Re: Docket No. DMEA 3238 - Tungsten
Fire Chief mine
Bonner County, Idaho

Dear Mr. Myers:

Reference is made to your letter of November 1, 1954, to Mr. A. E. Weissenborn, Executive Officer, DMEA Field Team, Region II, requesting withdrawal of the above-docketed application for exploration assistance.

As requested, the referenced application is being transferred to the inactive files and the subject docket closed without prejudice to the property. If at some future date additional work finds evidence of significant tungsten mineralization, we shall be glad to consider a revised application for exploration assistance. The revised application should contain all of the new information available and refer to the subject docket.

Sincerely yours,

C. O. Mittendorf

Re: Docket No. DMEA-3238 (tungsten)
Fire Chief Mining Co.
Fire Chief Mine
Bonner County, Idaho

Dear Mr. Selfridge:

Enclosed is a copy of a letter dated November 1, 1954, from Mr. C. A. Myers, president of the Fire Chief Mining Co., in which he states that the company has decided to withdraw the cited application.

We talked with Mr. Myers and he wanted to hold the application open until spring because he is doing more work at the property and wished to await the results of this work before the examiners visited his property. It was suggested to him that it might be well to withdraw his application for now and submit an amended one based on the results of the new work. We informed him it could be withdrawn without prejudice to future consideration of his property.

Sincerely yours,

John S. Vhay
For: A. E. Weissenborn
Executive Officer, DMEA

Re: Docket No. DMEA-3238 (tungsten)
Fire Chief Mining Co.
Fire Chief Mine
Bonner County, Idaho

Dear Mr. Myers:

As we wrote you on July 28, 1954, the Field Team would like to have a definite statement from you as to when the property covered by the cited application can be examined. This field examination should be made before the surface exposures are covered with snow.

As winter is drawing near, and we have had no word from you, we are wondering if you are still interested in obtaining an exploration contract. If you are no longer interested, it would help us if you would so state so that the application can be withdrawn. An immediate reply would be appreciated.

Sincerely yours,

Dear Mr. Myers:

We have been requested by the Washington office of DMEA to re-examine your Fire Chief property in Bonner County, Idaho. We are not planning to make this examination in the near future as we believe the area is overlain with snow and inaccessible. We would, however, appreciate your informing us when the surface is accessible enough to be thoroughly examined. Upon receipt of such information we shall immediately schedule a field examination. We hope that you will find it possible to either accompany our field examiners during the examining period or have someone familiar with the property accompany them.

Re: Docket No. DMEA 3238 - Tungsten
Fire Chief Mining Co.
Fire Chief mine
Boiner County, Idaho

Dear Mr. Weissenborn:

Reference is made to the above-docketed application for exploration assistance. A prior application for exploration assistance, Docket No. 2457, was denied August 12, 1952. This denial, however, was made with the recommendation that a new application be filed if additional prospecting exposed significant tungsten mineralization.

On November 19, 1953, we received the following letter from Mr. Myers, President, Fire Chief Mining Co.:

> "With reference to your letter of August 12, 1952 in which you turned down the Fire Chief Mining Co. application for an exploration loan.
>
> "We believe we have now accomplished additional surface prospecting with new and improved showings of scheelite. We would like to have one of your engineers examine our property again in view of obtaining a loan application."

Because no supporting data were received with the above letter, the applicant was requested by our letter of November 25, 1953, to furnish a sketch showing the extent of the recent work and assay results. These have now been received and copies are enclosed for your information.

The subject application is, therefore, being referred to your office for a new field examination of the property.

Sincerely yours,

George C. Selfridge

Re: Docket No. DMEA 3238 - Tungsten
Fire Chief Mining Co.
Fire Chief mine
Bonner County, Idaho

Dear Mr. Weissenborn:

Reference is made to the above-docketed application for exploration assistance. A prior application for exploration assistance, Docket No. 2457, was denied August 12, 1952. This denial, however, was made with the recommendation that a new application be filed if additional prospecting exposed significant tungsten mineralization.

