Jan. 1959

UNITED STATES
DEPARTMENT OF THE INTERIOR
OFFICE OF MINERALS EXPLORATION

FOR GOVERNMENT USE ONLY
Operator
Docket No. OME –
Contract No. 14-23-090 –
Contract Date

LIEN AND SUBORDINATION AGREEMENTS[1]

To the United States of America:

That certain land in the County of Lehmi, State of Idaho, described as follows:[2] The June Bug Mining Claims Located on Mormon Creek. Description of the mining claims will be attached to this form. Also attached is a lien agasint Seventeen Claims hereinafter called the "land", is the subject of a proposed exploration contract, hereinafter called the "Contract", between the United States of America, hereinafter called the "Government" and

Reynold P. Miller[3] hereinafter called the "Operator". In consideration for and as an inducement to the Government executing the Contract, the undersigned:

1. (a) Being the owner of an interest in the land, hereby grants to the Government a lien upon all of his right, title, and interest in the land and upon any production of minerals therefrom to secure the payment to the Government of the royalty on production provided for by the Contract, and agrees if the Operator's interest should be surrendered or terminated at any time prior to the expiration of the rights of the United States under said Contract to pay royalty to the Government according to the terms of said Contract; or

(b) Being the holder of a claim, lien, or encumbrance against the land, hereby subordinates his claim, lien, or encumbrance in or against the land and in any production therefrom to the rights of the Government under the Contract with respect to royalty on production and liens to secure same.[4]

2. Undertakes and agrees that property in which the Government may acquire an interest or equity under the Contract may be dismantled, severed from the land, and removed as may be provided in the Contract; and the Government's interest and equity in such property shall be prior and superior to any adverse right or claim of the undersigned.

3. Represents and undertakes that there is no claim, lien, or encumbrance upon the undersigned's right, title, claim, or interest in or against the land other than the following: (If "none" insert the word "none". Do not leave blank.)

Richard M. Shoup And Lenna Shoup hold first Lien on Seventeen Claims.

1/ Production from the land is not required, and in the absence of production there is no obligation to pay royalty to the Government.

2/ Either (a) insert the legal description of the land, or (b) strike out the words "as follows" and insert "in a lease [or contract, deed, or other document] dated_____, and recorded in Book_____, Page____, official records of said county". If (b) is used, the book and page of recordation must be inserted above. If the space provided is insufficient, use an Annex and refer to the Annex in the space.

3/ Insert name exactly as it appears in the Application MME Form 40.

4/ Subparagraph 1(a) does not apply to the holder of a claim, lien, or encumbrance.

4. Undertakes and agrees (a) neither to commit any act nor assert any claim in conflict with the provisions of this Agreement; and (b) to give advance notice of the Government's rights under this agreement to any subsequent transferee, mortgagee, encumbrancer, or lessee of any of the undersigned's right, title, claim, or interest in or against the land or any production therefrom, furnishing the Government with two true copies of such notice; and

5. Consents to all amendments (including an agreement of termination) and assignments of the Contract without notice thereof, and undertakes and agrees that this agreement shall extend and apply thereto.

6. Added provisions _____ (State "None" or "See Annex No._____".)

Dated this _____ day of Feb. 12, 19 71.

Memorandum

To : Chief, Office of Minerals Exploration

From : Field Officer, Region I

Subject: New application (Copper-Gold-Silver)
Reynold P. Miller
June Bug Claims
Lemhi County, Idaho

Enclosed is the cited application with supplemental information that was requested in my letter to the applicant on February 22, 1971.

The application is for a broad-scale type of exploration in which 23 holes will be core-drilled in an area about a mile square. The objective of this work is to determine limits of some so-called copper bearing rock. The applicant estimates reserves of 20 million tons of vein-type ore containing 1 to 3 percent copper. The geological report by William P. Barnes, Geological Engineer, included in the application, has obviously influenced the thinking of the applicant.

I've talked to some residents of Salmon, Idaho, about the applicant's property and received the off-hand comment that many have attempted to find copper in the area, but surface indications are unpromising.

Undoubtedly, a field examination should be scheduled if for no other reason than to attempt to determine from the applicant just what it is he intends to do and why. I'll have to make a trip to Salmon in early June to gather data from the Pope-Shenon mine; at the same time I can get together with Mr. Miller and take a look at his claims. There is little hope, however, that I'll be able to recommend a contract.

Enclosure

Re: New Application (Copper-Gold-Silver)
June Bug Claims
Lemhi County, Idaho

Dear Mr. Puffett:

This is in reply to your letter of February 22, 1971 and I attach a copy for your convenient reference.

I estimate that the proposed exploration work which I would like to perform will cost approximately $85,000.00.

I estimate that this cost will be divided approximately as follows:

Core Drilling approximately 23 holes to a depth averaging 210 feet at $15.50 per lineal foot	$74,865.00
The estimated expenses hereinafte detailed	6,500.00
The estimated contingencies	3,635.00
	$85,000.00

I propose to borrow through my pending loan application with your agency the sum of $50,000.00.

1.(c) I will contribute $35,000.00 which will be partly from cash on hand, partly from current income and if necessary the balance from loans on disposition of securities which I now own.

7. (a) Copies of the bids of three contractors are attached pertaining to the core drilling.

(b) Salary of supervisor at $1,200.00 per month for estimated three months $3,600.00

(c)	Estimated cost of 120 assays at $5.00 each	$ 600.00
	Estimated cost of facilities to retain core and samplying supplies	1,500.00
	Estimated cost of accounting and legal service	800.00
		$ 6,500.00

I also attach a map showing the location of the proposed exploration work which are the dots circled in red.

If you need further information, please contact me.

Thank you very much.

Very truly yours,

Reynold P. Miller

Mr Miller:

In reply to yours of March 5, 1971, we submit to you a bid of $16.00 per foot for your core drilling work.

Sincerely
Dave Bolinder

FRANDSEN BROTHERS

ROUTE NO. 4 BLACKFOOT, IDAHO

RECEIVED MAY 3 1971 O.M.E. SPOKANE, WASH.

DRILLING CONTRACT

THIS AGREEMENT, entered into this 27 day of March, 19 71 by and between FRANDSEN BROTHERS, party of the first part, and Reynold P. Miller, party of the second part.

WITNESSETH:

Party of the first part agrees to drill a hole ~~3~~ 4 inches ~~in diameter, reducing if necessary, to a size, not smaller than will accommodate a turbine pump with bowles~~ Core ~~inches in diameter,~~ at an agreed price of 17.00 dollars per foot, from top of ground to bottom of hole 100 ft deep. Said hole to be located on the Salmon, Idaho

Party of the first part agrees to furnish all casing, at an agreed price of $ 1.00 per foot for 1" inch; $ ——— per foot for ——— inch. All casing to be welded in hole, with a steel drive shoe welded onto bottom joint. Drive shoe to be furnished, $ ——— for ——— inch. $ ——— for ——— inch.

Party of the second part agrees to pay for the drilling and the casing, as follows: Cash at the end of every 30 days.

If two or more holes are drilled, balance of each hole to be paid for in full when completed.

~~Party of the first part agrees to perforate the casing at an agreed price of $~~

Party of the first part agrees to drill a hole sufficiently straight and drilled in such a manner that it will accommodate a turbine pump at a point at least twenty feet below the static water level, said pump to enter the hole free and easy, and to be free to turn in said hole without binding.

Party of the first part shall drill to a depth designated by the party of the second part or to a depth where the driller thinks that a sufficient flow of water has been found to supply a turbine pump, ~~with a discharge of ——— miners inches of water.~~

All extra work performed by party of the first part, shall be paid for as follows: At the end of every 30 days

Signed F. W. Frandsen

Signed

CITY, STATE AND ZIP CODE: Homedale, Idaho 83628	JOB LOCATION: 24 miles South east of Salmon, Idaho	
ARCHITECT:	DATE OF PLANS: 4-9-71	JOB PHONE:

We hereby submit specifications and estimates for:

Moblelization:	lum sum		$600.00
Core Drill:	NX WL	Per Lin. ft.	15.50

This price will Include reaming, cementing, and all other costs.

We Propose hereby to furnish material and labor — complete in accordance with above specifications, for the sum of:

_____ dollars ($ _____).

Payment to be made as follows:

All material is guaranteed to be as specified. All work to be completed in a workmanlike manner according to standard practices. Any alteration or deviation from above specifications involving extra costs will be executed only upon written orders, and will become an extra charge over and above the estimate. All agreements contingent upon strikes, accidents or delays beyond our control. Owner to carry fire, tornado and other necessary insurance. Our workers are fully covered by Workmen's Compensation Insurance.

Authorized Signature: Leonard L. Justice

Note: This proposal may be withdrawn by us if not accepted within 60 days.

Acceptance of Proposal — The above prices, specifications and conditions are satisfactory and are hereby accepted. You are authorized to do the work as specified. Payment will be made as outlined above.

GENERAL INSTRUCTIONS

Before filling out this application, please read the *OME Regulations for Obtaining Federal Assistance in Financing Explorations for Mineral Reserves* (30 CFR Chap. II). To assure prompt action, your application must provide all applicable material and information specified on the back of this application form. Avoid unnecessary correspondence and delays by submitting complete and accurate information. *Please submit two copies of this application and all accompanying papers* except as otherwise noted. Place your name and address on each sheet. Each item of information, maps, and reports required as a part of this application is described on the back of this form. Identify each attached statement by the item number to which it applies. If an item does not apply to your application, show the item number on your statement and after it write "not applicable." Maps or sketches should be used to supplement narrative descriptions of the property location and boundaries in item 2, existing mine workings and geology in item 3, and the proposed exploration work in item 5. When this information is not too complex, all of it may be shown on one map or sketch. All documents and other attachments submitted as a part of this application, except those in item 3(g) which you mark to be returned, become the property of the Government and will not be returned to the applicant. Send true copies, *not originals*, of leases, contracts, and other documents which are an essential part of your business records. *File this application with the Department of the Interior, U.S. Geological Survey, Office of Minerals Exploration, Washington, D. C., 20242, or with the nearest OME Field Office.*

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief, and that he would not ordinarily undertake the proposed exploration under current conditions and circumstances at his sole expense.

