Re: Docket No. DMEA-3608 (Uranium)
163 acres in Secs. 21 and 28,
T. 21 N., R. 27 W., 5th P.M.
Barry County, Missouri

Dear Mr. Burtner:

Your application for aid in an exploration project and other information available to us in Washington concerning your above-described property have been reviewed.

Projects approved by the Defense Minerals Exploration Administration must, in its judgment, show definite promise of yielding materials of acceptable grade in quantities that will significantly improve the mineral supply position for the National Defense Program.

Careful study of all our information indicates to us that the probability of disclosing minable ore reserves by your proposed program is not sufficiently promising to justify Government participation. We regret to advise you, under these circumstances, that your application for exploration assistance is denied.

We wish to thank you for your interest in the Defense Minerals Program and for bringing your property to our attention.

Sincerely yours,

C. O. Mittendorf (fw)

Summary of Proposed Project

Subject: Denial of application for an exploration project

Docket No.: DMEA-3608

Commodity: Uranium

Applicant: Burtner's, Inc.,
1328 S. Florence
Springfield, Missouri

Property: SW/4 of SE/4 and 3 acres in N. W. corner of SE/4 of section 21. E/2 of NW/4 and NW/4 of NE/4 of section 28, all in T. 21 N., R. 27 W. 5th P. M., Barry County, Missouri

Date of application: December 16, 1954

Amount of application: $13,134

Work proposed: The Applicant proposes to explore a subterranean cavern for radioactive materials reported found there by Logan Lieb and some German scientists during the period of World War I. He proposes to make the cavern entrance accessible and safe, to map the cavern, cut channel samples along the "ore" exposures, and use an electric drill to augur shallow drill hole samples in the roof, floor, walls, and pillars of the cavern.

Field Team Report: The application was not referred to the Field Team for an examination and report because of the obvious lack of merit in the proposed project.

In transmitting the application to the Washington Office, the Executive Officer, DMEA Field Team, Region VI, stated he had virtually no tangible data pertinent to the area or the cavern the Applicant has tried to describe in his application. The Executive Officer noted that the application does not include some of the supporting statements that Mr. Burtner made verbally to him during his several visits to the Regional Office during December,

although the Applicant stated he has proof of the presence of radioactive material in the cavern in accordance with the legendary Logan Lieb story.

Commodity Committee Members' Comments:

Geological Survey - E. L. Newcomb, December 30, 1954

States that a search through the Missouri State Survey publications did not disclose any appropriate information with regard to the origin of the Logan Lieb myth. The Missouri State Survey Information Circular No. 5, (1949) Notes on Uranium, does not mention a deposit in Barry County, although it does briefly cover known uranium deposits which occur elsewhere in Missouri.

More information is needed before a field referral can be considered, which may be obtained from both the A.E.C. and the Applicant.

The present application does not indicate that a sound, worthwhile DMEA project has been presented, nor a proposal which merits exploration assistance.

Bureau of Mines - John E. Crawford, January 10, 1955, following discussion with Joseph O. Hosted, representative of the Atomic Energy Commission:

"We suggest that the application be denied, inasmuch as on November 18, 1954, Robert E. Russell of the Atomic Energy Commission made a preliminary reconnaissance survey of the subject property and reported no evidence of uranium mineralization was found thereon."

Rare and Miscellaneous Metals Division - Ernest Wm. Ellis, January 12, 1955:

Upon checking with the AEC relative to Item 3 of Clinton C. Knox's letter of December 17, 1954, it was ascertained that no sample had been received by that Agency although reports had reached them that a sample had been sent and as a result of said report, several searches had been instigated.

Recommend that the application be denied for the reasons outlined in the above Uranium Commodity Committee members' comments.

$13,134 - Uranium

Memorandum

To: E. W. Ellis, Defense Minerals Exploration Administration

From: E. L. Newcomb, U. S. Geological Survey

Subject: Review of application

We are not able to add very much to the information already presented in the application.

An effort has been made to determine the origin of the Logan Lieb myth. However, a search through the Missouri State Survey publications did not disclose any appropriate information. The Missouri State Survey Information Circular No. 5, (1949) Notes on Uranium, does not mention a deposit in Barry County, although it does briefly cover known uranium deposits which occur elsewhere in Missouri.

From Mr. Knox's transmittal letter, I would assume that the A.E.C. offices at Denver and Washington could help us considerably in determining our best course of action on this application.

More information is needed before a field referral can be considered, which may be obtained from both the A.E.C. and the applicant.

The present application does not indicate that we have a sound, worthwhile DMEA project under consideration, nor a proposal which merits exploration assistance.

Re: Burtner's Inc.
Application for a uranium exploration project contract, Barry County, Mo.

Dear Sirs:

Transmitted herewith are the original and two copies of the subject application brought to this office today by Mr. H. L. Burtner, representing the applicant corporation. A fourth copy is being retained in the Field Team file awaiting your assignment of a docket number and possible reviews by the Commodity Group and/or a field referral which I believe may be found justifiable.