On November 19, 1953, we received the following letter from Mr. Myers, President, Fire Chief Mining Co.:

> "With reference to your letter of August 12, 1952 in which you turned down the Fire Chief Mining Co. application for an exploration loan.
>
> "We believe we have now accomplished additional surface prospecting with new and improved showings of scheelite. We would like to have one of your engineers examine our property again in view of obtaining a loan application."

Because no supporting data were received with the above letter, the applicant was requested by our letter of November 25, 1953, to furnish a sketch showing the extent of the recent work and assay results. These have now been received and copies are enclosed for your information.

The subject application is, therefore, being referred to your office for a new field examination of the property.

Sincerely yours,

Re; Docket N. DMEA 2457-Tungsten
Fire Chief Mine
Bonner County, Idaho

Dear Sir:

In answer to your letter of November 25, 1953, I am sending you a map of the main workings and showing the approximate location of good Scheelite stringers. These stringers are above and to the south of the tactite vein which was originally inspected by Mr. Vern Frickland. Mr. Reno (D.M.E.A) also gave it a cursory examination on the surface as there was no attempt to cut into these showings. We have now blasted these scheelite stringers open and they are looking better as we get into them. This assay sheet I am enclosing is not intended to represent any particular vein or width but it is from a five pound group of samples picked at random, from the open cut after blasting.

In our opinion we believe that this property warrants further investigation by your office and we would like to have one more of your engineers inspect and substantiate our findings. It will be May of this year before the snow will be gone from the mountain. We trust we will have your co-operation in this matter.

Sincerely yours,

Re: Docket No. DMEA 2457 - Tungsten
Fire Chief Mine
Bonner County, Idaho

Dear Mr. Myers:

This will acknowledge receipt on November 19, 1953, of your letter advising us that additional surface prospecting on the subject property has opened up new and improved showings of scheelite.

You have not, however, included supporting data to substantiate your claim. We suggest, therefore, that you send us a sketch showing the extent of the recent work and the assay results from any samples you have taken from the same area.

Sincerely yours,
C. O. Mittendorf (for)

Dear Mr. Mittendorf:

With reference to your letter of August 12, 1952 in which you turned down the Fire Chief Mining Co. application for an exploration lean.

We believe we have now accomplished additional surface prospecting with new and improved showings of shheelite. We would like to have one of your engineers examine our property again in view of obtaining a loan application.

Sincerely yours,

C. A. Myers

Re: Docket No. DMMA 2457 - Tungsten
Fire Chief Mine
Bonner County, Idaho

Dear Mr. Myers:

Your application for exploration assistance and other data concerning the subject area available to us in Washington have been carefully reviewed.

This information, while noting some small occurrences of scheelite on your property, indicates that, geologically, there is little probability of making a significant mineral discovery. We regret, therefore, to inform you that your application is denied.

If the surface prospecting which you intend to carry out is successful in exposing new and improved showings of scheelite or other mineralization, we shall be glad to consider a new application for exploration assistance.

We wish to thank you for your interest in the Defense Minerals Program and for bringing this property to our attention.

Sincerely yours,

C. O. Mittendorf (for)

# Office Memorandum • UNITED STATES GOVERNMENT

TO : Acting Administrator, DMEA

DATE: August 7, 1952

FROM : Iron and Ferro-Alloy Division, DMEA

SUBJECT: Denial of exploration project in the amount of $40,000.00
Docket No. DMEA 2457 - Tungsten
Fire Chief Mining Company
Bonner County, Idaho

The denial of the subject application by this Division is based on the following information:

1. The area was originally prospected for copper and gold with little success. In the course of this prospecting, some small showings of scheelite were discovered. These discoveries were in a gouge on the footwall from 1 to 4 inches in width. The indications are that, geologically, there is little possibility of making a significant mineral discovery.

2. Former operators drove 700 feet of crosscut adits and sunk a 50-foot shaft with no ore discoveries.

3. The field team recommends denial of this project, but have recommended some surface prospecting by the applicants. If this work indicates any improvements in the ore showings, then it is recommended that the applicants file a revised application for exploration assistance.

