Memorandum

To: Director, Geological Survey

From: Regional Director, Region I
Audit Operations, Office of Survey and Review

Subject: Royalty Review of Contract 2148
Docket No. OME-6236 (Gold-Silver)
Northern Continental, Inc.
Phillips County, Montana

As requested by the Chief, Office of Minerals Exploration, we made a royalty review of Contract 2148. The results of our review are shown in the attached report.

C. D. Baer

Attachment

We examined the cash receipts records in the Branch of Budget and Finance, Administrative Division, Geological Survey, and reviewed the contract files of the Office of Minerals Exploration (OME) pertaining to royalty due to the Government on the value of production from property included in Contract 2148 with Northern Continental, Inc. (Operator). The review was made during January 1970 at Washington, D.C.

Under the terms of this contract, the Operator is obligated to pay to the Government a 5 percent royalty on the value of any production from the land described in the contract for a period of 10 years from the date of the contract (May 17, 1962) or until the total net amount ($33,734) contributed by the Government with interest at 6 percent, shall have been repaid, whichever occurs first.

A prior royalty review completed during May 1965, reported that through April 30, 1965, the value of production was $285,447 and that royalty payments of $14,272 had been received by OME.

The present review covers production from April 13 to July 14, 1965. During this period the value of production was $39,729 and royalty payments received by OME were $1,987.

On May 20, 1965, the Operator informed OME that all known economic ore reserves had been extracted from the mine and on July 1, 1965,

the Operator turned the lease back to the owner, Little Rockies Mining and Development Co. On May 18, 1967, Little Rockies Mining and Development Co. leased the mine to Little Rocky Mining Co., Ltd. which consequently gave them the responsibility to pay royalties to OME. However, if Little Rocky Mining Co., Ltd. does not pay the royalties, then the responsibility to pay royalties transfers back to Little Rockies Mining and Development Co. as stipulated in the Lien or Subordination agreement of the contract. Since July 14, 1965, there has been no production.

The value of production and royalty due and paid the Government through July 14, 1965, is as follows:

Period	Value of Production	Royalty Due and Paid
Prior Review	$285,447	$14,272
This Review	39,729	1,987
Total	$325,176	$16,259

OFFICE OF MINERALS EXPLORATION
CONTRACT ADMINISTRATION AND AUDIT DIVISION

REPORT OF ROYALTY REVIEW

I have reviewed the files of the Washington office pertaining to Contract 14-23-90-2148, Docket OME-6236 (Gold-Silver) dated May 17, 1962, with

Northern Continental, Inc.
4534 West North Avenue
Chicago, Illinois 60639

for the purpose of determining the amount of royalty payable to the U. S. Government on sales of minerals from property referred to as the Gold Bug, et al., claims located in Phillips County, Montana, during the period May 17, 1962, through April 30, 1965.

A certification of possible production was issued on January 29, 1964, and, in accordance with Article 6 of the contract, royalty is payable on all minerals produced from the land described in Article 2 of the contract or transported through any workings or portions thereof to the cost of which the Government has contributed for a period of 10 years from the date of the contract or until the total net amount contributed by the Government with interest at 6 percent is fully repaid, whichever occurs first. A Report of Review in lieu of final audit dated December 5, 1963, indicated accepted costs under the exploration contract amounting to $67,467.40 with the Government's contribution on a 50 percent basis being $33,733.70.

The status of the project, the scope of review, and the reasons therefor are stated on page 2.

This review found the total sales subject to the Government's royalty for the period to be $285,447.39. Royalty payable to the Government at the rate specified in the contract is $14,272.36.

As of April 30, 1965, the royalty account of this project was found to be:

Total Royalty Payable	$14,272.36
Total Royalty Paid	14,272.36
Balance of Royalty Due	$ -0-

C. E. Fisher, OME Auditor

May 4, 1965

14-23-90-2148 Northern Continental, Inc. OME-6236

STATUS OF PROJECT, SCOPE OF REVIEW AND REASONS THEREFOR

This contract provides that the Operator, whether or not the producer, shall pay to the Government a percentage royalty on all minerals produced from the land under the contract or transported through any workings or portions thereof to the cost of which the Government has contributed.

The land under the contract consists of 4 patented and 2 unpatented lode mining claims in secs. 15 and 22, T. 25 N., R. 24 E., Montana PM, Phillips County, Montana. The Operator has rights of possession of the claims under terms of a mining lease dated July 10, 1961, granted by Little Rockies Mining and Development Company. The lessor, together with 8 individuals having royalty rights on production from the claims, executed a lien or subordination agreement to secure the payment of the Government's royalty on production provided by the contract.

Exploration work under the contract was started in June 1962 and was completed in September 1963. The first shipment of crude ore (Mine lot No. 1) was received at the East Helena plant of American Smelting and Refining Company on February 29, 1964. The Operator has paid the Government's royalty on a monthly basis as and when settlements are made by the smelter. The last settlement at the date of this Report of Royalty Review relates to 1965 Mine Lot No. 9, settled as of March 19, 1965.

This review included the recomputation and tabulation of copies of liquidation statements furnished by the Operator in support of the royalty remittances. A brief summary of the production, value and royalty payable and paid as disclosed by such tabulation follows:

Short Wet Tons - Ore		4,692.281
Short Dry Tons - Ore		4,415.894
Value		$359,846.72
Allowable deductions:		
Treatment	$26,495.58	
Hauling	46,922.75	
Umpire	981.00	74,399.33
Net value subject to royalty		$285,447.39
Royalty Due 5%		14,272.36
Royalty Paid		14,272.36
Balance of Royalty Due		$ -0-

STATUS OF PROJECT, SCOPE OF REVIEW (CONT'D)
AND REASONS THEREFOR

This review was made in lieu of an on-site audit of the Operator's accounts and records for the following reasons:

(1) The files indicate that all sales of production from the property have been reported and proper royalty thereon paid; and

(2) The administrative cost to the Government of an on-site royalty audit at this time would be excessive in relation to the amount of possible additional royalty which might be disclosed.

UNITED STATES OF AMERICA
CERTIFICATION OF POSSIBLE PRODUCTION
UNDER AN EXPLORATION CONTRACT

Northern Continental, Inc.
P. O. Box 1550
Grand Junction, Colorado

Re: OMM-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana
Contract 2148

Gentlemen:

Pursuant to Article 6 of the contract, as amended, referred to above, the Government hereby certifies that mineral or metal production may be possible as a result of the exploration work.

Therefore, royalties shall be paid to the Government as provided in the contract on all production from the land described in the contract and on all production transported through workings to the cost of which the Government contributed in accordance with the special "Agreement Concerning Royalty" in Article 14 of the contract, from May 17, 1962, to May 17, 1972, or until the sum of $33,733.70 is fully repaid with interest, at the rate of 6 percent per annum, whichever occurs first. The payment of royalties is secured by a lien upon the land and upon any production therefrom.

Royalty payments should be made in favor of the Office of Minerals Exploration, and should be mailed or delivered to the Field Officer, Office of Minerals Exploration, Region I, South 157 Howard Street, Spokane, Washington, 99204. Each payment should be accompanied by two copies of settlement sheets or other suitable sales evidence showing the name of the purchaser, the quantity and grade of the production sold, the price per unit, and the gross proceeds and allowable deductions therefrom. The purchaser should be notified of the Government's royalty on production and directed to pay the royalty, computed as provided in the contract, directly to the Government.

The Field Officer should be promptly notified upon the commencement of any production, and upon any cessation thereof. Production unsold or unused six months after extraction from the ground should be reported promptly to the Field Officer.

Attention is specifically invited to the provisions of Article 2(c) of the contract referring to the preservation of the Government's royalty rights. Two true copies of any instrument transferring, surrendering, or encumbering any of said rights shall be furnished to the Field Officer.

Dated this 29 day of January, 1964.

Dear Mr. and Mrs. Bryant:

Enclosed is a copy of a certification of possible production which has been issued pursuant to the terms of the subject contract. This relates to the Lien or Subordination Agreement signed by you on March 5, 1962.

The Government's prior lien on the land and upon any production therefrom will continue in existence for the length of time mentioned in the enclosed copy of certification to the Operator. You are obligated during that period to commit no act and to assert no claim in conflict with the Government's rights under the agreement signed by you, and to give advance notice of the Government's rights to any transferee or lessee of any part of your interest in the land or the production therefrom.

Sincerely yours,

George Fumich, Jr.

OFFICE OF MINERALS EXPLORATION
CONTRACT ADMINISTRATION AND AUDIT DIVISION

REPORT OF REVIEW

I have reviewed the Monthly Reports of:

Northern Continental, Inc.
P. O. Box 1550
Grand Junction, Colorado

pertaining to Exploration Contract 14-23-090-2148, OME No. 6236, including Amendments Nos. 1 and 2, for June 1962 to September 1963, inclusive, covering a gold-silver project on the Gold Bug, et al., Claims, Phillips County, Montana.

My review included an examination of the Monthly Vouchers (OME Forms 60) and supporting documents, comparison of the claimed costs with the contract and pertinent schedules, confirmation of work performed by reference to reports and correspondence, and a determination of the reasonableness and propriety of the costs.

This review was made in lieu of a final audit of the Operator's accounts and records for the reason that:

> All of the acceptable costs were under a contract provision for contribution by the Government on the basis of fixed unit costs of work performed.

The findings of this review are stated in the following summary and the attached schedule:

Total cost billed by Operator		$67,779.40
Exceptions:		
Prior to this review	$312.00	
Herewith	-0-	312.00
Total acceptable cost		$67,467.40

The contract calls for a 50 percent contribution of the allowable costs by the Government. Therefore, if the project is otherwise accepted as having met the terms of the contract, payments as follows are valid and proper:

Payable on audited claim	$33,733.70
Paid to date	33,533.69
Balance due Operator	$ 200.01

E. D. Talbert

December 5, 1963

E. D. Talbert, OME Auditor

14-23-090-2148 Northern Continental, Inc. OMK-6167

Exceptions prior to this review:

Assays of 942 samples were claimed by the Operator, but the assays of only 786 samples were accepted by the Acting Field Officer of OMK Region I as meeting contract specifications; difference disallowed, 156 samples @ $2.00	$ 312.00

Total acceptable cost:

Bulldozing, 69.6 hrs. @ $12.50	$ 870.00
Drifting, 1500 ft. @ $36.00	54,000.00
Timbering, 143.52 ft. @ $7.50	1,076.40
Raising, 200 ft. @ $36.00	7,200.00
Long-hole drilling, 2749 ft. @ $1.00	2,749.00
Samples Assayed, 786 ea. @ $2.00	1,572.00
	$67,467.40

EXPLORATION CONTRACT
NORTHERN CONTINENTAL, INC.
OME-6236

AMENDMENT NO. 2

It is agreed this 16th day of May, 1963, between the United States of America, acting through the Department of the Interior, Office of Minerals Exploration, hereinafter referred to as the "Government," and Northern Continental, Inc., hereinafter referred to as the "Operator," that Contract No. 2148 (OME-6236), dated May 17, 1962, as amended, is further amended, effective May 17, 1962, as follows:

1. In Exhibit A, under General Provisions, the first paragraph is deleted and replaced as follows:

> "When structure and/or mineralization indicate the advisability, the drift and raises shall be sampled by cutting channels normal to the trend of the mineralization or structure. In zones shown to contain significant values in gold and/or silver, similar channel samples shall be taken at intervals of not more than 10 feet. In these zones composite car samples from each round may be substituted for channel samples. The cuttings from long-hole drill holes shall be recovered and if they show significant mineralization they shall be sampled. Each such sample shall represent not more than a 5-foot length of hole."

This amendment shall not be construed to increase the amount of any item designated as maximum, the fixed unit cost of any item of work, the estimated total cost of the contract, nor the aggregate total amount which the Government may be required to contribute.

EXPLORATION CONTRACT
NORTHERN CONTINENTAL, INC.
OME-2148

AMENDMENT NO. 1

It is agreed this 14th day of September, 1962, between the United States of America, acting through the Department of the Interior, Office of Minerals Exploration, hereinafter referred to as the "Government," and Northern Continental, Inc., hereinafter referred to as the "Operator," that Contract No. 2148 (OME-6236), dated May 17, 1962, is amended, effective May 17, 1962, as follows:

1. In Exhibit A:

(a) Under Description of the Work, the specification "D-8 Caterpillar bulldozer" in the last sentence of the first paragraph is revised to read "D-6 Caterpillar bulldozer."

(b) Under Estimated Cost of Project, Fixed Unit Costs, the first specification is deleted and replaced as follows:

80 hours bulldozing access road and portal site, @ $12.50/hr.	$1,000.00

and the figures $76,300.00 and $38,150.00 for the Total Estimated Cost of Project and Government Participation @ 50% are replaced by the figures $76,100.00 and $38,050.00, respectively.

(c) In Article I.(b) of the contract the figures $76,300.00 and $38,150.00 are replaced by the figures $76,100.00 and $38,050.00, respectively.

2. The first paragraph of Article 14, of the Contract, is deleted and the following is substituted in lieu thereof as subparagraph "(A)" and the second paragraph of said Article 14 referring to subparagraph (i) of Article 6 is designated subparagraph "(B)":

"(A). Nondiscrimination. The provisions governing performance of work under Government contracts, as set out in Section 301 of the Executive Order 10925, dated March 6, 1961 (a copy of which is attached hereto as Exhibit B and by reference hereby incorporated and made a part of this contract), shall be applicable to this contract.

"In compliance with the Rules and Regulations (41 CFR, Section 60-1.3(a)) issued under Executive Order 10925 of March 6, 1961, the Operator is hereby bound and agrees to include in each subcontract which it shall make with a subcontractor or supplier paragraphs (1) through (7) of Section 301 of said Executive Order, unless exempted pursuant to the rules, regulations, and relevant orders of the President's Committee on Equal Employment Opportunity.

"The Operator shall require each of its subcontractors (first tier) to include in every subcontract with each of its subcontractors (second tier) the following clause: The (here identify the second-tier subcontractor by name) shall incorporate by reference in each subcontract or purchase order with a subcontractor or supplier paragraphs (1) through (6) of Section 301 of Executive Order 10925 of March 6, 1961, unless exempted pursuant to the rules, regulations, and relevant orders of the President's Committee on Equal Employment Opportunity."

This amendment reduces the cost of bulldozer work, the estimated total cost of the project, and the aggregate total amount which the Government may be required to contribute.

Executed in quintuplicate the day and year first above written.

Title 3—THE PRESIDENT

Executive Order 10925

ESTABLISHING THE PRESIDENT'S COMMITTEE ON EQUAL EMPLOYMENT OPPORTUNITY

WHEREAS discrimination because of race, creed, color, or national origin is contrary to the Constitutional principles and policies of the United States; and

WHEREAS it is the plain and positive obligation of the United States Government to promote and ensure equal opportunity for all qualified persons, without regard to race, creed, color, or national origin, employed or seeking employment with the Federal Government and on government contracts; and

WHEREAS it is the policy of the executive branch of the Government to encourage by positive measures equal opportunity for all qualified persons within the Government; and

WHEREAS it is in the general interest and welfare of the United States to promote its economy, security, and national defense through the most efficient and effective utilization of all available manpower; and

WHEREAS a review and analysis of existing Executive orders, practices, and government agency procedures relating to government employment and compliance with existing non-discrimination contract provisions reveal an urgent need for expansion and strengthening of efforts to promote full equality of employment opportunity; and

WHEREAS a single governmental committee should be charged with responsibility for accomplishing these objectives:

NOW, THEREFORE, by virtue of the authority vested in me as President of the United States by the Constitution and statutes of the United States, it is ordered as follows:

PART I—ESTABLISHMENT OF THE PRESIDENT'S COMMITTEE ON EQUAL EMPLOYMENT OPPORTUNITY

SECTION 101. There is hereby established the President's Committee on Equal Employment Opportunity.

SEC. 102. The Committee shall be composed as follows:

(a) The Vice President of the United States, who is hereby designated Chairman of the Committee and who shall preside at meetings of the Committee.

(b) The Secretary of Labor, who is hereby designated Vice Chairman of the Committee and who shall act as Chairman in the absence of the Chairman. The Vice Chairman shall have general supervision and direction of the work of the Committee and of the execution and implementation of the policies and purposes of this order.

(c) The Chairman of the Atomic Energy Commission, the Secretary of Commerce, the Attorney General, the Secretary of Defense, the Secretaries of the Army, Navy and Air Force, the Administrator of General Services, the Chairman of the Civil Service Commission, and the Administrator of the National Aeronautics and Space Administration. Each such member may designate an alternate to represent him in his absence.

(d) Such other members as the President may from time to time appoint.

(e) An Executive Vice Chairman, designated by the President, who shall be *ex officio* a member of the Committee. The Executive Vice Chairman shall assist the Chairman, the Vice Chairman and the Committee. Between meetings of the Committee he shall be primarily responsible for carrying out the functions of the Committee and may act for the Committee pursuant to its rules, delegations, and other directives. Final action in individual cases or classes of cases may be taken and final orders may be entered on behalf of the Committee by the Executive Vice Chairman when the Committee so authorizes.

SEC. 103. The Committee shall meet upon the call of the Chairman and at such other times as may be provided by its rules and regulations. It shall (a) consider and adopt rules and regulations to govern its proceedings; (b) provide generally for the procedures and policies to implement this order; (c) consider reports as to progress under this order; (d) consider and act, where necessary or appropriate, upon matters which may be presented to it by any of its members; and (e) make such reports to the President as he may require or the Committee shall deem appropriate. Such reports shall be made at least once annually and shall include specific references to the actions taken and results achieved by each department and agency. The Chairman may appoint sub-committees to make special studies on a continuing basis.

PART II—NONDISCRIMINATION IN GOVERNMENT EMPLOYMENT

SECTION 201. The President's Committee on Equal Employment Opportunity established by this order is directed immediately to scrutinize and study employment practices of the Government of the United States, and to consider and recommend additional affirmative steps which should be taken by executive departments and agencies to realize more fully the national policy of nondiscrimination within the executive branch of the Government.

SEC. 202. All executive departments and agencies are directed to initiate forthwith studies of current government employment practices within their responsibility. The studies shall be in such form as the Committee may prescribe and shall include statistics on current employment patterns, a review of current procedures, and the recommendation of positive measures for the elimination of any discrimination, direct or indirect, which now exists. Reports and recommendations shall be submitted to the Executive Vice Chairman of the Committee no later than sixty days from the effective date of this order, and the Committee, after considering such reports and recommedations, shall report to the President on the current situation and recommend positive measures to accomplish the objectives of this order.

SEC. 203. The policy expressed in Executive Order No. 10590 of January 18, 1955 (20 F.R. 409), with respect to the exclusion and prohibition of discrimination against any employee or applicant for employment in the Federal Government because of race, color, religion, or national origin is hereby reaffirmed.

SEC. 204. The President's Committee on Government Employment Policy, established by Executive Order No. 10590 of January 18, 1955 (20 F.R. 409), as amended by Executive Order No. 10722 of August 5, 1957 (22 F.R. 6287), is hereby abolished, and the powers, functions, and duties of that Committee are hereby transferred to, and henceforth shall be vested in, and exercised by, the President's Committee on Equal Employment Opportunity in addition to the powers conferred by this order.

PART III—OBLIGATIONS OF GOVERNMENT CONTRACTORS AND SUBCONTRACTORS

SUBPART A—CONTRACTORS' AGREEMENTS

SECTION 301. Except in contracts exempted in accordance with section 303 of this order, all government contracting agencies shall include in every government contract hereafter entered into the following provisions:

"In connection with the performance of work under this contract, the contractor agrees as follows:

"(1) The contractor will not discriminate against any employee or applicant for employment because of race, creed, color, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, creed, color, or national origin. Such action shall include, but not be limited to, the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the contracting officer setting forth the provisions of this nondiscrimination clause.

"(2) The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor,

state that all qualified applicants will receive consideration for employment without regard to race, creed, color, or national origin.

"(3) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the agency contracting officer, advising the said labor union or workers' representative of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

"(4) The contractor will comply with all provisions of Executive Order No. 10925 of March 6, 1961, and of the rules, regulations, and relevant orders of the President's Committee on Equal Employment Opportunity created thereby.

"(5) The contractor will furnish all information and reports required by Executive Order No. 10925 of March 6, 1961, and by the rules, regulations, and orders of the said Committee, or pursuant thereto, and will permit access to his books, records, and accounts by the contracting agency and the Committee for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

"(6) In the event of the contractor's non-compliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be cancelled in whole or in part and the contractor may be declared ineligible for further government contracts in accordance with procedures authorized in Executive Order No. 10925 of March 6, 1961, and such other sanctions may be imposed and remedies invoked as provided in the said Executive order or by rule, regulation, or order of the President's Committee on Equal Employment Opportunity, or as otherwise provided by law.

"(7) The contractor will include the provisions of the foregoing paragraphs (1) through (6) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the President's Committee on Equal Employment Opportunity issued pursuant to section 303 of Executive Order No. 10925 of March 6, 1961, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the contracting agency may direct as a means of enforcing such provisions, including sanctions for non-compliance: *Provided, however,* that in the event the contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the contracting agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States."

SEC. 302. (a) Each contractor having a contract containing the provisions prescribed in section 301 shall file, and shall cause each of its subcontractors to file, Compliance Reports with the contracting agency, which will be subject to review by the Committee upon its request. Compliance Reports shall be filed within such times and shall contain such information as to the practices, policies, programs, and employment statistics of the contractor and each subcontractor, and shall be in such form, as the Committee may prescribe.

(b) Bidders or prospective contractors or subcontractors may be required to state whether they have participated in any previous contract subject to the provisions of this order, and in that event to submit, on behalf of themselves and their proposed subcontractors, Compliance Reports prior to or as an initial part of their bid or negotiation of a contract.

(c) Whenever the contractor or subcontractor has a collective bargaining agreement or other contract or understanding with a labor union or other representative of workers, the Compliance Report shall include such information as to the labor union's or other representative's practices and policies affecting compliance as the Committee may prescribe: *Provided,* that to the extent such information is within the exclusive possession of a labor union or other workers' representative and the labor union or representative shall refuse to furnish such information to the contractor, the contractor shall so certify to the contracting agency as part of its Compliance Report and shall set forth what efforts he has made to obtain such information.

(d) The Committee may direct that any bidder or prospective contractor or subcontractor shall submit, as part of his Compliance Report, a statement in writing, signed by an authorized officer or agent of any labor union or other workers' representative with which the bidder or prospective contractor deals, together with supporting information, to the effect that the said labor union's or representative's practices and policies do not discriminate on the grounds of race, color, creed, or national origin, and that the labor union or representative either will affirmatively cooperate, within the limits of his legal and contractual authority, in the implementation of the policy and provisions of this order or that it consents and agrees that recruitment, employment, and the terms and conditions of employment under the proposed contract shall be in accordance with the purposes and provisions of the order. In the event that the union or representative shall refuse to execute such a statement, the Compliance Report shall so certify and set forth what efforts have been made to secure such a statement.

SEC. 303. The Committee may, when it deems that special circumstances in the national interest so require, exempt a contracting agency from the requirement of including the provisions of section 301 of this order in any specific contract, subcontract, or purchase order. The Committee may, by rule or regulation, also exempt certain classes of contracts, subcontracts, or purchase orders (a) where work is to be or has been performed outside the United States and no recruitment of workers within the limits of the United States is involved; (b) for standard commercial supplies or raw materials; or (c) involving less than specified amounts of money or specified numbers of workers.

SUBPART B—LABOR UNIONS AND REPRESENTATIVES OF WORKERS

SEC. 304. The Committee shall use its best efforts, directly and through contracting agencies, contractors, state and local officials and public and private agencies, and all other available instrumentalities, to cause any labor union, recruiting agency or other representative of workers who is or may be engaged in work under government contracts to cooperate with, and to comply in the implementation of, the purposes of this order.

SEC. 305. The Committee may, to effectuate the purposes of section 304 of this order, hold hearings, public or private, with respect to the practices and policies of any such labor organization. It shall from time to time submit special reports to the President concerning discriminatory practices and policies of any such labor organization, and may recommend remedial action if, in its judgment, such action is necessary or appropriate. It may also notify any Federal, state, or local agency of its conclusions and recommendations with respect to any such labor organization which in its judgment has failed to cooperate with the Committee, contracting agencies, contractors, or subcontractors in carrying out the purposes of this order.

SUBPART C—POWERS AND DUTIES OF THE PRESIDENT'S COMMITTEE ON EQUAL EMPLOYMENT OPPORTUNITY AND OF CONTRACTING AGENCIES

SEC. 306. The Committee shall adopt such rules and regulations and issue such orders as it deems necessary and appropriate to achieve the purposes of this order, including the purposes of Part II hereof relating to discrimination in government employment.

SEC. 307. Each contracting agency shall be primarily responsible for obtaining compliance with the rules, regulations, and orders of the Committee with respect to contracts entered into by such agency or its contractors, or affecting its own employment practices. All contracting agencies shall comply with the Committee's rules in discharging their primary responsibility for securing compliance with the provisions of contracts and otherwise with the terms of this Executive order and of the rules, regulations, and orders of the Committee pursuant hereto. They are directed to cooperate with the Committee, and to furnish the Committee such information and assistance as it may require in the performance of its functions under this order. They are further directed to appoint or designate, from among the agency's personnel, compliance officers. It shall be the duty of such officers to seek compliance with the objectives of this order by conference, conciliation, mediation, or persuasion.

SEC. 308. The Committee is authorized to delegate to any officer, agency, or employee in the executive branch of the

Government any function of the Committee under this order, except the authority to promulgate rules and regulations of a general nature.

SEC. 309. (a) The Committee may itself investigate the employment practices of any government contractor or subcontractor, or initiate such investigation by the appropriate contracting agency or through the Secretary of Labor, to determine whether or not the contractual provisions specified in section 301 of this order have been violated. Such investigation shall be conducted in accordance with the procedures established by the Commitee, and the investigating agency shall report to the Committee any action taken or recommended.

(b) The Committee may receive and cause to be investigated complaints by employees or prospective employees of a government contractor or subcontractor which allege discrimination contrary to the contractual provisions specified in section 301 of this Order. The appropriate contracting agency or the Secretary of Labor, as the case may be, shall report to the Committee what action has been taken or is recommended with regard to such complaints.

SEC. 310. (a) The Committee, or any agency or officer of the United States designated by rule, regulation, or order of the Committee, may hold such hearings, public or private, as the Committee may deem advisable for compliance, enforcement, or educational purposes.

(b) The Committee may hold, or cause to be held, hearings in accordance with subsection (a) of this section prior to imposing, ordering, or recommending the imposition of penalties and sanctions under this order, except that no order for debarment of any contractor from further government contracts shall be made without a hearing.

SEC. 311. The Committee shall encourage the furtherance of an educational program by employer, labor, civic, educational, religious, and other nongovernmental groups in order to eliminate or reduce the basic causes of discrimination in employment on the ground of race, creed, color, or national origin.

SUBPART D—SANCTIONS AND PENALTIES

SEC. 312. In accordance with such rules, regulations or orders as the Committee may issue or adopt, the Committee or the appropriate contracting agency may:

(a) Publish, or cause to be published, the names of contractors or unions which it has concluded have complied or have failed to comply with the provisions of this order or of the rules, regulations, and orders of the Committee.

(b) Recommend to the Department of Justice that, in cases where there is substantial or material violation or the threat of substantial or material violation of the contractual provisions set forth in section 301 of this order, appropriate proceedings be brought to enforce those provisions, including the enjoining, within the limitations of applicable law, of organizations, individuals or groups who prevent directly or indirectly, or seek to prevent directly or indirectly, compliance with the aforesaid provisions.