I have virtually no tangible data pertinent to the area or the cavern Mr. Brutner has tried to describe in this application. He states, however, that he has proof it is the cavern in the interesting story of the legendary Logan Lieb and his early work on the radioactive materials reportedly found there. A similar story has been told applying to the various other caverns and mines in that Missouri-Arkansas locality. Other persons have informed me that a concern which prospected and had some magnetic surveying done about three years ago in the adjacent Radium Springs area, had collected photostatic copies of many of the published accounts of the Lieb story.

I note that the application does not include some of the supporting statements that Mr. Burtner made verbally to me during his several visits here this month when I tried to give assistance and suggestions for its preparation. Among them are the following which might furnish worthwhile references:

1. Reportedly a Mr. Russell of the A.E.C. Offices in Denver, visited this property on November 10, 1954.

2. Mr. Ernest Blessing, Mining Engineer, Conservation Branch of the Geological Survey, Miami, Okla. visited the property about Nov. 1, 1954, in connection with the leases being negotiated on adjacent National Forest land.

3. Reportedly a 5-pound sample of the black rock (presumably like the small piece Messrs. Burtner and Gissy brought in here on December 6, 1954, which appeared different than any uranium ore I had ever seen) was submitted to a Mr. Tully of the A.E.C. Offices in Washington, D. C., sometime during the past year.

Jan. 11-'55
No sample rec'd. to-date by A.E.C.
EWR.

4. The Arkansas State Geologist's Office has analytical data on the radioactive material, according to Mr. Burtner's statement.

5. Mr. Burtner also stated that Dr. Edward L. Clark, Missouri State Geologist, now on temporary duty with the President's Security Council in Washington, D. C., had visited the property.

6. Mr. Burtner also described a second caved entrance to the cavern higher up on the mountain which he believes he can locate and reopen as a part of the proposed excavating work to furnish an exhaust for the bad air in the cavern.

7. Based on his reported one trip into the "ore" area of the cavern, Mr. Burtner described his exploration plan, after making the cavern entrance accessible and safe, would be merely to map the cavern, cut channel samples along the "ore" exposures, and use an electric drill to auger shallow drill hole samples in the roof, floor, walls, and pillars of the cavern.

Sincerely yours,

Clinton C. Knox

APPLICATION FOR AID IN AN EXPLORATION PROJECT, PURSUANT TO DMEA ORDER 1, UNDER THE DEFENSE PRODUCTION ACT OF 1950, AS AMENDED

Not to be filled in by applicant

Docket No. 3608
Metal or Mineral Lead & Zinc
Date Received
Estimated Cost $43,134
Participation (Government Aid)

INSTRUCTIONS

1. *Name of applicant.*—(*a*) State here your full legal name, in the form in which you will wish to contract, and your mailing address: Burtner Inc., 1328 S. Florence Springfield Mo.

(*b*) If other than an individual, add to your name above whether a corporation, partnership, etc., and the name of the State in which incorporated or otherwise organized. A Missouri Corp.

(*c*) If a corporation, add to above statement, titles, names and addresses of officers. see attached list

(*d*) If a partnership, add to the above statement the names and addresses of all partners.

2. *General.*—Read DMEA Order 1, "Government Aid in Defense Exploration Projects," before completing this application. Submit this application and all accompanying papers in quadruplicate (four copies), with your name and address on each sheet of the application and on all accompanying papers. Where sufficient space is not provided on the form for all required information, state it on an accompanying paper, with a reference in each case to the instruction to which it refers by number. Comply with all applicable instructions; or, if not applicable, so state. File the application with Defense Minerals Exploration Administration, Department of the Interior, Washington 25, D. C., or with the nearest field executive officer thereof.

3. *Applicant's property rights.*—(*a*) State the legal description of the land upon which you wish to explore, including all land which you possess or control that may be benefited by the exploration, and excluding any land or interest in land which is not to be included in the exploration project contract SW/4 SE/4 and Inquiries in NW Corner of SE/4 of sec 21, N.W and NW/4 - NE/4 of sec 28 all in T21N, R27W. see 3rd Insert.

(*b*) State any mine name by which the property is known. None at Present

(*c*) State your interest in the land, whether owner, lessee, purchaser under contract, or otherwise Lease

(*d*) If you are not the owner, submit with this application a copy of the lease, contract, or other document under which you control the property. Copy of leases attached

(*e*) If you own the land, describe any liens or encumbrances on it None Not applicable

(*f*) If the land consists of unpatented claims, add to the description above, the book and page numbers for each recorded location notice. Not applicable

4. *Physical description.*—(*a*) Describe in detail any mining or exploration operations which have been or now are being conducted upon the land, including existing mine workings and production facilities. State your interest, if any, in such operations. Also describe accessibility of mine workings for examination purposes. see Inserts.

(*b*) State past and current production, and ore reserves, if any, giving quantities and grades.

(*c*) Describe the geologic features of the property, including mineralization, type of deposit (vein, bedded, etc.), and your reasons for wishing to explore. Illustrate with maps or sketches. Send with your application (but not necessarily as a part of it) any geologic or engineering report, assay maps, or other technologic information you may have, indicating on each whether you require its return to you.

(*d*) State the facts with respect to the accessibility of the project: Access roads, distances to shipping, supply and residence points.

(*e*) State the availability of manpower, materials, supplies, equipment, water, and power.