Memorandum

To: George C. Selfridge, DMEA

From: D. M. Lemmon, USGS

Subject: Field Report
Fire Chief mine
Bonner County, Idaho

DMEA ~~2475~~ 2457 - Tungsten

A report dated June 30, 1952, by H. T. Reno, Engineer, Bureau of Mines, states that minor amounts of scheelite occur in a gouge 1 to 4 inches thick.

I concur with the Field Team recommendation that the application be denied and that the applicant be advised that a new application should be filed if further prospecting uncovers more encouraging evidence that tungsten ore might be found.

MEMORANDUM

To: Chairman, Operating Committee, DMEA, Washington, D. C.

From: Field Team, Region II

Subject: Docket No. DMEA 2457X (tungsten), Fire Chief Mine, Bonner County, Idaho

On the basis of information presented in the enclosed examination memorandum by H. T. Reno, Mining Engineer, U. S. Bureau of Mines, the Field Team recommends that exploration assistance for the captioned prospect be denied.

It is suggested, however, that if work soon to be done for the applicant's account discloses significant strike extensions of the structure consideration be given to a revised application.

Field Team representatives will be instructed to appraise the results of such further work as may be done on the prospect in the near future and, if justified, to assist the owners in the preparation of a suitable exploration project proposal.

MEMORANDUM

To: M. E. Volin, Member, DMEA Field Team, Region II

From: H. T. Reno, Mining Engineer, Bureau of Mines

Subject: Preliminary examination, DMEA Docket No. 2457 (tungsten), Fire Chief Mine, Bonner County, Idaho

RECOMMENDATION

It is recommended that this application be held in abeyance pending receipt of an amended application.

LOCATION AND PROPERTY

The property consists of one staked lode mining claim and 13 proposed claims in secs. 10, 11, and 15, T. 61 N., R. 5 W., Bonner County, approximately 1/2 mile west of Nordman, Idaho. It is owned by the Fire Chief Mining Co.

COMPETENCE OF APPLICANT

The officers and members of the company are business men. They know nothing of mining.

HISTORY

According to the applicant, 700 hundred feet of crosscut adits and 50 feet of shaft were driven by the Nickel Plate Mining Co. in the 1920's. Interest was primarily in copper in the sulfide zone.

DESCRIPTION OF DEPOSIT

The deposit is a 6 inch to 8 foot wide zone in garnet chlorite schist which contains arsenopyrite, pyrite, pyrrhotite, chalcopyrite, and magnetite. A narrow (1 in. to 4 in.) oxidized gouge portion on the apparent footwall contains minor amounts of scheelite. Specks of scheelite are widely scattered through 2 to 3 feet of the hornblende schistose footwall. The strike varies from north to N. 52° W. and the dip averages about 85° N.E. This zone can be positively identified for 80 feet on the strike and to a shaft bottom down 50 feet. The extension cannot be determined because of heavy overburden.

Reviewed by
DMEA OPERATING COMMITTEE

7-25-52
(date)

Two 1/4-inch to 2-inch wide quartz stringers containing scheelite outcrop 40 feet southwest of the southernmost exposure of the sulfide zone. Material that can be classed as ore is not apparent.

EVALUATION OF APPLICANT'S PROPOSAL

The applicant's proposal is vague and does not specify either the type, amount, or location of exploration. The company is prepared to invest $10,000 in the project.

DISCUSSION

Verne Fryklund of the USGS examined this property prior to submission of the application. He recommended denial if an application was submitted. Work by the applicant since Fryklund's examination has disclosed no geologic evidence to change Fryklund's appraisal of the property. I found his mapping to be complete and I agree with his appraisal.

It was suggested to the applicant that more prospecting and hand trenching could be done for small expense on a rock ridge 50 to 250 feet south of the known extension and also that the relative position of a 600 foot crosscut adit about 300 feet below the sulfide zone should be determined. The applicant intends to do this work without Government aid and then submit an amended application if encouraging evidence is uncovered.

