commercial unless it is concentrated in our mill at the Mineral Hill property. To ship this ore direct to a smelter would result in a loss to our company and for this reason it would not even be mined. However, if it were shipped to a smelter we would pay royalty only on the net smelter value of the ore and would result in our paying royalty on the basis of 3% instead of the 5% you are asking.

Instead of shipping the ore direct to a smelter, we concentrated it in our mill in order to reduce smelting and transportation charges on the lesser tonnage of concentrates in an attempt to make the ore commercial. No charge was assessed to the ore for our milling of same. We cannot see why we should pay increased royalties to the government because of our effortion to beneficiate the ore at no charge.

However, if you insist, we will pay the additional amount of $23.[illegible] which you have assessed because of its being such a minor amount. [illegible]

payment will be made with the full understanding that it will not set a precedent for the future when larger amounts might be involved. In other words, we want to leave the matter of future royalty payments and the method of calculating same open for a possible legal interpretation.

As to the amount of $2.54 being assessed as a royalty payment shortage on crude ore for the year 1953, we find your audit is correct.

Our check in the amount of $25.88 is enclosed in full payment of the above two items with the understanding that it is being paid according to the conditions we have set forth in this letter.

Yours very truly,

BANNER MINING COMPANY

Memorandum

To: C. O. Mittendorf, Administrator, DMEA

Attention: Ernest W. Ellis

From: Executive Officer, DMEA Field Team, Region IV

Subject: Settlement Sheets - Contract Idm-E33 (Copper)
Docket No. DMEA 269XB, Banner Mining Company

We have received settlement sheets covering nine shipments of ore from the Banner Mining Company during the period from March 27, 1953 to April 27, 1953. The total royalty paid by the company on these shipments was $286.48. According to our calculations the operator has overpaid the Government in the amount of $49.71.

We are enclosing a copy of a calculation sheet submitted by the company and a copy of a calculation sheet prepared in this office. The company has not deducted the charges for trucking the ore from the mine to the railroad in calculating the net smelter value per ton for the purpose of determining the royalty rate and the net value upon which the royalty is computed.

According to DMEA Circular No. 32 the DMEA royalty is to be computed upon the amount received for the product sold at the point of delivery. The point of delivery may be the point of loading on the railroad, the smelter, the concentrator, or the mine. We interpret this to mean that if the charges for trucking the ore from the mine to the railroad are deducted by the smelter the point of delivery is the mine, and the haulage and trucking charges may be deducted from the gross value in determining the royalty rate as well as the amount of royalty due to the Treasurer of the United States. We recalculated the royalty on this basis.

6-25-53
No Reply necessary - discussed with King via phone this date
Ellis

The attached calculation sheets give the net smelter value as calculated by the operator and as calculated by the Bureau of Mines. According to our calculation the total amount of royalty due the Government is $236.77, whereas the operator has paid us $286.48. Please advise us if our method of calculating the royalty is correct, and if we should inform the operator that we will credit him with $49.71, which he may withhold from future royalty payments.

W. H. King