(c) Recommend to the Department of Justice that criminal proceedings be brought for the furnishing of false information to any contracting agency or to the Committee as the case may be.

(d) Terminate, or cause to be terminated, any contract, or any portion or portions thereof, for failure of the contractor or subcontractor to comply with the nondiscrimination provisions of the contract. Contracts may be terminated absolutely or continuance of contracts may be conditioned upon a program for future compliance approved by the contracting agency.

(e) Provide that any contracting agency shall refrain from entering into further contracts, or extensions or other modifications of existing contracts, with any non-complying contractor, until such contractor has satisfied the Committee that he has established and will carry out personnel and employment policies in compliance with the provisions of this order.

(f) Under rules and regulations prescribed by the committee, each contracting agency shall make reasonable efforts within a reasonable time limitation to secure compliance with the contract provisions of this order by methods of conference, conciliation, mediation, and persuasion before proceedings shall be instituted under paragraph (b) of this section, or before a contract shall be terminated in whole or in part under paragraph (d) of this section for failure of a contractor or subcontractor to comply with the contract provisions of this order.

SEC. 313. Any contracting agency taking any action authorized by this section, whether on its own motion, or as directed by the Committee, or under the Committee's rules and regulations, shall promptly notify the Committee of such action or reasons for not acting. Where the Committee itself makes a determination under this section, it shall promptly notify the appropriate contracting agency of the action recommended. The agency shall take such action and shall report the results thereof to the Committee within such time as the Committee shall provide.

SEC. 314. If the Committee shall so direct, contracting agencies shall not enter into contracts with any bidder or prospective contractor unless the bidder or prospective contractor has satisfactorily complied with the provisions of this order or submits a program for compliance acceptable to the Committee or, if the Committee so authorizes, to the contracting agency.

SEC. 315. Whenever a contracting agency terminates a contract, or whenever a contractor has been debarred from further government contracts, because of noncompliance with the contractor provisions with regard to nondiscrimination, the Committee, or the contracting agency involved, shall promptly notify the Comptroller General of the United States.

SUBPART E—CERTIFICATES OF MERIT

SEC. 316. The Committee may provide for issuance of a United States Government Certificate of Merit to employers or employee organizations which are or may hereafter be engaged in work under government contracts, if the Committee is satisfied that the personnel and employment practices of the employer, or that the personnel, training, apprenticeship, membership, grievance and representation, upgrading and other practices and policies of the employee organization, conform to the purposes and provisions of this order.

SEC. 317. Any Certificate of Merit may at any time be suspended or revoked by the Committee if the holder thereof, in the judgment of the Committee, has failed to comply with the provisions of this order.

SEC. 318. The Committee may provide for the exemption of any employer or employee organization from any requirement for furnishing information as to compliance if such employer or employee organization has been awarded a Certificate of Merit which has not been suspended or revoked.

PART IV—MISCELLANEOUS

SECTION 401. Each contracting agency (except the Department of Justice) shall defray such necessary expenses of the Committee as may be authorized by law, including section 214 of the Act of May 3, 1945, 59 Stat. 134 (31 U.S.C. 691): *Provided*, that no agency shall supply more than fifty per cent of the funds necessary to carry out the purposes of this order. The Department of Labor shall provide necessary space and facilities for the Committee. In the case of the Department of Justice, the contribution shall be limited to furnishing legal services.

SEC. 402. This order shall become effective thirty days after its execution. The General Services Administration shall take appropriate action to revise the standard Government contract forms to accord with the provisions of this order and of the rules and regulations of the Committee.

SEC. 403. Executive Order No. 10479 of August 13, 1953 (18 F.R. 4899), together with Executive Orders Nos. 10482 of August 15, 1953 (18 F.R. 4944), and 10733 of October 10, 1957 (22 F.R. 8135), amending that order, and Executive Order No. 10557 of September 3, 1954 (19 F.R. 5655), are hereby revoked, and the Government Contract Committee established by Executive Order No. 10479 is abolished. All records and property of or in the custody of the said Committee are hereby transferred to the President's Committee on Equal Employment Opportunity, which shall wind up the outstanding affairs of the Government Contract Committee.

Division of Minerals

Subject: OME-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana
Contract 2148

JUSTIFICATION FOR AMENDMENT NO. 1

In a memorandum, dated July 25, 1962, Region I advised that the Operator could not hire a D-8 bulldozer as specified in the contract. However, he did obtain a D-6 dozer that has performed satisfactorily.

This proposed amendment allows the Operator to use the D-6 dozer at a reduced unit cost per hour of work.

SUBJECT to visible easements and easements of record;

Said AUGUST NUMBER ONE MILL SITE and AUGUST NUMBER TWO MILL SITE are also SUBJECT to surface rights and surface ownership of record in other parties;

Said MARY LODE, ANN LODE, GOLD BOY LODE and GOLD BUG LODE, as well as the BOLERO and MC TAVISH Unpatented Claims are SUBJECT to a lien until MAY 17, 1972, in favor of the United States of America;

and

WHEREAS, The Seller is duly authorized to sell said claims and all minerals therein, and the Buyer wishes to acquire an option to purchase same which will permit it, its nominee or nominees, or its assigns to examine, test and survey the possibilities of said mineral claims, and

WHEREAS, The Seller has warranted to the Buyer that it has the full right, title and interest in and to the said Patented Claims, except as hereinbefore stated, and the right to deal with and alienate the same, free and clear of adverse claim or encumbrance,

NOW, THEREFORE, In consideration of the promises, and the payment by Buyer of the sum of $25,000.00 to Seller, upon the execution by Buyer of this Agreement, Seller hereby gives to Buyer the option to purchase said claims, together with all personal property and all appurtenances and hereditaments now situated thereon or appertaining thereto, save and except that certain steel office building now located by the portal of the mine now located on said mineral claims, for the sum of $400,000.00 upon the following terms and conditions, to-wit:

1. This option will expire July 26, 1970, unless exercised prior thereto or unless Buyer pays Seller an additional $25,000.00 on or before July 26, 1970, which will extend this option until January 26, 1971.

2. That the consideration paid for this option and for such extension shall be applied on said purchase price, if Buyer exercises this option.

3. That this option must be exercised prior to its expiration, in the following manner:

   (a) By written Notice to Seller, which Notice shall be deemed given three days after depositing same in the Canadian Mails, certified or registered mail, postage prepaid, addressed to Seller at 412 W. Main, Lewistown, Montana, 59457, and

   (b) By depositing the balance due on said purchase price in Escrow at NORTHWESTERN BANK OF LEWISTOWN, Lewistown, Montana, to be by it disbursed as hereinafter set forth.

4. That upon exercise of this option, Seller will convey said claims to Buyer, as follows:

   By Quit Claim Deed on all the Unpatented Claims and on AUGUST NUMBER ONE MILL SITE and AUGUST NUMBER TWO MILL SITE;

   By Warranty Deed on all the other Patented Claims, except that MARY LODE, ANN LODE, GOLD BOY LODE and GOLD BUG LODE would be conveyed subject to the lien of the United States of America;

   Seller will furnish to Buyer Abstracts of Title on the claims to be conveyed by Warranty Deed, continued to whatever date is necessary to show good and marketable title thereto to be vested in Seller, subject to visible easements and easements of record and to said lien of the United States of America through the Office of Minerals Exploration of the Department of the Interior. Seller may furnish Title Insurance in lieu of Abstract on all or any part of said claims to be conveyed by Warranty Deed.

   That said Deeds and an executed copy of this Option shall be deposited in Escrow at said NORTHWESTERN BANK.

5. Upon exercise of this Option, Buyer shall have 45 days after receipt of the continued Abstracts within which to have the same examined and obtain an Attorney's opinion thereon. Within said 45 days, Buyer shall furnish Seller and said Escrow Bank with a copy of such Title Opinion, or, if no such opinion is provided within said time, said Escrow Bank is authorized to disburse to Seller said purchase price balance. If such title opinion reveals defects rendering said title unmarketable, Seller shall promptly proceed at its expense to remedy such defects. Seller shall have no responsibility for any defect which is not specified in such written opinion as rendering said title unmarketable. If Seller shall not have caused such title defects to be cured within six months from the date of receipt of such title opinion, then Buyer may either:

(a) Rescind this agreement and obtain return from the Escrow Bank of the balance of said purchase price, or

(b) Take such action as may be necessary to clear said defects and obtain reimbursement for the cost thereof, including reasonable Attorney's fees, from the funds held by said Escrow Bank, and the balance thereof shall then be delivered to Seller by said bank.

After said title defects are cured, said Abstracts will be again continued, at Seller's expense, to include the curative instruments and Buyer shall have 20 days, after receipt of such continued Abstracts, for supplemental examination and opinion. Upon receipt by said Escrow Bank of said supplemental opinion passing said title, or upon expiration of said 20 day period without any such opinion, said bank shall disburse said purchase price balance to Seller and deliver said Deeds to Buyer.

A Commitment to Insure from a Title Insurance Company, delivered to said Escrow Bank, will take the place of an Abstract and Attorney's opinion on any of said claims included in said Commitment.

6. Buyer shall be entitled to enter upon said claims and possess the same upon execution of this Option and conduct such examinations and investigations, including such geological, geochemical or geophysical surveying, drilling, trenching, sampling or assaying as it shall deem necessary or convenient to determine whether such claims can be operated and mined economically, and may remove therefrom any ore deemed by it to be necessary for assaying and testing purposes. In this connection, Buyer shall also have the use of so much of the surface, improvements, water rights, easements, appurtenances and hereditaments and personal property as are necessary or convenient or as may be within the power of Seller to authorize.

Until said Option is exercised, Buyer will not mine any ore from said claims for commercial purposes or for any purposes other than those set forth above, nor will it sell, remove or stockpile any such ore.

In any event on any minerals or metals produced on or before May 17, 1972, from said MARY LODE, ANN LODE, GOLD BOX LODE, GOLD BUG LODE, BOLERO or MC TAVISH Claims, Buyer will pay to the United States of America, in accordance with its said lien, a royalty of 5% of the gross proceeds therefrom or of any thereof unsold, and shall furnish said United States with copies of settlement sheets and otherwise comply with the terms of said lien.

7. Seller will pay all taxes and assessments levied against said claims for 1969 and prior years, and Buyer will pay the same for 1970 and for all years thereafter if this Option is exercised. All such taxes and assessments will be paid before the same become delinquent.

8. The annual assessment work on said Unpatented Claims for the year ending September 1, 1969, has been performed and Affidavits establishing same have been filed. The Buyer will perform such work by July 1st of each year during the term of this Option and will file Affidavits thereof.

9. All taxes imposed upon Buyer based upon its activities on any part of the claims shall be promptly paid by Buyer.

10. Buyer will carry comprehensive liability and property damage insurance, upon which Seller shall be named as an additional insured to adequately protect Seller from any and all claims arising during the term of this Option. Buyer shall hold Seller harmless from any and all such claims, from all expense in defending against the same, and from any and all liens for labor, services, materials and supplies furnished to Buyer.

11. Buyer shall conduct the herein authorized operations on said claims in a good and workmanlike and minerlike manner and, upon reasonable request, will make available to Seller for examination or copying all maps, reports and other data resulting from its examination and investigation of said claims, including all surveys, drill logs and geological reports, as well as all records and books of account relevant to any question that might arise under this agreement.

12. Buyer may, at its expense, apply for Patents for said Unpatented Claims, or any thereof, and obtain said Patents in Seller's name before the exercise of this Option and in its own name after such exercise. Seller will cooperate in such application and efforts by Buyer.

13. Upon reasonable request, Seller will deliver to Buyer all reports, maps and information it has regarding the minerals under or upon said claims or as may be convenient for Buyer's use hereunder.

14. Seller will pay all charges made by said bank in connection with the Escrow mentioned herein.

15. Buyer may cut and use such timber from any of the Patented Claims as may be necessary for the herein authorized operations, but no timber shall be cut or sold for commercial purposes.

16. Time is of the essence of this Option and it shall automatically terminate, without notice, if Buyer fails to pay the consideration to extend this Option as stated in Paragraph 1 hereof or fails to exercise this Option as herein provided, or fails to comply with any of its other obligations hereunder.

Buyer may also abandon this Option and terminate the same by written notice to Seller, given in accordance with Paragraph 3 (a) hereof.

Upon such termination, however caused, Seller shall retain all payments theretofore received, Buyer will vacate said claims and deliver possession thereof and of said personal property to Seller, in as good condition as now exists, reasonable wear and tear and damage by the elements excepted, and said Escrow Bank shall return to Seller all documents held by it.

Upon such termination, however caused, Buyer shall have 90 days thereafter within which to remove any machinery, equipment or other personal property owned by it and which it brought upon said claims. Any thereof which is still on any of said claims after the expiration of said 90 day period shall become the property of Seller.

17. Upon exercise of this Option, Seller shall execute and deliver to Buyer any other documents necessary to complete the sale and purchase herein set forth.

18. This constitutes the entire agreement and supersedes all prior agreements. Anything not expressed herein shall have no effect for any purpose and no one has authority to make any promise, warranty or representation not expressed herein.

19. During the term of this Option, Seller and its officers or duly authorized representatives shall have the right to come upon said claims at all reasonable times for the purpose of inspecting said claims and other property and Buyer's activities hereunder.

20. The terms and provisions hereof shall extend to and be binding upon the parties, their successors, and assigns.

IN WITNESS WHEREOF, The parties have executed this agreement, the day and year first above written.

It is agreed MAY 17 1962 (Date), between the United States of America, acting through the Department of the Interior, Office of Minerals Exploration, hereinafter called the "Government," and

Northern Continental, Inc., a Montana corporation.

4534 West North Av. Chicago, Illinois 60639

whose mailing address is P. O. Box 1550, Grand Junction, Colorado, hereinafter called the "~~Operator," as follows:~~

ARTICLE I. Authority and scope.--(a) This contract, entered into under the authority of Public Law 701, 85th Cong., 2d sess. (72 Stat. 700; 30 U.S.C. § 641 - 646), consists of this form, the attached Annex I (land description), Exhibit A (work and costs), and the maps and documents listed. The work is a search for new or unexplored deposits of the commodity designated above. The Operator shall begin the work on or before June 1, 1962 (Date), and, subject to the provisions of Article 7 and Exhibit A, shall complete the work within 24 months from the date of the contract.

(b) The description of the work and the fixed cost for each unit of work to be performed (per foot of drilling, per foot of drifting, per hour of operations, etc.) are hereby agreed upon as specified in Exhibit A. The estimated total cost of the work is $ 76,300.00 The Government will contribute 50 percent of the total fixed unit costs of the work performed, not in excess of $ 38,150.00 in accordance with the provisions of Articles 4 and 5.

(c) Interest computation.--Simple interest computed annually at the rate of 6 percent shall accrue from the dates Federal funds are made available until the period specified for payment of royalty expires, or until the amount of Federal funds contributed is fully repaid with interest.

(d) The Operator shall not transfer or assign this contract or any right or obligation thereunder without the written consent of the Government.

ARTICLE 2. Operator's rights in land.--(a) The Operator represents and undertakes that Annex I correctly describes the land which is the subject of this contract and the nature of the Operator's right of property and possession therein (whether as owner, lessee, or otherwise), and that such right, title, or interest is subject only to the following claims, liens, or encumbrances:

See Annex I

(b) The Subordination Agreement of the holder of any claim, lien, or encumbrance listed above and (if the Operator does not hold the legal title) the Lien Agreement of any holder of the legal title of the land (lessor, seller, optionor, etc.) are attached as follows:

See Annex I

(c) The Operator shall preserve and maintain his right, title, or interest in the land and his right to the possession thereof for the purposes of this contract, and shall devote the land and all existing improvements, facilities, buildings, installations, and appurtenances to the purposes of this contract. The Operator shall neither transfer, convey, nor surrender the land nor any right, title, or interest therein, nor permit nor suffer any claim, lien, or encumbrance thereon, without expressly referring to and providing in the instrument of conveyance, lien, or encumbrance for the preservation of the Government's right to a royalty on production and liens for the payment thereof. Two true copies of such instrument shall be furnished to the Government. If the Government's rights to royalty as provided in Article 6 have been terminated, the provisions of this paragraph (c) shall become inapplicable.

ARTICLE 3. Performance of the work.--(a) Operator's responsibility.--The work shall be performed diligently, efficiently, in a workmanlike manner in accordance with good mining standards, and in compliance with State laws governing health, safety, and liability insurance covering employment. The Operator shall provide suitable and adequate equipment, facilities, materials, supplies, and labor to complete the work as specified in Article 1(a).

(b) Government may inspect.--The Operator shall consult with and inform the Government on all phases of the work as it progresses. The Government may enter at all reasonable times to inspect the work under the contract and production operations during the period that royalty is payable to the Government. The Operator shall provide the Government with all reasonable means of access for such inspections.

ARTICLE 4. Contribution by the Government.--The Government will make its contribution on the basis of the monthly vouchers referred to in Article 5(b), but all payments by the Government are provisional only, subject to audit. Until the account between the Operator and the Government is finally audited and settled and the Operator's final report has been received, the Government may withhold such sums as are necessary to protect its interests. To the extent that amounts in excess of fixed unit costs or in excess of the estimated total cost may be necessary for the performance of the work, the Operator shall incur and pay such amounts for his own account without contribution by the Government. The Government will not contribute to the cost of any work performed prior to the date of this contract. The Government may make payments for the account of the Operator directly to independent contractors and suppliers rather than to the Operator.

ARTICLE 5. Reports, accounts, audits.--(a) Operator's records.--The Operator shall keep suitable records and accounts of the units of work performed and of any production in which the Government may have an interest; and shall preserve those with respect to work performed for at least three years after final payment by the Government, and those with respect to production for at least three years after any obligation to pay royalties to the Government has terminated. The Government may inspect and audit said records and accounts at any time, either by itself or by a certified public accountant. The Comptroller General of the United States or his representative, until the expiration of said three-year periods, shall have access to and the right to examine all pertinent books, documents, papers, and records of the Operator.

(b) Monthly reports.--The Operator shall provide the Government with five copies of monthly reports in three sections as follows:

(1) Operator's Monthly Voucher claiming costs for work performed;

(2) Operator's Progress Report showing the number of units of the various types of work performed; and

(3) a narrative report of the work performed during the reporting period, including adequate engineering-geological maps or sketches, drill hole logs and locations, and assay reports on samples taken concurrently with advance in mineralized ground.

(Forms for reporting under (1) and (2) above will be provided by the Government.)

(c) Final report.--Upon completion of the work or termination of the Government's obligation to contribute to costs, the Operator shall furnish the Government with five copies of a final report (in addition to the final monthly report). This final report shall include a geological and engineering evaluation of the results of the work performed under the contract with an estimate of the ore reserves resulting from such work, complete assay data, adequate geological and engineering maps or sketches, and a summary of the work performed and the unit costs thereof.

(d) Report of sales.--The Operator shall provide the Government with suitable accounting and documentary evidence covering all production to which the Government's royalty relates, such as copies of smelter or concentrator settlement sheets and certified accounts of production and sale or other disposition of production.

(e) Compliance with requirements.--If the Government determines that any of the Operator's reports, records, or accounts are insufficient or incomplete, or if the Operator fails to make them, the Government may procure the preparation or completion of same with suitable attachments as an expense of the work to which the Operator shall contribute. The Government may withhold approval and payment of any vouchers relating to insufficient or incomplete reports, records, or accounts.

ARTICLE 6. Repayment by Operator.--(a) Certification.--If the Government considers that mineral or metal production from the land covered by the contract may be possible as a result of the exploration work, it shall so certify in writing to the Operator at any time not later than six months after a sufficient final report and final accounting (see Article 5) have been furnished.

(b) Royalty on production.--The Operator, whether or not the producer (for example, if the Operator either transfers or does not retain his interest in the land), shall pay to the Government a royalty on all minerals and metals mined or produced from the land as follows:

(1) irrespective of any certification of possible production--from the date of the contract until the lapse of the time within which the Government may issue such certification or until the total net amount contributed by the Government is fully repaid with interest, whichever occurs first; or

(2) if the Government issues a certification of possible production--for a period of ten years from the date of the contract or until the total net amount contributed by the Government is fully repaid with interest, whichever occurs first.

(c) Payment of royalty.--(1) The Government's royalty shall be five percent of the [redacted] gross proceeds (including any bonuses, premiums, allowances, or other benefits) from the production sold, in the form sold (ore, concentrate, metal, or equivalent), at the point of delivery (the f.o.b. point); except, that charges of the buyer arising in the regular course of business and shown as deductions on the buyer's settlement sheets (such as treatment processes performed by the buyer, sampling and assaying to determine the value of the production sold, and freight payable by the buyer to a carrier (not the Operator)), shall be allowed as deductions in arriving at the "gross proceeds" as that term is used herein. No costs of the Operator are deductible in arriving at the "gross proceeds" as that term is here used.

The term "treatment processes" means those processes (such as milling, concentrating, smelting, refining, or equivalent, but excluding fabricating or manufacturing) applied to the crude ore or other production after it is extracted from the ground to put it into a commercially marketable form.

(2) The Government's royalty shall be computed and paid currently upon each lot sold, held, or used in integrated operations, as the case may be.

(d) Unsold production.--If any production (ore, concentrate, metal, or equivalent), after the lapse of six months from the date the ore was extracted from the ground, remains neither sold nor used by the Operator in integrated manufacturing or fabricating operations (for instance if it is stockpiled), the Government, at its option, as long as it so remains, may require the computation and payment of its royalty on the value of such production in the form (ore, concentrate, metal, or equivalent) it is in when the Government elects to require computation and payment. If any production is used by the Operator in integrated manufacturing or fabricating operations before the Government makes its election, the Government's royalty on such production shall be computed on the value thereof in the form in which and at the time it is so used. "Value" as here used means what is or would be gross income from mining operations for percentage depletion purposes in Federal income tax determination, or the market value, whichever is greater.

(e) Lien for payment.--To secure the payment of royalty (see Article 6(b)), the Operator hereby grants to the Government a lien upon his interest in the land and upon any production of minerals and metals therefrom until the royalty claim is extinguished by lapse of time or is fully paid.

(f) Notice to purchasers.--The Operator shall give notice of the Government's claim for royalty to any purchaser of the production, and shall authorize and direct such purchaser to pay the royalty directly to the Government and to furnish the Government with copies of the settlement sheets. If the records of any production and sales or other disposition of production, whether the production is by the Operator or by others, are not made available to the Government, the amount of the royalty may be estimated by the Government, and this estimate shall be final and binding upon the Operator.

(g) No obligation to produce.--Nothing in this contract shall be construed as imposing any obligation on the Operator or the Operator's successor in interest to engage in any production operations.

(h) Government not obligated to buy.--Nothing in this contract shall be construed as imposing any obligation on the Government to purchase any minerals and metals mined or produced from the land.

ARTICLE 7. Termination of the Government's Obligations.--(a) If the Government determines that operations at any time have failed to achieve anticipated results and further work is not justified, the Government may give the Operator written notice thereof, and thereupon:

(1) the Government shall be free of all obligation to pay on account of units of work not then performed; and

(2) the Operator shall be free of all obligation to prosecute the work other than such as may be necessary and incidental to final accounting and reporting.

(b) If the Government determines that the Operator is in default under the terms of the contract, the Government may give the Operator written notice of such default with a specification of reasonable time within which the default must be cured; and if the Operator fails to cure such default as required, thereupon:

(1) the Government shall be relieved of all obligation to pay on account of units of work not performed when the notice was given, and

(2) the Operator shall be free of all obligation to prosecute the work other than such as may be necessary and incidental to final accounting and reporting.

The Government may also avail itself of any other remedy the law may provide for breach of contract, including the right to rescind the contract and to demand repayment of all moneys contributed by the Government under the contract.

(c) The giving of any notice by the Government under the provisions of this Article 7 shall not affect the Government's rights as provided for in the contract with respect to royalty and liens to secure the payment thereof, and such rights shall be fully preserved.

(d) The determinations of the Government are subject to appeal under Article 11.

ARTICLE 8. Notices to be given by the Government may be delivered to the Operator or may be sent by certified mail addressed to the Operator at his mailing address stated in this contract. If mailed, notices are deemed to have been delivered five days after the date of mailing.

ARTICLE 9. Officials not to benefit.--No member of or delegate to Congress or resident commissioner shall be admitted to any share or part of this contract or to any benefit that may arise therefrom; but this provision shall not be construed to extend to this contract if made with a corporation for its general benefit.

See Article 14

~~ARTICLE~~ 10. Nondiscrimination.--In connection with the performance of work under this contract, the Operator agrees not to discriminate against any employee or applicant for employment because of race, religion, color, or national origin. The aforesaid provision shall include, but not be limited to, the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Operator agrees to post hereafter in conspicuous places, available for employees and applicants for employment, notices to be provided by the Government setting forth the provisions of the nondiscrimination clause.

The Operator further agrees to insert the foregoing provision in all subcontracts hereunder, except subcontracts for standard commercial supplies or raw materials.

ARTICLE 11. Disputes.--Any dispute arising under this contract which is not disposed of by agreement shall be decided by the Director, Office of Minerals Exploration, who shall reduce his decision to writing and mail or otherwise furnish a copy thereof to the Operator. The decision of the Director, Office of Minerals Exploration, shall be final and conclusive unless, within 30 days from the date of receipt of such copy, the Operator mails or otherwise furnishes to the Director, Office of Minerals Exploration, a written appeal addressed to the Secretary. The decision of the Secretary or his duly authorized representative for the determination of such appeals shall be final and conclusive unless determined by a court of competent jurisdiction to have been fraudulent, or capricious, or arbitrary, or so grossly erroneous as necessarily to imply bad faith, or not supported by substantial evidence.

The term "Director, Office of Minerals Exploration," as used herein includes his duly authorized representative.

ARTICLE 12. Eight-Hour Law of 1912--Overtime compensation.--This contract, to the extent that it is of a character specified in the Eight-Hour Law of 1912, as amended (40 U. S. Code 324—326) and is not covered by the Walsh-Healey Public Contracts Act (41 U. S. Code 35—45), is subject to the following provisions and exceptions of said Eight-Hour Law of 1912, as amended, and to all other provisions and exceptions of said Law:

No laborer or mechanic doing any part of the work contemplated by this contract, in the employ of the Operator or any independent contractor contracting for any part of said work contemplated, shall be required or permitted to work more than eight hours in any one calendar day upon such work, except upon the condition that compensation is paid to such laborer or mechanic in accordance with the provisions of this clause. The wages of every laborer and mechanic employed by the Operator or any independent contractor engaged in the performance of this contract shall be computed on a basic day rate of eight hours per day; and work in excess of eight hours per day is permitted only upon the condition that every such laborer and mechanic shall be compensated for all hours worked in excess of eight hours per day at not less than one and one-half times the basic rate of pay. For each violation of the requirements of this clause a penalty of five dollars shall be imposed for each laborer or mechanic for every calendar day in which such employee is required or permitted to labor more than eight hours upon said work without receiving compensation computed in accordance with this clause, and all penalties thus imposed shall be withheld for the use and benefit of the Government.