Feb. 12/1971
DATED

Reynold P. Miller
BY *(Signature)*

TITLE

A wilfully false statement or certification to any Department or Agency of the United States Government is a criminal offense.
U. S. Code, Title 18, Sec. 1001.

INFORMATION REQUIRED WITH THIS APPLICATION

1. Financial Eligibility:

(a) Submit evidence of efforts made within 90 days preceding the filing of this application to obtain credit from your bank of account and at least one other banking institution or other private source of credit. Such evidence shall include (1) true copies of your letters to credit sources which show date of loan request, amount and terms requested, and proposed use of loan funds and (2) true copies of replies from credit sources. If the loan was offered under terms which you consider unreasonable, state why you consider them so.

(b) List names and addresses of affiliated, parent, or controlling companies or organizations and state extent and nature of their interest.

(c) State how you propose to furnish your share of the cost of the exploration work.

2. Applicant's Rights in Land:

(a) State your interest in the land and mineral rights, whether owner, lessee, purchaser under contract, or other. If you are not the owner, submit one true copy of the lease, contract, or other document (with address of owner) under which you control the property. Describe all liens, mortgages, or other encumbrances on the land and state book and page number and official place where recorded.

(b) State the legal description (section, township, and range; metes and bounds; patent number of claims) of the land upon which you wish to explore and all adjacent land which you own or control. Describe any part of the land or workings which should not be subject to Government royalty and liens. If the land consists of unpatented claims, state book and page number for each recorded location notice, including amended locations, and official place where recorded. State all the names by which you know the property.

(c) For all land or mineral rights encumbered or not owned, submit five copies of Lien and Subordination Agreements signed by owner on MME Form 52. If the agreements cannot be obtained, state reasons and whether you can furnish a performance bond.

3. Physical Description:

(a) Describe in detail and illustrate with maps or sketches all mining or exploration operations which you know have been or are being conducted upon the land. Include existing mine workings and all production facilities.

(b) State your interest, if any, in operations described in (a)

(c) State, if you know, the past and current production, supporting your statement with copies of settlement sheets, mine records, or published data if available.

(d) Describe known ore reserves, giving quantities and grades.

(e) Describe by narrative and maps or sketches the geologic features of the property, including ore minerals, geologic formations if known, and type of deposit (vein, bedded, etc.).

(f) If you have sampled the area you propose to explore, show where the samples were taken, describe sampling methods used, and provide copies of assay certificates. State your reasons for expecting to find ore.

(g) Send with your application at least *two* copies of all geologic or engineering reports, assay maps, or technologic information which you have, indicating whether you require their return.

4. Accessibility of Property:

(a) To aid the OME representative who may examine the property state name, address, and telephone number of person who will meet him; give directions for reaching the property; and describe accessibility of property and of any mine workings.

(b) Name the shipping and supply points and state the distances to the property.

5. Exploration Work:

(a) Describe fully the proposed exploration work giving individual footages and sizes of openings *for each item of work.* Use narrative, maps, plans, and sections as necessary. Show location of the proposed work as related to geologic features such as veins, ore-bearing beds, contacts of rock formations, etc. Show also the relation of the proposed work to any existing mine workings and to *land boundaries* or to the closest identifiable corner.

(b) If an access road must be built, show the proposed location on the property map and state the length, type and construction methods proposed.

(c) If an OME contract is executed, state how soon thereafter work would be started and finished. State your anticipated average daily or monthly rate of progress for each type of work.

6. Experience:

State your operating experience and background to conduct this exploration work and also that of the person who will supervise the work.

7. Estimate of Costs:

Furnish detailed estimates of the necessary costs for time and materials *for each item of the work proposed in 5(a)* under the headings listed below with a total for each heading and the estimated total cost of the work. Costs for any work to be performed by an independent contractor should be listed separately under category (a) below. Costs for any work that is not to be performed by an independent contractor should be listed under categories (b) through (g).

(a) Independent contracts. State the total cost of any proposed independent contract for all or any part of the work, and the number of units and the unit cost for each type of work, such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, or per cubic yard of material moved. Cost estimates should be supported by bids from three contractors if possible. (*Note*—If none of the work is to be contracted, write "none" after this item.)

(b) Personal services. The cost of supervision, engineering and geological services, outside consultants, and labor should be itemized by numbers and classes of employees; rates of wages, salaries or fees; and periods of employment. State whether these services are available.

(c) Operating materials and supplies. List items of material and supplies giving quantity and price of each. Include under this heading power, water, and fuel, and units of equipment and tools costing less than $50 each.

(d) Operating equipment. List items of equipment and tools costing $50 or more per unit. Give specifications and indicate how each item is to be acquired—i. e., rented, purchased or provided by the applicant. If rented or purchased, state the estimated rental or purchase price. If furnished by the applicant, state condition and present fair market value.

(e) Initial rehabilitation and repairs. Describe the type and the cost of *initial* rehabilitation or repair of existing buildings, fixtures, installations (exclusive of mine workings), and movable operating equipment now owned by the applicant which will be used in the exploration work.

(f) New buildings, fixtures, installations. Describe each building, fixed improvement, and installation to be purchased, constructed, or installed for the exploration work, stating specifications and cost including labor, materials, and supervision.

(g) Miscellaneous. Describe the type and estimate the cost of repairs and maintenance of the operating equipment listed in 7(d). Do not repeat initial repairs listed in 7(e). Show also the costs of analytical work, accounting, workmen's compensation and employees' liability insurance, payroll taxes, and other required costs that do not fall within the previous categories. [*Note*—The Government will not contribute to costs incurred before the date of the contract, or to costs of or incident to: (1) acquiring, using, or possessing land and any existing improvements, facilities, buildings, installations, and appurtenances, or the depreciation and depletion thereof; (2) general overhead, corporate management, interest and taxes (other than payroll and sales taxes); (3) insurance (other than employees' liability insurance); and (4) damages to persons or property (other than authorized repair to or replacement of equipment or other property used in the work).]

APPLICATION FOR FINANCIAL ASSISTANCE IN MINERALS EXPLORATION

RECEIVED

FEB 22 1971

O. M. E.
SPOKANE, WASH.

1. Financial Eligibility:

   (a) Letters from two banks attached.

   (b) N/A

   (c) I already have performed a considerable amount of work as will be further detailed.

2. Applicant's Rights in Land:

   (a) There are 58 June Bug claims involved in the property. Applicant is the owner of claims 18 through 58. Claims 1 through 17 are owned by applicant but are subject to a purchase contract from Richard M. Shupe and Lena Shupe of Salmon, Idaho. incorrectly spelled

   (b) Legal Description: The property is in Lemhi County, Idaho, in Sections 4, 5, 6, 7 and 8, Township 18 North, Range 23 E.B.M., and a portion in Township 19 North, Range 23 E.B.M., further represented by mining claims June Bug 1 through 58, recorded in Lemhi County, Idaho.

3. Physical Description:

   (a) Sketch shows road work and bulldozer work and drill sites. Also enclosed is an I P Map. There are no existing mine workings or production facilities.

   (b) The exploratory road work, bulldizer work and the I P were all done at my request and by me or other qualified persons.

   (c) There is no production, past or current.

   (d) Estimated ore reserves are 20,000,000 tons of vein-type ore containing 1% to 30% of copper and smaller amounts of silver and gold. There are no proven ore reserves. One of the purposes of this application is to obtain funds for core drilling to establish the reserves.

   (e) This property is in the belt series of Central Idaho, lying on a thrust fault. The beds are almost flat although there is some folding and shearing. There is a possibility of a large low-grade "porphyry" type copper deposit and a possibility of limited tonnage of higher grade copper. There are pegmatitic dykes and quartzite.

   (f) Systematic hand sampling as shown on the sketch attached, copies of assay certificates or reports are enclosed. I expect to find ore based upon the work already done and geological reports.

   (g) Two copies of all geological and engineering reports are attached.

4. Accessibility of Property:

   (a) Reynold P. Miller, [redacted], [redacted], [redacted];
   Telephone: [redacted]2. P.O. Box 936 Homedale, Idaho 83628
   337-3661

   The property lies near McDevitt Creek, approximately 24 miles from Salmon City, Idaho, can be reached by car on Highway 28 and a good Forest Service Road.

   (b) Shipping and Supply Points: Helena, Montana; Salmon City, Idaho; Salt Lake City, Utah.

REYNOLD P. MILLER
[redacted]
[redacted],
P.O. Box 936
Homedale, Idaho 83628

RECEIVED

FEB 22 1971

SPOKANE, WASH

5. Exploration Work:

(a) It is proposed to use all of the applied for funds for core drilling on the property as the geologist and drillers determine. It is estimated it will require 10 to 15 holes from 3 to 500 feet in depth. The proposed drilling sites are shown on the attached sketch.

(b) An access road is in existence.

(c) Work would start approximately May 1, 1971, and end October 30, 1971.

6. Experience:

I have been in the mining and ore processing business for approximately twenty years. However, for this work I would hire an independent contractor and a geologist to supervise the work.

7. Estimate of Costs:

(a) Independent Contracts--The total work proposed would be done by an independent contractor with $40,000 attributed to drilling costs and approximately $10,000 to geology and assaying.