16—66551-1

5. *The exploration project.*—(*a*) State the mineral or minerals for which you will to explore Uranium

(*b*) Describe fully the proposed work, including a map or sketch of the property showing a plan (and cross sections if needed) of any present mine workings, and the location of the proposed exploration work as related to such features as contacts, veins, ore-bearing beds, etc. See attached sketch.

(*c*) The work will start within 30 days and be completed within 6 months from the date of an exploration project contract.

(*d*) State the operating experience and background of the applicant with relation to the ability to carry out such exploration project, and also that of the person or persons who will supervise the operations.

6. *Estimate of costs.*—Furnish a detailed estimate of the costs of the proposed work (you will have to use a separate sheet), under the following headings. Add the totals under all headings to give the estimated total cost of the project:

(*a*) *Independent contracts.*—(Note.—If the applicant does not intend to let any of the work to contractors, write "none" after this item. To the extent that the work is to be contracted, do not repeat the cost of the contract-work in subsequent items.) State the cost of any proposed independent contracts for the performance of all or any part of the work, expressed in terms of units of work (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved, etc.).

(*b*) *Labor, supervision, consultants.*—Include an itemized schedule of numbers, classes and rates of wages, salaries or fees for necessary labor, supervision and engineering and geological consultants.

(*c*) *Operating materials and supplies.*—Furnish an itemized list, including items of equipment costing less than $50 each, and power, water and fuel.

(*d*) *Operating equipment.*—Furnish an itemized list of any operating equipment to be rented, purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or suggested use-allowance based on present value, as the case may be.

(*e*) *Rehabilitation and repairs.*—Furnish a detailed list showing the cost of any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and which will be devoted to the exploration project.

(*f*) *New buildings, improvements, installations.*—Furnish a detailed list showing the cost of any necessary buildings, fixed improvements, or installations to be purchased, installed or constructed for the benefit of the exploration project.

(*g*) *Miscellaneous.*—Furnish a detailed list showing the cost of repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance, and payroll taxes.

(*h*) *Contingencies.*—Give an estimate of any necessary allowances for contingencies not included in the costs stated above.

NOTE.—No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes), or any other indirect costs, or work performed or costs incurred before the date of the contract, should be included in the estimate of costs.

7. (*a*) Are you prepared to furnish your share of the cost of the proposed project in accordance with the regulations on Government participation (Sec. 7, DMEA No. 1)? Yes.

(*b*) How do you propose to furnish your share of the costs?

☑ Money ☑ Use of equipment owned by you ☑ Other

Explain in detail on acompanying paper.

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief.

ASSIGNMENT OF MINING LEASE

KNOW ALL MEN BY THESE PRESENTS:

That the undersigned, BUTLER HOLLOW MINING COMPANY, INC., a Missouri corporation, hereinafter referred to as Assignor, does hereby assign to BURTNERS, INC., a Missouri corporation, hereinafter referred to as Assignee, all of its right, title and interest in the following described land in Barry County, Missouri, being more particularly described as follows, to-wit:

> The East Half of the Northwest Quarter and the Northwest Quarter of the Northeast Quarter of Section 28 and the Southwest Quarter of the Southeast Quarter and three acres in the Northwest corner of the Southeast Quarter of the Southeast Quarter of Section 21, all in Township 21, Range 27, and containing in all 163 acres, more or less, according to the United States survey thereof, in Barry County, Missouri.

It is further agreed between the parties hereto that all of the right, title and interest in the above described land arises by virtue of a certain lease between the Radium Springs Land Company, Inc., an Illinois corporation, and Homer L. Burtner, Sr., of Springfield, Missouri, which said lease is recorded in Book 208, Page 7, of the Office of Recorder of Deeds of Barry County, Missouri; and the subsequent assignment from Homer L. Burtner, Sr., of an undivided one-third (1/3) interest to E. J. Gissy, of Breese, Illinois; and an undivided one-third (1/3) interest to Herbert Stratton, of Springfield, Missouri; and that the said Homer L. Burtner, Sr., and Lucile Burtner, his wife, E. J. Gissy, a single person, and Herbert Stratton and Lena Mai Stratton, his wife, have subsequently assigned to Butler Hollow Mining Company, Inc., a corporation, the Assignor herein, and that said assignments are recorded in the following book and page numbers in the Office of Recorder of Deeds, Barry County, Missouri: Book _____, Page _____; Book _____, Page _____; and Book _____, Page_____; Book _____, Page _____; and Book _____, Page _____.

It is further understood that the Assignee herein takes subject to the above mentioned lease and subsequent assignments and that the Assignor herein grants no more to the Assignee herein than it had by virtue of the above lease and subsequent assignments.