U.S. Dept. of Interior

Dear Sir;

In answer to your letter of July 3,1952 and also your letter of May 5,1952 we are working in conjunction and cooperation with the local D.M.E.A. office and U.S.G.S. to try and set up a basis for a small surface exploration program by further prospecting and surveying on our own. We have definetly established the presence of Scheelite Tungsten but the quantity and feasability of mining it are still in doubt. As soon as we have decided on a definite program we will file an amended application. Until then I trust you will bear with us.

Refer to docket No. D.M,E.A. 2457

Sincerely

C. A. Meyers

Dear Mr. Myers:

To date a reply has not been received to our letter of May 5, 1952, in which you were advised that information contained in your application for exploration aid on the subject property was too scant and indefinite to permit the D.M.E.A. to give proper consideration to the feasibility of extending such aid.

We are anxious to expedite processing of all applications but cannot do so unless applicants furnish us with requested information. We will appreciate your sending us the map, assay results, and other information outlined in our May 5 letter. May we hear from you at the earliest practicable date?

Sincerely yours,

George C. Selfridge

Re: Docket No. DMEA 2457X - Tungsten
Fire Chief Mine
Bonner County, Idaho

Dear Mr. Myers:

Your application for aid for an exploration project on the above noted property, together with your letter of April 10, 1952, have been received.

The information given is very meager and is insufficient for us to proceed further with the application.

We suggest that you obtain the services of someone versed in mining and have him prepare an amended application, with a sketch map showing particularly the claims, the location of the vein as you know it, the location of the proposed bulldozer trenches you plan to make, and have a few assays made of representative ore. There should be a short report stating the manner of ore occurrence and your reasons for believing you will encounter ore of commercial grade. At this time, it appears to be best to consider only the surface work, the results of which will enable you to apply further for the buildings, equipment, and labor for the underground work.

Your application will be held in abeyance pending receipt of the above noted information.

Sincerely yours,

George C. Selfridge

Dear Sirs;

In reference and answer to your letter of March 31, 1952. The total cost of our project is to be $40,000, forty thousand dollars. That is the total estimated cost of exploring and exposing the vein system, most of which we hope will be open pit method of mining.

If however you would like a detailed estimate of the total cost, let us know and I will send you one.

Very Sincerely
Chas. A. Meyers

## INSTRUCTIONS

This form is to be filed with Defense Minerals Administration, Department of the Interior, Washington 25, D. C. It should be accompanied by appropriate application form when a specific type of Government assistance is requested, in the form of (1) loan, (2) purchase contract, (3) Government guarantee of a private loan, (4) priorities or allocation of mining equipment, and maintenance, repair and operating supplies, and (5) other forms of Government assistance that might arise under the Act. Submit four (4) signed copies of the form and accompanying papers. Name and address should be stamped or typed on each sheet of this form and all accompanying papers. *When a question is inapplicable it should be so stated on the form.* Additional sheets may be attached in answering any questions or in supplying additional information. (IF YOU CANNOT ANSWER A QUESTION, SO STATE.) If a question is answered elsewhere indicate where answered. It is not necessary to answer it again.

## GENERAL TECHNICAL DATA

Supply the following information on separate sheets, arranged, numbered, and lettered as indicated:

1. Materials produced:
   (*a*) What are the chief mine, mill, or smelter products?
   (*b*) What are the byproducts, if any?
2. Name(s) and type(s) of mine(s), mill(s), smelter(s), refinery(ies), pit(s), quarry (ies), drilling operation(s). Include old names of property, if any. Show extent of workings, including the following:
   (*a*) Linear feet of shafts.
   (*b*) Linear feet of drifts and crosscuts.
   (*c*) Linear feet of tunnels or adits.
   (*d*) Linear feet of other mine openings (explain briefly).
   Indicate whether mine is flooded or not. Describe any pumping problems. Give size or productive capacity.
3. For each operation listed above supply the following:
   (*a*) Distance and direction from nearest town and shipping point.
   (*b*) Mining district.
   (*c*) Township, Section, Range.
   (*d*) County, State.
4. (*a*) State whether or not property is now in operation, and if in operation, by whom operated.
   (*b*) Are you operating this property as:
   - ☑ Owner.
   - ☐ Lessee.
   - ☐ Contractor.
5. Number of years in production _____
   If not in production or operation, estimated date when production will begin _____
6. Experience of operators:
   Describe the mining and general business experience of (*a*) the applicant, and (*b*) the person or persons who manage the project.
7. History:
   (*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for suspension of operation.
   (*b*) State briefly the known history and production of adjoining and neighboring properties.
   (*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.