(b) N/A

(c) N/A

Homedale, Idaho

Gentlemen:

I am engaged in the exploration and development of a proposed open pit mining operation in Lemhi County. Over the past three years I have performed a considerable amount of exploration and development work and the project has now reached the point extensive core drilling will be necessary to confirm the location and extent of the ore bodies. For this purpose I need $50,000, which will be used to hire an independent contractor to do core drilling and to hire a geologist to supervise the drilling and examine the results. This work will be accomplished during 1971, from about May 1 to November 1. In order to accomplish this work, I would need $20,000 May 1, $10,000 July 1, $10,000 August 1, and $10,000 October 1.

Repayment of any sums loaned to me would require a five-year period, commencing approximately two years from date.

Yours very truly,

Reynold P. Miller

Dear Mr. Miller:

I regret to inform you that we will be unable to honor your request for a loan of $50,000.00. We do not have a program to cover loans of this nature.

We appreciate your inquiry, and we will be glad to help any time we can.

Very truly yours,

Dear Mr. Miller:

In regards to your application for $50,000.00 to develope a mine, in the past we have not made any loans of this nature. To do so now would require us to hire a geologist, and it appears that there is considerable risk associated with this type of loan. Therefore, we will be unable to lend you any money for this type of venture.

Thank you for applying for a loan. If I can be of further assistance, please contact me.

Yours truly,

Ken Nielsen

THE COPPER DEPOSITS NEAR SALMON, IDAHO

BY

CLYDE P. ROSS

RECEIVED
FEB 22 1971
U
SPOKANE WASH

WASHINGTON
GOVERNMENT PRINTING OFFICE
1925

On the north slope of the range between the "big ridge" and the Harmony mine another lode is exposed at what is known as the upper shaft. The strike is about N. 65° W., and the dip is 70° SW. Considerable quartz is present.

The Swift tunnel on the Income group follows a shear zone with steep southerly dip, in places nearly vertical. Near the inner end of the tunnel the shear zone is offset several feet to the south on a fault that appears to strike nearly north and dip west. No sulphides were observed in the tunnel, but at somewhat more than 200 feet in from the portal the lode is reported to contain some gold. Copper ore is reported to have been found in shallow shafts above and about 900 feet southeast of the portal of the tunnel, in what may be a continuation of the same lode.

PROSPECTS ON McDEVITT CREEK

There are a number of prospects along McDevitt Creek, which is near the southern boundary of T. 19 N., R. 23 E., but no work was in progress on them at the time of visit in September, 1923. Some of the prospects have long been abandoned, and on none of them has extensive development work been done. The prospect that is reported to have the largest amount of underground workings is on the south fork of the creek near the northwest corner of T. 18 N., R. 23 E., probably in sec. 7. Its altitude is more than 7,000 feet above sea level. At this prospect there is a log cabin near the stream, a tunnel on the left side a short distance downstream from the cabin, and another on the right side still farther down, with a log blacksmith shop at its mouth. The tunnel first mentioned trends N. 85° W. for about 50 feet, then N. 80° W. for nearly 50 feet more. At about 60 feet in from the portal there is a winze, and a short distance farther in a drift 25 feet long trending S. 56° W. The other tunnel is about 410 feet long. For a distance of nearly 300 feet it trends about S. 5° E., and then it swings around to about S. 25° E. near the face.

The country rock of this and the other prospects on McDevitt Creek is dark-gray slaty quartzite. Somewhat over half a mile downstream from the prospect there is an exposure of such rock in which ripple marks are well preserved. The bedding here strikes nearly east and dips 20° N. Near the mouth of the longer tunnel the bedding appears to strike N. 45° W. and to dip somewhat less than 15° NE.

About 250 feet from the portal of the lower tunnel a small excavation in the east side of the tunnel discloses some small irregular stringers of quartz containing chalcopyrite. There is also some chalcopyrite disseminated in the rock adjoining the stringers. In the last 30 feet or so of the tunnel a fault zone of gouge and brecciated

and bleached quartzite is exposed. This zone strikes about N. 25° W. and dips 60° or more SW.

At the portal of the tunnel on the left side of the stream there is a breccia zone about 5 feet wide which strikes nearly north and dips about 75° W. From the portal to the winze the rock in the tunnel is barren and unbrecciated. In the winze and the workings beyond it the rock is mineralized and the ground is much broken. The mineralization produced a number of small and irregular stringers of quartz containing chalcopyrite and some malachite. Many of the quartz stringers lie nearly horizontal.

PROSPECTS ON HAYDEN CREEK

The mineral deposits on Hayden Creek, which lies largely in T. 17 N., R. 23 E., and joins Lemhi River a short distance below the railroad station at Lemhi, are among the first found in the county. They are reported to have been prospected by the Mormons who built Fort Lemhi, near the present railroad station of Tendoy, about 1854, but little has been done with them since that time. In 1923 Webster Atwood was the only man reported to be developing prospects on Hayden Creek. He owns the Nellie group, nearly 7 miles from Lemhi and another prospect several miles farther up Hayden Creek. The latter was not visited but is reported by Mr. Atwood to be only very slightly developed as yet. On the Nellie group there are open cuts on both sides of Hayden Creek. One of those on the left side is nearly 20 feet wide; the others are smaller.

The rock in this vicinity is a green schist. It is probably of sedimentary origin but is more thoroughly metamorphosed than any of the other rocks observed in the course of the present investigation. In the large open cut the schistosity strikes east and dips 28° S. The attitude of the bedding could not be determined. In this open cut the mineralized zone is exposed for a width of about 12 feet, with a body of barren schist in the middle. Numerous narrow bands of quartz containing chalcopyrite lie along the schist planes. The rock contains a little pyrite and calcite and is in places stained with limonite and manganese oxide. A carload of ore was shipped from this prospect several years ago by the former owners. The present developments are insufficient to establish the dimensions of the ore body in any direction, but some of the ore uncovered is of good grade. The face of the small open cut on the right side of the stream, nearly opposite that just described, was covered with slide rock at the time of visit, but specimens from that cut show considerable bornite and some pyrite. The bornite is probably hypogene but is slightly later than the pyrite. A little supergene chalcocite is present.

Dear Mr. Miller:

I have discussed your June Bug Claims of Lemhi County, Idaho with our company representatives in New York.

Our present position is that we are interested in your property and feel that it merits further evaluation. Unfortunately we are short of manpower and cannot see our way clear to getting involved in another major project at this time.

I would like to keep in touch with you and possibly consider your proposition again in the future when the timing might be better for us, and if the property is still available.

Thank you very much for showing me around your property.

Very truly yours,

Re: Junebug and Idaho Copper unpatented lode mining claims, Lemhi County, Idaho.

Dear Mr. Miller:

This letter is intended strictly for your personal information, and it is based on several trips to the properties during the fall of 1969. The letter is not for public distribution and is not intended for purposes of financing.

The potential of the properties can be divided into two categories -- (1) the possibility that there may be a large low-grade "porphyry" type copper deposit similar to those of the western Cordillera, and (2) the possibility of developing a more limited tonnage of higher grade copper. Presently there are no proven ore reserves.

Dozer cuts have exposed several pegmatitic dikes of granitic-alaskitic composition that contain disseminated chalcopyrite. The grade of the copper is generally less than 0.60 percent. It is possible that these pegmatite dikes are fingers extending upward or laterally from a more massive mineralized granite. Pegmatites are generally associated with massive granite intrusions.

To evaluate this potential a drilling programemust be initiated. The degree of risk is high; the granitic intrusion may be at great depth or at a great lateral distance, and there is no guarantee that if found, it will contain the same concentration of copper as the pegmatitic dikes. I would recommend that drilling sites be spotted at the greatest convergence of the pegmatite dikes and preferably low on the mountain.

Fissure quartz is associated with pegmatite dikes on the property; the quartz represents a late phase of magmatic differentiation. The quartz is often above the pegmatite dikes and has greater lineal extent that the pegmatites. Where observed, the quartz veins have mineable widths of 1.60 percent copper. Minor amounts of silver and gold are present. To prove reserves in the quartz veins a systematic drilling program involving angle holes is necessary. Such a program would also involve risk. Some of the veins are complicated by faulting and the grade and width of the mineralization are variable. The development of the mineralized quartz would depend on proving sufficient reserves to amortize a mill; the overall grade is too low to ship directly to a smelter.

Very truly yours,

John C. Lawrence

INTRODUCTION

This Mining Property is a group of unpatented claims there is 58 June Bug ~~and 55 Idaho Copper~~. These claims are located in the Mc Devitt Mining District on Morton Creek in Lemhi County, Idaho. The property can be reached by car on a good Forest Service road a few miles of the highway 28 and about twenty four miles from Salmon City. It is in an area where there has been much mining activity over the years and is in geologically favorable rock.

A reconnaissance was made this writer to determine structural geology if possible from the areas that have been exposed. Enough of the ore zone and structural geology has been exposed to convince us that this property could be a potentially large deposit of low grade copper with some zones of enrichment.

GEOLOGY

This property is in the famous belt series of Central Idaho and the country that is host to the copper mineralization to be a argillaceous quartzite. The beds are almost flat laying altough some folding and shearing were noted. Bedding planes faults on the borders of the mineralized zone were noted. Three vertical shear zones which intersect bedding planes and cotain highly mineralized gossan are prominant feartures exposed..

RECEIVED
FEB 22 1971
O. M. E.
SPOKANE, WASH.

Ore Deposits

There are two very interesting types of ore deposits on this property. The one that has the greater potential so far as reserves are concerned is an approximately flat lying zone of contorted schistose quartzite. This zone was noted in cuts in four different places over a distance of approximately three-quarters of a mile with every indication that the zone persists beyond the limits noted. The depth of this zone could not be fully determined because a full section has only been partially exposed in one area. This area, which has been exposed in a cut over one hundred feet long, shows a thickness of the mineralized zone to be approximately forty feet if the low lying bordersaare projected to give a vertical section. This bed has been extensively folded and mineralization noted throughout the zone.