It is expressly understood by the parties hereto that as a consideration for this assignment that the Assignee agrees to pay a minimum monthly rental of Seventy-five ($75.00) Dollars per month beginning on the _____ day of July, 1954, and that as additional consideration that it shall comply with the rents and royalties provisions in the lease mentioned above and the subsequent assignments by which it is obligated to pay to the Radium Springs Land Company fifteen (15%) percent of the gross market value of all ores and minerals taken from the premises; that Assignee shall pay to Homer L. Burtner and Lucile Burtner, his wife, five (5%) percent of the gross market value of all ores and minerals taken from the premises; that Assignee agrees to pay to E. J. Gissy the sum of five (5%) percent of the gross market value of all ores and minerals taken from said premises; that Assignee agrees to pay to Herbert Stratton and Lena Mai Stratton, his wife, five (5%) percent of the gross market value of all ores and minerals taken from said premises; and that Assignee agrees to pay to Butler Hollow Mining Company, Inc., a corporation, fifteen (15%) percent of the gross market value of all ores and minerals taken from the said premises.

It is further agreed that the accounting for such gross market value of said ores and minerals taken from said premises shall be in accordance with the terms of the lease set out above and all the subsequent assignments.

IN WITNESS WHEREOF, the parties have hereunto set their hands and seals this 2nd day of July, 1954.

MINING LEASE

This Indenture, made this third day of June, 1954, by and between RADIUM SPRINGS LAND COMPANY, INC., an Illinois corporation, of Bresse, County of Clinton and State of Illinois, party of the first part, and Homer L. Burtner, Sr., of Springfield, Mo. party of the second part:

WITNESSETH, That the said party of the first part, in consideration of the sum of One Dollar ($1.00) in hand paid, receipt of which is hereby acknowledged, and of the undertakings and agreements hereinafter set forth to be kept and performed by the said party of the second part, his heirs or assigns, and the royalties to be paid as hereinafter set out, do by these presents demise and lease unto the said party of the second part, his heirs or assigns, the following described tract or parcel of land, situated in Barry County, State of Missouri, and more particularly described as follows, to-wit:

> East Half of the Northwest Quarter, and the Northwest Quarter of the Northeast Quarter of Section 28; and the Southwest Quarter of the Southeast Quarter, and three acres in the Northwest corner of the Southeast Quarter of the Southeast Quarter of Section 21, all in Township 21, Range 27, and containing in all 163 acres, more or less, according to the United States survey thereof;

for the purpose of digging, drilling, prospecting and mining said land for uranium, lead, zinc, coal, asphaltum, and every kind of valuable mineral or ore, granting also to the party of the second part, his successors or assigns, the right to erect all necessary buildings and machinery on said land for the purpose of mining and dressing, crushing and cleaning ores thereon, and to remove the same at the expiration or forfeiture of this lease, except timbering and other improvements necessary to support the ground. All uses of the ground, not consistent with thorough and proper mining, as herein required, are hereby reserved to the said party of the first part.

This lease shall be and remain in full force for a period of two years from the date hereof and as long thereafter as production of any of the foregoing minerals and/or ores is had in sufficient commercial or paying quantities to provide a royalty to the party of the first part of not less than Seventy-five Dollars ($75.00) per month. It is understood and agreed that if at the end of said two year period ore and/or minerals are not being produced from said premises in sufficient quantities to provide the foregoing minimum royalty payment then this lease shall terminate and be null and void.

The said party of the second part, his successors and assigns, shall mine said land in a good, thorough and workmanlike manner, and shall keep all shafts and drifts well and securely timbered and supported, and shall not remove such timbers and supports so as to endanger the ground, or permit the same to cave or fall in. Mining shall be carried on in good faith, continuously, and shall not be suspended at any time to exceed forty days in any three successive calendar months, except on written permission of the said party of the first part. Delays caused by unavoidable accidents, or causes beyond the control of the party of the second part, are excepted.

The said party of the second part, his successors, and assigns, shall keep a correct account of all ores and/or minerals mined, the kind and weight thereof, to whom sold and the price received therefor, which books shall be open to the inspection of the partyoof the first part at all reasonable times.

The said party of the second part, his successors and assigns shall pay to the party of the first part, its successors and assigns, at Breese, Illinois, on the 15th day of each month a royalty in the amount of fifteen per cent (15%) of the gross market value of all ores and/or minerals mined or sold during the preceeding month with a statement showing the amount and kind of ores and/or minerals sold, to whom sold and the price received from same. Provided further that the party of the second part shall pay to the party of the first part a

minimum monthly rental of Seventy-five Dollars ($75.00) per month beginning third day of June, 1954.

It is further understood and agreed that at any time during the term of this lease the party of the first part or any of its officers, stockholders or anyone authorized by them, or either of them, may go upon the premises herein leased for the purpose of making an inspection or for any other purpose which is not prejudicial to the rights of the party of the second part.

Any failure upon the part of the party of the second part to comply with and perform the requirements of this lease in good faith shall terminate said lease and the party of the first part may, without any court proceedings of any kind or character, reenter upon and take possession of said premises and this lease shall be null and void.

IN WITNESS WHEREOF, THE said parties have hereunto set their hands and seals in duplicate, the day and year first above written.

4.A Have done Bulldozing, dynamiting, pick & Shovel work and Excavating.

This Property Was Worked several years ago by Logan Lieb and some German Scientists about World war I. The openings they used were dynamited shut. The main entrance is now partially opened. It will require work as illustrated before this job can be completed.

See Technical World magazine Jan. 1913 page 593.