ARTICLE 13. Copeland (Anti-Kickback) Act--Nonrebate of wages.--The regulations of the Secretary of Labor applicable to contractors and subcontractors (29 CFR, Part 3), made pursuant to the Copeland Act, as amended (40 U. S. C. 276c) and to aid in the enforcement of the Anti-Kickback Act (18 U. S. C. 874) are made a part of this contract by reference. The Operator will comply with these regulations and any amendments or modifications thereof and will be responsible for the submission of affidavits required of independent contractors thereunder. The foregoing shall apply except as the Secretary of Labor may specifically provide for reasonable limitations, variations, tolerances, and exemptions.

ARTICLE 14. Changes and added provisions.--

The provisions governing performance of work under Government contracts, as set out in Section 301 of Executive Order 10925, dated March 6, 1961 (a copy of which is attached hereto as Exhibit B and by reference hereby incorporated and made a part of this contract), shall be applicable to this contract, and shall be included in all contracts executed by the Operator for the performance of work contemplated by this contract, and for that purpose the term "contract" shall be deemed to refer to this instrument and to contracts awarded by the Operator and the term "contractor" shall be deemed to refer to the Operator and to contractors awarded contracts by the Operator.

A new subparagraph (i) is added to Article 6 of this contract to read as follows:

"(i) Special Agreement Concerning Royalty. Notwithstanding the certification provisions of this Article 6, and with no further action required on the part of the Government, the Operator, as principal if the Operator is the producer, or as surety if the Operator is not the producer, or its successor, shall pay to the Government a royalty on production, regardless of where it is produced, which is transported through any workings or any portion of any workings to the cost of which the Government has contributed, for the period described in Article 6(b)(2) above, and pursuant to the terms of Article 6(c) et seq. However, in no event shall more than one royalty be due or paid under this contract on the same production."

Executed in quintuplicate the day and year first above written.

EXPLORATION CONTRACT
NORTHERN CONTINENTAL, INC.
OME-6236

ANNEX I

The land referred to in Article 2 of the contract consists of four (4) patented and two (2) unpatented lode mining claims, including all rights pertaining thereto, in secs. 15 and 22, T. 25 N., R. 24 E., Montana Principal Meridian, Phillips County, Montana. Patent and recording data of the claims are as follows:

Patented Claims

Name	Survey No.	Patent No.
Gold Boy	3806	22176
Gold Bug	3807	22177
Mary	3841	22311
Ann	3842	22311

Unpatented Claims

	Recorded at Malta, Phillips County, Montana	
Name	Book	Page
Bolero	1	375
McTavish	1	376

The claims are shown in green on Plate 1 entitled, "Claim Map, Northern Continental, Little Rockies Area . . .", attached hereto and made part hereof.

The Operator has rights of possession of the claims under the terms of a Mining Lease, dated July 10, 1961, granted by Little Rockies Mining and Development Company, as amended by an Amendment to Mining Lease, dated August 1, 1961. The following former owners have royalty

rights on production from the above-listed claims: Marion S. Heller, Juanita Heller, Cecil Flinders, Margaret Flinders, Frank B. Bryant, Della Bryant, Edward F. Wieglenda, and Vesta Wieglenda.

A Lien or Subordination Agreement dated March 5, 1962, executed by Little Rockies Mining and Development Company and the individual royalty owners listed above is attached hereto and made part hereof.

LIEN OR SUBORDINATION AGREEMENT 1/

To the United States of America:

That certain land in the County of Phillips, State of Montana,

described as follows: 2/

Unpatented Claims	Recorded at Malta Phillips County, Montana Book	Page	Patented Claims	Patent No.
			Gold Boy	22176
Bolero	1	375	Gold Bug	22177
McDavish	1	376	Mary	22311
			Ann	22311

hereinafter called the "land", is the subject of a proposed exploration contract, hereinafter called the "Contract", between the United States of America, hereinafter called the "Government" and

Northern Continental, Inc., a Montana corporation 3/

hereinafter called the "Operator". In consideration for and as an inducement to the Government executing the Contract, the undersigned:

1. (a) Being the owner of an interest in the land, hereby grants to the Government a lien upon all of his right, title, and interest in the land and upon any production of minerals therefrom to secure the payment to the Government of the royalty on production provided for by the Contract, and agrees if the Operator's interest should be surrendered or terminated at any time prior to the expiration of the rights of the United States under said Contract to pay royalty to the Government according to the terms of said Contract; or

(b) Being the holder of a claim, lien, or encumbrance against the land, hereby subordinates his claim, lien, or encumbrance in or against the land and in any production therefrom to the rights of the Government under the Contract with respect to royalty on production and liens to secure same. 4/

2. Undertakes and agrees that property in which the Government may acquire an interest or equity under the Contract may be dismantled, severed from the land, and removed as may be provided in the Contract; and the Government's interest and equity in such property shall be prior and superior to any adverse right or claim of the undersigned.

3. Represents and undertakes that there is no claim, lien, or encumbrance upon the undersigned's right, title, claim, or interest in or against the land other than the following: (If "none" insert the word "none". Do not leave blank.)

NONE

1/ Production from the land is not required, and in the absence of production there is no obligation to pay royalty to the Government.

2/ Either (a) insert the legal description of the land, or (b) strike out the words "as follows" and insert "in a lease /or contract, deed, or other document/ dated_____, and recorded in Book____, Page____, official records of said county". If (b) is used, the book and page of recordation must be inserted above. If the space provided is insufficient, use an Annex and refer to the Annex in the space.

3/ Insert name exactly as it appears in the Application MME Form 40.

4/ Subparagraph 1(a) does not apply to the holder of a claim, lien, or encumbrance.

Exh. 2c(1)

4. Undertakes and agrees (a) neither to commit any act nor assert any claim in conflict with the provisions of this Agreement; and (b) to give advance notice of the Government's rights under this agreement to any subsequent transferee, mortgagee, encumbrancer, or lessee of any of the undersigned's right, title, claim, or interest in or against the land or any production therefrom, furnishing the Government with two true copies of such notice; and

5. Consents to all amendments (including an agreement of termination) and assignments of the Contract without notice thereof, and undertakes and agrees that this agreement shall extend and apply thereto.

6. Added provisions NONE (State "None" or "See Annex No._____".)

Dated this 5th day of March, 1962.

GRAND JUNCTION, COLORADO

EXPLORATION CONTRACT
NORTHERN CONTINENTAL, INC.
OME-6236

EXHIBIT A

The purpose of this project is to explore by drifting, raising, and long-hole drilling for gold-silver-bearing ore bodies along the strike of the Gold Bug vein system, which occurs in a shattered zone within Tertiary syenite porphyry.

General Provisions

All significantly mineralized areas traversed in the drift or raises shall be sampled by cutting channels normal to the vein at intervals of not more than 10 feet. The cuttings from long-hole drill holes shall be recovered and if they show significant mineralization shall be sampled. Each such sample shall represent not more than a 5-foot length of the hole.

Each sample shall be split as necessary and then assayed for gold and silver. The Operator shall store one split in a suitable container properly identified as to the location where the sample was obtained. The stored samples shall be made available for Government inspection and possible use. With prior Government approval, the Operator may dispose of the stored samples.

True copies of assay certificates for all samples shall be submitted with the Operator's monthly reports, which shall also include a map or sketch showing the work completed during the reporting period. The map or sketch should show the general geological formations and structures traversed by the drift, raises, and long holes and the locations and assay values of the samples.

The Operator shall provide such supervisory and technical services as may be required to complete the work in a satisfactory manner.

The location, direction, and extent of each work item shall be subject to Government approval.

Description of the Work

The work shall consist of constructing an access road approximately 1800 feet in length from the main road to the portal site of the Gold Bug drift and excavating the portal. The bulldozer used in constructing the road and portal site shall not be smaller than a D-8 Caterpillar bulldozer or equivalent unit of any other make.

From the portal site on the Gold Bug vein system, at an elevation of approximately 4570 feet, a drift shall be driven 1500 feet in a northeasterly direction along the vein. The drift shall be not less than 6' x 8' in cross section in the clear of timber and shall be timbered as necessary, using standard drift sets of not less than 8" x 8" timber, or equivalent round timber. Mine rails shall not be less than 30 pound size, air lines 3-inch diameter, and water lines 1-inch diameter. The drift shall be ventilated, using not less than 12-inch diameter vent pipe.

In the drift, at a point about 500 feet in from the portal, 3 long holes shall be drilled into each wall of the drift. One hole shall be about 5 degrees up from horizontal and the others at 30 and 45 degrees. At intervals of 200 feet, as the drift is advanced, the same procedure for drilling additional long holes shall be followed. It is estimated that the long holes will average about 100 feet in length and be about 1-7/8" in completed diameter. They are designed to explore the upper and side extensions of the vein system. Two 100-foot raises shall be driven from the drift at points agreed upon by the Operator and the Government. The raise shall have two timbered compartments each approximately 4' x 5' in the clear of timber.

The Government will contribute to no more than 80 hours of bulldozer work on the access road and portal site, 1500 feet of drifting, 1000 feet of drift timbering, 200 feet of raising, 3600 feet of long-hole drilling, and the assaying of 1400 samples for gold and silver.

The approximate location and extent of the access road, drifts, raises, and long holes are shown in red on the attached Plate 1 and Plate 2. Plate 2 is a longitudinal projection in the plane of the Gold Bug vein and shows prior work and the proposed exploration work.

Estimated Cost of Project

Fixed Unit Costs

80 hours bulldozing access road and portal site, @ $15.00/hr.	$1,200.00	
1500 feet drifting, @ $36.00/ft.	$54,000.00	
1000 feet of drift timbering, @ $7.50/ft.	7,500.00	
200 feet raising, @ $36.00/ft.	7,200.00	
3600 feet long-hole drilling, @ $1.00/ft.	3,600.00	
1400 samples assayed for gold and silver, @ $2.00/sample	2,800.00	
Total Estimated Cost of Project		~~$76,300.00~~ 76,100
Government Participation @ 50%		$38,150.00

Presidential Documents

Title 3—THE PRESIDENT

Executive Order 10925

ESTABLISHING THE PRESIDENT'S COMMITTEE ON EQUAL EMPLOYMENT OPPORTUNITY

WHEREAS discrimination because of race, creed, color, or national origin is contrary to the Constitutional principles and policies of the United States; and

WHEREAS it is the plain and positive obligation of the United States Government to promote and ensure equal opportunity for all qualified persons, without regard to race, creed, color, or national origin, employed or seeking employment with the Federal Government and on government contracts; and

WHEREAS it is the policy of the executive branch of the Government to encourage by positive measures equal opportunity for all qualified persons within the Government; and

WHEREAS it is in the general interest and welfare of the United States to promote its economy, security, and national defense through the most efficient and effective utilization of all available manpower; and

WHEREAS a review and analysis of existing Executive orders, practices, and government agency procedures relating to government employment and compliance with existing non-discrimination contract provisions reveal an urgent need for expansion and strengthening of efforts to promote full equality of employment opportunity; and

WHEREAS a single governmental committee should be charged with responsibility for accomplishing these objectives:

NOW, THEREFORE, by virtue of the authority vested in me as President of the United States by the Constitution and statutes of the United States, it is ordered as follows:

PART I—ESTABLISHMENT OF THE PRESIDENT'S COMMITTEE ON EQUAL EMPLOYMENT OPPORTUNITY

SECTION 101. There is hereby established the President's Committee on Equal Employment Opportunity.

SEC. 102. The Committee shall be composed as follows:

(a) The Vice President of the United States, who is hereby designated Chairman of the Committee and who shall preside at meetings of the Committee.

(b) The Secretary of Labor, who is hereby designated Vice Chairman of the Committee and who shall act as Chairman in the absence of the Chairman. The Vice Chairman shall have general supervision and direction of the work of the Committee and of the execution and implementation of the policies and purposes of this order.

(c) The Chairman of the Atomic Energy Commission, the Secretary of Commerce, the Attorney General, the Secretary of Defense, the Secretaries of the Army, Navy and Air Force, the Administrator of General Services, the Chairman of the Civil Service Commission, and the Administrator of the National Aeronautics and Space Administration. Each such member may designate an alternate to represent him in his absence.

(d) Such other members as the President may from time to time appoint.

(e) An Executive Vice Chairman, designated by the President, who shall be *ex officio* a member of the Committee. The Executive Vice Chairman shall assist the Chairman, the Vice Chairman and the Committee. Between meetings of the Committee he shall be primarily responsible for carrying out the functions of the Committee and may act for the Committee pursuant to its rules, delegations, and other directives. Final action in individual cases or classes of cases may be taken and final orders may be entered on behalf of the Committee by the Executive Vice Chairman when the Committee so authorizes.

SEC. 103. The Committee shall meet upon the call of the Chairman and at such other times as may be provided by its rules and regulations. It shall (a) consider and adopt rules and regulations to govern its proceedings; (b) provide generally for the procedures and policies to implement this order; (c) consider reports as to progress under this order; (d) consider and act, where necessary or appropriate, upon matters which may be presented to it by any of its members; and (e) make such reports to the President as he may require or the Committee shall deem appropriate. Such reports shall be made at least once annually and shall include specific references to the actions taken and results achieved by each department and agency. The Chairman may appoint sub-committees to make special studies on a continuing basis.

PART II—NONDISCRIMINATION IN GOVERNMENT EMPLOYMENT

SECTION 201. The President's Committee on Equal Employment Opportunity established by this order is directed immediately to scrutinize and study employment practices of the Government of the United States, and to consider and recommend additional affirmative steps which should be taken by executive departments and agencies to realize more fully the national policy of nondiscrimination within the executive branch of the Government.

SEC. 202. All executive departments and agencies are directed to initiate forthwith studies of current government employment practices within their responsibility. The studies shall be in such form as the Committee may prescribe and shall include statistics on current employment patterns, a review of current procedures, and the recommendation of positive measures for the elimination of any discrimination, direct or indirect, which now exists. Reports and recommendations shall be submitted to the Executive Vice Chairman of the Committee no later than sixty days from the effective date of this order, and the Committee, after considering such reports and recommedations, shall report to the President on the current situation and recommend positive measures to accomplish the objectives of this order.

SEC. 203. The policy expressed in Executive Order No. 10590 of January 18, 1955 (20 F.R. 409), with respect to the exclusion and prohibition of discrimination against any employee or applicant for employment in the Federal Government because of race, color, religion, or national origin is hereby reaffirmed.

SEC. 204. The President's Committee on Government Employment Policy, established by Executive Order No. 10590 of January 18, 1955 (20 F.R. 409), as amended by Executive Order No. 10722 of August 5, 1957 (22 F.R. 6287), is hereby abolished, and the powers, functions, and duties of that Committee are hereby transferred to, and henceforth shall be vested in, and exercised by, the President's Committee on Equal Employment Opportunity in addition to the powers conferred by this order.

PART III—OBLIGATIONS OF GOVERNMENT CONTRACTORS AND SUBCONTRACTORS

SUBPART A—CONTRACTORS' AGREEMENTS

SECTION 301. Except in contracts exempted in accordance with section 303 of this order, all government contracting agencies shall include in every government contract hereafter entered into the following provisions:

"In connection with the performance of work under this contract, the contractor agrees as follows:

"(1) The contractor will not discriminate against any employee or applicant for employment because of race, creed, color, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, creed, color, or national origin. Such action shall include, but not be limited to, the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the contracting officer setting forth the provisions of this nondiscrimination clause.

"(2) The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor,

state that all qualified applicants will receive consideration for employment without regard to race, creed, color, or national origin.

"(3) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the agency contracting officer, advising the said labor union or workers' representative of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

"(4) The contractor will comply with all provisions of Executive Order No. 10925 of March 6, 1961, and of the rules, regulations, and relevant orders of the President's Committee on Equal Employment Opportunity created thereby.

"(5) The contractor will furnish all information and reports required by Executive Order No. 10925 of March 6, 1961, and by the rules, regulations, and orders of the said Committee, or pursuant thereto, and will permit access to his books, records, and accounts by the contracting agency and the Committee for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

"(6) In the event of the contractor's non-compliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be cancelled in whole or in part and the contractor may be declared ineligible for further government contracts in accordance with procedures authorized in Executive Order No. 10925 of March 6, 1961, and such other sanctions may be imposed and remedies invoked as provided in the said Executive order or by rule, regulation, or order of the President's Committee on Equal Employment Opportunity, or as otherwise provided by law.

"(7) The contractor will include the provisions of the foregoing paragraphs (1) through (6) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the President's Committee on Equal Employment Opportunity issued pursuant to section 303 of Executive Order No. 10925 of March 6, 1961, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the contracting agency may direct as a means of enforcing such provisions, including sanctions for non-compliance: *Provided, however,* that in the event the contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the contracting agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States."

SEC. 302. (a) Each contractor having a contract containing the provisions prescribed in section 301 shall file, and shall cause each of its subcontractors to file, Compliance Reports with the contracting agency, which will be subject to review by the Committee upon its request. Compliance Reports shall be filed within such times and shall contain such information as to the practices, policies, programs, and employment statistics of the contractor and each subcontractor, and shall be in such form, as the Committee may prescribe.

(b) Bidders or prospective contractors or subcontractors may be required to state whether they have participated in any previous contract subject to the provisions of this order, and in that event to submit, on behalf of themselves and their proposed subcontractors, Compliance Reports prior to or as an initial part of their bid or negotiation of a contract.

(c) Whenever the contractor or subcontractor has a collective bargaining agreement or other contract or understanding with a labor union or other representative of workers, the Compliance Report shall include such information as to the labor union's or other representative's practices and policies affecting compliance as the Committee may prescribe: *Provided,* that to the extent such information is within the exclusive possession of a labor union or other workers' representative and the labor union or representative shall refuse to furnish such information to the contractor, the contractor shall so certify to the contracting agency as part of its Compliance Report and shall set forth what efforts he has made to obtain such information.

(d) The Committee may direct that any bidder or prospective contractor or subcontractor shall submit, as part of his Compliance Report, a statement in writing, signed by an authorized officer or agent of any labor union or other workers' representative with which the bidder or prospective contractor deals, together with supporting information, to the effect that the said labor union's or representative's practices and policies do not discriminate on the grounds of race, color, creed, or national origin, and that the labor union or representative either will affirmatively cooperate, within the limits of his legal and contractual authority, in the implementation of the policy and provisions of this order or that it consents and agrees that recruitment, employment, and the terms and conditions of employment under the proposed contract shall be in accordance with the purposes and provisions of the order. In the event that the union or representative shall refuse to execute such a statement, the Compliance Report shall so certify and set forth what efforts have been made to secure such a statement.

SEC. 303. The Committee may, when it deems that special circumstances in the national interest so require, exempt a contracting agency from the requirement of including the provisions of section 301 of this order in any specific contract, subcontract, or purchase order. The Committee may, by rule or regulation, also exempt certain classes of contracts, subcontracts, or purchase orders (a) where work is to be or has been performed outside the United States and no recruitment of workers within the limits of the United States is involved; (b) for standard commercial supplies or raw materials; or (c) involving less than specified amounts of money or specified numbers of workers.

SUBPART B—LABOR UNIONS AND REPRESENTATIVES OF WORKERS

SEC. 304. The Committee shall use its best efforts, directly and through contracting agencies, contractors, state and local officials and public and private agencies, and all other available instrumentalities, to cause any labor union, recruiting agency or other representative of workers who is or may be engaged in work under government contracts to cooperate with, and to comply in the implementation of, the purposes of this order.

SEC. 305. The Committee may, to effectuate the purposes of section 304 of this order, hold hearings, public or private, with respect to the practices and policies of any such labor organization. It shall from time to time submit special reports to the President concerning discriminatory practices and policies of any such labor organization, and may recommend remedial action if, in its judgment, such action is necessary or appropriate. It may also notify any Federal, state, or local agency of its conclusions and recommendations with respect to any such labor organization which in its judgment has failed to cooperate with the Committee, contracting agencies, contractors, or subcontractors in carrying out the purposes of this order.

SUBPART C—POWERS AND DUTIES OF THE PRESIDENT'S COMMITTEE ON EQUAL EMPLOYMENT OPPORTUNITY AND OF CONTRACTING AGENCIES

SEC. 306. The Committee shall adopt such rules and regulations and issue such orders as it deems necessary and appropriate to achieve the purposes of this order, including the purposes of Part II hereof relating to discrimination in government employment.

SEC. 307. Each contracting agency shall be primarily responsible for obtaining compliance with the rules, regulations, and orders of the Committee with respect to contracts entered into by such agency or its contractors, or affecting its own employment practices. All contracting agencies shall comply with the Committee's rules in discharging their primary responsibility for securing compliance with the provisions of contracts and otherwise with the terms of this Executive order and of the rules, regulations, and orders of the Committee pursuant hereto. They are directed to cooperate with the Committee, and to furnish the Committee such information and assistance as it may require in the performance of its functions under this order. They are further directed to appoint or designate, from among the agency's personnel, compliance officers. It shall be the duty of such officers to seek compliance with the objectives of this order by conference, conciliation, mediation, or persuasion.

SEC. 308. The Committee is authorized to delegate to any officer, agency, or employee in the executive branch of the

Government any function of the Committee under this order, except the authority to promulgate rules and regulations of a general nature.

SEC. 309. (a) The Committee may itself investigate the employment practices of any government contractor or subcontractor, or initiate such investigation by the appropriate contracting agency or through the Secretary of Labor, to determine whether or not the contractual provisions specified in section 301 of this order have been violated. Such investigation shall be conducted in accordance with the procedures established by the Commitee, and the investigating agency shall report to the Committee any action taken or recommended.

(b) The Committee may receive and cause to be investigated complaints by employees or prospective employees of a government contractor or subcontractor which allege discrimination contrary to the contractual provisions specified in section 301 of this Order. The appropriate contracting agency or the Secretary of Labor, as the case may be, shall report to the Committee what action has been taken or is recommended with regard to such complaints.

SEC. 310. (a) The Committee, or any agency or officer of the United States designated by rule, regulation, or order of the Committee, may hold such hearings, public or private, as the Committee may deem advisable for compliance, enforcement, or educational purposes.

(b) The Committee may hold, or cause to be held, hearings in accordance with subsection (a) of this section prior to imposing, ordering, or recommending the imposition of penalties and sanctions under this order, except that no order for debarment of any contractor from further government contracts shall be made without a hearing.

SEC. 311. The Committee shall encourage the furtherance of an educational program by employer, labor, civic, educational, religious, and other nongovernmental groups in order to eliminate or reduce the basic causes of discrimination in employment on the ground of race, creed, color, or national origin.

SUBPART D—SANCTIONS AND PENALTIES

SEC. 312. In accordance with such rules, regulations or orders as the Committee may issue or adopt, the Committee or the appropriate contracting agency may:

(a) Publish, or cause to be published, the names of contractors or unions which it has concluded have complied or have failed to comply with the provisions of this order or of the rules, regulations, and orders of the Committee.

(b) Recommend to the Department of Justice that, in cases where there is substantial or material violation or the threat of substantial or material violation of the contractual provisions set forth in section 301 of this order, appropriate proceedings be brought to enforce those provisions, including the enjoining, within the limitations of applicable law, of organizations, individuals or groups who prevent directly or indirectly, or seek to prevent directly or indirectly, compliance with the aforesaid provisions.

(c) Recommend to the Department of Justice that criminal proceedings be brought for the furnishing of false information to any contracting agency or to the Committee as the case may be.

(d) Terminate, or cause to be terminated, any contract, or any portion or portions thereof, for failure of the contractor or subcontractor to comply with the nondiscrimination provisions of the contract. Contracts may be terminated absolutely or continuance of contracts may be conditioned upon a program for future compliance approved by the contracting agency.

(e) Provide that any contracting agency shall refrain from entering into further contracts, or extensions or other modifications of existing contracts, with any non-complying contractor, until such contractor has satisfied the Committee that he has established and will carry out personnel and employment policies in compliance with the provisions of this order.

(f) Under rules and regulations prescribed by the committee, each contracting agency shall make reasonable efforts within a reasonable time limitation to secure compliance with the contract provisions of this order by methods of conference, conciliation, mediation, and persuasion before proceedings shall be instituted under paragraph (b) of this section, or before a contract shall be terminated in whole or in part under paragraph (d) of this section for failure of a contractor or subcontractor to comply with the contract provisions of this order.

SEC. 313. Any contracting agency taking any action authorized by this section, whether on its own motion, or as directed by the Committee, or under the Committee's rules and regulations, shall promptly notify the Committee of such action or reasons for not acting. Where the Committee itself makes a determination under this section, it shall promptly notify the appropriate contracting agency of the action recommended. The agency shall take such action and shall report the results thereof to the Committee within such time as the Committee shall provide.

SEC. 314. If the Committee shall so direct, contracting agencies shall not enter into contracts with any bidder or prospective contractor unless the bidder or prospective contractor has satisfactorily complied with the provisions of this order or submits a program for compliance acceptable to the Committee or, if the Committee so authorizes, to the contracting agency.

SEC. 315. Whenever a contracting agency terminates a contract, or whenever a contractor has been debarred from further government contracts, because of noncompliance with the contractor provisions with regard to nondiscrimination, the Committee, or the contracting agency involved, shall promptly notify the Comptroller General of the United States.

SUBPART E—CERTIFICATES OF MERIT

SEC. 316. The Committee may provide for issuance of a United States Government Certificate of Merit to employers or employee organizations which are or may hereafter be engaged in work under government contracts, if the Committee is satisfied that the personnel and employment practices of the employer, or that the personnel, training, apprenticeship, membership, grievance and representation, upgrading and other practices and policies of the employee organization, conform to the purposes and provisions of this order.

SEC. 317. Any Certificate of Merit may at any time be suspended or revoked by the Committee if the holder thereof, in the judgment of the Committee, has failed to comply with the provisions of this order.

SEC. 318. The Committee may provide for the exemption of any employer or employee organization from any requirement for furnishing information as to compliance if such employer or employee organization has been awarded a Certificate of Merit which has not been suspended or revoked.

PART IV—MISCELLANEOUS

SECTION 401. Each contracting agency (except the Department of Justice) shall defray such necessary expenses of the Committee as may be authorized by law, including section 214 of the Act of May 3, 1945, 59 Stat. 134 (31 U.S.C. 691): *Provided*, that no agency shall supply more than fifty per cent of the funds necessary to carry out the purposes of this order. The Department of Labor shall provide necessary space and facilities for the Committee. In the case of the Department of Justice, the contribution shall be limited to furnishing legal services.

SEC. 402. This order shall become effective thirty days after its execution. The General Services Administration shall take appropriate action to revise the standard Government contract forms to accord with the provisions of this order and of the rules and regulations of the Committee.

SEC. 403. Executive Order No. 10479 of August 13, 1953 (18 F.R. 4899), together with Executive Orders Nos. 10482 of August 15, 1953 (18 F.R. 4944), and 10733 of October 10, 1957 (22 F.R. 8135), amending that order, and Executive Order No. 10557 of September 3, 1954 (19 F.R. 5655), are hereby revoked, and the Government Contract Committee established by Executive Order No. 10479 is abolished. All records and property of or in the custody of the said Committee are hereby transferred to the President's Committee on Equal Employment Opportunity, which shall wind up the outstanding affairs of the Government Contract Committee.

Re: OME-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Philips County, Montana

Dear Mr. Griswold:

On April 24, 1962 you wrote to our subsidiary, Northern Continental, Inc., asking them to submit a statement from this corporation advising that it would not finance the entire cost of the proposed exploration program on the subject project. At the request of Northern Continental, Inc. we are writing you this letter.

Continental Materials Corporation is unable to provide funds for more than one-half of the cost of the subject exploration project. Our financial resources are such that we can provide for one-half of this cost by furnishing funds to Northern Continental, Inc. and we are prepared to do so.