The other type of deposit is what appears to be a number of shear zones almost normal to the bedding planes. These zones are very pronounced and are highly mineralized. Samples assaying over 30% copper have been taken from one zone. It is exposed on both sides of an intersecting gully and appears to be over twenty feet wide on the west side. The dip of these zones is essentially vertical.

The zones have been sampled extensively by the previous owners with results running from two to thirty percent copper. No attempt was made by the writer to do systematic sampling at this time. I would estimate, however, that the samples above mentioned would be in line with conditions observed.

Conclusions and Recommendations

As a result of this preliminary investigation, I feel certain that this property has the potential of being a large deposit of copper ore. It topography as well as its proximity to the highway and power facilities adds to its favor.

The full extent of the ore zone needs to be determined as does the relationship of the mineralized vertical zones to the bedding plane zone. This will require further study. Systematic sampleing should be done to determine approximate ore reserves.

In this day of high copper and other metal prices and of modern machinery and methods, this becomes a very exciting property for it has the potential of being a large producer.

ADJOINING PROPERTY

RECEIVED
FEB 22 1971
O. M. E.
SPOKANE, WASH.

A group of ~~35~~ 58 unpatented mining claims known and recorded as the ~~Idaho Copper Claims make up the Idaho Copper Mining Property~~. Many of these claims border on the Junebug Claims. Electricity is available within four miles of the property and water is available on the claims. Access is by good road for four miles from State Highway No. 28.

A very quick reconnaissance of this property indicates geology similar to that noted above. Perhaps the major difference is the shear type deposits rather than bedding zones. Mineralized quartz veins have been exposed by extensive dozer work and veins 10 to 50 feet wide and 700 to 800 feet in length have been noted. Assays taken from these veins indicate one to three per cent copper with picked samples running as high as 30 per cent.

This property, with the Junebug Property, appears to this writer to have a large potential copper zone.

EXPLORATION AND OPTION AGREEMENT

THIS AGREEMENT, made and entered into as of the _____ day of December, 1967, by and between R. M. SHOUP, a single person, and GEORGE E. SHOUP and LENA SHOUP, his wife,

hereinafter called Optionor, whether one or more, and REYNOLD MILLER, a married man,

hereinafter called Optionee:

W I T N E S S E T H:

This agreement will set forth all of the terms and conditions under which Optionor grants to Optionee the right to explore and develop, and the option to purchase, the following described property, situate in the McDevitt Mining District, in the County of Lemhi and State of Idaho:

Junebug Mining Claims 1 - 17, McDevitt Mining District, Morman Canyon, Lemhi County, Idaho

Richard M. Shoup
Telephone → 756-3155 Salmon, Idaho

RECEIVED
FEB 22 1971
O. M. E.
SPOKANE, WASH.

All of the above mining claims, and all other property, rights and interests of Optionor set forth above, hereinafter collectively are called the "Claims."

NOW THEREFORE, in consideration of the covenants and agreements hereinafter set forth, and of the sum of _____ **FIVE HUNDRED and NO/100 - - -** ($500.00) DOLLARS and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged by Optionor, the aforementioned parties agree to the following:

SECTION 1. GRANT

Optionor hereby gives and grants to Optionee, its successors and assigns, for the term hereinafter provided, the exclusive right to explore and develop the Claims, and the exclusive option to purchase the Claims, upon the terms and conditions hereinafter set forth. The foregoing grant of exclusive option to purchase the Claims is called, in this agreement, the "Option," or "Purchase Option."

Optionor covenants and represents that Optionor is the sole owner of the Claims, free and clear of liens, encumbrances, and conflicting claims or interests.

Optionor further covenants and represents that all of the unpatented Claims have been located in compliance with the laws of the state in which the Claims lie, and with all laws of the United States of America governing location of the Claims, and that Optionor

has performed all assessment work required by law to maintain title to the unpatented Claims in Optionor to the date hereof.

RECEIVED FEB 22 1971 O.M.L. SPOKANE, WASH.

SECTION 2. TERM

The rights herein granted to explore and develop the Claims, and the aforementioned Purchase Option, shall exist for a term, hereinafter sometimes called the "Option Period," beginning on the date hereof and, unless extended as hereinafter provided, ending on the 1st day of December, 1971, or ending prior thereto upon exercise of the Purchase Option, or upon termination of this agreement in the manner hereinafter provided, whichever first occurs.

SECTION 3. PURCHASE PRICE

If the Purchase Option is exercised, the purchase price to be paid by Optionee to Optionor for all of the Claims, together, is the sum of ONE HUNDRED THOUSAND and NO/100 - - ($ 100,000.00) DOLLARS, less credit for all sums and amounts permitted hereunder to be credited against the purchase price, and less all reasonable adjustments and deductions for defective title as hereinafter provided. In the event of exercise of the option, the consideration payment of FIVE HUNDRED and NO/100 - - - - - ($ 500.00) DOLLARS shall be credited to and applied in reduction of said purchase price. The above purchase price, less all credits, adjustments, and deductions, hereinafter is called the "Net Purchase Price."

SECTION 4. PAYMENTS

In consideration of the exploration and option rights herein granted Optionee shall pay to Optionor, the following sums, on or before the dates hereinafter set forth, respectively, subject, however, to the provisions for termination of this agreement, as hereinafter provided and all other terms and conditions of this agreement.

$ 500.00	Down Payment
2,000.00	September 1, 1968

RECEIVED
FEB 22 1971
O. M. E.
SPOKANE, WASH.

It is provided, however, and the parties covenant and agree, as essential conditions to this agreement, that if Optionee delivers notice terminating this agreement, in the manner hereinafter provided, Optionee shall not be required to pay any of the above payments, or any other sums hereunder, accruing after the effective date of said termination.

If Optionee elects to exercise its above purchase option, all of the foregoing payments theretofore made shall be credited against, and applied in reduction of, the said Purchase Price as set forth above.

SECTION 5. MANNER OF PAYMENT

All payments to be made to Optionor hereunder may be made by Optionee's check or draft mailed or delivered to Optionor at Optionor's address for notice purposes, hereinafter set forth, or to an escrow agent if one is selected hereunder, or for the account of Optionor at such bank or banks in one of the United States as Optionor may designate from time to time by written notice to Optionee. The escrow agent, or said bank or banks, shall be deemed the agent of Optionor for the purpose of receiving, collecting and receipting for such payments.

SECTION 6. EXERCISE OF OPTION

If Optionee elects to exercise its Purchase Option, it shall mail or deliver to Optionor, at any time before expiration of the Option Period, or any extension thereof, written notice of its election, and the exercise of the Purchase Option shall be effective upon mailing or delivering the notice of election.

Upon mailing or delivering the above notice of election, this agreement thereafter shall be and constitute a contract for the sale and purchase of the Claims described in the notice of election, subject, however, to all of the terms and conditions of this agreement, including the provisions concerning defects in title to the Claims.

Optionee shall have no obligation to purchase any of the Claims, or to pay the purchase price, or any part thereof, unless and until it has exercised its Purchase Option in the manner set forth above. Nothing in this agreement, and no action by either party hereunder, shall be construed as requiring or obligating Optionee to exercise its Purchase Option.

If notice of election to exercise the Purchase Option is not mailed or delivered by Optionee, as set forth above, during the Option Period or any extension thereof, this agreement shall terminate, and Optionee thereafter shall have no further interest or obligations in, under or by virtue of this agreement, except as otherwise specifically provided in this agreement.

SECTION 7. CLOSING;ESCROW

A. Closing

If, upon exercise of the Purchase Option, an escrow agent has not been designated as provided below, the notice

RECEIVED
FEB 22 1971
O.M.E.
SPOKANE, WASH.

exercising the Purchase Option shall specify a time and place for closing the sale and purchase of the Claims. The closing may be held during or after expiration of the Option Period, but shall be held not more than sixty (60) days from the date of the notice, at a time and place reasonably convenient to the parties hereto, all subject, however, to the following Section 8 concerning defects in title to the Claims. At the closing, Optionor shall execute and deliver to Optionee a good and sufficient deed or deeds acceptable to Optionee, in recordable form, with all state and federal stamp and deed taxes paid, conveying to Optionee title to the Claims as represented in the foregoing Section 1. Upon delivery of the deed or deeds, Optionee shall pay and deliver to Optionor the Net Purchase Price. After completion of the closing, this agreement, and all rights and obligations of the parties hereunder, forthwith shall terminate, except such rights and obligations hereunder as may then have accrued and remain unpaid or unsatisfied.

RECEIVED
FEB 22 1971
SPOKANE, WASH.

B. Escrow

At any time during the term hereof, Optionee may designate an escrow agent to serve the parties hereto in lieu of the above closing, subject to all of the terms and conditions of this agreement. If an escrow agent is designated, the parties forthwith shall execute and deliver to the escrow agent instructions to be prepared by Optionee, setting forth the duties of the escrow agent and the terms of the escrow, consistent with the terms and conditions of this agreement. As

between the parties to this agreement, all of the terms and conditions of the escrow instructions shall be subject to the provisions of this Exploration and Option Agreement, and any terms and conditions of the escrow instructions conflicting or inconsistent with any of the provisions of this instrument shall be void and of no effect as between the parties to this agreement, whether or not the escrow instructions have been signed by the parties hereto.

RECEIVED
FEB 22 1971
O. M. E.
SPOKANE, WASH.

Whenever Optionee so requests, by written notice delivered to Optionor at any time during the term hereof, after designation of an escrow agent, Optionor forthwith shall make, execute and deliver to the escrow agent a deed or deeds to the Claims, in the form described in the above provisions for closing. Optionee thereupon shall make, execute and deliver to the escrow agent instruments, in recordable form, stating that Optionee holds no interest in the Claims described in said deeds, respectively. The escrow agent shall hold all documents and instruments, and all sums and payments, delivered to it by the parties hereto, and shall deliver the same to the parties hereto, upon the terms and conditions of the escrow instructions.