RECEIVED DEC 20 1954

H. L. Buxner has spent approx $10,000.00 this last summer on excavating by Bulldozer, blasting, Pick & Shovel in effort to drain and gain access to an entrance to the subterranean caverns. Following an unprecendented 2 year drouth, he was able to inspect about 1600 ft. of these tortuous passages, at two times last February when he discovered the Ore. Then the underground stream rose, blocking the passage, and the excavation work was begun. That work was stopped in Oct. 1954. When heavy rains came, and the applicant was temporarily hurt. Mr Logan Lieb and some German scientists did remove some radio active ore to be shipped to Germany, but could not get the ore out of the U.S. Have at only one time been able to bring out a small amount of ore. (see assay report). Also there is Radon or Helium Gas in caverns.

BURTNER'S Inc
Springfield Mo
1328 S. Florence

Insert.

4. B. No current Production and no record of exactly how much was taken out Previously (ore reserves) was able during drought on two occasions only to penetrate far enough under this mountain to come in contact with ore. In my opinion there are thousands of tons of Ore in sight, lots of Gas and bad air trapped behind water and Mud. This Ore all looks like Pitchblend. Was able to bring out only small tonnage.

4. C. The mountain is made up of limestone and sandstone rock. The interior (that is now flooded) consists of numerous underground caverns and Passageways. and the work outlined we will be able to drain these caverns by Gravity. We have tried pumps and at 60,000 gal an hour and over a period of 7 days (24 hrs per day) could not lower the water enough to gain entrance.

(2) (Type of deposit) Pitchblend both Vein + bedded.

(3) By removing enough earth according to attached plan water will drain and we will be able to get back to Ore. Before this was blasted shut and Valley filled the bottom was 16 ft lower than at Present. We want to go 18' below present.

see sketches attached.

December 9, 1954

Mr. H. L. Burtner,

In connection with the proposed excavation for a channel from the mouth of the cave to a point approximately 1000 feet in the existing stream bed:

We propose to excavate and dispose of material as follows:

Approximately 4400 cubic yards from the mouth of the cave, east 200 feet, including necessary work on slides and present stock piles, approximately 4700 cubic yards from the above described location to the low point in the stream bed, including all necessary clearing - for the sum of $1.00 per cubic yard.

In the event it is necessary to move solid rock, we propose to rent our compressor, drills, tools, etc., for $20.00 per day. You are to furnish all labor, blasting materials, etc.

We checked the grades on the proposed channel, and find that it will be necessary to cut 18 feet deep at the mouth of the spring, and at a 1% grade, the channel will be approximately 1000 feet long, terminating in the existing stream bed.

Yours very truly,

McLEAN CONSTRUCTION COMPANY

Re: Burtner's Inc.
Application for a uranium exploration project contract, Barry County, Mo.

Dear Sirs:

Transmitted herewith are the original and two copies of the subject application brought to this office today by Mr. H. L. Burtner, representing the applicant corporation. A fourth copy is being retained in the Field Team file awaiting your assignment of a docket number and possible reviews by the Commodity Group and/or a field referral which I believe may be found justifiable.

I have virtually no tangible data pertinent to the area or the cavern Mr. Brutner has tried to describe in this application. He states, however, that he has proof it is the cavern in the interesting story of the legendary Logan Lieb and his early work on the radioactive materials reportedly found there. A similar story has been told applying to the various other caverns and mines in that Missouri-Arkansas locality. Other persons have informed me that a concern which prospected and had some magnetic surveying done about three years ago in the adjacent Radium Springs area, had collected photostatic copies of many of the published accounts of the Lieb story.

I note that the application does not include some of the supporting statements that Mr. Burtner made verbally to me during his several visits here this month when I tried to give assistance and suggestions for its preparation. Among them are the following which might furnish worthwhile references:

1. Reportedly a Mr. Russell of the A.E.C. Offices in Denver, visited this property on November 10, 1954.

2. Mr. Ernest Blessing, Mining Engineer, Conservation Branch of the Geological Survey, Miami, Okla. visited the property about Nov. 1, 1954, in connection with the leases being negotiated on adjacent National Forest land.

3. Reportedly a 5-pound sample of the black rock (presumably like the small piece Messrs. Burtner and Gissy brought in here on December 6, 1954, which appeared different than any uranium ore I had ever seen) was submitted to a Mr. Tully of the A.E.C. Offices in Washington, D. C., sometime during the past year.

4. The Arkansas State Geologist's Office has analytical data on the radioactive material, according to Mr. Burtner's statement.

5. Mr. Burtner also stated that Dr. Edward L. Clark, Missouri State Geologist, now on temporary duty with the President's Security Council in Washington, D. C., had visited the property.

6. Mr. Burtner also described a second caved entrance to the cavern higher up on the mountain which he believes he can locate and reopen as a part of the proposed excavating work to furnish an exhaust for the bad air in the cavern.

7. Based on his reported one trip into the "ore" area of the cavern, Mr. Burtner described his exploration plan, after making the cavern entrance accessible and safe, would be merely to map the cavern, cut channel samples along the "ore" exposures, and use an electric drill to auger shallow drill hole samples in the roof, floor, walls, and pillars of the cavern.