We have made inquiries of our two principal sources of outside financing in an attempt to secure the remainder of these funds, and we have been refused. Copies of these letters have been furnished to you.

Very truly yours,

CONTINENTAL MATERIALS CORPORATION

April 27, 1962

Mr. Robert H. Greenberg
Walter E. Heller & Company
105 West Adams Street
Chicago 90, Illinois

Dear Mr. Greenberg:

On February 23, 1962 Continental Materials Corporation, of which this company is a wholly-owned subsidiary, wrote you inquiring about a loan. In connection with an application to the U. S. Department of the Interior it is necessary that we repeat the inquiry directly and receive an answer from you addressed to us.

Based upon work done by the mining staff of our parent company we believe that the gold-silver property in northeast Montana in which we are interested has a sufficient likelihood of success to justify an exploration program which will total approximately $200,000. We would like to borrow half of this or about $100,000 from Walter E. Heller & Company.

We will furnish your company complete details concerning the property and a program we propose. However, we would like a preliminary indication from you as to whether your company is willing to undertake such financing and if so on what terms.

Sincerely,

NORTHERN CONTINENTAL, INC.

CHICAGO 90 · ILLINOIS

April 27, 1962

Mr. Peter Bauer
Northern Continental, Inc.
4534 West North Avenue
Chicago 39, Illinois

Dear Peter:

For antecedent details would you please refer to your letter to me of April 27, 1962, concerning a proposal made by the Company that this bank advance $100,000 to finance an exploration program contemplated in respect of gold-silver property located in northeast Montana. As you know, we have previously been informed as to certain details of the proposed venture.

We are unable to see how we could participate in financing the Company for such a purpose at this time. No definite repayment program could be set up inasmuch as there is no basis for predicting cash throw off and there is no alternative way which we can see as being available to repay the loan in the event that the exploration activities and things related thereto are unsuccessful.

With the foregoing in mind we are, therefore, unable to give the requested assistance to you, to our regret, at this time.

Best regards.

Very truly yours,

Gregg A. Hunter

OFFICIAL FILE COPY
O. M. E
RECEIVED APR 16 1962

Memorandum

To: Chief, Division of Field Operations

From: Acting Field Officer, Region I

Subject: Transmittal of application for OME assistance
Northern Continental, Inc.
Box 1550
Grand Junction, Colorado

Enclosed is an application for OME aid to explore for gold-silver ore on four patented and two unpatented claims in Phillips County, Montana.

The application is well prepared and documented, and it is doubtful that much, if any, worthwhile additional information will be gained by an on-site examination. U. S. Bureau of Mines records indicate that since 1900 total production from the area has been 495,356 tons of ore having an average grade of about 0.23 ounce gold and 1.84 ounces silver per ton and worth $4,848,721, or $9.79 per ton. Settlement sheets accompanying the application indicate that 359.62 tons shipped from the 350 level of the Gold Bug mine between May, 1955, and September, 1958, had a total value of $29,790.11 in gold and silver, or $82.88 per ton.

The applicant proposes to explore the downward and lateral continuation of the structure mined above the 350 level by a 3-stage program of drifting, long hole drilling, and raising. Stage I, involving 1,800 feet of access road, 1,500 feet of drifting, 400 feet of raising, 3,600 feet of long hole drilling, and 1,480 assays, is estimated to cost $109,700; Stage II, dependent upon Stage I and involving 1,000 feet of drifting, 3,000 feet of drilling, and 1,000 assays, is estimated to cost $53,362; and Stage III, involving 400 feet of raising and 160 assays, is estimated to cost $30,102. The total estimated cost of the proposed program is $193,244, of which the Government's share would be $96,622.

raise only cut 80

The applicant's estimated cost of $1,240 for 1,800 feet of road, or $0.688, say $0.69, per foot is reasonable, as are his costs for supplies and the value of equipment which he will provide. However, there is some adjustment due in his cost for personal services under Exhibit 7b.

I would think that a geologist-supervisor at $700 per month should be able to do the necessary surveying in addition to his supervision duties and that under his direction a helper at $18.00 per day could do the sampling and assist with the surveying. I do not believe a general supervisor one week per month is necessary to conduct the proposed program. Elimination of this item would also preclude the need of travel and subsistence allowance of supervisory personnel.

If the property were closer to Butte, good miners and a mechanic should be obtainable for about $2.50 per hour. Perhaps it would be difficult to get good men at this price for this property, but I think $3.00 per hour is too high. I suggest $2.65 to $2.70 would be ample. A topman at $2.25 per hour, or $18.00 per day, is reasonable.

Assaying for gold and silver at $2.00 for either or both metals is quoted by Goodall Bros. in Helena; elsewhere the quotation is $2.00 for either and $2.50 for both.

Mobilization of equipment and supplies at $3,000, especially if some of the equipment is to be brought in from Grand Junction, is probably fair, as is $1.00/ft. of advance for maintenance and repair of equipment.

The gold and silver values are spotty, and therefore at least two raises, one in each stage, would probably be prudent--two in each stage might in this case be desirable, but it also might approach blocking out of ore.

It is recommended that the two stages of drifting and long hole drilling be approved as proposed and that one raise be included in each stage. It is also recommended that the proposed access road be approved.

The costs as proposed, except for the changes mentioned, are recommended.

GENERAL INSTRUCTIONS

Before filling out this application, please read the *OME Regulations for Obtaining Federal Assistance in Financing Explorations for Mineral Reserves* (30 CFR Chap. III). To assure prompt action, your application must provide all applicable material and information specified on the back of this application form. Avoid unnecessary correspondence and delays by submitting complete and accurate information. *Please submit ~~four~~ copies of this application and all accompanying papers* except as otherwise noted. Place your name and address on each sheet. Each item of information, maps, and reports required as a part of this application is described on the back of this form. Identify each attached statement by the item number to which it applies. If an item does not apply to your application, show the item number on your statement and after it write "not applicable." Maps or sketches should be used to supplement narrative descriptions of the property location and boundaries in item 2, existing mine workings and geology in item 3, and the proposed exploration work in item 5. When this information is not too complex, all of it may be shown on one map or sketch. All documents and other attachments submitted as a part of this application, except those in item 3(g) which you mark to be returned, become the property of the Government and will not be returned to the applicant. Send true copies, *not originals*, of leases, contracts, and other documents which are an essential part of your business records. *File this application with the Office of Minerals Exploration, Department of the Interior, Washington 25, D. C., or with the nearest OME Field Office.*

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief, and that he would not ordinarily undertake the proposed exploration under current conditions and circumstances at his sole expense.

March 5, 1962
DATED

Peter A. Bauer
BY *(Signature)*

Peter A. Bauer, Vice President
TITLE

A wilfully false statement or certification to any Department or Agency of the United States Government is a criminal offense. U. S. Code, Title 18, Sec. 1001.

INFORMATION REQUIRED WITH THIS APPLICATION

1. Financial Eligibility:

(a) Submit evidence of efforts made within 90 days preceding the filing of this application to obtain credit from your bank of account and at least one other banking institution or other private source of credit. Such evidence shall include true copies of correspondence which show: (1) date of loan request, (2) amount and terms requested, (3) proposed use of loan funds, and (4) the replies from credit sources. If the loan was offered under terms which you consider unreasonable, state why you consider them so.

(b) List names and addresses of affiliated, parent, or controlling companies or organizations and state extent and nature of their interest.

(c) State how you propose to furnish your share of the cost of the exploration work.

2. Applicant's Rights in Land:

(a) State your interest in the land and mineral rights, whether owner, lessee, purchaser under contract, or other. If you are not the owner, submit one true copy of the lease, contract, or other document (with address of owner) under which you control the property. Describe all liens, mortgages, or other encumbrances on the land and state book and page number and official place where recorded.

(b) State the legal description (section, township, and range; metes and bounds; patent number of claims) of the land upon which you wish to explore and all adjacent land which you own or control. Describe any part of the land or workings which should not be subject to Government royalty and liens. If the land consists of unpatented claims, state book and page number for each recorded location notice, including amended locations, and official place where recorded. State all the names by which you know the property.

(c) For all land or mineral rights encumbered or not owned, submit five copies of Lien and Subordination Agreements on MME Form 52. If the agreements cannot be obtained, state reasons and provide copies of letters of refusal.

3. Physical Description:

(a) Describe in detail and illustrate with maps or sketches all mining or exploration operations which you know have been or are being conducted upon the land. Include existing mine workings and all production facilities.

(b) State your interest, if any, in operations described in (a).

(c) State, if you know, the past and current production, supporting your statement with copies of settlement sheets, mine records, or published data if available.

(d) Describe known ore reserves, giving quantities and grades and sampling methods used. Support your statement with copies of assay certificates and assay maps if available.

(e) Describe by narrative and maps or sketches the geologic features of the property, including ore minerals, geologic formations if known, and type of deposit (vein, bedded, etc.).

(f) State your reasons for expecting to find ore, and if you have sampled the area you propose to explore, show where the samples were taken, describe sampling methods used, and provide copies of assay certificates.

(g) Send with your application at least *two* copies of all geologic or engineering reports, assay maps, or technologic information which you have, indicating whether you require their return.

4. Accessibility of Property:

(a) To aid the OME representative who may examine the property, state name and address of person who will meet him; give directions for reaching the property; and describe accessibility of property and of any mine workings.

(b) Name the shipping and supply points and state the distances to the property.

5. Exploration Work:

(a) Describe fully the proposed exploration work giving individual footages and sizes of openings *for each item of work.* Use narrative, maps, plans, and sections as necessary. Show location of the proposed work as related to geologic features such as veins, ore-bearing beds, contacts of rock formations, etc. Show also the relation of the proposed work to any existing mine workings and to *land boundaries* or to the closest identifiable corner.

(b) If an access road must be built, show the proposed location on the property map and state the length, type and construction methods proposed.

(c) If an OME contract is executed, state how soon thereafter work would be started and finished. State your anticipated average daily or monthly rate of progress for each type of work.

6. Experience:

State your operating experience and background to conduct this exploration work and also that of the person who will supervise the work.

7. Estimate of Costs:

Furnish detailed estimates of the necessary costs *for each item of the work proposed in 5(a)* under the headings listed below with a total for each heading and the estimated total cost of the work. Costs for any work to be performed by an independent contractor should be listed separately under category (a) below. Costs for any work that is not to be performed by an independent contractor should be listed under categories (b) through (g).

(a) Independent contracts. State the total cost of any proposed independent contract for all or any part of the work, and the number of units and the unit cost for each type of work, such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, or per cubic yard of material moved. Cost estimates should be supported by bids from three contractors if possible. (*Note*—If none of the work is to be contracted, write "none" after this item.)

(b) Personal services. The cost of supervision, engineering and geological services, outside consultants, and labor should be itemized by numbers and classes of employees; rates of wages, salaries or fees; and periods of employment. State whether these services are available.

(c) Operating materials and supplies. List items of material and supplies giving quantity and cost of each. Include under this heading power, water, and fuel, and units of equipment and tools costing less than $50 each.

(d) Operating equipment. List items of equipment and tools costing $50 or more per unit. Give specifications and indicate how each item is to be acquired—i.e., rented, purchased or provided by the applicant. If rented or purchased, state the estimated rental or purchase price. If furnished by the applicant, state condition and present fair market value.

(e) Initial rehabilitation and repairs. Describe the type and the cost of *initial* rehabilitation or repair of existing buildings, fixtures, installations (exclusive of mine workings), and movable operating equipment now owned by the applicant which will be used in the exploration work.

(f) New buildings, fixtures, installations. Describe each building, fixed improvement, and installation to be purchased, constructed, or installed for the exploration work, stating specifications and cost including labor, materials, and supervision.

(g) Miscellaneous. Describe the type and estimate the cost of repairs and maintenance of the operating equipment listed in 7(d). Do not repeat initial repairs listed in 7(e). Show also the costs of analytical work, accounting, workmen's compensation and employees' liability insurance, payroll taxes, and other required costs that do not fall within the previous categories. [*Note*—The Government will not contribute to costs incurred before the date of the contract, or to costs of or incident to: (1) acquiring, using, or possessing land and any existing improvements, facilities, buildings, installations, and appurtenances, or the depreciation and depletion thereof; (2) general overhead, corporate management, interest and taxes (other than payroll and sales taxes); (3) insurance (other than employees' liability insurance); and (4) damages to persons or property (other than authorized repair to or replacement of equipment or other property used in the work).]

INT.-DUP. SEC., WASH., D.C. 50399

Introduction

This application is made by Northern Continental, Inc., a Montana corporation, the applicant, to explore for gold and silver on lands in the northeast part of Montana. These lands include two former producing mines, the Gold Bug and the August-Little Ben, and consists of both patented and unpatented claims held under long term lease. The work will be performed by the mining staff of the applicant's parent company, Continental Materials Corporation. Because of the past history of this property and the results of our preliminary work, set forth in this application, we believe the project outlined for the discovery of additional mineral reserves is of the type contemplated by the Minerals Exploration Program.

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

1. Financial Eligibility

(a) The applicant applied to Harris Trust and Savings Bank of Chicago, (its regular depository and the depository of its parent corporation) for a loan of $96,622.00, the amount requested by this application. Such application was denied. The applicant also applied to Walter Heller & Company, of Chicago, a commercial financing institution, for such a loan, and this application also was denied. Both lenders considered a loan of the type requested as inappropriate for them to undertake. Copies of correspondence are included as Exhibit 1a(1).

(b) The sole stockholder of applicant is:

Continental Materials Corporation
4534 West North Avenue
Chicago 39, Illinois

No other person or corporation has any interest in applicant.

(c) Applicant's share of the cost of the exploration work will be furnished from its general funds, obtained from its parent corporation.

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

2. Applicant's Rights in Land

(a) The applicant has a 10-year lease (with option to renew), in the subject premises. This leasehold interest arises under Mining Lease dated July 10, 1961 between Little Rockies Mining and Development Company and Northern Continental, Inc., as amended by Amendment to Mining Lease, dated August 1, 1961. Copies (completely conformed) of these agreements are included as Exhibit 2a(1). Such agreements state the name and address of the owner in paragraph 12 (page 6).

Former owners have agreed that royalties due them may be paid out of royalties otherwise payable to the present owner, Little Rockies. See copy (fully conformed) of Agreement dated September 5, 1961 among Marion Heller, et al, attached as Exhibit 2a(2).

(b) The land upon which the applicant wishes to explore and which should be subject to Government royalty and liens comprises the following claims in Sections 15 and 22, T. 25 N., R. 24 E. in Phillips County, Montana; map is shown as Exhibit 2b(1):

Patented Claims

Name	Survey No.	Patent No.
Gold Boy	3806	22176
Gold Bug	3807	22177
Mary	3841	22311
Ann	3842	22311

Unpatented Claims

Name	Recorded at Malta, Phillips County, Montana Book	Page
Bolero	1	375
McTavish	1	376

A metes and bounds description of the foregoing claims is included as Exhibit 2b(2).

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

Land adjacent to the foregoing and which the applicant controls, but which should NOT be subject to Government royalty or liens includes the following claims in Sections 10, 14, 15 and 22, T. 25 N., R. 24 E. in Phillips County, Montana:

Patented Claims

Name	Survey No.
August Group Mining Claims	
Ella C. and Liebert Fraction Lodes	8927
August and Little Ben Lodes	8878
Nina Lode	9355
Cumberland, Blue Bird, King, Granger & Big Blow Out Lodes	8999
Queen Rose, King Peter, Edmonton & Susie Lodes	9357
Night Shade Lode	10041
Morning Glory No. 2 Quartz Lode	9356
Nightingale No. 2 Lode	10081
Gold Bug Group	
Sunny Jim Lode	10044
Treasurer Lode	10045

Unpatented Claims	Recorded at Book	Page
Cuba		
Gem	1	445
McHuber	1	430
Margie	1	282

Land not immediately adjacent to the above claims and which the applicant controls, but which should NOT be subject to Government royalty or liens includes the following millsites in Sections 22 and 27, T. 25 N., R.24 E., P.M. in the community of Landusky.

Patented Millsites

Name	Survey No.
August Number One Millsite	9085
August Number Two Millsite	9086
August Number Three Millsite	9087

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

(c) The interest in the land and mineral rights not owned by the applicant is the subject of the Lien and Subordination Agreement (MME Form 52) among Little Rockies Mining and Development Company, Marion Heller, et al, included as Exhibit 2c(1).

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

3. Physical Description:

Introductory Statement

Examination of surface and underground physical characteristics in the Gold Bug zone indicate that the host rocks are closely fractured and ore minerals are distributed erratically in breccia and branching vein systems. Surface diamond drilling would not adequately sample such an area. For the same reason it is felt that the zone could not be satisfactorily explored by a winze at acceptable costs. Therefore, it is believed that exploration can best be undertaken by drifting on the Gold Bug zone and by percussion drilling from underground drill stations from a low level adit.

(a) Description of Land Exploration

The land included in this application consists of about 80 acres comprising 4 patented claims and about 40 acres in 2 unpatented claims bordering the patented claims.

2 parallel mineralized zones about 1500 feet apart, upon which various amounts of exploration activity have been conducted, exist in this area. Zone 1 includes the area of the Gold Bug mine, covered by this project, and Zone 2 covers the area of the August and Little Ben mines (see Exhibit 3a(1).

Exploration and mining upon Zone 1 have been conducted intermittently since 1893. Underground operations ceased in 1958. In 1960 and 1961 Northern Continental mapped the geology of the surface and accessible underground workings, sampled those workings, performed a surface geochemical survey, and did 80 hours of bulldozer

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

trenching. The old workings have been centered in an area about 1000 feet long and 400 feet wide. They expose a system of mineralized structures at various levels which have been mined and explored in a random manner by drifting and stoping from 6 adits, 2 of which are caved at the portal and are not accessible. The location of these workings have been established on the base map from compass surveys and the few available maps of the old workings. The estimated total is 3200 linear feet of drifting and crosscutting, and 280 feet of vertical raise and winze, as tabulated below:

See Exhibits 3a(1), 3d(2), 3d(3).

Adit	Portal Elevation	Drift & X-cut	Raise & Winze	Stoping
100 level	5030	250 ft. est.	100 ft. to surf.	Unknown
Discovery level (Portal caved)	4900	250 ft.	Unknown	Unknown
250 level	4880	50 ft.	None	2,000 cu.ft.
300 level	4820	1200 ft. (partially caved)	60 ft.to 250 level 50 ft.to 350 level -20 ft. in sill	35,000 cu.ft.
350 level	4770	1260 ft.	50 ft. to 300 level	7,000 cu.ft.
400 level (Portal caved)	4725	160 ft.	None	None

The maximum strike length followed along a mineralized structure has been about 500 feet (on the 350 level). Most of the raises and winzes were apparently driven for access and ventilation as they do not follow the dip of the structures.

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

There are numerous shallow pits and trenches upon the surface which are obscured by erosion and from which little information is available.

In 1961 Northern Continental dug or reopened several bulldozer trenches along the strike of the Gold Bug system, primarily to check geologic projection of the vein system. This was done in conjunction with a geochemical survey, which seems to delineate trends of mineralization.

The only existing production facilities are at the 350 level. These consist of mine track and a mine car loader. Considerable rehabilitation and repair of mine dump and openings are required to proceed with further exploration. A mill building and a shed exist, but are not in useable condition.

Zone 2 - the August and Little Ben area has not been operated since 1942 and at present none of the workings are accessible. Our knowledge of this area is restricted largely to hearsay reports and old mine maps. The vein system has been explored for a strike length of about 3000 feet and between an elevation of 4620 to the outcrop at 5200 feet. No exploration is proposed at this time due to lack of knowledge of possible targets.

No production facilities remain.

(b) Interest:

Northern Continental had no interest or participation in the operations described above, other than the evaluation work mentioned.

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

(c) Production:

There is no current production from this property. Some production records available to us of the Gold Bug Mine are the settlement sheets from the 350 level dated from May 1955 to September 1958, see Exhibits 3c(1) & (2) supplied.

Total production from the area as reported to the U. S. Bureau of Mines since 1900 has been 495,365 tons yielding 116,998 ounces of gold and 912,841 ounces of silver, see Exhibit 3c(3) supplied. This data has been compiled from the Permanent Individual Mine Record kept by the Albany, Oregon office of the U.S. Bureau of Mines.

Gold and silver are the only metals of economic significance recovered from the ores, although very minor amounts of copper, lead and zinc are reported.

(d) Ore Reserves:

The only known ore reserves on the property are those projected from the 350 level of the Gold Bug Mine. They are estimated to be 10,000 tons containing an average of 0.36 ounces of gold and 14.3 ounces of silver per ton, over an average width of 8 feet. This tonnage can be classified as Indicated Ore. With respect to our present knowledge and information, we have not inferred ore beyond the projections derived from Exhibits 3d (inclusive).

This reserve was estimated from chip samples taken across mineralized structures. Values were weighted to determine the resultant grade.

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

Exhibit 3d(inclusive) includes sample maps, assay certificates, summary of assays and typical sections through the mineralized zone.

(e) Geologic Features:

The general geology of the Little Rocky mountains was obtained from the sources listed below, although very little detail appears about the Gold Bug area.

1. Knechtel, Maxwell M., Stratigraphy of the Little Rocky Mountains and Encircling Foothills, Montana, U.S. Geol. Sur. Bull. 1072-N, 1959.

2. Emmons, W. H., Gold Deposits of the Little Rocky Mountains, Montana, U.S. Geol. Sur. Bull. 340, 1908.

3. Brockunier, S. R., Geology of the Little Rocky Mountains, Montana, Thesis for Ph. D, Yale University, 1936.

These authors describe the Little Rockies as being laccolithic with a core of Tertiary syenite porphyry, roughly 6 miles in diameter, which intrudes through a series of metamorphic and sedimentary rocks ranging from Precambrian to Quaternary in age. See Exhibit 3a(2), Geologic Map of Little Rocky Mountains, Knechtel, Brockunier and Hobbs.

The Gold Bug area is principally underlain by syenite porphyry and related dikes, although there are zenoliths or pendants of Precambrian and sedimentary rocks in the porphyry. Knechtel describes the general character of the porphyry as follows:

"In the Little Rocky Mountains large bodies of syenite porphyry of early Tertiary origin have been mapped in contact

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

with the Warm Creek shale and most of the formations older than the Warm Creek. These bodies of igneous rock represent alkalic magmas that invaded the Precambrian rocks - and possibly also the Cambrian rocks of some localities - but are believed to have solidified in part before coming into contact with post-Cambrian units. Most, if not all, of the contacts between the porphyry and the post-Cambrian rocks are accordingly believed to be fault surfaces.

The large bodies of syenite porphyry are cut in some places by dikes of syenite porphyry, monzonite porphyry. and trachyte porphyry; some of the trachyte porphyry has a high aegerine content. These dikes appear to have undergone little, if any, alteration.

Much of the older porphyry of the larger bodies, however, is greatly shattered, and much of it is impregnated with silica that was evidently introduced - at the same time of shattering, or not long afterward - by circulating aqueous solutions, which are believed also to have deposited the gold-silver ores of various mines and prospects in and around the Little Rocky Mountains (Emmons, 1908; Dyson, 1939). The sedimentary rocks are also silicified at some places along and near their contacts with the porphyry. For example, conspicuous chimney rocks in the SE$\frac{1}{4}$ sec. T. 25 N., R. 24 E. (loc. K, pl. 52), on the east side of the Landusky-Hays road about half a mile north of the

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

Little Ben mine, are composed almost entirely of fossiliferous jasperoid, representing silicification of beds of Lodgepole limestone probably by aqueous solutions that ascended along nearby faults during the early Tertiary igneous activity. The bulk of the Cambrian and younger rocks exposed in the Little Rocky Mountains and the foothills are nevertheless essentially unaltered, and their porosity and permeability do not appear to have been impaired appreciably by any effects of the igneous activity."

Emmons (op. cit.) considered the most important ore deposits in the Little Rockies to be found in zones of fractured porphyry replaced and cemented by quartz and pyrite. Knechtel mapped a series of faults bearing across the property at about N 70° E and Brockunier mentions a major shear zone extending across this area toward McPherson Mountain. The general trend of workings in the August-Little Ben and Gold Bug mines seems to intersect this structure at an acute angle. This may indicate a tensional relationship with those vein systems.

The Gold Bug vein system, which has been examined in some detail underground by the applicant, occurs in a shatter zone within the syenite porphyry. Mineralization occurs in (various types of) fractures and zones ranging from a few inches to several feet in width. The principal zone appears to be continuous for several hundred feet in dip and strike, but the minor components of structure within the zone are quite variable in attitude.

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

Emmons (op. cit.) states: "There is no evidence that the movements which resulted in the formation of openings that permitted the solutions to enter the porphyry and deposit their burden produced spaces of any considerable size. The movements resulted rather in shearing and in brecciation along fissured zones, with a large number of small openings rather than a single large open space." Emmons indicates that he saw no reason for any dimunition as long as the vein remained in the porphyry. Thickness of the porphyry is unknown. Hangingwalls and footwalls are not well defined, and mineralized fractures may branch into either wall for several feet. The only visible differentiation between vein material and country rock is the degree of shattering and the amount of contained iron oxides. The depth of oxidation has not been determined.

Mineralization in the vein material occurs in seams of iron oxide, and breccia cemented with iron oxides and quartz. Some pyrite and arsenopyrite occur in minor amounts in the Gold Bug veins. Fluorite noted by other investigators in the area does not seem to be abundant.

Ore minerals are present as free gold in intimate association with hessite (Ag_2Te), according to petrographic-minerographic determinations by the University of California (submitted by Wisser & Cox, consulting geologists). Iron oxides obscure these minerals, except in very high grade specimens, and assaying is necessary to determine whether they are present.

The presence of several trachyte phonolite porphyry dikes has been reported to bear a relationship to mineralization (Brockunier, and letter by W. C. Ackerman, Montana Bureau of Mines, 1959). Such a dike occurs in the west end of the 350 level of the Gold Bug mine, but its influence upon ore deposits are not understood at this time. Communications with local miners indicate that the old workings contained favorable mineralization adjacent to, or near, these dikes.

(f) Reasons for Expecting to Find Ore:

The reasons for expecting to find ore are these:

1. Sampling of underground workings indicates that ore exists at the lowest explored level of the Gold Bug structure.
2. Geologic evidence and past exploration work indicate that the Gold Bug mineralized structure should extend down dip and laterally.
3. Past development and production at the August-Little Ben mines show that near surface mineral occurrences persist to considerable depth.

The area we propose to explore has not been sampled except as shown on Exhibit 3a(1) and 3d(Incl.), included in (d) above. This sampling consists mostly of chip samples, taken as individual cuts, across exposures to differentiate between physical features of the vein material.

(g) Reports, Maps, Etc.:

Refer to Index for list of copies of material included in application. Return of these copies is not required.

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

4. Accessibility of Property:

(a) OME representative will be met and directed to the property by C. H. Reynolds or J. G. Roscoe, of Box 1550, Grand Junction, Colorado, Phone Chapel 3-2100.

The property and workings are located $1\frac{1}{2}$ miles north of Landusky, Montana along a well-maintained forest service road. Landusky is reached by State Highway 19 from Lewistown (96 miles) or Malta (65 miles).

(b) Shipping and supply points are Lewistown and Malta. Truck delivery service is available from these towns to a terminal 5 miles south of Landusky.

Adequate labor is not available locally; experienced miners will be recruited from distant localities. R.E.A. single phase power is available at Landusky. Water sufficient for mining purposes is present on the property.