SECTION 8. TITLE EXAMINATION; DEFECTIVE TITLE

A. Abstract of Title and Survey

Upon written request by Optionee at any time during the Option Period, Optionor forthwith shall obtain and deliver to Optionee abstracts of title to the Claims, and, if requested by Optionee, plats and field notes of surveys of the Claims. At Optionor's request, Optionee will advance the actual cost of the abstracts and surveys incurred by Optionor after the date of

the written request, and may deduct these sums from subsequent payments to Optionor hereunder.

The abstracts shall be prepared by licensed or otherwise qualified abstractors acceptable to Optionee, and shall be based upon the official district records for each judicial district, and the records of the United States Bureau of Land Management for each mining district, within which any of the claims are situated. The abstracts shall be certified by the abstractor to a date not more than thirty (30) days prior to the date on which the abstracts are delivered to Optionee. The surveys, if required, shall be made by a qualified, registered surveyor acceptable to Optionee.

RECEIVED
FEB 22 1971
O. M. E.
SPOKANE, WASH.

B. Defects in Title

The abstracts delivered to Optionee, as above, may be examined by Optionee's attorney, at Optionee's expense. If the abstracts show any defect in title to any of the Claims, as measured by applicable existing law of the state in which the Claims are situated, or applicable federal law or regulations, by reason of which defect Optionor is unable to convey to Optionee title to the Claims as represented in the above Section 1, Optionee shall deliver to Optionor written notice of all such title defects. Optionor shall have a reasonable time, not to exceed three (3) months from and after the date of the above notice, herein called "Optionor's title curative period," in which to remedy the title defects set forth in the notice.

If, upon expiration of Optionor's title curative period Optionor has not remedied the title defects to Optionee's satisfaction, or if during Optionor's title curative period Optionor

notifies Optionee, in writing, that Optionor is unable or unwilling to remedy the title defects, then at any time thereafter, while this agreement remains in effect, Optionee shall have the right, but shall not be required, to do the following:

1) Optionee shall have the right to take such action, steps and proceedings as it, in its sole discretion, may elect in order to remedy the title defects, and may, at any time, cease any such curative action, steps and proceedings undertaken by it. Optionor shall execute all documents, and take such other action, as may be reasonably necessary to assist Optionee in remedying title defects. All reasonable costs and expenses incurred by Optionee in remedying or attempting to remedy the title defects, including the settlement or purchase of conflicting claims or interest, and all attorneys fees and other legal expenses, may be deducted by Optionee from payments to be made to Optionor hereunder.

RECEIVED
FEB 22 1971
O. M. E.
SPOKANE, WASH

2) Optionee shall have the right to exercise its Purchase Option in the manner provided in Section 6, subject, however, to the following subsection C of this Section 8, concerning adjustment of the purchase price for defective title, whether or not Optionee has undertaken, completed, or ceased any action, steps or proceedings to remedy the title defects.

If the title defects have not been remedied by either party to Optionee's satisfaction on or before the date ten (10) days

prior to the expiration of the Option Period, and if Optionee so notifies Optionor by written notice within said ten (10) day period, the duration of the Option Period, and all of Optionee's rights hereunder, shall be extended, without further instrument or act of either party, for an extended term of six (6) months from and after the date on which the Option Period otherwise would expire.

RECEIVED
FEB 22 1971
U. M. E.
SPOKANE, WASH.

Nothing in this Section 8 shall limit or prevent Optionee from exercising its Purchase Option as provided in Section 6, if Optionee elects to do so, at any time during the Option Period and all extensions thereof, and nothing in this Section 8 shall limit or prevent Optionee from terminating and cancelling this agreement, if it elects to do so, at any time during the Option Period and all extensions thereof.

C. Costs; Adjustment in Purchase Price

The purchase price set forth in the above Section 3 is based upon title to the Claims as represented in Section 1. If, at the time that Optionee elects to purchase the Claims, any title defects of which Optionor was notified, by written notice, as above, have not been remedied or corrected, whether or not Optionee has undertaken or completed any action or steps to remedy the title defects, the said purchase price shall be reduced by the following, for such title defects:

1) If any divided or undivided interests in any of the claims are owned or held by persons other than Optionor, a sum in the same proportion of the purchase price as the said divided or undivided interests, respectively, held by others bear to the entire title to the Claims as represented in the foregoing Section 1; and

2) All sums necessary to pay and satisfy remaining liens or encumbrances affecting title to any of the Claims; and

3) Unless deducted under 1) or 2), above, all sums which reasonably may be required thereafter to remove all said remaining title defects, to quiet title to the Claims in Optionee, and to settle, by litigation, purchase, or other settlement, conflicting claims and interests of others; and

4) All costs and expenses incurred by Optionee, prior to exercising its Purchase Option, in removing or attempting to remove said title defects; and

5) All other deductions, credits and adjustments permitted hereunder.

Optionee shall have the right, while this agreement remains in effect, to pay any proper and correct liens and charges incurred by Optionor or others against the Claims, and any taxes and assessments against the Claims in addition to those specifically required to be paid by Optionee, and to deduct all sums so paid from payments to Optionor hereunder.

RECEIVED
FEB 22 1971
O. M.
SPOKANE WASH

SECTION 9. TITLE DEFENSE; QUIETING TITLE

If, at any time or times during the term hereof, title to the Claims, or any parts thereof, is or may be contested by any person, corporation or government agency, Optionee shall have the right, but shall not be required, to defend or quiet the title thereto before any court or administrative body.

If Optionee elects to defend or quiet title, Optionee shall have the right to deduct, from payments to Optionor hereunder, all reasonable costs and expenses of such actions, including, but without being limited to, attorney's fees, unless such actions result from Optionee's failure to perform its obligations set forth in this agreement. If Optionee elects not to defend or quiet title, Optionor may do so at Optionor's expense. Optionee

at any time may withdraw from, or discontinue, any title litigation, or any steps it may have undertaken to defend or quiet title.

If neither Optionee nor Optionor elects to defend or quiet title, or in the event that either party does attempt to defend or quiet title and is unable to do so to Optionee's reasonable satisfaction, then, if Optionee exercises its Purchase Option hereunder, the purchase price to be paid for the Claims shall be reduced proportionally, as provided in the above Section 8.

RECEIVED FEB 22 1971 O.M.E. SPOKANE, WASH.

SECTION 10. TITLE;LOSS OR ENCUMBRANCE

If Optionor's title to the Claims is lost or encumbered as a result of Optionee's failure to perform its obligations hereunder, Optionee shall be liable to Optionor for such loss or encumbrance only if this agreement is thereafter terminated in any manner other than by exercise of the Purchase Option. Said liability shall not exceed the lesser of the fair value of the Claims lost, or the amount of the encumbrance, as the case may be, or a sum in the same proportion of the purchase price set forth in the foregoing Section 3 as total acreage or interest lost bears to the total acreage or interest owned by Optionor in the Claims; it is provided, however, that Optionee shall not be liable for any loss or encumbrance resulting from decisions of any court or government authority that work performed by Optionee as assessment work required hereunder is inadequate for, or does not constitute, the assessment work required to preserve title to the unpatented Claims.

SECTION 11. ANNUAL ASSESSMENT WORK

A. Optionee shall perform all annual assessment work

required by law to hold the unpatented claims wholly owned by Optionor for each assessment year, as defined by statute, within the period beginning upon the date hereof and ending upon the date on which this agreement expires or terminates for any reason; it is provided, however, that if this agreement expires or is terminated on or before the first day of March in any such assessment year, Optionee shall have no obligation to perform assessment work for such assessment year or thereafter.

RECEIVED
FEB 22 1971
O. M. E.
SPOKANE, WASH.

If this agreement expires or is terminated after the first day of July in any assessment year, Optionee shall have the right to enter into the unpatented Claims at any time or times during the remainder of said assessment year to perform or complete the above required assessment work for said assessment year, without payment or other obligation to Optionor or others.

Optionee shall prepare and record, for and in behalf of Optionor, an affidavit of labor and improvements during each assessment year for which Optionee performs the above assessment work, which affidavit shall be prepared and recorded as required by statutes of the state in which the unpatented Claims are located.

B. The assessment work to be performed by Optionee hereunder may consist of, but is not limited to, excavation, road building, drill site preparation, drilling, trenching, pitting, geological or other surveys, or other work selected by Optionee in its sole discretion, provided that the work so performed is of a type customarily accepted as assessment work, and is of the value of at least the amount then required by applicable statute or government regulation.

SECTION 12. PATENT PROCEEDINGS

Upon request of Optionee at any time or times during the term hereof, Optionor forthwith shall begin and complete, in Optionor's name but at Optionee's expense, proceedings to patent any of the unpatented Claims. Optionor shall execute any and all documents required for this purpose. If Optionor begins patent proceedings and Optionee thereafter requests Optionor to discontinue them, or if this agreement is terminated while patent proceedings are pending, Optionee shall have no further obligation with respect thereto except to pay any unpaid expenses accrued in such proceedings prior to its request to discontinue, or prior to termination, whichever first occurs.

RECEIVED FEB 22 1971 O. M. E. SPOKANE, WASH.

SECTION 13. RELOCATION AND AMENDMENT OF CLAIMS

If the unpatented Claims do not constitute a body of contiguous and adjoining claims without interior gaps, Optionee, in the name of Optionor, shall have the right, but shall not be required, to amend the locations of any one or more unpatented Claims for the purpose of eliminating interior gaps, and Optionor promptly shall execute any documents necessary for that purpose. If the location of any unpatented Claim was for any reason defective, Optionee shall have the right, but shall not be required, to relocate the defective unpatented claim in the name of Optionor for the purpose of curing the defect. Expenses incurred by Optionee in amending or relocating Claims will be paid by Optionee. All unpatented Claims as amended or relocated hereunder shall be a part of the Claims as though specifically described herein. Optionee, at its discretion, may repair or replace any claim location monuments or markers which have become wholly or partially obliterated or destroyed.