| Measured (proved) | | | | | |
| Indicated (probable) | | | | | |

(*c*) If placer:

(1) Give estimated total yardage and average marketable mineral content of each deposit.

(2) Submit map showing location of placer deposit and surrounding area, with all test holes or pits. Submit logs of each hole and test pit with depth and average value of each.

(3) Describe gravel, stating whether fine, medium or coarse; loose, tight, cemented, or frozen, and whether it contains stumps or boulders more than 1 foot in diameter; if so, how large, and in what proportion.

(4) Describe bedrock, giving type (granite, sandstone, shale, etc.) and state whether it is hard or soft, smooth, uneven or rough.

(5) Describe overburden, stating whether loose, tight, or cemented; fine or coarse textured; furnish estimate of average thickness and total amount.

(6) Tabulate the reserves using the form outlined above for ore or mineral reserves.

13. Access Roads:

Give road distances to shipping, supply and residence points, stating kind and condition of roads.

14. Water Supply:

State source and quantity of water available for operations and whether sufficient for all seasons of year.

15. Power:

State amount of power used, rate per hour, and source thereof.

16. Labor:

State number and classes (miners, muckers, millmen, etc.) of men employed during a recent representative payroll period.

17. Equipment and Facilities:

Describe present equipment on the property, including buildings. (State condition.) List major pieces of equipment now owned or controlled and in serviceable condition available for this operation.

18. Are there any particular conditions or circumstances affecting your operations that are not described above? If so, explain.

Name and address of applicant

Date March 11, 52

If you have already filed MF-100, give date filed March 11 52, type of assistance requested Exploration

DMA Docket Number (if available)

## INSTRUCTIONS

Read Mineral Order 5, Regulations Governing Government Aid in Defense Projects, before completing this application. Submit four copies each, of the signed application form, General Technical Data Form MF-100, and answers to questions as specified, to Defense Minerals Administration, Department of the Interior, Washington 25, D. C., or to the nearest field executive office thereof, with your name and address on each sheet of the application and all accompanying papers. If you have previously filed MF-100, it is not necessary to file it again. However, you should indicate in space provided above the type of assistance previously applied for (loans, procurement contracts, etc.) and DMA Docket Number, if available. *When a question is inapplicable it should be so stated in the form.* Additional sheets should be attached in answering any questions or in supplying additional information. IF YOU CANNOT ANSWER A QUESTION, SO STATE.

1. (*a*) Give a description of the real property that will be in any way involved in the exploration project, including any existing mine or operating property.

   (*b*) If you are not the owner of the property, submit a copy of the lease, purchase option, or other agreements under which you are authorized to operate the property with each copy of your application.

   (*c*) Give the legal description of the exact parcel, plot, or area upon which the exploration is to be conducted.

   NOTE: (1) If both areas are the same, so state. The only obligation to repay the Government is from the net earnings from any commercial discovery made in the area specified in (*c*) above in which the exploration is to be conducted, and the expenditure of funds which may be charged as costs of the project must be limited to that area or to work necessary to perform the exploration in that area.

   (2) If applicant is not the owner of the property or if there are any liens or encumbrances against the property, copy of agreements of claimants, lienors, encumbrances, and lessors subordinating their interests in the property to the interest of the Government under the Exploration Project Contract will be required for attachment to the Contract.