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

5. Exploration Work:

See Exhibits 3a(1), 3d(1),(2),(3) for plans, maps and sketches.

(a) Exploration of the Gold Bug zone is planned in three stages as follows:

STAGE 1 - Underground exploration to determine the down dip continuity, tenor and extent of known mineralized zones.

STAGE 2 - Underground exploration to determine the strike extent of the Gold Bug mineralized zone northeasterly of the present outcrop.

STAGE 3 - Underground exploration to determine vertical continuity of mineralized zones disclosed by Stage 2.

STAGE 1 - It is proposed to physically explore and sample the Gold Bug gold and silver bearing zone beneath the present exposures by means of underground openings. This can be accomplished at an elevation of approximately 4570 feet, or about 200 feet below the present lowest exposure. As shown on Exhibit 3a(1), this will require approximately 1500 feet of drifting. Concurrent with the drift work, it is proposed to further define and sample the indicated mineralized zone by means of drill holes from the drift as shown on Exhibit 3a(1). It is contemplated that two 200 foot raises will be required in this stage to establish vertical continuity of mineralization disclosed.

The mineralization existing on this property will require very thorough and extensive sampling, and assaying will be necessary. It is proposed that large bulk samples be taken from each drift and raise round to be crushed and split for assay. There is a crusher now located on the property which can be rehabilitated for

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

this purpose. It is also proposed to channel sample all drifts and raises at approximately five foot intervals. Maximum individual sample intervals from drill hole sampling will be five feet. Vacuum-dust collecting dry drills are available for this purpose.

Summary of Stage 1 work:

1. Mobilization
2. Access road construction and portal preparation
3. 1500 feet 8' x 8' drift
4. 3600 feet drilling
5. 400 feet raising
6. Assaying of 1480 samples

STAGE 2 - If the Stage 1 work establishes the existence of gold and silver mineralization of commercial tenor, it is proposed to further explore the zone to the northeast at the same horizon for approximately 1000 feet. This would be accomplished in the same manner as Stage 1.

Summary of Stage 2 work:

1. 1000 feet 8' x 8' drift
2. 3000 feet drilling
3. Assaying of 1000 samples

STAGE 3 - If Stage 2 discloses the existence of gold and silver mineralization of commercial tenor, it is proposed to test the vertical continuity of it by raising. This would be accomplished as proposed in Stage 1 by two 200 foot raises.

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

Summary of Stage 3 work:

1. 400 feet 5' x 10' raises

2. Assaying of 160 samples

Summary of total work - mobilization and portal preparation plus the following unit work:

	Road Construction	Drifting	Raising	Drilling	Assays
STAGE 1	1800'	1500'	400'	3600'	1480
STAGE 2		1000'		3000'	1000
STAGE 3			400'		160
	1800'	2500'	800'	6600'	2640

Size of Openings:

Drifts - minimum section 8' x 8' rock, 6' x 7' timbered

Raises - minimum section 5' x 10' rock, 2 compartment 4' x 5' timbered

The applicant proposes the use of percussion drill equipment equipped with vacuum sampling accessories. This technique would be used for all proposed drill holes within the depth range of the equipment and would result in a drill hole size of 1 7/8" diameter. 25,000 feet of such drilling has proved its applicability at a uranium property operated by the applicant.

(b) To reach the proposed adit site will require the construction of approximately 1800 feet of access road, as shown on Exhibit 3a(1). It is proposed that this be an unsurfaced roadway, approximately 18 feet wide with an approximate grade of 10%, constructed by simple cut and fill method with a dozer.

(c) The applicant is prepared to begin Stage 1 work immediately upon execution of the contract. It is estimated that Stage 1 work

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

could be completed within 40 weeks, and Stages 2 and 3 would require approximately the same amount of time, or a total of 18 months. Due to short summer season and severe winter climate, the estimated schedule and costs are contingent upon work commencing by May 1, 1962.

It is anticipated that mobilization of equipment and labor would require 2 weeks and road construction and adit and dump preparation approximately 2 weeks. Anticipated average weekly progress for the 8' x 8' drifting, at 2 shifts per day, 6 days per week, is 60 feet.

Drilling progress is estimated at an average rate of 20 feet per drill shift, including move and set up time.

Why so low

Anticipated average rate of progress for raise excavation is 2.5 feet per shift, or 5 feet per day.

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

6. Experience:

The work will be directed by, and be under the supervision of the staff of the Mining Division of Continental Materials Corporation, the parent company of the Applicant. A brief history of company mining operations and personal experience records of some of the staff supervisory personnel is attached as Exhibit 6(1).

It is anticipated that Mr. Glenn S. Franklin, Mine Engineer, Wyoming operations, will be assigned to the project as Project Engineer.

The firm of Wisser and Cox, consulting geologists, 55 New Montgomery Street, San Francisco, California, is retained by Continental Materials Corporation as consultants. Experience records of the members of this firm are attached as Exhibit 6(2).

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

7. Estimate of Costs:

Continental Materials Corporation (parent company of Northern Continental, Inc.) proposes to furnish all necessary equipment, labor and supplies for the proposed work on a cost basis. The estimated cost of the work proposed in 5(a) is summarized by (1) Stages of Work, and (2) Items of Work: (Detailed figures on which these estimates are based are attached as Exhibits 7, 7(b), 7(c), 7(d), 7(e,f & g).)

1 - Cost Summary by Stages of Work:

Stage 1: (Exhibit 7)

Drifting, 1500 ft. @ $ 48.85	$ 73,278
Drilling, 3600 ft. @ 2.58 -?	9,289
Raising, 400 ft. @ 47.33	18,933
Initial Rehabilitation	1,000
Mobilization	3,000
Road Construction	1,240
Assaying	2,960
Total Stage 1	$109,700

Stage 2: (Exhibit 7)

Drifting, 1000 ft. @ $ 46.62	$ 46,616
Drilling, 3000 ft. @ 1.58	4,746
Assaying	2,000
Total Stage 2	$ 53,362

Stage 3: (Exhibit 7)

Raising, 400 ft. @ $ 74.66	$ 29,862
Assaying	320
Total Stage 3	$ 30,182
Grand Total	$193,244

Mr. Robert H. Greenberg
Walter E. Heller & Company
105 West Adams Street
Chicago 90, Illinois

Dear Bob:

Northern Continental, Inc., a subsidiary of Continental Materials Corporation, has a gold-silver property in northeast Montana. This property includes two former producing mines.

Based upon work done by our mining staff we believe that this property has a sufficient likelihood of success to justify an exploration program which will total approximately $200,000. We would like to borrow half of this, or about $100,000, from Walter E. Heller & Company.

I am prepared to furnish your company complete details concerning the property and the program we propose. However, I would like a preliminary indication as to whether your company is willing to undertake such financing and, if so, on what terms.

Sincerely,

CONTINENTAL MATERIALS CORPORATION

Dear Mr. Gunther:

In Mr. Greenberg's absence I am taking the liberty of answering your letter to him of February 23, 1962 in which you inquire as to the possibility of Northern Continental, Inc. obtaining a loan from Walter E. Heller & Company, the proceeds of which are to be used in an exploration program of certain mining properties owned by Northern Continental, Inc.

Unfortunately, I must advise you that we would be unable to consider a loan such as you are seeking. The purpose of such a loan is too speculative and there is insufficient collateral or security available to adequately protect us.

I regret to advise you of this decision, but we appreciate your contacting us and if in the future you think we may be able to be of assistance to you, please do not hesitate to contact us again.

Very truly yours,

WALTER E. HELLER & COMPANY

CHICAGO 90 · ILLINOIS

March 2, 1962

Mr. Sidney M. Gunther
Continental Materials Corporation
4534 West North Avenue
Chicago 39, Illinois

Dear Sidney: Northern Continental, Inc.

For antecedent details would you please refer to your letter to me of February 23, 1962, concerning a proposal made by the Company that this bank advance approximately $100,000 to finance in part an exploration program which the Company contemplates undertaking in respect of a gold-silver property located in northeastern Montana. Certain additional details have heretofore been furnished us by you by telephone.

I must advise you with regret that we are unable to participate in financing the Company for such a program. We are unable to see how, at this time, a definitive repayment program could be set up inasmuch as there is no basis that we are able to determine for predicting a cash generating power sufficient in any way to amortize the proposed indebtedness. In addition, there is no available alternative exit in the event that the cash flow needed to amortize the loan does not materialize inasmuch as the asset values of the Company are very small and the purpose of the expenditures proposed do not in any way assure the production of real asset values.

In view of the foregoing circumstances we are, unfortunately, unable to accommodate the Company so far as this request is concerned.

Very truly yours,

Gregg A. Hunter
Vice President

Mining Lease and Amendment
to Mining Lease,
recorded together.

Agreement (Royalty) recorded.

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

Exh. 2a (1, 2)

AGREEMENT

THIS AGREEMENT dated September 5, 1961 among Marion Heller of Lewistown, Montana and the other persons listed in paragraph B hereof (which persons are hereinafter individually called "ROYALTY OWNER" and together called the "ROYALTY OWNERS"), Little Rockies Mining and Development Company, a Montana corporation, (hereinafter called "LITTLE ROCKIES") and Northern Continental, Inc., a Montana corporation, (hereinafter called "CONTINENTAL"),

WITNESSETH:

A. WHEREAS, by Mining Lease dated July 10, 1961 between LITTLE ROCKIES and CONTINENTAL, amended August 1, 1961 (hereinafter called the "LEASE") LITTLE ROCKIES has leased to CONTINENTAL the following patented and unpatented claims in Phillips County, Montana:

Patented Claims

Name	Survey No.
August Group Mining Claims	
Ella C. and Liebert Fraction Lodes	8927
August and Little Ben Lodes	8878
Nina Lode	9355

All the foregoing claims are hereinafter called the "PREMISES".

B. WHEREAS, the ROYALTY OWNERS hold mineral royalties in the PREMISES as follows:

ROYALTY OWNERS	Royalty Interest
Marion Heller and Juanita Heller	1.00
Cecil Flinders and Margaret Flinders	.50
Frank B. Bryant and Della Bryant	.50
Edward F. Wieglenda and Vesta Wieglenda	.50
	2.50%

and the parties desire to provide for the payment of royalties directly to the ROYALTY OWNERS:

NOW, THEREFORE, the parties agree as follows:

1. The ROYALTY OWNERS acknowledge that the total royalty from the PREMISES due them is 2½% of the net smelter returns [one-fourth (1/4) of the ten per cent (10%) royalty] set forth in paragraph 4 of the LEASE. Each ROYALTY OWNER will accept that portion of such 2½% as is equal to his interest, as set forth after his name in paragraph B, in full payment of all his interest in the PREMISES.

2. LITTLE ROCKIES hereby authorizes and directs CONTINENTAL to pay, and CONTINENTAL will pay, to each ROYALTY OWNER that portion of such 2½% of net smelter returns as is equal to his interest set forth after his name in paragraph B, in one fourth (1/4) of all amounts otherwise payable to LITTLE ROCKIES as royalties pursuant to paragraph 4 of the LEASE. The preceding sentence shall not affect the remaining three-fourths (3/4) of such royalties.

3. CONTINENTAL may arrange with any mill, smelter or other ore buyer to pay any royalty and to transmit copies of settlement sheets or remittance statements directly to the ROYALTY OWNERS. No change in the provisions of this Agreement relating to the interest in the PREMISES of any ROYALTY OWNER shall be effective unless in writing signed by or on behalf of such ROYALTY OWNER and LITTLE ROCKIES and CONTINENTAL.

IN WITNESS WHEREOF, the parties have executed this Agreement the day and year first above written.

AMENDMENT TO MINING LEASE

THIS AMENDMENT dated August 1, 1961 between LITTLE ROCKIES MINING AND DEVELOPMENT COMPANY, a Montana corporation (hereinafter called "LITTLE ROCKIES") Lessor, and NORTHERN CONTINENTAL, INC., a Montana corporation (hereinafter called "CONTINENTAL") Lessee;

W I T N E S S E T H:

A. WHEREAS, the parties entered into a Mining Lease dated July 10, 1961 (hereinafter called the "LEASE") embracing certain patented and unpatented mining claims therein described (hereinafter called the "PREMISES"); and

B. WHEREAS, the parties desire to amend the LEASE to provide that if by July 31, 1968, CONTINENTAL is not regularly processing ore from the PREMISES in a mill with a capacity of at least 100 tons a day, CONTINENTAL will pay LITTLE ROCKIES Ten Thousand Dollars ($10,000) as an advance royalty; and

C. WHEREAS, the parties desire to amend the LEASE to provide that if by July 9, 1971 production has not been commenced from the PREMISES with a mill operating, LITTLE ROCKIES may terminate the LEASE; and

D. WHEREAS, because of the short remaining 1961 working season, the parties desire to reduce the amount of work to be performed by CONTINENTAL on or before December 31, 1961 as a condition to continuing its LEASE.

NOW THEREFORE, the parties agree as follows:

1. Advance Royalty. The LEASE is hereby amended by adding after subparagraph 4(c) thereof, a new subparagraph 4(d) to read as follows:

"(d) If by July 31, 1968 CONTINENTAL is not regularly processing ore from the PREMISES in a mill with a capacity of at least 100 tons a day, CONTINENTAL will pay LITTLE ROCKIES Ten Thousand Dollars ($10,000) as an advance royalty, to be credited against royalties earned thereafter pursuant to this paragraph 4."

2. Renewal Option. The LEASE is hereby amended by deleting paragraph 14 thereof and substituting a new paragraph 14 to read as follows:

"14. Renewal Option. CONTINENTAL by notice to LITTLE ROCKIES prior to the expiration of any ten (10) year term of lease may renew

this Agreement for an additional ten (10) years on the identical terms and conditions in this Agreement, including this renewal option, provided, at the time of each such notice, LITTLE ROCKIES has not terminated this Agreement pursuant to the provisions of paragraph 13 and the PREMISES are or have been in production with an operating mill."

3. Work Deferral. The LEASE is hereby amended by deleting from subparagraph 5(a) thereof the amounts and dates in the three columns thereof and substituting the following amounts and dates:

(1) Annual Increment	(2) Cumulative	(3) Date
$ 5,000	$ 5,000	December 31, 1961
25,000	30,000	December 31, 1962
30,000	60,000	December 31, 1963
40,000	100,000	December 31, 1964
50,000	150,000	December 31, 1965
60,000	210,000	December 31, 1966
70,000	280,000	December 31, 1967
80,000	360,000	December 31, 1968
90,000	450,000	December 31, 1969
100,000	550,000	December 31, 1970

4. No Other Changes. All other provisions of the LEASE shall remain in full force and effect.

5. Integration. This Amendment constitutes the entire agreement among the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements and understandings of the parties in connection therewith. No covenant or condition not expressed in this Amendment shall affect or be effective to interpret, change, or restrict the expressed provisions of this Amendment. No employee or agent of CONTINENTAL has any authority to make any promise, warranty or representations not expressed in this Amendment. No change or attempted waiver of any of the provisions hereof shall be binding unless in writing signed by the parties.

6. Headings. The paragraph headings contained in this Amendment are for reference purposes only and shall not in any way affect the meaning or interpretation of this Amendment.

7. Counterparts. Separate counterparts of this Amendment may be signed by CONTINENTAL and LITTLE ROCKIES and together will constitute one Amendment.

IN WITNESS WHEREOF, the parties have executed this Agreement the day and year first above written.

Margie	1	282

All the foregoing claims are hereinafter called the "PREMISES".

NOW THEREFORE, the parties agree as follows:

1. Consideration. For and in consideration of the sum of One ($1.00) Dollar, the receipt of which is hereby acknowledged by LITTLE ROCKIES, and the royalties to be paid and the covenants and agreements which CONTINENTAL hereby agrees to pay,

keep, and perform, all in the manner hereinafter set forth, LITTLE ROCKIES does hereby lease the PREMISES to CONTINENTAL upon the terms and conditions and for the purposes hereinafter set forth.

2. CONTINENTAL's Undertakings. With respect to all claims:

(a) CONTINENTAL will enter upon the PREMISES and conduct an examination and investigation, including such geological, geochemical or geophysical surveying, drilling, trenching, sampling or assaying as it shall deem necessary or convenient to determine whether the PREMISES can be operated economically.

(b) CONTINENTAL will pay or cause to be paid all property taxes finally assessed against each patented claim embraced by this Agreement on the date such taxes are payable and while this Agreement is in force. LITTLE ROCKIES warrants that all such taxes for the year 1960 totaled not more than $608.90 and have been paid.

(c) CONTINENTAL will perform labor or make improvements of One Hundred Dollars ($100) with respect to each unpatented claim subject to this Agreement on July 1 of each year until a patent has been issued therefor, and will file affidavits stating that such work was performed. LITTLE ROCKIES warrants that One Hundred Dollars ($100) of labor has been performed or improvements made for the year ended September 1, 1960 with respect to each unpatented claim included in the PREMISES.

3. Lease. LITTLE ROCKIES hereby leases the PREMISES to CONTINENTAL for a term of ten (10) years from the date of this Agreement (renewable as hereinafter set forth) or until this Agreement is terminated, together with:

(a) all minerals and mineral rights in the PREMISES; and

(b) the exclusive right and privilege to mine and sell all minerals from the PREMISES and to retain the proceeds of such sales, subject to distribution as set forth in this Agreement; and

(c) all personal property and fixtures now or hereafter attached to or used in conjunction with mining the PREMISES. The parties will promptly take an inventory of such personal property and fixtures, and upon the termination of this Agreement, CONTINENTAL will return to LITTLE ROCKIES all such personal property and fixtures in the same condition as CONTINENTAL receives them, ordinary wear and tear and deterioration excepted.

(d) so much of the use of the surface, surface rights, structures, improvements, water rights, rights-of-way, easements, tenements, hereditaments and appurtenances in, on or in any way now or hereafter appertaining to the PREMISES as may be necessary or convenient to mine the PREMISES.

CONTINENTAL hereby accepts this Lease. Upon termination of this Agreement, the term of this Lease shall end, but CONTINENTAL shall not be relieved of any obligation to pay royalties with respect to ore mined by CONTINENTAL from the PREMISES during the term of this Lease and sold. LITTLE ROCKIES warrants that it has title to the PREMISES and they are not subject to any outstanding interest, encumbrance, prior lease or valid adverse claim.

4. Royalties. On or about the 20th day of each calendar month, CONTINENTAL will pay as royalty to LITTLE ROCKIES an amount equal to ten percent (10%) of net smelter returns received by CONTINENTAL during the preceding calendar month from the sale of all metal, ore, concentrate, or any other mineral matter, mined from the PREMISES, whether such sale be made to any custom mill, smelter, mint, or any other mineral buyer whatsoever, all as set forth below.

(a) The term "net smelter returns" means the sum of:

(i) all receipts by CONTINENTAL from the sale of metal, ore, concentrate, or other mineral matter, after deducting all freight and haulage from the surface ore bin or stockpile to the mill and/or smelter.

(ii) all subsidies and other payments in respect of production received by CONTINENTAL from any government agency.

(b) Each payment of royalty by CONTINENTAL will be accompanied by a copy of each settlement sheet or remittance statement pertaining to the receipts on which such royalty payment is based.

(c) CONTINENTAL may arrange with any mill, smelter or other ore buyer to pay any royalty and to transmit copies of settlement sheets or remittance statements directly to LITTLE ROCKIES.

5. Termination by LITTLE ROCKIES. LITTLE ROCKIES may terminate this Agreement in accordance with the provisions of Paragraph 13 in case of default by CONTINENTAL in failing:

(a) to perform work for the purpose of benefiting the PREMISES (including work of any nature performed at the PREMISES or elsewhere) in an amount equal to the amounts set forth in Column (2) on or before the dates stated in Column (3) below:

(1) Annual Increment	(2) Cumulative	(3) Date
$10,000	$ 10,000	December 31, 1961
20,000	30,000	December 31, 1962
30,000	60,000	December 31, 1963
40,000	100,000	December 31, 1964
50,000	150,000	December 31, 1965
60,000	210,000	December 31, 1966
70,000	280,000	December 31, 1967
80,000	360,000	December 31, 1968
90,000	450,000	December 31, 1969
100,000	550,000	December 31, 1970

(b) to assume full and sole responsiblity for the operation and direction of the work CONTINENTAL shall do under this Agreement, including:

(i) employing or otherwise furnishing workmen upon a wage basis, a profit-sharing basis, or any other basis, as CONTINENTAL may determine;

(ii) recognizing that there shall be no privity of contract between LITTLE ROCKIES and any employee of CONTINENTAL, but that all CONTINENTAL's business shall be transacted by and in the name of CONTINENTAL, and that no miner or laborer employed by CONTINENTAL shall, under any circumstances, be deemed the employee of LITTLE ROCKIES;

(iii) meeting requirements of the Workman's Compensation Act of Montana, and specifically assuming all risk and liability for all accidents or injuries to CONTINENTAL and its employees or others arising out of CONTINENTAL's operation, and being liable directly for all contributions and taxes required to be paid and/or withheld by the employer pursuant to State and Federal laws, and/or State Old Age Benefit and Insurance Laws, and/or the Federal current tax payment, all in respect to CONTINENTAL's employees. and accepting exclusive liability for said contributions and/or tax;

(iv) the timely paying of all labor employed by CONTINENTAL at the PREMISES;

(v) holding LITTLE ROCKIES harmless from all loss, damage and liability from all liens for labor, services, materials or supplies furnished to CONTINENTAL; and

(vi) permitting LITTLE ROCKIES to post and thereafter maintain and keep posted notices of LITTLE ROCKIES' non-responsibility for such liens.

(c) to operate the PREMISES in a workmanlike and minerlike manner;

(d) upon reasonable request to make available to LITTLE ROCKIES for examination or copying:

(i) all maps, reports, and other data resulting from the examination and investigation of the PREMISES, including all surveys, drill logs and geological reports; and

(ii) all records and books of account relevant to any question which may arise under this Agreement;

(e) to perform any covenant or condition of this Agreement to be performed by CONTINENTAL.

6. Patent Proceedings. CONTINENTAL may apply for the issuance of patent upon all or any unpatented claims included in the PREMISES and take all steps necessary or convenient thereto, all in LITTLE ROCKIES' name but at CONTINENTAL's expense. LITTLE ROCKIES will cooperate in such action by CONTINENTAL. Upon issuance of patent, each such patented claim shall remain part of the PREMISES.

7. LITTLE ROCKIES' Undertakings. LITTLE ROCKIES:

(a) will deliver to CONTINENTAL all original location notices, and all maps and other writings under LITTLE ROCKIES' control relating to the location or title of the PREMISES;

(b) grants to CONTINENTAL an easement for ingress and egress, tunnels, telephone and electric lines and pipe lines to the PREMISES over and through all lands and roads now or hereafter owned or possessed by LITTLE ROCKIES;

(c) will do all acts and execute all documents requested by CONTINENTAL as necessary or convenient to effectuate any covenant of LITTLE ROCKIES; and

(d) may at all reasonable times enter in and upon all parts of the PREMISES for the purpose of inspection. All such entries shall be at the sole expense and risk of LITTLE ROCKIES and without interfering with CONTINENTAL's operation.

8. Production Taxes. All taxes imposed upon CONTINENTAL based upon production from any part of the PREMISES subject to this Lease shall be borne by the parties in proportion to their respective interests in the proceeds from such production.

9. Further Assurances. CONTINENTAL may take such action as it deems necessary or convenient to hold and defend its interest in the PREMISES against all persons, and LITTLE ROCKIES will cooperate with CONTINENTAL in such action.

10. Surrender. CONTINENTAL at any time by notice may surrender any one or more claims leased hereunder, and all rights and obligations under this Agreement with respect to such surrendered claims will thereupon terminate, and CONTINENTAL may surrender all of such claims and terminate this Agreement, except that CONTINENTAL may not surrender any unpatented claim during the period from July 1 to September 1 of any year unless prior to the effective date of such notice One Hundred Dollars ($100) of labor has been performed or improvements made with respect to the surrendered unpatented claim during the year ending on September 1 of such year.

11. Removal of Property. During the term of the Lease and for 90 days after termination of this Agreement, CONTINENTAL may remove all fixtures and personal property placed or erected on the PREMISES by CONTINENTAL and may remove all ore mined from the PREMISES during the term of the Lease.

12. Notices. All notices shall be in writing. All notices and payments to LITTLE ROCKIES may be directed to or care of:

Little Rockies Mining and Development Company
412 West Main Street
Lewistown, Montana

All notices to CONTINENTAL shall be directed to:

Northern Continental, Inc.
4401 West North Avenue
Chicago 39, Illinois
Attn: Legal Department

Any party may designate a new address to which payments and notices to said party may be sent by notice to all other parties. Unless otherwise specified

herein, all notices shall be effective when sent by registered or certified mail addressed as stated above.

13. Default. If CONTINENTAL defaults in the performance of any covenant or condition hereof, LITTLE ROCKIES may deliver notice to CONTINENTAL specifying in detail the default and if such default shall not be corrected or remedied within sixty (60) days after receipt by CONTINENTAL of such notice, if it reasonably can be corrected or remedied within such sixty (60) days, and if not within such time as may be reasonably required, LITTLE ROCKIES at its election may:

(a) recover damages for such default in performance of any such covenant;

(b) enjoin the continuance of such default in performance of any such covenant; or

(c) terminate this Agreement by delivery of notice to CONTINENTAL at the end of thirty (30) days after the expiration of the period for appeal after entry of final judgment holding CONTINENTAL in default in performance of any such covenant or condition, if CONTINENTAL has failed to correct or remedy such default within such thirty (30) day period.

CONTINENTAL may remedy any default by paying to LITTLE ROCKIES an amount equal to the damages recoverable by it for the specified default. CONTINENTAL shall be deemed to have corrected or remedied any default when CONTINENTAL shall in good faith commence action to correct or remedy such default if such action shall be prosecuted thereafter with due diligence.

14. Renewal Option. CONTINENTAL by notice to LITTLE ROCKIES prior to the expiration of any ten (10) year term of lease may renew this Agreement for an additional ten (10) years on the identical terms and conditions in this Agreement, including this renewal option, provided, at the time of each such notice, LITTLE ROCKIES has not terminated this Agreement pursuant to the provisions of paragraph 13.

15. Force Majeure. CONTINENTAL shall not be considered in default if CONTINENTAL's failure to perform any covenant or condition of this Agreement is caused by Act of God or by any circumstances not wholly and exclusively within the control of CONTINENTAL. The settlement of a labor dispute shall not be considered to be wholly and exclusively within the control of CONTINENTAL. Financial inability to make any payment shall not be considered beyond the control of CONTINENTAL.

16. Successors. All the terms, covenants and conditions of this Agreement shall survive execution and delivery of any amendments, and shall be binding upon and inure to the benefit of the successors and assigns of the respective parties. The rights of LITTLE ROCKIES hereunder may be assigned in whole or in part. No change or division in ownership of LITTLE ROCKIES' interest or royalty payments, however accomplished, shall operate to create or enlarge any obligation or diminish any right of CONTINENTAL or be binding upon CONTINENTAL for any purpose until receipt by CONTINENTAL of a notice signed by or on behalf of LITTLE ROCKIES and all successors, stating the nature of the change or division and stating the single person and address to which all future notices and payments may be directed by CONTINENTAL.

17. Integration. This Agreement constitutes the entire agreement among the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements and understandings of the parties in connection therewith. No covenant or condition not expressed in this Agreement shall affect or be effective to interpret, change, or restrict the expressed provisions of this Agreement. No employee or agent of CONTINENTAL has any authority to make any promise, warranty or representation not expressed in this Agreement. No change or attempted waiver of any of the provisions hereof shall be binding unless in writing signed by the parties.