Sincerely yours,

Clinton C. Knox

Docket No. 3608
Metal or Mineral Uranium
Date Received
Estimated Cost $13,134
Participation (Government %)

INSTRUCTIONS

1. *Name of applicant.*—(*a*) State here your full legal name, in the form in which you will wish to contract, and your mailing address: Burtner's Inc.
1328 S. Fassnight
Springfield Mo.

(*b*) If other than an individual, add to your name above whether a corporation, partnership, etc., and the name of the State in which incorporated or otherwise organized. a. Missouri Corporation

(*c*) If a corporation, add to above statement, titles, names and addresses of officers. see attached sheet.

(*d*) If a partnership, add to the above statement the names and addresses of all partners.

2. *General.*—Read DMEA Order 1, "Government Aid in Defense Exploration Projects," before completing this application. Submit this application and all accompanying papers in quadruplicate (four copies), with your name and address on each sheet of the application and on all accompanying papers. Where sufficient space is not provided on the form for all required information, state it on an accompanying paper, with a reference in each case to the instruction to which it refers by number. Comply with all applicable instructions; or, if not applicable, so state. File the application with Defense Minerals Exploration Administration, Department of the Interior, Washington 25, D. C., or with the nearest field executive officer thereof.

3. *Applicant's property rights.*—(*a*) State the legal description of the land upon which you wish to explore, including all land which you possess or control that may be benefited by the exploration, and excluding any land or interest in land which is not to be included in the exploration project contract SW/4, SE/4 and 3 acres in N.W. Corner of SE/4 of Sec. 21, NW/4 and NW/4-NE/4 of Sec. 28 all in T29 N. R.27 W. See 3B Insert.

(*b*) State any mine name by which the property is known. None at present.

(*c*) State your interest in the land, whether owner, lessee, purchaser under contract, or otherwise Lessee.

(*d*) If you are not the owner, submit with this application a copy of the lease, contract, or other document under which you control the property. Copy of lease attached.

(*e*) If you own the land, describe any liens or encumbrances on it Not applicable

(*f*) If the land consists of unpatented claims, add to the description above, the book and page numbers for each recorded location notice. Not applicable.

4. *Physical description.*—(*a*) Describe in detail any mining or exploration operations which have been or now are being conducted upon the land, including existing mine workings and production facilities. State your interest, if any, in such operations. Also describe accessibility of mine workings for examination purposes.

(*b*) State past and current production, and ore reserves, if any, giving quantities and grades. See Inserts.

(*c*) Describe the geologic features of the property, including mineralization, type of deposit (vein, bedded, etc.), and your reasons for wishing to explore. Illustrate with maps or sketches. Send with your application (but not necessarily as a part of it) any geologic or engineering report, assay maps, or other technologic information you may have, indicating on each whether you require its return to you.

(*d*) State the facts with respect to the accessibility of the project: Access roads, distances to shipping, supply and residence points.

(*e*) State the availability of manpower, materials, supplies, equipment, water, and power.

5. *The exploration project.*—(State the mineral or minerals for which you to explore Uranium

(*b*) Describe fully the proposed work, including a map or sketch of the property showing a plan (and cross sections if needed) of any present mine workings, and the location of the proposed exploration work as related to such features as contacts, veins, ore-bearing beds, etc. see attached sketch.

(*c*) The work will start within 30 days and be completed within 6 months from the date of an exploration project contract.

(*d*) State the operating experience and background of the applicant with relation to the ability to carry out such exploration project, and also that of the person or persons who will supervise the operations.

6. *Estimate of costs.*—Furnish a detailed estimate of the costs of the proposed work (you will have to use a separate sheet), under the following headings. Add the totals under all headings to give the estimated total cost of the project:

(*a*) *Independent contracts.*—(Note.—If the applicant does not intend to let any of the work to contractors, write "none" after this item. To the extent that the work is to be contracted, do not repeat the cost of the contract-work in subsequent items.) State the cost of any proposed independent contracts for the performance of all or any part of the work, expressed in terms of units of work (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved, etc.).

✓ (*b*) *Labor, supervision, consultants.*—Include an itemized schedule of numbers, classes and rates of wages, salaries or fees for necessary labor, supervision and engineering and geological consultants.

✓ (*c*) *Operating materials and supplies.*—Furnish an itemized list, including items of equipment costing less than $50 each, and power, water and fuel.

(*d*) *Operating equipment.*—Furnish an itemized list of any operating equipment to be rented, purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or suggested use-allowance based on present value, as the case may be.

(*e*) *Rehabilitation and repairs.*—Furnish a detailed list showing the cost of any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and which will be devoted to the exploration project.

(*f*) *New buildings, improvements, installations.*—Furnish a detailed list showing the cost of any necessary buildings, fixed improvements, or installations to be purchased, installed or constructed for the benefit of the exploration project.

(*g*) *Miscellaneous.*—Furnish a detailed list showing the cost of repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance, and payroll taxes.

(*h*) *Contingencies.*—Give an estimate of any necessary allowances for contingencies not included in the costs stated above.

NOTE.—No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes), or any other indirect costs, or work performed or costs incurred before the date of the contract, should be included in the estimate of costs.

7. (*a*) Are you prepared to furnish your share of the cost of the proposed project in accordance with the regulations on Government participation (Sec. 7, DMEA No. 1)? Yes

(*b*) How do you propose to furnish your share of the costs?