2. (*a*) What metals or minerals do you expect to find?

   (*b*) Furnish statement of the geologic features of your property, giving type of ore deposit and reasons for expecting to find commercial ore bodies. Illustrate with maps or sketches. If you have a geologic or engineering report, or assay maps showing width and grade, please send them with application, stating whether or not you wish to have them returned.

Defense
MAR 31 1952

The information requested in questions 3, 4, 5, 6, 7, 8, and 9 below should be answered specifically and in detail, as this information will be attached to and incorporated as part of the Exploration Project Contract, if such contract is entered into with you by the Government.

ANSWER EACH QUESTION ON SEPARATE SHEETS OF PAPER AND SUBMIT A COPY OF EACH ANSWER FOR EACH COPY OF YOUR APPLICATION.

3. (*a*) Describe fully the proposed work and give the total cost of the project.

   (*b*) State the time required to start the project and to complete it.

4. Submit a map or sketch of the property involved showing a plan (and cross section, if needed) of the present mine workings and the *location of the proposed exploration work* as related to geologic features, such as contacts, veins, ore-bearing beds, etc.

5. Furnish an itemized list of existing facilities, buildings, installations, and fixtures with a statement of the cost of any necessary rehabilitation or repairs to put into useful and operable condition.

6. Furnish a detailed list of additional facilities, buildings, and fixtures to be purchased, installed, or erected by you, with the estimated cost of each item.

7. Furnish a detailed list of operating equipment, separated into items to be—

   (*a*) Rented

   (*b*) Purchased

   (*c*) Furnished by you

   with the rental, purchase price, or depreciation of each item, as the case may be, to be charged as a cost of the project.

8. Furnish an itemized schedule of labor, by numbers and classes (miners, muckers, etc.) and of supervisors by numbers and positions, with the maximum wages or salaries to be paid to each.

9. Furnish a detailed list with estimated cost of each item for materials, supplies, engineering, assaying, accounting, power, water, utilities, and any other items not provided for above.

10. (*a*) How much are you prepared to invest in the proposed project?

    (*b*) Is this amount sufficient to pay your part of the cost of the project, in accordance with the regulations on Government participation (Sec. 9 of MO–5)?

11. State any conditions or circumstances regarding the property not sufficiently brought out by the foregoing questions.

## CERTIFICATION

## INSTRUCTIONS

This form is to be filed with Defense Minerals Administration, Department of the Interior, Washington 25, D. C. It should be accompanied by appropriate application form when a specific type of Government assistance is requested, in the form of (1) loan, (2) purchase contract, (3) Government guarantee of a private loan, (4) priorities or allocation of mining equipment, and maintenance, repair and operating supplies, and (5) other forms of Government assistance that might arise under the Act. Submit four (4) signed copies of the form and accompanying papers. Name and address should be stamped or typed on each sheet of this form and all accompanying papers. *When a question is inapplicable it should be so stated on the form.* Additional sheets may be attached in answering any questions or in supplying additional information. (IF YOU CANNOT ANSWER A QUESTION, SO STATE.) If a question is answered elsewhere indicate where answered. It is not necessary to answer it again.

## GENERAL TECHNICAL DATA

Supply the following information on separate sheets, arranged, numbered, and lettered as indicated:

1. Materials produced:
   (*a*) What are the chief mine, mill, or smelter products?
   (*b*) What are the byproducts, if any?
2. Name(s) and type(s) of mine(s), mill(s), smelter(s), refinery(ies), pit(s), quarry (ies), drilling operation(s). Include old names of property, if any. Show extent of workings, including the following:
   (*a*) Linear feet of shafts.
   (*b*) Linear feet of drifts and crosscuts.
   (*c*) Linear feet of tunnels or adits.
   (*d*) Linear feet of other mine openings (explain briefly).

   Indicate whether mine is flooded or not. Describe any pumping problems. Give size or productive capacity.