18. Headings. The paragraph headings contained in this Agreement are for reference purposes only and shall not in any way affect the meaning or interpretation of this Agreement.

9. Counterparts. Separate counterparts of this Agreement may be signed by CONTINENTAL and LITTLE ROCKIES and together will constitute one Agreement.

IN WITNESS WHEREOF, the parties have executed this Agreement the day and year first above written.

EXHIBIT 6 - Experience

Continental Materials Corporation Mining Division

Brief history of company and mining operations:

Company incorporated in September, 1954 as Continental Uranium, Inc.. Mining staff subsequently assembled to conduct mining operations on properties held and to carry on exploration activities to extend ore reserves.

Corporate name changed in 1957 to Continental Materials Corporation as activities diversified.

Mining Operations:

Continental No. 1 Mine, San Juan County, Utah

Underground operation, 1954-1958

Produced approximately 77,000 tons of uranium ore

Rattlesnake Mines, San Juan County, Utah

Initial development was an open pit operation involving the removal of about 2,500,000 cu. yds. of overburden with subsequent selective mining of some 200,000 tons of ore and waste. Underground operations then developed which have produced approximately 175,000 tons of ore to date.

Wyoming Operations, Fremont County, Wyoming

Development and mining at this property has been conducted from an open pit and two vertical shafts. Production to date has been approximately 180,000 tons.

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

EXHIBIT 6, Cont'd.

In addition to the above, several smaller properties have been operated and have contributed varying amounts to the overall operation.

All activities of the Mining Division have been conducted by the company staff. This has consisted of supervision of initial drilling, reserve estimates, feasibility studies, development planning, determination of mining methods, plant design and construction and equipment selection for production.

Following is a tabulation of mining production by years:

Year	Tons Shipped
1961	91,637
1960	93,408
1959	85,977
1958	86,196
1957	87,110
1956	34,123
1955	22,568
1954 (4 months)	7,609

Present Mining Division Employees:

Administrative & Supervisory	6
Technical	6
Accounting	2
Hourly & Contract Employees	60

EXPERIENCE RECORD OF APPLICANT

Contents 6 Pages

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

C. H. REYNOLDS

Biographical data:
Age: 44
B. S. in Mining Engineering - Mackay School of Mines, University Nevada, 1943
Member:
American Institute of Mining and Metallurgical Engineers, 1946
Past Chairman of Colorado Plateau Section, 1961
Nu Eta Epsilon, Honorary Engineering Society

Professional Experience:

1943-1944.....Basic Refractories, Inc., Gabbs, Nevada, mining engineer. Duties consisted of establishing engineering control, conducting cost studies, pit design and planning for open pit mining of Brucite (Mg OH2) deposit. Conducted engineering and sampling procedures for rigid quality control. Supervised initial pilot plant studies to beneficiate ore.

1944-1946.....South Pacific Area, United States Marine Corps

1946-1947.....Bunker Hill and Sullivan Mining and Concentrating Co., Coeur d'Alene district--geologist, mine operating geology, detailed mapping of development work and outside properties.

1947-1955.....Sidney Mining Co., Coeur d'Alene District, Engineer-geologist to 1951; chief engineer to 1953; mine superintendent to 1955. Integrated Pb-Zn mining and milling operation with new (1947) modern selective flotation plant; 250 tpd. capacity. Underground vein mine with shrinkage and cut and fill stoping. In responsible charge of extensive exploration and development program, including 1000 foot shaft deepening project and attendant installation and level development.

1955-to Date..Continental Materials Corp.--General Superintendent of mining division, organized mining department and brought properties into production from initial drilling. In charge of staff--operating, technical, accounting--engaged in mining activities, property evaluation, exploration projects.

JOHN G. ROSCOE

Biographical Data:
Age: 40
B. S. in Mining Engineering, Mackay School of Mines, University of Nevada, 1948
Member:
American Institute of Mining and Metallurgical Engineers, 1947
Registered Professional Engineer, Idaho, No. 876, 1954
U. S. Mineral Surveyor, 1954

Professional Experience:

1948-1954.....Bunker Hill Co., Kellogg, Idaho - Mining Engineer. Mine and surface plant surveying, mill and smelter construction engineering, mill and smelter physical appraisal, mining claim patent surveying.

1954-1955.....U. S. Atomic Energy Commission, Denver, Colorado-Mining Engineer. Ore reserve data computation and evaluation. Exploration contract administration, property examination.

1955-1956.....Farmington Funding Corp., Colorado Springs, Colorado-Mining Engineer, Property examination. Organized and supervised exploration projects.

1956-1957.....Continental Materials Corp., Moab, Utah - Mine Superintendent. Supervised stripping and put Rattlesnake Open Pit into production. Set up plant and equipment, developed mining system.

1957-to Date..Continental Materials Corp., Grand Junction, Colorado-Superintendent of Mines. Responsible to General Superintendent for mine production, mine planning and development. Coordinates activities at producing properties. Purchasing agent for capital expenditures. Assists general superintendent in direction of technical and administrative, personnel and property evaluation.

MAURICE H. BRADY

Biographical Data:
Age: 40
B. S. in Mining Engineering, Mackay School of Mines, University Nevada, 1950
Member:
American Institute of Mining Engineers

Professional Experience:

1950-1951.....Bunker Hill Co., Kellogg, Idaho - Miner, timberman and junior geologist in underground Pb-Zn-Ag mine.

1951-1955.....American Smelting & Refining Co., Santa Barbara, Chihauhua, Mexico - Engineer, assistant chief engineer, shift boss, division foreman, assistant to General Mine Superintendent. In charge of exploration and development projects, research on special problems, industrial engineering for 1500 tons per day integrated mining and milling operation with selective flotation for Pb, Zn, Cu, Fe.---1400 employees.

1955-1957.....Sabre-Pinon Corp., Colorado Plateau and New Mexico area. Superintendent for exploration and mining activities, engineer in charge of drilling projects in Grants, New Mexico district. Supervised drilling and participated in evaluation as well as original mine planning of areas which have developed into major producers in largest uranium district in the United States --- property now mining and milling 2250 tons per day.

1957 to Date..Continental Materials Corp. Mine Superintendent, Rattlesnake Mines, San Juan County, Utah. In charge of mining at largest open pit uranium mine on Colorado Plateau, responsible for grade control and selective extraction. Supervises underground mining, development and exploration of adjoining ore bodies.

ROY K. DONDERO

Biographical Data:
Age: 41
B. S. in Mining Engineering, Mackay School of Mines, University of Nevada, 1948

Professional Experience:

1948-1949.....Copper Canyon Mining Co., Battle Mountain, Nevada - Mine Engineer, surveying, sampling, mine planning and design.

1949-1953.....Pit Engineer and Foreman, Isbell Construction Co. - pit design, planning and contract measurement on 50 million ton stripping and mining contract for the Kennecott Copper Co., Ray, Arizona. Planned stripping program on American Smelting & Refining Co's. Silver Bell Mine.

1953-1956.....Pit Engineer and Foreman, The Anaconda Co., Yerington, Nevada - pit design and supervision 2000 tons per day open pit sulfur mine and 12,000 tons per day open pit oxide copper mine. Area engineer in charge of construction of 400 tons per day crusher and fluo-solids roasting plant.

1956-1957.....Resident Engineer and Assistant Construction Manager, Southwestern Engineering and F. H. McGraw Co. - Design Engineers Representative on borax recovery plant at Boron, California. Assistant Construction Manager for F. H. McGraw in field inspections, hiring key personnel, expediting materials and plans for contraction of $40 million alumina plant and $100 million alumina reduction plant.

1957-1958.....Resident Engineer for American Smelting & Refining Co. on $10 million asbestos mill, Black Lake, Canada. Owners representative, approved all purchases and sub-contracts under $5000, made recommendations on sub-contracts over $5000. General inspection of all construction, coordination of information and plans between contractor, designer and owner.

1958-to Date..Mine Superintendent, Continental Materials Corp. In charge of 200 tons per day underground uranium mine.

GLENN S. FRANKLIN

Biographical data:
Age: 43
Mackay School of Mines, University of Nevada, 1946-1949, 3 years study in Mining Engineering

Professional Experience:

1932-1941.....Sampler and Miner, gold and silver mines, Silver City, Nevada.

1941-1942.....U. S. Army.

1942-1943.....International Mining and Smelting Co., Battle Mountain, Nevada - Miner.

1943-1944.....Rare Metals Corp., Toulan, Nevada, Mill construction and operation; Howe Sound Mining Co., Holden, Washington - Miner.

1944-1946.....U. S. Army.

1946-1948.....Mackay School of Mines.

1948-1950.....Howe Sound Mining Co., Cobalt, Idaho - Miner, Engineer and Geologist.

1950-1951.....Mackay School of Mines.

1951-1959.....Howe Sound Mining Co., Cobalt, Idaho - Engineer and Geologist; surveying, diamond drill supervision, geochemical prospecting, shift boss.

1959-1960.....Isbell Construction Co., Cobalt, Idaho - Open Pit Powderman.

1960-to Date..Continental Materials Corp., Jeffrey City, Wyoming - Miner, shift boss-shaft sinking, mine engineering.

.... a partnership serving industries and governments by practical, imaginative applications of geology and engineering to physical problems and financial decisions.

.... an independent firm - since organized in 1955 has completed 89 job assignments for 47 clients in many countries...mining and industrial companies, government agencies investment firms, municipal corporations and individuals.

.... principals are EDWARD WISSER and MANNING W. COX Associates of many skills are available for assignments of any duration..The firm will undertake assignments only where applied geology can be of genuine value to the client. A per diem arrangement is usual, but where the scope of work is clearly defined the firm will offer a fixed price whatever the size of the project.

Biographical data:

Born: July 25, 1895, Fort Hamilton, New York
B.S. in Mining Engineering - University of California, 1917
Lt. Engineers, U.S. Army, 1917-1919
Teaching Fellowship in Geology - University of California, 1924-25
Johnston Scholar in Geology - Johns Hopkins, 1939-40
Lecturer in Mining - University of California, 1946-47
Professor of Mining - University of California, 1947-48
Professor of Mineral Exploration - University of California, 1947 to date
Member:
- Geological Society of America Fellow, 1937
- Society of Economic Geologists, 1937; councilor, 1958-60
- American Geophysical Union, 1951
- National Research Council, 1951-58
- Mining & Metallurgical Society of America
- American Institute of Mining & Metallurgical Engineers, 1918
  - Past chairman, San Francisco section, and various committees
- American Association of Petroleum Geologists
- Sigma Xi
- Geochemical Society

Listed in:
- American Men of Science
- Who's Who in Engineering

Professional Publications: 20
Examiner for accreditation of geological engineering curricula, Engineering Council for Professional Development
Recipient Penrose Grant, G.S.A. Monograph on Ore Localization (in press, 1959)

Professional Engagements:

1919 - 1921... Mining engineer, Ray Consolidated Copper Company, Arizona
1921 - 1924... Mine superintendent, Washington, California, Colorado
1925 ..... Engineer, Lincoln operators, Stockton Firebrick, California
1925 - 1926... Geologist, Phelps Dodge Corporation, Bisbee, Arizona
1926 - 1936... Chief Geologist, Mexican operations, U.S. Smelting and Refining Company; operating and engineering geology at Cia Real del Monte y Pachuca. Exploration and examination work throughout Mexico, with particular reference to: Sombrerete, Zacatecas; Guanajuato, Guanajuato; Santa Maria del Oro, Durango; Concepcion, Zacatecas; Matahuala, San Luis Potosi; Cinco Minas, Jalisco

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

Responsible for tunneling and diamond drilling expenditures in excess of $1,000,000 annually.

1936-1955... Independent Consulting Geologist; assignments include:

Consolidated Mines....	Bagio and Paracale Gold districts exploration, Philippines
Atok-Big Wedge Gold...	Direction of exploration, 1949-51
Mindaneo Mother Lode..	Philippine Mines, Atlas Copper exploration and development
International Minerals & Metals Corp.	Analysis lead-zinc district, Mexico Appraisal copper, lead, zinc district, Cuba Appraisal copper districts, California Study zinc resources, British Columbia
Cyprus Mines.....	Economic Studies, western Mexico Acquisition of Afterthought mine, California
Banco de Mexico.....	Analysis of basis for western Mexico smelting industry
Egale Pitcher Co.	Brought in San Pedro and Esmeralda mines Chihuahua, Mexico
The Paraffine Co.	Valuation of gypsum properties, Nevada
Lake Charles Oil Co. ..	Geologic survey of Baja California
New Amalden Corp. ...	Open pit mining project
Reconstruction Finance.	Examination of Governor quicksilver mine Ivanhoe district, Nevada
Wells Fargo Bank	Black rock sulphur deposit, Nevada
The Glidden Co.	Expert testimony re damage to mining by Shasta Lake, Calif. (Bully Hill zinc mines)
Winton Bros.	Procurement of beachwater riprap, Calif.
Shasta Iron Mines.....	Expert testimony re damage to mining, particularly to access, to Shasta Lake California
Slater Bros.Quarry	Expert testimony re construction materials, California
U.S. Justice Dept.....	Expert testimony re water damage to Big Blue mine, California

July, 1955 Partnership, Wisser & Cox

MANNING W. COX (partner)

Biographical data:
Born: February 19, 1918, Seattle, Washington
B. S. in Geology - University of Washington, 1940
Teaching Fellowship in Geology - Yale, 1940-41
Member:
American Institute of Mining & Metallurgical Engineers, 1942
Society of Economic Geologists, 1953
Sigma Xi
Registered Professional Engineer, Idaho, #1069

Professional Engagements:
1940.....National Park Service, ranger, Mt. Rainier
1941-1945...U.S. Geological Survey, geological branch:
Western states - general geology
Cuba - geology and valuation for manganese purchases
California, Utah - mining geology and diamond drilling
Nevada, Idaho - molybdenum resource study
New Mexico - district mining geology
1945-1946...U.S. Smelting & Refining Company, exploration geologist
San Juan, Colorado - prospect examination and mine rehabilitation.
1946-1955...American Smelting & Refining Company, geologist-engineer to 1951; then chief geologist, Northwestern Mining Division, Principal assignments included:

Substantial exploration projects:
Algeria, Tunisia, Morocco, Spain - examination and appraisal of lead, zinc, antimony mines, 1950-1951
Peru - valuation of copper properties, 1954
Colorado - Ibex Sunday underground development Leadville, 1947
Yukon Territory - McMillan, involving air transport for 2-drill exploration and geophysical prospecting, 1951-54
British Columbia - Bethlehem Copper, started in 1954
Washington - Deer Park Industries, involving geophysical and geochemical prospecting and trenching in 300 square mile area.
Montana, Wyoming - uranium prospecting by ground and airborne geophysics.

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

Mine Operating Geology:
Development, detailed mapping and sampling, ground support, rock bursts, reserve estimation at: Morning, Page, Frisco, Mike Horse, Lucky Friday, Jack Waite, Standard Mammoth; Coeur d'Alene district, Idaho and northern Montana, 1946-1950

New Mine Development:
Galena Project - Coeur d'Alene district, from initial shaft sinking and plant construction, to discovery and development into major silver producer, 1947-1955.
Van Stone Project, Washington - from initial mapping, pit and plant design, location and construction, into 1000 tpd open pit zinc producer, 1949-1952
Lake Asbestos property, Quebec - mapping, drill exploration, evaluation, pit design, lake drainage, highway relocation (1952). Came into production at 5000 tpd in 1958.
Barvue Zinc mine, Quebec - study open pit and plant

Resource Studies:
Siliceous fluxes for Helena and Tacoma smelters
Zinc resources for west coast smelter
Fluorite for Garfield acid plant
Aluminous materials throughout western United States for National Metallurgical Corporation.

District Studies - (16) throughout western United States, British Columbia, Yukon and Alaska
Responsible for geologic and engineering department consisting of 2 to 4 offices with 8 to 15 professional employees; $200,000 to $500,000 annual budget.

1955 to date... Consulting geologist, mine operator
Boriana WO_3 lease, Kingman, Arizona; operated HMS plant and underground mine
Evaluation of mining properties of S.E. Hadj Thami, El Glauoi, Pasha of Mrrakesh, Morocco

July, 1955 Partner, Wisser & Cox

Biographical data:

Born: September 10, 1926, Kalamazoo, Michigan
John Muir College
B.S. in Geology - Missouri School of Mines, 1951
M.S. in Geology - University of California, 1957

Professional Engagements:

1944-1946....U.S. Navy (radio technician)
1951-1956....Anaconda Company. International Smelting and Refining Company
Park City, Utah, stope geology (lead-zinc) 1951
General exploration, 1952-1953
Lovitt Mine, Washington (gold) underground mine geologist, 1952
Yerington, Nevada (copper) pit control and exploration, 1953-1956
Leviathan mine (sulfur) California, open pit control, 1954-1956

1957 to date..Wisser and Cox
Central Idaho district study (base metals)
Metaline District, Washington - mine damage, reservoir leakage, property evaluation.
San Vicente quarry, California - limestone pit development
Caguas exploration project, Puerto Rico (copper)

PROFESSIONAL ENGAGEMENTS

(July 1955 through December 1958)

C. B. Aitchison.....	1) Manganese valuations 2) Iron ore exploration recommendations
Angell & Adams.....	Preparation of testimony re condemnation of McMurray rock quarry, Russian River, California
Asbestos Corporation, Ltd.....	Examination of prospects, California
Bagdad Copper Company.....	Valuation of waste disposal area, Bagdad District, Arizona
Balboa Mining Company.....	Examination and direction of exploration Sein Fein mine (lead) Arizona
Battle Mountain Copper Company..	1) Design of three open pits 2) Estimation of reserves at Copper Canyon and Copper Basin, Nevada 3) Valuation of copper deposits at Battle Mountain, Nevada
Bethlehem Copper Company.....	Review of exploration techniques, Highland Valley project, Canada; recommendations for new drilling technique
P. A. Borelli	Appraisal of White Caps mine, Arizona
Calaveras Central Gold Mining Co.	Economic study of drift mine, California for aggregate and highway materials production
S. K. Connors.....	Valuation Ray Silver-Lead prospect, Arizona
Consolidated Uranium Company...	Valuation of copper property, Arizona
Cordera Mining Company.....	Direction of exploration work at Mt. Diablo quicksilver, California

NORTHERN CONTINENTAL
P. [illegible]
[illegible] JUNCTION, COLORADO

De Soto Copper Company.....	1) Management of DeSoto Copper mine exploration 2) Management of Cordera copper mine exploration, involving diamond drilling
Dozier & Presley.....	Legal testimony re valuation of Rio Vista clay pits
Ebasco Services.....	Evaluation of limestone deposits for cement plant at Frazier, California
Flintkote Company.....	1) Evaluation of gypsum deposits for wallboard, Sweetwater, Texas 2) Mining and exploration layout for Sweetwater gypsum deposits, including highway relocation, railroad survey 3) Examination of fumarolic sulphur deposits in California 4) Evaluation of natural resources of U.S. Lime Products Company, Nevada including quarrying methods and access 5) Examination of claim histories, Nevada 6) Evaluation of reserves, Blue Diamond gypsum, Nevada 7) preparation operating maps, Blue Diamond, Nevada 8) Evaluation of reserves, Glens Falls Portland Cement Company, New York
E. G. Frawley, etal.....	Examination of manganese deposits, Mexico and Arizona; copper prospects, Arizona. Total 22 properties
Paul Goddard.....	Examination Round Hills tungsten Bishop, California
Granite Construction Company....	Search for breakwater rock, Pillar Point, California
Boris Gresov.....	Management advice, Sello Azul prospect, Mexico
Hualpai Company.....	1) Study of heavy media metallurgy at Stockton Hill lead mine, Arizona 2) Examination molybdenum properties, Arizona. access roads, mine rehabilitation sampling.

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

International Minerals & Chemical...	Recommendations for exploration to acquire boron deposits in California
Jack Waite Mining Company	1) Engineering study and evaluation of Jack Waite mine, Idaho 2) Negotiations new A.S.& R. contract 3) Management advisory service
Johns Manville Company.....	1) One-year exploration campaign for gypsum in western U.S. and Mexico, including geologic mapping, diamond drill exploration, transportation and production costs studies 2) Examination of asbestos deposits in Malheur County, Oregon and Shasta County, California 3) Appraisal Bestwall gypsum properties throughout North America
Kennecott Copper Company.....	1) Structural analysis and detailed recommendations for prospecting in Southern California 2) Structural analysis of Arizona copper deposits 3) Appraisal Bully Hill mine, California
Loew & Flaherty.....	Evaluation of chrome prospect, Mendicino County, California
E. J. Longyear Company.....	Reserve estimates, operations research and layout of mining methods, Rio de Oro Uranium mines, New Mexico
Minera Cuprum, S.A.	Exploration for asbestos, Mexico; drilling prospecting, logistics, trenching, road construction, detailed mapping, 4 localities
Minera San Bruno, S.A.	Diatomite exploration, Mexico; trenching property acquisition
New York & Honduras Rosario Co..	Batzan copper district examination, Mexico
Pacific Gas & Electric Co.	Coal land condemnation litigation.

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

Pacific Cement & Aggregates.....	1) Ore reserve and operating problems study Santa Cruz Cement Co. California 2) Layout of drill exploration at San Vicente limestone quarry, California, for conversion of glory hole to bench quarry 3) Pit and stripping design, reserve and waste examination, San Vicente, Calif. 4) Bonny Doon exploration for limestone California; core drilling, geochemical water tests, pit design, reserve estimation. 5) Appraisal of Three Rivers limestone, California (cement rock)
Frank Price.....	Evaluation of Last Chance copper prospect Yerington, Nevada
Seattle City Lighting Department..	Valuation of mine damage problem re: Boundary dam site application, Washington; preparation of reports to Federal Power Commission; 11 miles detailed geology re dam sites, reservoir leakage, mine damage, relocation shafts, pumping station and powerhouse, planning and directing deep drilling, ground water study (with Leggette, Brashears & Graham), study of economics of district and of lead-zinc industry, preparation of plastic model of district.
Lloyd H. Smith.....	1) Catalog of non-sulfide copper deposits of western United States 2) Examination and appraisal of Perrico copper property, Durango, Mexico
Ralph L. Smith Lumber Company...	1) Valuation asbestos property, California 2) Management advisory service
Standard Ore & Alloys	1) Examination and layout of exploration program at Red Mountain, Colorado 2) Study of exploration program, Penn Mine, California, including mine rehabilitation
A Syndicate.....	Study of Capula Silver, Mexico
A Syndicate.....	Consultation re San Rafael Mine, Mexico

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

Transarizona Resources.....	Management contract of Lakeshore mine project, Arizona (copper) exploration, development and metallurgical research with U.S. Bureau of Mines, Tucson Experimental Station; including open pit development, leach plant location and design, road location, diamond and rotary drill exploration, segregation metallurgy
Transcontinental Resources, Ltd...	1) Valuation of Blue Ledge copper mine, California 2) Examination of properties (28) in western United States
Transworld Mining Syndicate.....	Valuation diamond placers in Brazil; detailed operating study
Ukiah Mines, Inc.	Valuation Rathburn mercury prospect, California
U. S. Army Engineers	Testimony, Beale Air Force Base condemnation re valuation of zinc property.
U. S. Justice Department	Appraisal and expert testimony re stone quarry, Stanislaus National Forest
U. S. Lime Products Company	1) Valuation and exploration of limestone deposits, including study access, roads piers, mining methods and costs, siding construction, and exploration, Lake Shasta, California 2) Exploration for limestone near Auburn, Calif.
Werdenhoff Mining Company.....	Valuation of company's mineral holdings in Idaho; a district geologic study
J. H. Whitney & Company	Valuation of prospects, Puerto Rico; layout and direction of Caguas copper exploration by mapping, geophysical and geochemical work, hydrothermal alteration studies, physical exploration
Yuma Land Company.....	Valuation copper deposits, Yuma test site, Arizona

NORTHERN CONTINENTAL
P. O. BOX 1550
GRAND JUNCTION, COLORADO

Addendum of December 1, 1959

Flintkote Company.....	9) Gypsum exploration project, Canada (in progress) 10) Evaluation of reserves and economics Calaveras Cement Co. California 11) Examination of asbestos deposits, Calif.
Fibreboard Paper Products Co.....	Evaluation of an asbestos deposit reserves, mining and milling methods and outcome estimates, California
Idaho Highway Dept.	Appraisal of mining claims along U.S. Highway #10, Shoshone County, Idaho
Golden, Theodore	mine examination, California
Western Reneline Corp.	Appraisal of limestone and sand deposits Santa Cruz County, California
Pacific Gas & Electric	2) Appraisal of Mt. Diablo area right of way, California 3) Appraisal of Sonora Pass right of way, California
U.S. Dept. of Justice	2) Appraisal of Capehart housing project area, Auburn, California
J.D. Mason, et al	4) Examination of lime project, Arizona
Jack Waite Mining Co.	Study of Aetna quicksilver property, Calif.
Western Knapp Engineering Co...	Examination of Lucky S gold property, Calif.
J. Hoffman	Examination of Mother Lode gold, California

NORTHERN CONTINENTAL
P. O. BOX 1550

CONSULTING GEOLOGISTS

Addendum of December 31, 1960

Blue Diamond Company	Examination of gypsum deposits, Nevada
East Bay Municipal Utility District ..	Appraisal Camanche Reservoir property; rock, clay, Cu-Zn, sand, etc.
Jack Waite Mining Company.....	(4) Exploration of gold property, California
Hunting Geophysical Services, Inc...	Consultation re Papago Indian Reservation
Atlas Mining Company	Mullan area, Idaho
Transarizona Resources, Inc.....	Valuation report including financial projection Lakeshore property, Arizona
J. H. Hamacher, et al	Mercury examination, California
Continental Materials Corp.	1) Consultation re exploration programs in continental United States 2) Field exploration, Arizona, Nevada
See Tee Mining Corp.	1) Examination Creede district, Colorado 2) " Summitville " , Colorado 3) " Crystal Hill & Gap properties, Colorad
N.D. Cote	Kaweah River examination, California
Pacific Cement & Aggregates	Continuing studies, Bonny Doon quarry, Calif
Seattle City Light	Preparation of engineering aspects of legal briefs re Boundary Dam, Washington
Morris Ravine Mining Co.	Evaluation report, drift placer, California
R. L. Smith Lumber Company	Legal testimony
H. Zinder & Associates	Cle Elum quarry problem
Walter Simas	Exploration of St. Thomas asbestos, Calif.
Pacific Gas & Electric	Final reports and expert testimony Mt. Diablo R.O.W. litigation
Guggenheim Bros.	Valuation Mexican manganese property
U. S. Dept. of Justice	Beale Air Force Base, condemnation report, Cal
Kanaranze Ore Company	Examination lead prospect, Nevada
Flintkote Company	12) Siskiyou asbestos, California

NORTHERN CONTINENTAL

Re: OME-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana
Contract 2148

Dear Mr. Flinders:

By the terms of the subject Exploration Contract, as amended, the Certification of Possible Production issued January 29, 1964, and the Lien or Subordination Agreement, dated March 5, 1962, signed by you, Marion S. Heller, Juanita Heller, Margaret Flinders, Frank B. Bryant, Della Bryant, Edward F. Wieglenda, and Vesta Wieglenda, all minerals mined or produced from May 17, 1962, to May 17, 1972, were subject to the Government's royalty as set forth in said contract.