☑ Money ☑ Use of equipment owned by you ☑ Other

Explain in detail on acompanying paper.

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief.

ASSIGNMENT OF MINING LEASE

KNOW ALL MEN BY THESE PRESENTS:

That the undersigned, BUTLER HOLLOW MINING COMPANY, INC., a Missouri corporation, hereinafter referred to as Assignor, does hereby assign to BURTNERS, INC., a Missouri corporation, hereinafter referred to as Assignee, all of its right, title and interest in the following described land in Barry County, Missouri, being more particularly described as follows, to-wit:

> The East Half of the Northwest Quarter and the Northwest Quarter of the Northeast Quarter of Section 28 and the Southwest Quarter of the Southeast Quarter and three acres in the Northwest corner of the Southeast Quarter of the Southeast Quarter of Section 21, all in Township 21, Range 27, and containing in all 163 acres, more or less, according to the United States survey thereof, in Barry County, Missouri.

It is further agreed between the parties hereto that all of the right, title and interest in the above described land arises by virtue of a certain lease between the Radium Springs Land Company, Inc., an Illinois corporation, and Homer L. Burtner, Sr., of Springfield, Missouri, which said lease is recorded in Book 208, Page 7, of the Office of Recorder of Deeds of Barry County, Missouri; and the subsequent assignment from Homer L. Burtner, Sr., of an undivided one-third (1/3) interest to E. J. Gissy, of Breese, Illinois; and an undivided one-third (1/3) interest to Herbert Stratton, of Springfield, Missouri; and that the said Homer L. Burtner, Sr., and Lucile Burtner, his wife, E. J. Gissy, a single person, and Herbert Stratton and Lena Mai Stratton, his wife, have subsequently assigned to Butler Hollow Mining Company, Inc., a corporation, the Assignor herein, and that said assignments are recorded in the following book and page numbers in the Office of Recorder of Deeds, Barry County, Missouri: Book _____, Page _____; Book _____, Page _____: and Book _____, Page_____; Book _____, Page _____: and Book _____, Page _____.

It is further understood that the Assignee herein takes subject to the above mentioned lease and subsequent assignments and that the Assignor herein grants no more to the Assignee herein than it had by virtue of the above lease and subsequent assignments.

It is expressly understood by the parties hereto that as a consideration for this assignment that the Assignee agrees to pay a minimum monthly rental of Seventy-five ($75.00) Dollars per month beginning on the _____ day of July, 1954, andthat as additional consideration that it shall comply with the rents and royalties provisions in the lease mentioned above and the subsequent assignments by which it is obligated to pay to the Radium Springs Land Company fifteen (15%) percent of the gross market value of all ores and minerals taken from the premises; that Assignee shall pay to Homer L. Burtner and Lucile Burtner, his wife, five (5%) percent of the gross market value of all ores and minerals taken from the premises; that Assignee agrees to pay to E. J. Gissy the sum of five (5%) percent of the gross market value of all ores and minerals taken from said premises; that Assignee agrees to pay to Herbert Stratton and Lena Mai Stratton, his wife, five (5%) percent of the gross market value of all ores and minerals taken from said premises; and that Assignee agrees to pay to Butler Hollow Mining Company, Inc., a corporation, fifteen (15%) percent of the gross market value of all ores and minerals taken from the said premises.

It is further agreed that the accounting for such gross market value of said ores and minerals taken from said premises shall be in accordance with the terms of the lease set out above and all the subsequent assignments.

IN WITNESS WHEREOF, the parties have hereunto set their hands and seals this 2nd day of July, 1954.

MINING LEASE

This Indenture, made this third day of June, 1954, by and between RADIUM SPRINGS LAND COMPANY, INC., an Illinois corporation, of Breese, County of Clinton and State of Illinois, party of the first part, and Homer L. Burtner, Sr., of Springfield, Mo. party of the second part:

WITNESSETH, That the said party of the first part, in consideration of the sum of One Dollar ($1.00) in hand paid, receipt of which is hereby acknowledged, and of the undertakings and agreements hereinafter set forth to be kept and performed by the said party of the second part, his heirs or assigns, and the royalties to be paid as hereinafter set out, do by these presents demise and lease unto the said party of the second part, his heirs or assigns, the following described tract or parcel of land, situated in Barry County, State of Missouri, and more particularly described as follows, to-wit:

> East Half of the Northwest Quarter, and the Northwest Quarter of the Northeast Quarter of Section 28; and the Southwest Quarter of the Southeast Quarter, and three acres in the Northwest corner of the Southeast Quarter of the Southeast Quarter of Section 21, all in Township 21, Range 27, and containing in all 163 acres, more or less, according to the United States survey thereof;

for the purpose of digging, drilling, prospecting and mining said land for uranium, lead, zinc, coal, asphaltum, and every kind of valuable mineral or ore, granting also to the party of the second part, his successors or assigns, the right to erect all necessary buildings and machinery on said land for the purpose of mining and dressing, crushing and cleaning ores thereon, and to remove the same at the expiration or forfeiture of this lease, except timbering and other improvements necessary to support the ground. All uses of the ground, not consistent with thorough and proper mining, as herein required, are hereby reserved to the said party of the first part.