DEPARTMENT OF THE INTERIOR
Defense Minerals Administration
RECEIVED
MAR 31 1952

3. For each operation listed above supply the following:
   (*a*) Distance and direction from nearest town and shipping point.
   (*b*) Mining district.
   (*c*) Township, Section, Range.
   (*d*) County, State.
4. (*a*) State whether or not property is now in operation, and if in operation, by whom operated.
   (*b*) Are you operating this property as:
   - ☒ Owner.
   - ☐ Lessee.
   - ☐ Contractor.
5. Number of years in production _____

   If not in production or operation, estimated date when production will begin _____
6. Experience of operators:
   Describe the mining and general business experience of (*a*) the applicant, and (*b*) the person or persons who manage the project.
7. History:
   (*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for suspension of operation.
   (*b*) State briefly the known history and production of adjoining and neighboring properties.
   (*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.

8. Names and addresses of Officers, Directors, or Partners, and in addition thereto, the five largest stockholders if applicant is a corporation.

Spokane, Washington
Mar. 10,1952

X. inapplicable
XI. inapplicable

XII . A. The scheelite tungsten is isseminated in banded zones of indefinite width in iron and garnetized rock.
B. unknown
(1) unknown
(2) unknown
C. not plasser

XIII one mile from project to state road, this one mile is a dirt road one and one half mile to residence point. Forty miles of paved road to Priest River Idaho and forty miles of dirt road to Metaline Falls Wash.

XIV. One mile from project to sufficient water supply for all seasons of year. Name of water supply "Granit Creek."
XV. R.E.A line within one half mile.
XVI. Inapplicable
XVII. One 220 cubic foot compressor, one 1100 lb. bucket-two drum slusher , one one half ton ore car. 1000 ft. used rail. one 1R drifter.
XVIII. This ore body is very favorable to open pit meathod of mining.

Fire Chief Mining Co.
Chas. A. Myers - Pres.

(*b*) If deposit is other than placer:

(1) Submit assay plans and/or sections showing location and size of proved (measured) and probable (indicated) ore or mineral reserve.

(2) State the tonnage (indicate type of ton) and grade of each class of ore reserve, as above, and show how computed. Tabulated total ore reserve as follows:

TOTAL ORE OR MINERAL RESERVES

| Ore or Mineral Reserve | Estimated Tons (a) | Metal or Mineral Content Per Ton (Grade) (b) | Gross Value Per Ton (c) | Recoverable Unit Value Per Ton (d) | Estimated Cost of Production Per Ton (e) |
|---|---|---|---|---|---|
| Measured (proved) | | | | | |
| Indicated (probable) | | | | | |

(*c*) If placer:

(1) Give estimated total yardage and average marketable mineral content of each deposit.

(2) Submit map showing location of placer deposit and surrounding area, with all test holes or pits. Submit logs of each hole and test pit with depth and average value of each.

(3) Describe gravel, stating whether fine, medium or coarse; loose, tight, cemented, or frozen, and whether it contains stumps or boulders more than 1 foot in diameter; if so, how large, and in what proportion.

(4) Describe bedrock, giving type (granite, sandstone, shale, etc.) and state whether it is hard or soft, smooth, uneven or rough.

(5) Describe overburden, stating whether loose, tight, or cemented; fine or coarse textured; furnish estimate of average thickness and total amount.

(6) Tabulate the reserves using the form outlined above for ore or mineral reserves.

13. Access Roads:

Give road distances to shipping, supply and residence points, stating kind and condition of roads.

14. Water Supply:

State source and quantity of water available for operations and whether sufficient for all seasons of year.

15. Power:

State amount of power used, rate per hour, and source thereof.

16. Labor:

State number and classes (miners, muckers, millmen, etc.) of men employed during a recent representative payroll period.

17. Equipment and Facilities:

Describe present equipment on the property, including buildings. (State condition.) List major pieces of equipment now owned or controlled and in serviceable condition available for this operation.

18. Are there any particular conditions or circumstances affecting your operations that are not described above? If so, explain.

## CERTIFICATION

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this form and accompanying papers is correct and complete to the best of their knowledge and belief.