Nothing in this Section shall limit the rights or increase the obligations of either party concerning defects in title as set forth in the above Section 8.

cerning any Boundary Interests, except to perform annual assessment work, in the manner set forth above, on all unpatented mining claims wholly owned by Optionor within the Boundary Interests which Optionee elects to include as part of the Claims, all subject to the foregoing provisions concerning assessment work.

RECEIVED FEB 22 1971 O. M. L. SPOKANE, WASH.

SECTION 15. POSSESSION; EXPLORATION

During the Option Period, Optionee shall have the right to exclusive possession of the claims, and the exclusive right, through its authorized agents, employees, contractors, and representatives, to enter into and upon the Claims for all purposes of this agreement, [illegible] and at such locations as Optionee, in its sole discretion, deems desirable, to prospect, explore, develop, drill, trench, strip, excavate, test pit, sample, and conduct any and all exploration and development activities for the purpose of determining the mineral or metal content of the Claims.

While the Purchase Option remains in effect, Optionee shall have the right to remove from the Claims all such materials and minerals as it deems necessary to properly test, explore or develop the Claims, ~~[illegible]~~

Optionee shall have the exclusive right to use all structures, tools and facilities located on the Claims, and the right to place and use thereon, and to remove, all such equipment, vehicles, machinery, buildings, structures, and facilities as it may deem desirable from time to time.

SECTION 16. LIENS AND ENCUMBRANCES

Optionee shall pay all wages, expenses, and other obligations

SECTION 14. BOUNDARY INTERESTS

For all purposes of this agreement, the term "Boundary Interests" shall mean any and all mining claims, or interests therein, or other rights or interests in land, owned by Optionor, in addition to the Claims as described above, any part or parts of which are within Two (2) miles from the nearest boundary of any part of the Claims.

If any Boundary Interests are owned by Optionor, or are located or acquired by Optionor prior to the expiration or termination of this agreement, Optionor forthwith shall notify Optionee in writing, describing each such Boundary Interest. Optionee shall have the right, at its option, to elect to have any or all of the Boundary Interests made a part of the Claims, as though specifically described in the description of the Claims in this agreement, with the right, at its option, to explore and develop the same, and the right, upon exercise of the Purchase Option, to have the Boundary Interests conveyed to Optionee as part of the Claims, as additional consideration for this agreement, without any payment therefor other than the purchase price set forth in the foregoing Section 3 for the Claims without the Boundary Interests. Any or all mining claims made a part of the Claims under this Section may be amended or relocated by Optionee in the manner provided in the preceding Section.

If Optionee elects to have any Boundary Interests made a part of the Claims hereunder, it shall mail or deliver to Optionor, within sixty (60) days after receipt of each such notice from Optionor, written notice of such election. Optionee's election shall be effective upon mailing or delivering the above notice to Optionor.

Optionee shall have no obligations to Optionor or others con-

RECEIVED
FEB 22 1971
O. M. E.
SPOKANE, WASH.

incurred by it in prospecting, exploring and developing the Claims and in performing annual assessment work hereunder. Optionee shall keep the title to the Claims free and clear of liens and encumbrances resulting from its operations hereunder, and neither party shall cause or create any liens or encumbrances which might affect title to the Claims during the term hereof.

If authorized by applicable statutes, Optionor may post upon the Claims notices of non-liability for labor and material furnished to Optionee, and Optionee shall maintain, during the term hereof, any such notice posted by Optionor.

SECTION 17. CONDUCT OF OPERATIONS. INDEMNITY

All of Optionee's operations hereunder shall be conducted in a careful and workmanlike manner.

Optionee shall indemnify and save harmless Optionor from and against liability, claims and causes of action for injury to, or death of, persons, and damage to property, resulting from Optionee's operations hereunder.

SECTION 18. TAXES

RECEIVED
FEB 22 1971
U.M.E.
SPOKANE, WASH.

Optionee shall pay all taxes and assessments levied or assessed upon its equipment and operations hereunder, and upon all building and facilities owned or placed by it upon the Claims.

Optionee shall reimburse Optionor for all taxes and assessments levied or assessed against the Claims during the term hereof and paid by Optionor. Optionor shall pay all such taxes and assessments before the same become delinquent, and shall deliver to Optionee duplicate receipts evidencing payment; provided, however, that all

of the above taxes levied or assessed against the Claims for the calendar year in which this agreement is executed, and for the calendar year in which this agreement terminates, either by expiration of the term hereof or by act of either party, shall be apportioned between the parties, and Optionee shall reimburse Optionor for the same proportion of all said taxes paid by Optionor for such calendar years as the total number of days in which this agreement remains in effect during such calendar years, respectively, bears to the entire said calendar years.

RECEIVED
FEB 22 1971
U.M.E.
SPOKANE, WASH.

SECTION 19. TERMINATION

A. By Optionor. In the event of any default by Optionee in the performance of its obligations hereunder, Optionor shall give to Optionee written notice to cure the default. If the default is not cured within sixty (60) days after receipt of the notice, or if Optionee has not within that time begun action to cure the same and does not thereafter diligently prosecute such action to completion, Optionor may terminate this agreement by delivering to Optionee written notice of such termination, subject to Optionee's right to remove its property and equipment from the Claims, as hereinafter provided. Optionor shall have no right to terminate this agreement except as set forth in this paragraph.

B. By Optionee. Optionee shall have the right to terminate this agreement at any time upon written notice delivered to Optionor, which termination shall take effect upon the date set forth in the notice, or, if no date is specified, upon the date of delivery of the notice. Upon such termination, all right, title and interest of Optionee under this agreement shall terminate, and Optionee shall not be required to make any further payments, or to perform any further obligations

hereunder, except payments or obligations which then have accrued under the express provisions of this agreement, and which have not been paid or performed.

C. Removal of Property. Upon any termination of this agreement, whether by expiration of the term hereof or by act of either party, Optionee shall have a period of one year from and after the effective date of termination in which to remove from the Claims all of its machinery, buildings, structures, facilities, equipment and other property of every nature and description erected, placed or situated thereon.

RECEIVED FEB 22 1971 O.M.E. SPOKANE, WASH.

SECTION 20. DELIVERY OF DATA

Within a reasonable time after termination of this agreement upon receipt of written request from Optionor, Optionee shall deliver to Optionor a copy of factual drill hole logs, factual geologic maps, and factual assay reports prepared by Optionee resulting from work performed by Optionee on the Claims under this agreement. Optionee shall not be required to disclose or deliver to Optionor or to anyone information concerning, or which might tend to reveal, processes, techniques or equipment developed by or for Optionee, or with which it may be experimenting, or any processes, techniques or equipment which it is under obligation to any other person or company not to reveal.

Optionee shall not be required to deliver or provide any data or information hereunder concerning any of the Claims as to which this agreement is still in effect, or as to which its Purchase Option has been exercised.

SECTION 21. ASSIGNMENT OR SALE

A. By Optionor; right of first refusal.

If at any time or times during the term hereof, Optionor intends to sell, assign, transfer or convey the Claims, or any part thereof, Optionor shall deliver to Optionee at least thirty (30) days' prior written notice, describing all of the terms of the proposed sale,

assignment, transfer or conveyance. Optionee shall have the exclusive right, during the above thirty (30) day period, at its election, to purchase the Claims described in said notice for a sum of money equal in value to the consideration which would be received by Optionor under the terms set forth in the written notice. If Optionee elects to purchase the claims described in the notice, it shall so notify Optionor in writing within the said thirty day period, and the closing of the sale, transfer of title, and payment of the purchase price, shall be held within sixty days after the date of the notice to Optionor, at a time and place reasonably convenient to both parties. If Optionee has not notified Optionor of its above election within the thirty (30) day period, Optionor shall have the right, for an additional thirty (30) day period from and after the expiration of the above notice period, to sell, assign, transfer or convey Optionor's interest in the Claims as described in said notice, upon the terms and conditions set forth in said notice, but all subject, however, to this agreement, and all exploration and Purchase Option rights of Optionee under the above Section 1. The provisions of this paragraph shall continue to apply to any and all parts of the Claims not sold, assigned, transferred or conveyed by Optionor during the above additional thirty (30) day period. Nothing in this Section, and no sale, assignment, transfer or conveyance under this Section, shall limit or prevent Optionee from exercising any and all rights granted Optionee hereunder, including, but without being limited to, the Purchase Option set forth in the above Section 1.

RECEIVED
FEB 22 1971
O. M. E.
SPOKANE, WASH.

B. By Optionee

Optionee shall have the right to assign or subcontract to others the performance of exploration and development work hereunder, subject to all of the terms of this agrement, but no such assignment or subcontract shall relieve Optionee of its obligations

to Optionor hereunder. Optionee further shall have the right, at any time, to assign its rights and interests under this agreement to any company or any reliable party.

C. Binding Effect

All of the terms and conditions of this agreement shall run with the land and shall inure to the benefit of, and be binding upon, the respective heirs, successors and assigns of the parties hereto.

SECTION 22. DISPUTES NOT TO INTERRUPT OPERATIONS

Subject to the right of Optionor to terminate this agreement for default, disputes or differences between the parties hereto shall not interrupt performance of this agreement or the continuation of operations hereunder. In the event of any dispute or difference, operations may be continued, and settlements and payments may be made hereunder, in the same manner as prior to such dispute or difference, until the matters in dispute have been finally determined between the parties, and thereupon such payments or restitutions shall be made as may be required under the terms of the settlement or final determination of the dispute.

SECTION 23. FORCE MAJEURE

RECEIVED FEB 22 1971 O.M.E. SPOKANE, WASH.