This lease shall be and remain in full force for a period of two years from the date hereof and as long thereafter as production of any of the foregoing minerals and/or ores is had in sufficient commercial or paying quantities to provide a royalty to the party of the first part of not less than Seventy-five Dollars ($75.00) per month. It is understood and agreed that if at the end of said two year period ore and/or minerals are not being produced from said premises in sufficient quantities to provide the foregoing minimum royalty payment then this lease shall terminate and be null and void.

The said party of the second part, his successors and assigns, shall mine said land in a good, thorough and workmanlike manner, and shall keep all shafts and drifts well and securely timbered and supported, and shall not remove such timbers and supports so as to endanger the ground, or permit the same to cave or fall in. Mining shall be carried on in good faith, continuously, and shall not be suspended at any time to exceed forty days in any three successive calendar months, except on written permission of the said party of the first part. Delays caused by unavoidable accidents, or causes beyond the control of the party of the second part, are excepted.

The said party of the second part, his successors, and assigns, shall keep a correct account of all ores and/or minerals mined, the kind and weight thereof, to whom sold and the price received therefor, which books shall be open to the inspection of the party of the first part at all reasonable times.

The said party of the second part, his successors and assigns shall pay to the party of the first part, its successors and assigns, at Breese, Illinois, on the 15th day of each month a royalty in the amount of fifteen per cent (15%) of the gross market value of all ores and/or minerals mined or sold during the preceeding month with a statement showing the amount and kind of ores and/or minerals sold, to whom sold and the price received from same. Provided further that the party of the second part shall pay to the party of the first part a

minimum monthly rental of Seventy-five Dollars ($75.00) per month beginning third day of June, 1954.

It is further understood and agreed that at any time during the term of this lease the party of the first part or any of its officers, stockholders or anyone authorized by them, or either of them, may go upon the premises herein leased for the purpose of making an inspection or for any other purpose which is not prejudicial to the rights of the party of the second part.

Any failure upon the part of the party of the second part to comply with and perform the requirements of this lease in good faith shall terminate said lease and the party of the first part may, without any court proceedings of any kind or character, reenter upon and take possession of said premises and this lease shall be null and void.

IN WITNESS WHEREOF, THE said parties have hereunto set their hands and seals in duplicate, the day and year first above written.

4.A. Have done Bulldozing, dynamiting, pick and shovel work. and Excavating.
This property was worked several years ago by Logan Lieb and some German scientists about World War I. The openings they used were dynamited shut. The main entrance is now partially opened. It will require work as illustrated by are this job can be completed.
H.L. Barber has spent approx. $10,000.00 this last summer on excavating by bulldozer, Blasting Pick and Shovel in effort to drain and gain access to an extreme to the subterranean caverns. Following an unprecedented 2 year drought, he was able to inspect about 1600 ft. of the underground passages. at the time last February when he discovered the air. then the underground stream rose. blocking the passage and the excavation work was begun. Work was stopped in Oct. 1954. when heavy rains came and the applicant was temporarily hurt. Mr Logan Lieb and German scientists did remove some radio active ore to be shipped to Germany but could not get the ore out of the U.S. due at one time he able to bring out a small amount of ore. as a sample. The Radon at Helium Gas in Caverns.

4. B. (a) No current Production and not record of exactly how much was taken out Previously. (as reserves) was able during drought on two occasions only to penetrate far enough under this mountain to come in contact with ore. In my opinion there are thousands of tons of ore in sight. ~~but~~ lots of Gas and bad air trapped behind water & mud. This Ore all looks like Pitchblend was able to bring out only small amount.

4(C) The mountain is made up of limestone and sandstone rock. the interior (that is now flooded) consists of numerous Underground caverns and passageways. and the work outlined we will be able to drain these caverns by Gravity. we have tried pumps. and at 60,000 gal an hour and over a period of 7 days (24 hrs) pitchday could not lower the water enough to gain entrance.

(2) (Type of deposit) Pitchblend both vein & Bedded.

(3) By removing enough earth according to attached plan water will drain and we will be able to get back to ore. Before this was flooded out & Valley filled the bottom was 16' lower than at Present. We want to go 18' below present.

ore samples attached.

December 9, 1954

Mr. H. L. Burtner,

In connection with the proposed excavation for a channel from the mouth of the cave to a point approximately 1000 feet in the existing stream bed:

We propose to excavate and dispose of material as follows:

Approximately 4400 cubic yards from the mouth of the cave, east 200 feet, including necessary work on slides and present stock piles, approximately 4700 cubic yards from the above described location to the low point in the stream bed, including all necessary clearing - for the sum of $1.00 per cubic yard.

In the event it is necessary to move solid rock, we propose to rent our compressor, drills, tools, etc., for $20.00 per day. You are to furnish all labor, blasting materials, etc.

We checked the grades on the proposed channel, and find that it will be necessary to cut 18 feet deep at the mouth of the spring, and at a 1% grade, the channel will be approximately 1000 feet long, terminating in the existing stream bed.

Yours very truly,

McLEAN CONSTRUCTION COMPANY