As the period during which production was subject to royalty has now expired, the Government according to its present records retains no claim or lien against the property subject to the contract or any future production therefrom. We, therefore, are closing our books and records on this contract.

Sincerely yours,

Harold Kirkemo

MEMORANDUM

To: Chief, Office of Minerals Exploration

From: Field Officer, Region I

Subject: Final Royalty Inspection
OME-6236 (gold-silver)
Northern Continental, Inc.
Gold Bug, et al., claims
Phillips County, Montana
Contract 2148

I made a final royalty inspection of the Gold Bug mine on Tuesday morning, May 23, 1972.

The mine appeared to be inactive and the portal to the OME adit was caved, identical to its condition on my last inspection Sept. 14, 1971.

Mr. Ed Wieglenda and Mr. Legg, Niseka Mining Company, arrived at the property during my inspection. Mr. Legg explained to me that his company had been doing some surface exploration and hoped eventually to develop an open-pit mine on the property.

Mr. Legg said that there had been no production from the property during the past year; in fact, his lease from Little Rockies Mining and Development Company expressly forbade production during the period for which royalties would be due to OME.

In respect to your memorandum of May 23, 1972, I have no further comment concerning royalties from the property and deem it advisable for the contract to be closed as of May 17, 1972, the expiration date for OME royalty.

MEMORANDUM

To: Chief, Office of Minerals Exploration

From: Field Officer, Region I

Subject: Annual royalty inspection
OME-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al, claims
Phillips County, Montana
Contract 2148

The Gold Bug mine was deserted when I visited it on Tuesday, Sept. 14, 1971. Buildings near the OME adit portal were locked and in good repair. The portal is obscured by sloughed material, the same as it was when I last visited the property on Aug. 27, 1970.

The Postmistress at Landusky told me that Mr. Legg, from Vancouver, British Columbia, and presumably an officer of Niseka Mining Company, had recently visited the mine with others whom he had attempted to interest in the property. Earlier, a Mr. George Richardson had examined the property, spending several weeks between Dec. 1970 and July 1971. Obviously Niseka Mining Company still controls the property. There has been no production during the past year.

Memorandum

To : Chief, Office of Minerals Exploration

From : Field Officer, Region I

Subject: Royalty inspection
OME-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana
Contract 2148

I visited the Gold Bug mine on Thursday morning, August 27, 1970. Three men were servicing a bulldozer near the portal of the OME adit. They had recently removed the sloughed material from near the portal and were letting the backed-up water drain. During the past year they had worked in driving about 1300 feet of adit drift and crosscut in an area on the other side of the hill from the OME adit.

In Landusky, Montana, I conferred with Joseph J. Durek, a consultant geologist, who has been retained by the Niseka (Nigh-Seek-Uh) Mining Company. Mr. Durek showed me some maps of the new underground work and these indicated that the work had been done on claims that are north of those subject to the contract. The foreman of operations, Mr. Edward Wieglanda, was ill and had returned to Lewistown, Montana.

Apparently the Niseka Mining Company had exercised at least one of the options with Little Rockies Mining and Development Company, the mine owners, and planned to continue exploration and development. No ore had been produced during the past year.

The Government's lien on production extends until May 17, 1972.

Dear Mr. Flinders:

Thank you for your prompt reply to our letter of May 25, 1970, and the copy of the lease with the Niseka Mining Company, Vancouver, British Columbia.

We have reviewed the lease, made duplicates for this office and our Spokane office, and are returning herewith your copy.

Please advise us whether Niseka Mining Ltd. exercises its option to purchase prior to July 26, 1970, or elects to extend the option until January 26, 1971. If it elects the latter choice, please advise us next January whether the company exercised the option to purchase or dropped the lease.

Subject: Summary final report

OME-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al Claims
Phillips County, Montana
Contract 2148

INTRODUCTION

This report summarizes an OME exploration project for gold-silver ore in a shear zone in syenite porphyry in the Little Rocky Mountains north of Landusky, Montana. The contract, dated May 17, 1962, was for a total estimated cost of $76,300.000, of which the Government would contribute 50 percent, or $38,150.00. The contract was amended twice and was completed in September, 1963. The accepted cost of the completed work was $67,779.40, of which the Government contributed $33,733.70. The Government issued a Certification of Possible Production on January 29, 1964, under the terms of which royalties shall be paid to the Government on all production from the land described in the contract and on all production transported through workings to the cost of which the Government contributed, from May 17, 1962, to May 17, 1972, or until the sum of $33,733.70 is fully repaid with interest at the rate of 6 percent per annum, whichever occurs first. There were 52,659.39 tons of crude ore produced between February, 1964 and June, 1965; average metal content of this ore was 1.06 ounces gold and 37.06 ounces silver per ton. Total precious metal content was 5,563.55 ounces of gold and 195,165.32 ounces of silver. Royalties paid to the Government totalled $16,258.79. Northern Continental, Inc. surrendered their lease on the mine on July 1, 1965. The mine is now idle.

OPERATOR

Northern Continental, Inc., a Montana corporation
P. O. Box 1550
Grand Junction, Colorado

Final Field Rept.

The parent company is: Continental Materials Corporation
4534 West North Avenue
Chicago, Illinois 60639

The mining field office is: Continental Materials Corporation
820 South Ninth Street
Grand Junction, Colorado 81502

PROPERTY

The property consists of four patented claims and two unpatented claims (figure 1) as follows:

Patented claims	Survey No.	Patent No.
Gold Boy	3806	22176
Gold Bug	3807	22177
Mary	3841	22311
Ann	3842	22311

Unpatented claims	Recorded at Malta, Phillips County, Montana	
Bolero	Book 1	Page 375
McTavish	Book 1	Page 376

The Operator had rights of possession of the claims under the terms of a Mining Lease, dated July 10, 1961, granted by Little Rockies Mining and Development Company, 412 W. Main Street, Lewistown, Montana 59457. The following former owners have royalty rights on production from the above-listed claims:

Name	Address
Marion S. Heller and Juanita Heller	Lewistown, Montana 59457
Cecil Flinders and Margaret Flinders	412 West Main Street Lewistown, Montana 59457
Frank B. Bryant and Della Bryant	222 West Washington Street Lewistown, Montana 59457
Edward F. Wieglenda and Vesta Wieglanda	Denton, Montana 59430

Northern Continental, Inc. surrendered their lease on the property effective July 1, 1965.

A lease, with option to purchase, was given to Little Rocky Mining Company, Landusky, Montana, on March 18, 1967, and was still in effect as of May 29, 1969.

The Gold Bug, et al claims are in secs. 15 and 22, T. 25 N., R. 25 E., Phillips County, Montana. They are on the southwestern slopes of the Little Rocky Mountains at altitudes ranging from 4300 to 5500 feet and are about $1\frac{1}{2}$ miles from Landusky, Montana. The claims can be reached from Landusky by following the Forest Service road that extends east and north of town to Hays, Montana.

The underground workings that existed prior to the start of the OME work were listed by the applicant as follows:

Adit	Altitude (feet)	Drift & crosscut	Raise & winze	Stoping
100 level	5030	250 ft.	100 ft. to surface	Unknown
Discovery level (portal caved)	4900	250 ft.	Unknown	Unknown
250 level	4880	50 ft.	None	2,000 cubic ft.
300 level	4820	1200 ft. (partially caved)	60 ft. to 250 level 50 ft. to 350 level -20 ft. in sill	35,000 cubic ft.
350 level	4770	1260 ft.	50 ft. to 300 level	7,000 cubic ft.
400 level	4725	160 ft.	None	None

The generalized locations of workings, with the exception of the 400 level, are shown on figure 1. The extent of the OME workings are shown on figure 2 and the stopes above this level are shown on figure 3.

PURPOSE OF PROJECT

The purpose of the project was to explore by drifting, raising, and long-hole drilling for gold-silver-bearing ore bodies along the strike of the Gold Bug vein system, which occurs in a shattered zone within Tertiary syenite porphyry.

GEOLOGIC JUSTIFICATION

The central part of the Little Rocky Mountains is composed of a laccolith of syenite porphyry that has intruded rocks ranging in age from Precambrian to Late Cretaceous (Emmons, 1908, p. 101-104; Knechtel, 1959, pl. 52). Gold mines have been developed along shear zones in the porphyry near the southwest and southeast margins of the porphyry and, in some places, in adjacent sedimentary rock. Mineralogy of the lode deposits is relatively simple; pyrite, quartz, and fluorite are the most common minerals. Some gold telluride (sylvanite?) has been reported in the Ruby Gulch gold mining district (Dyson, 1939, p. 210) in the southeastern part of the laccolith. The ores are reported to be relatively low grade and, besides carrying gold, contain about an ounce of silver per ton.

Five gold-bearing lodes were found at the Gold Bug mine before 1907 (Emmons, 1908, p. 115). These had been prospected by short adits and open cuts; some stoping had been done. None of the lodes were extensive; the stopes were short and were from a few inches to several feet wide.

Northern Continental, Inc. mapped the geology on the surface and in the accessible underground workings in 1960 and 1961. They reopened several bulldozer trenches along the strike of the Gold Bug vein system and conducted a surface geochemical survey. They found that ore minerals are along fractures and zones ranging from a few inches to several feet in width. The principal zone (Gold Bug) appears to be continuous for several hundred feet along dip and strike, but minor structural components within the zone are variable in attitudes. Ore is in seams of iron oxide and in breccia cemented with iron oxide and quartz. Pyrite and arsenopyrite are present locally; fluorite is not abundant. Ore minerals are free gold and hessite; iron oxides obscure these minerals and assaying is necessary to determine their presence.

The applicant company did not believe the zone could be satisfactorily explored by surface diamond drilling or by sinking a winze. Exploration was justified because:

(1) Sampling of underground workings indicated that ore exists at the lowest explored level of the Gold Bug structure.
(2) Geologic evidence and past exploration indicated that the Gold Bug mineralized structure should extend down dip and laterally.

Smelter shipments from the mine to the East Helena Plant of American Smelting and Refining Company from May 1955 until September 1958 contained 359.42 tons of crude ore and 10.5 tons of concentrate. The crude ore contained 0.71 to 12.71 ounces gold and 21.9 to 729.6 ounces silver per ton. The concentrates contained 5.975 to 6.267 ounces gold and 263.05 to 461.4 ounces silver per ton. Total net smelter returns for the crude ore was $29,790.11 or $828.84 per ton. Total net smelter returns for the concentrate was $5,800.77 or $552.54 per ton. These shipments indicate that the ore in parts of the mine is considerably richer in gold and silver than had been reported by Emmons (1909) or Dyson (1939).

CONTRACT

The contract, No. 2148, dated May 17, 1962, required work to be completed within 24 months. The estimated costs of the original contract work were as follows:

Fixed unit costs		
80 hours bulldozing access road and portal site at $15/hr	$ 1,200.00	
1500 feet drifting at $36.00/ft	54,000.00	
1000 feet of drift timbering at $7.50/ft	7,500.00	
200 feet raising at $36.00/ft	7,200.00	
3600 feet long-hole drilling at $1.00/ft	3,600.00	
1400 samples assayed for gold and silver at $2.00/sample	2,800.00	
Total estimated cost of project		$76,300.00
Government participation at 50 percent		38,150.00

Description of the work

The work included constructing an access road approximately 1800 feet long from the main road to the portal site of the Gold Bug drift and excavate the portal. From the portal site on the Gold Bug vein system, at an elevation of approximately 4570 feet, a drift was to be driven 1500 feet in a northeasterly direction along the vein. In the drift, at a point about 500 feet in from the portal, 3 longholes were to be drilled into each wall of the drift. At intervals of 200 feet, as the drift was advanced, the same procedure for drilling additional long holes was to be followed. Two 100-foot raises were to be driven from the drift at points agreed on by the Operator and the Government.

The contract was amended two times as follows:

Amendment No. 1, dated September 14, 1962, permitted the use of D-6 Caterpillar bulldozer instead of a D-8 Caterpillar bulldozer. The unit cost for bulldozing was reduced from $15.00/hr to $12.50/hr. The total estimated cost of the project was reduced to $76,100.00 and the amount of Government participation was reduced to $38,050.00. A new nondiscrimination article was substituted for the one that appeared in the original contract.

Amendment No. 2, dated May 16, 1963, permitted the substitution of composite car samples for channel samples.

PROJECT WORK

Contract work started on June 20, 1962. Twenty-five feet of adit was completed by the end of June. As of November 8, 1962, the adit had been advanced 565 feet and required 147 feet of timbering.

The crosscut into the left rib at 520 feet from the portal cut an oxidized structure about 10 feet from the main drift. This structure is a fault or fissure filled with breccia and cemented with limonite and iron oxides. Further drifting intersected the northeastern extensions of this zone (figure 2). It was believed that the zone of breccia represents the Gold Bug vein system. This structure terminates against a fault, beyond which is shaley metasedimentary rock about 245 feet thick. Some of the metasedimentary rock is weakly mineralized along faults or zones of breccia.

Ore was intersected about 1200 feet from the portal, and occurs along two parallel fractures which are from 1 to 2 feet apart, and dip 60°-75° SE. Brecciation associated with these fractures is at least as wide as the drift and is most intense between the two parallel fractures. The structural pattern varies in detail, but in general the eastern fracture is the stronger, with openings as much as 3 inches wide, 2 feet deep, and 4 feet long. Some openings are barren; others contain porphyry fragments, silicified rock, and talcy gouge. The highly mineralized material can be recognized by black and greenish sooty minerals deposited on breccia fragments and in vesicles in the porphyry. Tetrahedrite(?) is present. Commonly,

these minerals are covered by a layer of pyrite or marcasite that is 1/4 to 1/2 inch thick and is characterized by botryoidal structure of radiating crystals. Composite mine car samples in this area assayed as much as .28 ounces gold and 21.3 ounces silver per ton (figure 2). This ore zone extends to a point about 1315 feet from the portal.

Crosscuts and long-hole drilling preparatory to driving raises were completed in May, 1963. During this time the Operator, on his own account, extended the adit. The first of two raises was started in the latter part of June, 1963, and long-hole drilling under the contract was completed.

Ore in the No. 1 raise (figure 2) is principally within a pyritized breccia structure along the hanging wall. A 5-foot channel sample across the vein on the portal side of No. 2 raise assayed 7.26 ounces gold and 18.2 ounces silver per ton. The structure is highly brecciated and contains both sulfides and iron oxides with some fluorite. Assays from both raises showed an erratic distribution of ore minerals but selected samples could be taken of high grade material. The vein structure weakens and splits near a contact with shale about 65 feet above the adit level. Longhole drilling indicated that fairly good ore occurs in the shale in the hangingwall of the structure.

The vein structure in Raise No. 2 abruptly steepens from 47° to 80° at 65 feet above the adit, and weakens into close-spaced splits. Long holes into the hanging wall of the raise cut samples of high-grade ore.

Contract work was completed in September, 1963; however, the Operator continued advancing the adit on his own account and also bulldozed several surface cuts to verify geologic projections and to check chemical anomalies.

The acceptable work and the approved costs of the contract work are as follows:

Item	Cost
Bulldozing, 69.6 hours at $12.50/hr	$ 870.00
Drifting, 1500 feet at $36.00/ft	54,000.00
Timbering, 143.52 ft at $7.50/ft	1,076.40
Raising, 200 ft at $36.00/ft	7,200.00
Long-hole drilling, 2749 ft at $1.00/ft	2,749.00
Samples assayed, 786 each at $2.00/ft	1,572.00
Total cost	$67,467.40

The Government has no equity in any equipment at the property.

The completed work explored the Gold Bug vein system at a distance of about 200 feet below old workings on the vein. This work proved the existence of ore-bearing rock at this altitude. The raises and long-hole drilling proved that the mineralized rock extended upward toward the old workings. The additional work by the Operator at his own expense adequately explored the Gold Bug vein system.

The work was done efficiently and few problems developed during the contract. The Operator's monthly narratives were complete and detailed and formed the basis of much of the information listed in this summary report.

REPORTS

The Operator submitted an excellent final report on December 2, 1963. Listed in this report are tonnages of inferred and indicated ore resulting from the contract work and also a tabulation of the actual unit costs of the project.

A Report of Review was issued on December 5, 1963, and the allowable costs as set forth above were approved.

A Report of Royalty Review was issued on May 4, 1965. The total royalty payable at that time was $14,272.36, all of which had been paid. There has been no more recent Royalty Review although royalties were paid on shipments through June 22, 1965.

PROJECT RESULTS

The project work was successful in intersecting the Gold Bug vein system about 200 feet below old workings, and proved that it contained gold and silver in minable amounts (figure 2). The applicant calculated that there were 14,800 tons of indicated ore in a zone that extended from 50 feet below to 135 feet above the OME adit. His calculations were for ore worth $20.00 per ton in place assuming that gold is $35.00 per ounce and silver $1.20 per ounce. Production proved that the ore actually mined was about $3\frac{1}{2}$ times as great as this and that the value of the ore was nearly $80.00 per ton.

The Government issued Certification of Possible Production on January 29, 1964. The Government's lien on production extends from May 17, 1962, to May 17, 1972, or until the sum of $33,733.70 is fully repaid with interest, at the rate of 6 percent per annum, whichever occurs first.

PRODUCTION

The Operator continued exploration and development after the end of OME contract work. Shipments of crude ore to the East Helena plant of American Smelting and Refining Company began in February, 1964, and continued through June, 1965, (Table I), after which the Operator relinquished his lease on the property. Crude ore sold totalled 52,659.39

Total	52,659.39					$325,176.03	$16,258.79

Total gold = 5,563.55 ounces

Total silver = 195,165.32 ounces

Average ounces gold per ton = 1.06

Average ounces silver per ton = 37.06

tons that averaged 1.06 ounces gold and 37.06 ounces silver per ton. Lead and copper values were nil; however, the ore averaged about 1 percent zinc for which there was no payment. There is no unsold ore stockpiled at the mine.

ROYALTIES

The royalties due and paid to the Government are listed on Table I. Total royalties paid are $16,258.79. There are no unpaid royalties due to the Government.

SUMMARY

The work was successful in finding extensions of the Gold Bug vein below the old workings. There has been more than 52,000 tons of ore sold that averaged 1.06 ounces gold and 37.06 ounces silver per ton. The ore came from stopes that bottom from 35 to 80 feet above the OME adit (figure 3).

There are many large inclusions of metasedimentary rock within the syenite porphyry (figure 2). Ore occurs both in these rocks and in sheared porphyry. Details are lacking on the geology of the stoped areas.

The mine is now idle. There is a modest tonnage of milling grade ore above and below the OME adit level. Deeper exploration and development would have to be from drilling or by sinking an underground shaft.

Memorandum

To: Chief, Office of Minerals Exploration

From: Field Officer, OME, Region I

Subject: Royalty Inspection
OME-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana
Contract 2148

I visited the Gold Bug mine on Monday morning, August 11, 1969. The mine was deserted and appeared to have been inactive for several months at least. The several sheet metal buildings near the now-caved portal of the lowermost adit are in good repair and are locked. Diamond drill core is stored in uncovered boxes near one of the buildings. The hillslope above the adit portal has sloughed and covered the opening to the adit. A strong flow of water emerges from the sloughed material; I could not determine if the water is coming from the adit or from a source higher on the hill. Cables cross the access roads to the 350-level adit and to the lower (OME) adit and "No Trespassing" signs are posted.

The postmistress at Landusky said that there had been some work on the hill above the Gold Bug mine during the past year. Her son(?) said that some long holes had been diamond drilled at the Hawkeye property which is higher on the slope than the Gold Bug mine.

There are many fresh-appearing bulldozer trenches on the slopes above the Gold Bug mine; I could not tell if these were on the property covered by the contract but assume that they are not.

There is no evidence of recent production from the Gold Bug mine.

Dear Mr. Flinders:

After the completion of the approved exploration work under the contract identified above, we asked to be informed about changes in the status of the property and production from it during the period of royalty obligation.

To assist you to furnish this information and to assure the accuracy of our records, please answer the questions on the back of this letter and return two copies to this office with copies of any pertinent documents.

Sincerely yours,

Harold Kirkemo

Re: OMR-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana
Contract 2148

Dear Mr. Flinders:

We apologize for not replying earlier to your letters dated July 12 and September 6, 1967. Please accept our thanks for sending us a copy of the Mining Lease dated May 18, 1967, between Little Rockies Mining and Development Company and Little Rocky Mining Co., Ltd.

Under Article 1(a) of the Lien and Subordination Agreement, you agreed that ". . . if the Operator's (Northern Continental, Inc.) interest should be surrendered or terminated at any time prior to the expiration of the rights of the United States under said Contract to pay royalty to the Government according to the terms of said Contract . . . ."

The Government's rights to royalty under the terms of the OMR contract with the previous lessee are not mentioned in the lease with Little Rocky Mining Co., Ltd. In fact, a statement on page 2 of the lease reads as follows:

> "And Whereas the Lessor has warranted to the Lessee that it has full right, title and interest in and to the Premises and the right to deal with and alienate the same free and clear of adverse claim or encumbrance."

In our letter to you dated June 12, 1967, a copy of which is enclosed, we referred to Article 4 in the Lien and Subordination Agreement executed March 5, 1962, by Little Rockies Mining and Development Company. Please note that you are obligated to give advance notice to any subsequent lessee of the Government's rights under this agreement. In reference to Article 1 of the agreement, we stated that "If the Government's rights to royalty are not protected in subsequent leases of the property, the Government will look to the owner for payment."

The term "its successor" in Article 14(i) under Special Agreement Concerning Royalty refers to anyone, whether assignee, lessee, or owner, who becomes obligated to pay royalty to the Government on any production from the property or on production transported through workings completed on the OME project.

We hope these explanations of measures to ensure payment of the Government's interest in the property are clear.

Sincerely yours,

FRANK E. JOHNSON

Re: OME - 6236 - Northern Continental, Inc., Contract 2148

Dear Mr. Johnson:

Enclosed please find a photocopy of a letter I wrote you on July 12, 1967.

Would you please answer the questions I asked you in this letter? In the event the company that has an option on our mining property should buy and start production, we will both have to know where we stand.

An immediate reply will be much appreciated.

Sincerely yours,

Cecil Flinders

Re: OME - 6236
NORTHERN CONTINENTAL INC
CONTRACT 2148

Frank E. Johnson, Chief,
Office of Minerals Exploration
U. S. Department of the Interior
Washington, D.C. 20242

Dear Mr. Johnson:

Enclosed please find copy of option agreement on our property as requested by you in your letter of June 12th.

It has been our understanding that if further production from our property is made, that royalty payments would be made by Continental Materials Corp., who obtained the O. M. E. loan. We understand that if they do not make payments, we will be held responsible. You quote Article 1 of the lien to support this.

Would you please explain to us Articles 5-b and 1-c. Doesn't this make Continental Materials Corp. (the Operator who obtained the loan) responsible? We would like to know, because it affects our title and if the Company, who has an option on our property, exercises it, they, as well as our Company will want to know.

Also, explain Article 14-i-"Special Agreement concerning Royalty". What is meant by "or its successor" in line 5?

We have always been under the impression that Continental who obtained the loan, would have to pay royalty on production from our mine, even if they no longer operated the mine, if there was any production, until the loan was paid in full, or 10 years had elapsed. We would not have signed the subordination agreement if it had been otherwise.

Your advices will be appreciated.

Sincerely yours,

Cecil Flinders, President

McTavish	1	376
Margie	1	282

and all the foregoing claims are hereinafter called the "Premises";

AND WHEREAS the Lessor has warranted to the Lessee that it has full right, title and interest in and to the Premises and the right to deal with and alienate the same free and clear of adverse claim or encumbrance,

NOW THEREFORE, the parties agree as follows that:

1. Consideration. For and in consideration of the sum of One ($1.00) Dollar, the receipt of which is hereby acknowledged by the Lessor, and the covenants and agreements which the Lessee hereby agrees to pay, keep, and perform, all in the manner hereinafter set forth, the Lessor does hereby lease the Premises to the Lessee upon the terms and conditions and for the purposes hereinafter set forth.

2. Undertakings of the Lessee. With respect to all claims:

(a) The Lessee will enter upon the Premises and conduct between the date hereof and September 1, 1967, examinations and investigations, including such geological, geochemical or geophysical surveying, drilling, trenching, sampling or assaying as it shall deem necessary or convenient to determine whether the Premises can be operated and mined economically, and the Lessee covenants and agrees that it will expend for such purpose during such period not less than Fifty Thousand Dollars ($50,000.00 U.S.). Lessee shall mine no ore for commercial purposes, but may remove from the premises any amount of ore deemed by

Lessee to be necessary for assaying and testing purposes.

(b) The Lessee will pay or cause to be paid all property taxes finally assessed against each patented claim embraced by this Agreement on the date such taxes are payable and while this Agreement is in force provided only that the Lessor shall give the Lessee prompt and due notice of any levies, assessments or tax claims affecting the Premises or part thereof which come to its attention and upon condition that all taxes due and owing at the date hereof have been fully paid and satisfied by the Lessor and others, a condition which the Lessor warrants and represents has been fulfilled.

(c) The Lessee will perform labor or make improvements of One Hundred Dollars ($100.00) with respect to each unpatented claim subject to this Agreement by July 1 of each year until a patent has been issued therefor and while this Agreement is in effect, and will file affidavits stating that such work was performed, provided only that the said unpatented claims are at the date hereof in good standing and that One Hundred Dollars ($100.00) of labor has been performed or improvements made and affidavits filed for the year ended September 1, 1966 with respect to each unpatented claim included in the Premises, a proviso which the Lessor warants and represents has been fulfilled.

3. Lease. The Lessor hereby leases the Premises to the Lessee until July 1, 1968, or until this Agreement is otherwise terminated, together with:

(a) all minerals and mineral rights in the Premises; and

(b) the right and privilege exclusive of all others including the Lessor to enter upon the Premises and to retain, explore, examine and investigate the minerals thereof as aforesaid; and

(c) all personal property and fixtures now or hereafter attached to or used in conjunction with mining the Premises, save and except that certain steel office building now located by the portal of the mine now located on the Premises, and the Lessee will return to the Lessor all such personal property and fixtures in the same condition as the Lessee receives them, ordinary wear and tear and deterioration excepted, unless the option herein is exercised, in which case all such personal property and fixtures shall be conveyed by Lessor to Lessee as one of the considerations for the purchase price hereinafter specified. In the event the option is exercised, the Lessor will cause the owner of the steel office building to remove the same from the Premises without cost to the Lessee , and the Lessor will indemnify the Lessee against any cost or expense which Lessee might need to expend in order to have said building removed in the event Lessor does not do so.

(d) so much of the use of the surface, surface rights, structures, improvements, water rights, rights-of-way, easements, tenements, hereditaments and appurtenances in, on or in any way now or hereafter appertaining to the Premises as may be necessary or convenient to explore the Premises, or as may be within the power of the Lessor to set over unto the Lessee.

The Lessee hereby accepts this Lease. Upon termination of this Agreement, the term of this Lease shall end. The Lessor warrants that it has title to the Premises and they are not subject to any outstanding interest, encumbrance, prior lease or valid adverse claim.