Optionee shall not be liable for failure to perform any of its obligations hereunder during periods in which performance is prevented by any cause reasonably beyond Optionee's control, which causes hereinafter are called "force majeure". For purposes of this agreement, the term "force majeure" shall include, but shall not be limited to, fires, floods, windstorms, other damage from the elements, strikes, riots, unavailability of transportation or necessary equipment, action of government authority, litigation, acts of God and acts of the public enemy. The duration of the Option Period, and the right to explore and develop the Claims, shall be extended for a period equal to the period for which performance is suspended by reason of the force majeure. All periods of force majeure shall be deemed to begin at the time Optionee stops performance hereunder by reason of force majeure. Optionee shall notify Optionor of the beginning and ending date of each such period.

If at any time Optionee notifies Optionor that, by reason of force majeure, Optionee is unable to perform assessment work required hereunder, Optionor shall perform the assessment work at Optionee's expense during the period of force majeure, unless Optionor also is prevented from so doing by reason of force majeure, as defined above.

SECTION 24. NOTICES

Any notice required or permitted to be given hereunder shall be deemed properly given upon delivering same personally to the party to be notified, or upon mailing such notice, by registered or certified mail, return receipt requested, to the party to be notified, at its address hereinafter set forth, or such other address within the United States of America as the party to be notified may have designated prior thereto by written notice to the other.

OPTIONOR R. M. Shoup

George E. Shoup

Lena Shoup

OPTIONEE Reynold Miller

Rental payments under Section 4, or Notice of Election to Exercise the Option under Section 6 shall be effective for purposes of preserving Optionee's rights upon proof of the depositing of such notices or payments in a regular depository for United States mails.

SECTION 25. RECORDING

Whenever requested to do so by Optionee during the term hereof, Optionor shall execute counterparts or a memorandum of this agreement in order to place on record Optionee's rights and interests in the Claims under this agreement. The recording counterparts or memorandum shall be prepared by Optionee, and shall contain or describe those terms and provisions of this agreement which Optionee deems

necessary in order to comply with the applicable recording laws of the state in which the Claims are situated. All statutory recording fees shall be paid by Optionee.

SECTION 26. MULTIPLE OWNERSHIP OF THE CLAIMS

The term "Optionor," as used in this agreement, applies individually and collectively to all owners of the Claims executing this agreement, or counterparts hereof. All payments to be made by Optionee to Optionor hereunder shall be divided by Optionor among said owners, as their several interest may appear.

Each Optionor severally agrees that, for the purpose of determining the majority in interest among them in the Claims, considered as a group or single parcel, each Optionor shall be deemed to have the proportionate interest hereinafter respectively set forth.

R. M. Shoup	½ Interest
George E. Shoup and Lena Shoup	½ Interest

This agreement may be executed in any number of counterparts with the same effect as if all parties had signed the same document, and shall be binding upon all owners of the Claims executing counterparts, even if other owners of the Claims have executed other counterparts, or have not entered into this agreement.

All acts of Optionor authorized or required hereunder in the nature of approval, consent, demand or notice, shall be done only by the joint action of the owner or owners of more than one-half of the entire Optionor's interest in the Claims, and Optionee shall have the right at all times to rely upon the acts of the majority authorized hereby.

SECTION 27. INTERPRETATION OF AGREEMENT

The Section headings in this agreement are inserted for convenience only, and shall not be considered a part of this agreement, or used in its interpretation.

SUPPLEMENTAL AGREEMENT

THIS AGREEMENT, Made and entered into this 10th day of June, 1969, by and between R. M. SHOUP, a single man, and LENA SHOUP, a single woman, of Salmon, Lemhi County, State of Idaho, parties of the first part, hereinafter called Optionor, and REYNOLD MILLER, a married man, party of the second part, hereinafter called Optionee:

RECEIVED
FEB 22 1971
SPOKANE, WASH.

WITNESSETH:

WHEREAS, The parties hereto entered into a certain Exploration and Option Agreement, dated December 1, 1967; and,

WHEREAS, The said Lena Shoup is the surviving heir of the said George E. Shoup, now deceased; and,

WHEREAS, The said Reynold Miller contemplates shipping certain ore under the provisions of the above described Exploration and Option Agreement, and the parties hereto desire to clarify the royalty arrangement concerning said shipments; and,

WHEREAS, the parties have agreed to modify and supplement the said original Exploration and Option Agreement, dated December 1, 1967, to secure the present needs of the parties;

NOW, THEREFORE, IT IS MUTUALLY AGREED Between the parties hereto, for and in consideration of the covenants and agreements herein contained, as follows:

I

That the said Reynold Miller shall pay to the parties of the first part, a Two (2%) per cent net smelter return on all ores shipped from the property described in the original Agreement;

II

The parties hereto agree that the payment described in Paragraph I shall be applied on the annual payment due by the second party to the first

parties in the year in which the ore is shipped;

III

IT IS UNDERSTOOD AND AGREED by the parties hereto, and the first parties hereby covenant that a certain contingency described in Section 27 of the original Exploration and Option Agreement, to-wit:

"This agreement is contingent upon the termination of an agreement between the optioners herein and J. Thomas Barnes. Also, optionors hereby hereby designate Fred H. Snook as the escrow agent."

has been satisfied by the said parties of the first part;

FEB 22 1971
O. M. E.
SPOKANE, WASH.

IV

That said first parties hereby covenant and agree to indemnify and hold harmless the said second party of any liability whatsoever, including court costs and attorney fees, incurred in connection with or in relation to the above described contingency.

V

This contract shall not be deemed a new contract by the parties except as the necessities of the case may require and as to the provisions expressly stated herein which are not covered by the original agreement, but this supplemental agreement shall be construed as modifying, supplemental to, and a construction and explanation of the status of the parties on the original agreement as of the date hereof. It shall in all respects as hereinabove mentioned be construed as a reaffirmance of said original agreement and it shall not be construed as a revocation or cancellation of the original agreement, but as an express affirmance of the existing original Agreement, whether such be inter partes as a whole, or by the various parties to the contract, but nevertheless, if there arises any conflict between the intent and meaning of the original agreement and this agreement, the provisions of this agreement shall prevail as to the real intent of the parties to the original

agreement; anything in such agreement to the contrary contained notwithstanding.

IN WITNESS WHEREOF, THE PARTIES HERETO have set their hands and seals the date first above written.

Re: OME-6847 (Copper-Gold-Silver)
Reynold P. Miller
June Bug Claims
Lemhi County, Idaho

Dear Mr. Miller:

Careful study of your application for financial assistance in exploring the referenced property and of other information available to us indicates that the probability of disclosing significant copper, gold, and silver ore reserves is not sufficiently promising to justify Government participation in the proposed exploration. Accordingly, we regret to inform you that your application is denied.

We wish to thank you for your interest in the minerals exploration program.

Sincerely yours,

Harold Kirkemo

Memorandum

To: The Record

From: Chief, Office of Minerals Exploration

Subject: OME-6847 (Copper-Gold-Silver)
Reynold P. Miller
June Bug Claims
Lemhi County, Idaho

Justification for Denial of Application

The Applicant proposes drilling 23 diamond drill holes in an area about a mile square to explore what he believes is a large low grade copper deposit with associated values in gold and silver. Total cost of the project is estimated to be $85,000.

Upon examining the property, the Field Officer noted many veins containing chalcopyrite with azurite and malachite coating bedding planes and cleavage surfaces in wall rocks adjacent to the veins. The widespread copper stain led the Applicant to believe a large, low grade copper deposit was present. Richer parts of two veins were sampled. Assays show 0.27 and 1.05 percent copper, nil gold and silver over widths of 8 and 9 feet, respectively.

The Field Officer concluded that the veins were too low grade to be mined underground, and were too widely spaced to be amenable to an open pit operation. He, therefore, recommended that the application be denied, and I concur in the recommendation.

MEMORANDUM

To: Chief, Office of Minerals Exploration

From: Field Officer, Region I

Subject: Application examination and recommendation
OME-6847 (Copper-gold-silver)
Reynold P. Miller
June Bug Claims
Lemhi County, Idaho

INTRODUCTION

Mr. Reynold P. Miller has applied for OME assistance to explore the June Bug claims, some 22 miles southeast of Salmon, Idaho, for copper-gold-silver ore bodies by diamond drilling. He estimates the total cost of the work will be $85,000. I examined the June Bug property on Wednesday, June 16, 1971, with Mr. Miller, who drove me to nearly all the important outcrops. We spent about three hours on the property, during which I collected 3 samples for assay.

RECOMMENDATION

I recommend that the application be denied. Several quartz and quartz-carbonate veins cut Precambrian argillites and quartzites on the June Bug claims. Some of the veins are sparsely mineralized with chalcopyrite. Oxidation has developed azurite and malachite, which stains a large area. Samples indicate that the veins contain less than one percent copper and no gold or silver. Country rock adjacent to the veins is copper-stained, however there is no obvious alteration that would suggest a large low-grade deposit. The veins are too poorly mineralized to be mined underground and are too narrow to be mined in open pits.

ON-SITE
APPL. REPORT

APPLICANT

Mr. Reynold P. Miller
P. O. Box 936
Homedale, Idaho 83628 Tel: 208-337-3661

Mr. Miller states in his application that he has been in the mining and ore processing business for approximately 20 years. He told me that his main source of income at present is from a bar in Homedale, from which he nets about one hundred dollars a day. He has, however, been active in buying and selling mineral properties and is familiar in part with certain aspects of mining.

PROPERTY

The applicant's property includes 58 unpatented claims designated June Bug 1 through 58. June Bug claims 1-17 are being purchased from Richard M. and Lena Shoup of Salmon, Idaho; the rest of the claims have been recorded in the applicant's name. Mr. Miller told me that the claims were actually staked by a private mining company who studied the area last year. I did not check the courthouse records to verify the claim ownership or the details of the location notices. Many of the claims staked by the private mining company probably overlap parts of the June Bug 1-17 claims, according to Mr. Miller. Figure 1 (Fig. 1 -- Composite claim, topographic and geologic map, June Bug claims, Secs. 4, 5, 6, and 8, T. 18 N., and Sec. 32 and 33, T. 19 N., R. 23 E., B.M., Lemhi County, Idaho) shows the general location of the claims. The application does not show the exact location of the claims being purchased from the Shoups. However, the location post for the June Bug 15 claim is near the vein exposed in Mormon Canyon near the west edge of the June Bug 49 claim (Fig. 1).

LOCATION AND ACCESSIBILITY

The June Bug claims are along the north and south slopes of Mormon Canyon, a tributary of McDevitt Creek whose headwaters are along the east slope of the Lemhi range. Altitudes in the claim area range from 5,800 to 7,500 feet. The north facing slopes are timbered; other slopes are untimbered and grass-covered. Outcrops are limited to stream beds or bulldozer cuts.

The property can be reached from Salmon, Idaho, by driving southeast along Idaho 28 for 22.3 miles to McDevitt Creek. Turn right and follow the McDevitt Creek road 5.6 miles to a turnoff to the left onto an unsurfaced road that follows Mormon Canyon. The claims cover the area of confluence between Mormon Canyon and McDevitt Creek and extend up Mormon Canyon for nearly 1-1/2 miles.

Bulldozed access roads traverse many parts of the claims and lead to all pertinent outcrops. Wet weather would probably prevent use of the roads by ordinary passenger vehicle.

GEOLOGY

Quartz and quartz-carbonate veins cutting argillites and quartzites of Precambrian age contain sparse amounts of copper on the June Bug claims. Ross (1925, p. 8 and pl. I) assigned the metasedimentary rocks to the Belt Series. Rupple (oral commun. 1971) suggested to me that country rock on the June Bug claims is the lowest or oldest unit in the Belt Supergroup. The rocks are generally gray and gray-green, thin- to moderately thick-bedded, argillaceous, micaceous, and include quartzite. Slaty cleavage is conspicuous in nearly all exposures and cuts the beds at high angles, which suggests that the beds are not overturned. The applicant's map, on which bedding attitudes are shown, indicates broad folds. Rupple thinks that there has been considerable thrust faulting. No igneous intrusives crop out but intrusive masses might be at shallow depths in Lemhi valley. Detailed mapping of the Poison Peak, Idaho, quadrangle, which includes the June Bug c laims, is scheduled for this summer by a student from the University of Idaho (Rupple, oral commun. 1971).

Some of the veins crop out as conspicuous quartz ribs that can be traced a few hundred feet along the surface. Other veins have been exposed in bulldozer cuts and do not crop out naturally. All the veins plotted on the applicant's map (Fig. 1) trend west-northwest to northwest and dip steeply northeast. They range in thickness from 3 to 25 feet.

Two types of material are predominant in the veins. Gray, massive quartz is the most common. Commonly adjacent to the quartz is honeycombed limonitic material that is from a few inches to as much as 4 feet thick. The vein exposed about 400 feet northeast of the adit on June Bug claim 54 (Fig. 1) is perhaps a composite of two veins; the northeast part, about 8 feet thick, is light cream colored, calcareous, and brecciated; the rest of the vein, also about 8 feet thick, is massive quartz. The cream-colored rock is referred to by the applicant as porphyry. Perhaps this designation is correct, but alteration and brecciation has so obscured the original characteristics of the rock that I can't be certain. Ross described the veins in the adit (Ross, 1925, pp. 41-42) and on the south slope of the valley but did not mention porphyry.

The ore minerals are chalcopyrite and its oxidation products. The chalcopyrite commonly occurs as grains less than 1/4 inch across that are surrounded by dark material or blue and green copper carbonates. In one recently broken rock, malachite forms long slender crystals as much as 1/2 inch long. The chalcopyrite grains are widely separated and in no place form as much as 5 percent of the rock. Two samples of vein material collected during the examination assayed 1.05 percent copper across 9 feet, and 0.27 percent copper across 8 feet (Fig. 1).

The applicant reports some samples cut along the bulldozed access roads for about 100 feet assayed more than one percent copper. There were no gold and silver values in the samples I had assayed. Applicant reports assays of 0.2 to 0.3 ounces of silver per ton in some of his samples. Obviously the precious metals do not constitute an important part of the copper ores on the June Bug claims.

The wall rock adjacent to the veins has been slightly folded, but has not been disturbed for more than a few inches from the vein. Alteration adjacent to the veins is not more pronounced than several feet from the vein except for some silicification. Crystalline magnetite was collected from one location near the north end line of June Bug claim 39, but its relationship to the copper-bearing veins is obscure.

In some respects the copper veins are similar to those at the Pope-Shenon mine about 12 miles to the northwest (OME-6651). However, the June Bug veins are not as richly mineralized as the Pope-Shenon veins. Obviously there are many copper-bearing veins that cut the Precambrian rocks in the northern Lemhi Range. The source of the copper is unknown, but perhaps is related to shallow intrusives. There seems to be no widespread wallrock alteration related to the copper mineralization that would lead one to search for a large low-grade deposit that can be open pit mined.

The applicant reports that several large mining companies have studied the area and completed geochemical surveys and I. P. studies, but no company has exercised an option to buy the claims.

APPLICANT'S PROPOSAL

The applicant proposes to explore his property by 23 diamond core drill holes, averaging about 210 feet long. Expected cost of the work, including contingencies, salaries of supervisor, assay costs, and legal and accounting fees, is $85,000. The applicant's purpose is to determine if a large low-grade copper ore body, amenable to open pit mining, is at shallow depth on the June Bug claims. He hopes that there is a zone of enrichment below the oxidized parts of the veins.

APPRAISAL OF PROPOSAL

There are many copper-bearing veins on the applicant's property and there is scattered azurite and malachite along the bedding planes and cleavage surfaces in country rock adjacent to the veins. Residual soil contains many rock fragments that have copper stain. Because of the rather widespread copper stain, the applicant believes that his property contains a large low-grade copper deposit.

Samples of the richer parts of the exposed veins assayed 0.27 and 1.05 percent copper across widths of 8 and 9 feet respectively. Precious metals are not present. The veins are too low grade to be mined underground and too narrow to be open-pitted.

Copper stain in the country rock is apparently confined to within a few feet from the quartz veins and seems to be related to the copper in the veins. The widespread copper stain in the residual soil is probably from the more resistant vein fragments in the residuum. There is no good evidence for a large low-grade ore deposit at the shallow depths to which the applicant plans to drill.

CONCLUSIONS

No large low-grade deposit is likely to be found by drilling to depths of 210 feet on the June Bug claims. Perhaps deeper drilling might be successful, but some indirect evidence of a large disseminated ore body should first be learned by geophysical or geochemical methods. The veins are somewhat parallel and do not seem to converge on the applicant's property--such a convergence could be an exploration target.

Although there are scattered copper stains and several low grade copper-bearing quartz veins on the June Bug claims, there is no target worthy of exploration. The application for OME assistance should be denied.

Re: OME-6847 (Copper)
Reynold P. Miller
June Bug Claims
Lemhi County, Idaho

Dear Mr. Miller:

The application for assistance to explore the June Bug claims has been reviewed by the Washington office and referred to Mr. Willard P. Puffett, Field Officer, Region I, Office of Minerals Exploration, U. S. Geological Survey, U. S. Courthouse, Room 656, West 920 Riverside Avenue, Spokane, Washington 99201

Although a number of questions are yet unanswered, Mr. Puffett will notify you if any additional information concerning the application is needed.

Sincerely yours,

Harold Kirkemo

Memorandum

To: Field Officer, Region I

From: Chief, Office of Minerals Exploration

Subject: OME-6847 (Copper)
Reynold P. Miller
June Bug Claims
Lemhi County, Idaho

The subject application is referred to you for consideration, a possible field examination, and recommendations.

There are a number of questions yet to be answered to complete this application, but if you determine from a field examination that the geological factors do not warrant further consideration, answers solely to complete the application are academic. Among the deficiencies in the application we note the following:

1. The estimated cost of the project is $50,000.00 according to the application, but $85,000.00 according to the Applicant's letter of April 22, 1971. The two bank letters are for a $50,000.00 loan.

2. The Lien and Subordination Agreements are unacceptable. The property is not described properly, and reply to item 3 should be "none" if R. M. and Lena Shoup own the claims. Item 6 should be "none" if there are no additional provisions. The date should be completed, and the owners should sign the document and give their addresses.

3. Information on recordation of claims is incomplete, particularly for the June Bug 18 through 58 claims where the book and page numbers are not given.

4. The Applicant's response to item 7 is virtually negligible.

Instead of asking the Applicant to answer all of these questions now, the better course may be to depend on you for guidance.

Re: New application (Copper-Gold-Silver)
June Bug Claims
Lemhi County, Idaho

Dear Mr. Miller:

The following additional information is needed before I can forward your recent application to our Washington, D. C., office. Please refer to the back of MME Form 40 for the designated items.

1.(c) Please state how you propose to furnish your share of the exploration cost. Money spent prior to the contract date cannot be considered part of the applicant's share of the cost.

7.(a) Independent contracts. Cost estimates should be supported by bids from three contractors if possible. If bulldozing in addition to diamond drilling is necessary, furnish bids from those who contract this work.
(b) Personal services. List salaries of the supervisor and/or geologist whom you plan to hire.
(g) Miscellaneous. List estimated number of assays and cost, sampling supplies, and accounting costs.

Submit a map of your claims on which is shown the location of the proposed exploration work.

Sincerely,

cc: OME

Willard P. Puffett