4. Option. At any time on or before the 1st day of July, 1968, the Lessee shall have the right, privilege and option to purchase the Premises from the Lessor, and all its right, title and interest therein, free and clear of all encumbrance, and the right to require and obtain from the Lessor such deeds, transfers, assignments, conveyances or other documents of title or assurances as it may for the purpose require for, and in consideration of the sum of either:

(a) Four Hundred Thousand Dollars ($400,000.00 U.S.) cash paid to the Northwestern Bank of Lewistown, Montana, as escrow agent, for disbursement to Lessor upon receipt of written notice from Lessee that Lessor has delivered to Lessee an abstract of title showing merchantable title in Lessor as provided in Subsection (d) hereof; or

(b) Five Hundred Thousand Dollars ($500,000.00 U.S.) payable One Hundred Thousand Dollars ($100,000.00 U.S.) upon completion of documentation transferring title to the Premises to the Lessee and the balance of Four Hundred Thousand

Dollars ($400,000.00 U.S.) payable thereafter by Forty-Five Thousand Dollars ($45,000.00 U.S.) on the first six-month anniversary of the down payment, One Hundred Fifty-five Thousand Dollars ($155,000.00 U.S.) on the second such six-month anniversary and One Hundred Thousand Dollars ($100,000.00 U.S.) on the third and fourth such six-month anniversaries, such deferred installment payments together with interest at the rate of six per cent (6%) per annum on any installments which fall into arrears, shall be secured by a charge or mortgage of the Premises drawn in form satisfactory to the attorneys of the Lessor but at the expense of the Lessee, and containing a privilege to the Lessee to prepay the said installments in whole or in part at any time without notice or bonus, and a right to the Lessor to declare the whole deferred balance due and payable upon default in payment of any installment as aforesaid, and containing the personal guarantee and covenant of the directors of the Lessee of the due performance and payment of the charge or mortgage, and providing that unless otherwise instructed in writing by the Lessor the Lessee may pay and satisfy its deferred payment obligations by tender to the Lessor at the Northwestern Bank of Lewistown, Montana.

(c) Exercise of this option and election of the method of payment in either the manner provided by Subsections (a) or (b) above shall be made

by notice in writing from the Lessee to the Lessor. Upon receipt of such notice, the Lessor shall promptly deposit with the Northwestern Bank of Lewistown, as escrow agent, a copy of this agreement, and shall promptly execute and deliver to said escrow agent a grant deed executed, acknowledged and entitled to record, with proper documentary stamps attached thereto conveying the Premises to Lessee. An escrow instruction shall be promptly executed by both Lessor and Lessee in such form as is acceptable to said bank as escrow agent and in conformity with the terms of this Agreement. If the manner of payment provided by Subsection (a) above is elected and the $400,000 paid to said escrow bank, the Lessee shall be entitled to immediate delivery of said deed and the escrow bank shall be authorized to deliver the $400,000 to Lessor at such time as said escrow agent shall have received a written opinion by Lessee's counsel advising that abstracts of title disclose a merchantable title to the Premises in Lessor, as provided in Subsection (d) hereof. If the manner of payment provided by Subsection (b) hereof is elected, the deed shall be delivered to the Lessee when the One Hundred Thousand Dollar ($100,000) payment is made to the escrow agent and said escrow agent shall have received a mortgage on the Premises securing to Lessor the balance of purchase price on the terms provided by Subsection (b) above. Said $100,000 payment shall be delivered to Lessor at such

time as said escrow agent shall have received a written opinion by Lessee's counsel advising that abstracts of title disclose a merchantable title in Lessor, as provided in Subsection (d) hereof.

(d) Upon exercise of this option by the Lessee, the Lessor, at Lessor's expense, shall provide to Lessee an abstract of title prepared by a licensed and bonded abstracter and certified as of a date later than the date of exercise of the option. Lessee shall have forty-five (45) days from the receipt of such abstract within which to have said abstract examined by attorneys of Lessee's choosing and at Lessee's expense. Within said forty-five-day period, Lessee shall provide Lessor and the escrow bank with a copy of such title opinion, or, if no such title opinion is provided within said time, said escrow bank is authorized to disburse to Lessor any moneys theretofore deposited with it by Lessee as payment upon the purchase price. In the event such title opinion shall reveal that there is any defect in the merchantability of Lessor's title, then Lessor shall promptly proceed at Lessor's expense to clear any such defect of title and have the record thereof included within the abstract of title. Lessor shall have no responsibility for any defect which is not specified in any such written opinion. In the event Lessor shall not have caused any such defect of title to be cured within six (6) months from the date of receipt of such title opinion,

then Lessee may either

1) Rescind this agreement and obtain return from the escrow agent of any money deposited with such agent upon the purchase price, or

2) Take such action as may be necessary to clear any defect in title and obtain reimbursement for the cost thereof, including attorneys' fees, from the funds held by said escrow agent, and the balance thereof shall then be deliverable to the Lessor by the escrow agent.

5. Termination by the Lessor. The Lessor may terminate this Agreement in accordance with the provisions of Paragraph 14 in case of default by the Lessee in failing:

(a) to perform work for the purpose of examining and investigating the Premises, including work of any nature performed at the Premises or elsewhere to a total value of Fifty Thousand Dollars ($50,000.00 U.S.) between the date hereof and September 1st, 1967, as set forth in Clause 2 (a) hereof.

(b) to assume full and sole responsibility for the operation and direction of the work the Lessee shall do under this Agreement, including:

(i) employing or otherwise furnishing workmen upon a wage basis, a profit-sharing basis, or any other basis, as the Lessee may determine

(ii) recognizing that there shall be no privity of contract between the Lessor and any employee of the Lessee but that all the Lessee's business shall be transacted by and

in the name of the Lessee, and that no miner or laborer employed by the Lessee shall, under any circumstances, be deemed the employee of the Lessor;

(iii) meeting requirements of the Workman's Compensation Act of Montana, and specifically assuming all risk and liability for all accidents or injuries to the Lessee and its employees or others arising out of the Lessee's operation, and being liable directly for all contributions and taxes required to be paid and/or withheld by the employer pursuant to State and Federal laws, and/or State Old Age Benefit and Insurance Laws, and/or the Federal current tax payment, all in respect to the Lessee's employees, and accepting exclusive liability for said contributions and/or tax;

(iv) the timely paying of all labor employed by the Lessee at the Premises;

(v) holding the Lessor harmless from all loss, damage and liability from all liens for labor, services, materials or supplies furnished to the Lessee; and

(vi) permitting the Lessor to post and thereafter maintain and keep posted notices of the Lessor's non-responsibility for such liens.

(c) to operate the Premises in a workmanlike and minerlike manner.

(d) upon reasonable request to make available to the Lessor for examination or copying:

(i) all maps, reports, and other data resulting from the examination and investigation of the Premises, including all surveys, drill logs and geological reports; and

(ii) all records and books of account relevant to any question which may arise under this Agreement.

(e) To carry comprehensive liability and property damage insurance including operation, protective and contractual liability coverages, with bodily injury limits of One Hundred Thousand Dollars ($100,000) each person and Three Hundred Thousand Dollars ($300,000) each occurrence; and property damage limits of Fifty Thousand Dollars ($50,000) each occurrence, and One Hundred Thousand Dollars ($100,000) aggregate operations, One Hundred Thousand Dollars ($100,000) aggregate protection, and One Hundred Thousand Dollars ($100,000) aggregate contractual. Any exclusion of insurance pertaining to (1) damage to underground property, (2) collapse of structures, and (3) damage resulting from explosion of blasting, shall be deleted.

(f) To perform any covenant or condition of this Agreement to be performed by the Lessee.

6. Patent Proceedings. The Lessee may apply for the issuance of patent upon all or any unpatented claims included in the Premises and take all steps necessary or convenient thereto, all in the Lessor's name but at the Lessee's expense. The Lessor will cooperate in such action by the Lessee. Upon issuance of patent, each such patented claim shall remain part of the Premises.

7. The Lessor's Undertakings. The Lessor:

(a) will deliver to the Lessee all reports, documents, information, and all maps and other information in writing under the Lessor's control relating to the minerals located under or upon, or the geological or engineering features or the location or title of the Premises;

(b) grants to the Lessee any easements for ingress and egress, tunnels, telephone and electric lines and pipe lines to the Premises over and through all lands and roads now or hereafter owned or possessed by the Lessor;

(c) will do all acts and execute all documents requested by the Lessee as may be necessary or convenient to effectuate any covenant of the Lessor.

8. Taxes. All taxes imposed upon the Lessee based upon its activities on any part of the Premises which are the subject of this Lease shall be borne by the Lessee.

9. Further Assurances. The Lessee may take such action as it deems necessary or convenient to hold and defend its interest in the Premises against all persons, and the Lessor will cooperate with the Lessee in such action.

10. Surrender. The Lessee at any time by notice may surrender any one or more claims leased hereunder, and all rights and obligations under this Agreement with respect to such surrendered claims will thereupon terminate, and the Lessee may surrender all of such claims and terminate this Agreement, except that the Lessee may not surrender any unpatented claim during the period from July 1 to September 1 of any year unless prior to the effective date of such notice One Hundred Dollars ($100.00 U.S.) of labor has been performed

or improvements made with respect to the surrendered unpatented claim during the year ending on September 1 of such year and affidavits in accordance with Clause 2 (c) hereof have been filed. Such surrender will not reduce the purchase price under paragraph 4 hereof.

11. Removal of Property. During the term of the Lease and for 90 days after termination of this Agreement, the Lessee may remove all fixtures and personal property placed or erected on the Premises by the Lessee during the term of the Lease and shall be charged no rent during said 90-day period.

12. Timber. Lessee may cut and use such timber from any of the patented mining claims as may be necessary for Lessee's operations on the Premises, provided that no timber shall be cut or sold for commercial purposes.

13. Notices. All notices shall be in writing. All notices to the Lessor may be directed to or care of:

Little Rockies Mining and Development Company
412 West Main Street
Lewistown, Montana

All notices to the Lessee shall be directed to:

Little Rocky Mining Co. Ltd.
Suite 1307 - 1030 West Georgia Street
Vancouver 5, B. C., Canada

Any party may designate a new address to which notices to said party may be sent by notice to all other parties. Unless otherwise specified herein, all notices shall be effective when sent by registered or certified air mail addressed as stated above and shall be deemed to have been received three days after posting anywhere in the continental United States or Canada.

14. Termination.

(a) If the Lessee defaults in the performance of any covenant or condition hereof, the Lessor may deliver notice to the Lessee specifying in detail the default

and if such default shall not be corrected or remedied within fifteen (15) days after receipt by the Lessee of such notice, if it reasonably can be corrected or remedied within such fifteen (15) days, and if not, within such time as may be reasonably required, the Lessor at its election may:

(i) recover damages for such default in performance of any such covenant;

(ii) enjoin the continuance of such default in performance of any such covenant; or

(iii) terminate this Agreement by delivery of a final notice to the Lessee, if the Lessee has failed to correct or remedy such default;

Provided always that the Lessee may remedy any default by paying to the Lessor within ten (10) days after receipt of such final notice of termination an amount equal to the damages recoverable by it for the specified default; and provided that the Lessee shall be deemed to have corrected or remedied any default when the Lessee shall in good faith commence action to correct or remedy such default if such action shall be prosecuted thereafter with due diligence.

(b) The Lessee may terminate this agreement by giving notice in writing of its abandonment of the Premises to the Lessor.

(c) This agreement shall be deemed to be terminated upon delivery of deeds and documents and making of all payments by the Lessee to the Lessor pursuant to an exercise of the option contained in Clause 4 hereof.

(d) This Agreement shall terminate in any event on July 2, 1968, if the option is not exercised.

(e) At or forthwith after any termination of this Agreement otherwise than by exercise of the option contained in Clause 4 hereof, the Lessee covenants and agrees to deliver to the Lessor copies of all maps, documents, reports, information and engineering data and records compiled by it during the examinations and investigations aforesaid and to return to the Lessor all such information as it may have furnished or supplied to the Lessee pursuant to Clause 7 (a) hereof.

15. Force Majeure. The Lessee shall not be considered in default if the Lessee's failure to perform any covenant or condition of this Agreement is caused by Act of God or by any circumstances not wholly and exclusively within the control of the Lessee. The settlement of a labor dispute shall not be considered to be wholly and exclusively within the control of the Lessee. Financial inability to make any payment shall not be considered beyond the control of the Lessee.

16. Successors. All the terms, covenants and conditions of this Agreement not hereafter amended shall survive execution and delivery of any amendments to the Agreement and shall be binding upon and inure to the benefit of the successors and assigns of the respective parties. The rights of the Lessor hereunder may be assigned in whole or in part. No change or division in ownership of the Lessor's interest or any payments hereunder, however accomplished, shall operate to create or enlarge any obligation or diminish any right of the Lessee or be binding upon the Lessee for any purpose until receipt by

the Lessee of a notice signed by or on behalf of the Lessor and all successors, stating the nature of the change or division and stating a single person and address to which all future notices and payments may be directed by the Lessee, and acknowledging that the successor is bound by the terms of this Agreement.

17. Corporation Names. The Lessor covenants and agrees with the Lessee that it will at any time after the exercise of the option contained in Clause 4 hereof at the request of the Lessee cause its corporate name to be changed to some name or designation not considered by the Secretary of State of Montana to be confusing or conflicting with the name of the Lessee, and in the meantime, the Lessor covenants and agrees to give such consents as may be necessary for the Lessee to obtain permission of the said Secretary of State to use its own name in the State of Montana, provided always that the Lessee shall indemnify and save harmless the Lessor from any and all claims or demands that may arise in connection therewith.

18. Integration. This Agreement constitutes the entire agreement among the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements and understandings of the parties in connection therewith. No covenant or condition not expressed in this Agreement shall affect or be effective to interpret, change, or restrict the expressed provisions of this Agreement. No employee or agent of the Lessee has any authority to make any promise, warranty or representation not expressed in this Agreement. No change, termination or attempted waiver of any of the provisions hereof shall be binding unless in writing signed by the parties.

19. Counterparts. Separate counterparts of this Agreement may be signed by the Lessor and the Lessee and together will constitute one Agreement.

IN WITNESS WHEREOF, the parties have executed this Agreement the day and year first above written.

Re: OME-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana
Contract 2148

Dear Mr. Flinders:

This will acknowledge receipt of your letter dated June 6, 1967, regarding an option given to Little Rocky Mining Co., Ltd.

Article 4 in the Lien or Subordination Agreement executed by Little Rockies Mining and Development Company on March 5, 1962, states as follows:

"4. (The owner) Undertakes and agrees (a) neither to commit any act nor assert any claim in conflict with the provisions of this Agreement; and (b) to give advance notice of the Government's rights under this agreement to any subsequent transferee, mortgagee, encumbrancer, or lessee of any of the undersigned's right, title, claim, or interest in or against the land or any production therefrom, furnishing the Government with two true copies of such notice; and".

Inasmuch as you are obligated thereby to provide the Government with two true copies of the option agreement, we request that the necessary copies be furnished, or that you send in your copy from which we can make duplicate copies. In the latter case, we will return your copy promptly.

In reply to your question regarding obligation for royalty payments in the event the Operator, Northern Continental, Inc., no longer leases the property, Article 1 of the above-mentioned Lien or Subordination Agreement states that the owner, in this case Little

23263

Rockies Mining and Development Company, "agrees if the Operator's interest should be surrendered or terminated at any time prior to the expiration of the rights of the United States under said Contract to pay royalty to the Government according to the terms of said Contract; ...". If the Government's rights to royalty are not protected in subsequent leases of the property, the Government will look to the owner for payment.

Sincerely yours,

FRANK E. JOHNSON

Re: OME-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana
Contract 2148

Dear Mr. Johnson:

This letter is in answer to yours of June 2nd in regards to the above captioned.

I would like to advise that it would be a little difficult for me to give you a copy of the option in question, due to the fact that it contains eighteen pages and they only have one copy. However, the contents of this option are mainly as follows:

No. 1 - Little Rocky Mining Company, Ltd., has until July 1, 1968 to study and examine our property.

No. 2 - Any time before that date they have the right to purchase our property.

No. 3 - In the interim there is to be no mining or production from our property at all other than taking samples for assay.

Will this letter suffice for your purposes? Please advise.

My understanding of the above mentioned OME contract is that if production comes from the property, Northern Continental, Inc., is to make royalty payments to you, even though they no longer lease the property. We understand that if they refuse to make these payments that we will have to. If this is not true please so advise.

Sincerely yours,

Cecil Flinders

Gold Bug, et al., Claims
Phillips County, Montana
Contract 2148

Dear Mr. Flinders:

We note in your reply, dated May 18, 1967, to our request (MME Form 63) for information on this certified OME project that a purchase option was given to Little Rocky Mining Co., Ltd., Landusky, Montana. We have not received a copy of this option as requested on Form 63. Please send us a copy at your earliest convenience.

We wish to remind you that regardless of the option mentioned, provisions of the Lien or Subordination Agreement signed by you on March 5, 1962, for the OME contract cited above remain in effect until May 17, 1972, or until the full amount of the Government's contribution to the costs of the exploration project is repaid with interest, whichever occurs first. Therefore, on any further production from the contract property, if the Government's royalty thereon is not paid by the producer, the Government will look to Little Rockies Mining and Development Company for payment of such royalties.

Sincerely yours,

FRANK E. JOHNSON

Phillips County, Montana
Contract 2148

Gentlemen:

Thank you for returning our form letter of May 20, 1966 (OME Form 63), informing us that your lease on the referenced claims was surrendered July 1, 1965, and that 374 tons valued at $20,891.00 was produced since April 30, 1965.

We respectfully call your attention to Article 6 of the contract (Repayment by Operator) and to the Certification of Possible Production dated January 29, 1964. These documents provide that "The Operator, whether or not the producer (for example, if the Operator either transfers or does not retain his interest in the land), shall pay to the Government a royalty on all minerals and metals mined or produced from the land . . ." or transported through the OME workings from May 17, 1962, to May 17, 1972, or until the sum of $33,733.70 is fully repaid with interest at 6 percent, whichever occurs first.

Our records indicate that as of July 20, 1965, royalties in the amount of $16,258.79 had been paid on production through mine lot No. 21.

Under the terms of the contract, Northern Continental, Inc., is not relieved of its royalty obligation by surrendering its lease. You are requested, therefore, to make payment promptly on any production sold or transported through the workings since July 1, 1965.

Royalty payments should now be made to the U. S. Geological Survey, and be mailed or delivered to the Field Officer, Region I, U. S. Geological Survey, Office of Minerals Exploration, South 157 Howard Street, Spokane, Washington 99204.

Sincerely yours,

FRANK E. JOHNSON

"Lessor warrants that it has title to the Premises and they are not subject to any outstanding interest, encumbrance, prior lease, or valid adverse claim."

May 20, 1965 Operator letter to MacLaren reported all known ore reserves had been extracted and mining had been terminated. About 700 tons are shipped for which settlement 18 not received and on which OME royalty was due.

On May 8, 1967 MME Form 63 — Owner reported option to purchase given to Little Rocky Mining Co. Ltd Lewistown, Montana. No production since July 1966.

The Operator under this contract surrendered the lease on July 1, 1965 to the owner Little Rockies Mining & Development Company. Since April 30, 1965 374 tons ore valued at $20,811.00 was produced.

Ltr Govt to Operator June 21, 1966 stated that Northern Continental is not released of its royalty obligation by surrendering its lease. Govt Records as of July 20, 1965 royalties of $16,258.79 had been paid through mine lot No. 21.

Oct. 27 1966 Operator announced new address but no response to letter of June 21, 1966.

Report of Royalty Divisions dated May 4, 1965 for period May 17, 1962 through April 30, 1965 — last settlement noted related to 1965 Mine Lot No. 9 settled as of March 19, 1965 total royalties paid $14,272.36.

Phillips County, Montana
Contract 2148

Dear Mr. Reynolds:

This will acknowledge receipt of your letter of June 2, 1965, advising that the property under the subject contract will be returned in the near future to the lessor, Little Rockies Mining Development Company.

We wish to call to your attention, however, that regardless of such action, the provisions of Article 6 of the contract remain in effect until May 17, 1972, or until the full amount of the Government's contribution to the costs of the exploration project is repaid, with interest. Therefore, on any future production from the contract property, if the Government's royalty thereon is not paid by the producer or the owner of the property, the Government will look to Northern Continental for payment of such royalties.

Sincerely yours,

George Fumich, Jr. gla

PROJECT SUMMARY REPORT

By: F. M. Murphy June 15, 1964

1. OME-6236 (Gold-Silver)
Contract 2148

Operator - Northern Continental, Inc.
4534 West North Avenue
Chicago, Illinois, 60639

Property - 4 patented and 2 unpatented claims in secs. 15 and 22, T. 25 N., R. 24 E., M.P.M., Phillips County, Montana

Operator's Property Rights - Mining Lease from Little Rockies Mining and Development Company, and 8 individuals holding a combined royalty interest of 2.50% in the claims.

2. Contract dated May 17, 1962

Work Authorized - The work consisted of bulldozing an access road and portal site, 1500 feet of drifting, drift timbering, raising, long-hole drilling, and assaying of samples, at an estimated cost of $76,300.00.

Amendments -

No. 1, September 14, 1962, allows use of D-6 dozer in lieu of D-8, and reduces the estimated cost to $76,100.00.

No. 2, May 16, 1963, allows core sampling in lieu of channel sampling.

Work Completed -

Bulldozing 69.6 hrs @ $12.50/hr.	$ 870.00
Drifting 1500 ft. @ $36.00/ft.	54,000.00
Timbering 143.52 ft. @ $7.50/ft.	1,076.40
Raising 200 ft. @ $36.00/ft.	7,200.00
Long-hole drilling 2749 ft. @ $1.00/ft.	2,749.00
Assaying 786 samples @ $2.00/each	1,572.00
Total Acceptable Cost	$67,467.40
Government's Participation @ 50%	$33,733.70

Final Reports -

Operator's final report received December 5, 1963.
Region I - None to date

3. Report of Review dated December 5, 1963

4. Certification of Possible Production issued January 29, 1964

5. Work under the contract started in June 1962 and was completed in September 1963. The Operator continued exploratory work at the completion of the OME project. Shipments of ore began with Mine Lot No. 1 on March 17, 1964.

6. Comments -

In the area stocks and sheets of Tertiary syenite porphyry are intruded into a series of Paleozoic sediments, locally termed "shale."

The ore occurs in "veins" which have developed from shearing and fracturing in a shatter zone several hundred feet wide and probably 3000 feet long within the porphyry. Contacts between the shale and porphyry are generally mineralized. The main vein structures seem to continue through the shale. The gold and silver values are associated with pyrite. No significant amounts of base metals occur in the veins.

The OME project work was done on the 550 level. The Operator estimates that 18,650 tons of inferred ore averaging $20.00 per ton were discovered by the OME work. Prior to the contract an estimated 10,000 tons of ore reserves were calculated for the area 25 feet above and below the 350 level.

Re: OME-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana
Contract 2148

Gentlemen:

By letter dated April 30, your reference #21-1004, you request advice as to the computation of interest under the referenced exploration contract.

Article 1(c) of the contract provides that simple interest at the rate of 6 percent "shall accrue from the dates Federal funds are made available" until the Government's total contribution ($33,733.70) is fully repaid with interest or until the period for payment of royalty expires (May 17, 1972), whichever occurs first. Article 6(c) of the contract provides that the Government's royalty shall be 5 percent of the gross proceeds as therein defined.

Our administrative practice is to compute interest on each individual payment of the Government's contribution from the first day of the month following the date of such payment. Likewise, credits for the payment of royalty are applied on the first day of the month subsequent to receipt by the Government.

Sincerely yours,

Acting Director

Re: OMe-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana
Contract 2148

Gentlemen:

As you know, we are presently mining from the property and remitting royalties as called for under the Exploration Contract. However, according to your letter dated January 29, 1964, Northern Continental, Inc. is responsible for remitting royalties based upon production from the land described above, until the sum of $33,733.70 is fully repaid, with interest at the rate of 6% per annum. We were wondering if you could tell us how the 6% interest is determined, so that we are not in violation of the Exploration Contract.

Your comments would be appreciated.

Very truly yours,

Melvin Pollack

Contract 2148

Gentlemen:

We are pleased to enclose our check in the amount of $536.22, representing royalty payments of mine lot Nos. 1 - 2 and 3, covering shipments for the month of March, 1964. Also, you will find copies of settlement sheets attached.

If you have no objection, we would appreciate it if we could remit our royalty payments once a month, based upon the previous month's shipments. This step would eliminate a few bookkeeping chores and correspondence between our field office and the Home Office. To keep our file in order, would you please confirm this in writing. Thank you.

Contract 2148

Dear Mr. Pollack:

Article 6(c)(2) of the above-cited contract states: "The Government's royalty shall be computed and paid currently upon each lot sold, etc." Although this office is not authorized to change this provision, it is believed that the payment procedure proposed in your letter of April 6, 1964, will be considered satisfactory. However, the matter will be referred to our office in Washington, D.C. for a decision.

You may proceed with your proposed payment plan until such time as you are advised otherwise.

Re: OME-6236 (Gold-Silver)
Gold Bug, et al., Claims
Phillips County, Montana
Contract 2148

Gentlemen:

We have been advised that the East Helena Plant, American Smelting & Refining Co., has made settlement with you for two shipments of ore from the Gold Bug, et al., claims and that subject to audit royalty is due the Government as follows:

Date	Mine Lot No.	Smelter Settlement	Royalty due OME
3/17/64	1	$1,650.65	$ 82.55
3/26/64	2	1,579.31	78.97
		$3,229.96	$161.50

In accordance with paragraph 3 of the Certification of Possible Discovery, dated January 29, 1964, royalty payments should be made in favor of the Office of Minerals Exploration and should be mailed to Field Officer, Office of Minerals Exploration, Region I, South 157 Howard Street, Spokane, Washington, 99204. Each payment should be accompanied by two copies of relevant settlement sheets.

Your early attention to this matter will be appreciated.

Mr. Stanley H. Lane, Manager
East Helena Plant
American Smelting & Refining Company
East Helena, Montana

Dear Mr. Lane:

Thank you for the copy of the ore purchase schedule and the pro forma settlement sample.

We presently plan to send a truck from this area to begin shipments during the last week of February. The unit will be a truck and trailer combination with a capacity of approximately 23 tons per trip. We anticipate that the trucker will be able to make three trips per week.

Will you please send me a schedule of the receiving hours at your plant so I may notify the trucker.

We plan to have Mr. Horace Hand of Goodall Brothers act as shippers representative and we will make arrangements to notify him of our schedule.

When settlement is made for a lot that has been received and sampled, will you please make the following deductions and transmit payments as set forth below:

Hauling per wet ton @ $10 per ton payable to:
J & K Enterprises
1700 15th St.
Denver, Colorado

5% of net smelter return (after deduction of freight and treatment charges) to:
Field Officer, Office of Minerals Exploration,
Region I, South 157 Howard St.
Spokane, Washington 99204

7.5% of net smelter return (after deductions of freight and treatment charges) to:
Little Rockies Mining & Development Co.
412 W. Main St.
Lewistown, Montana

. Stanley M. Lane, Manager
American Smelting & Refining Co.

February 19, 1954

1.0% of net smelter return (after deduction of freight and treatment charges) to:
Marion Heller & Juanita Heller
Lewistown, Montana

0.5% of net smelter return (after deduction of freight and treatment charges) to:
Cecil Flinders & Margaret Flinders
412 West Main St.
Lewistown, Montana

0.5% of net smelter return (after deduction of freight and treatment charges) to:
Frank H. Bryant & Delia Bryant
322 West Washington St.
Lewistown, Montana

0.5% of net smelter return (after deduction of freight and treatment charges) to:
Edward F. Wieglenda & Berta Wieglenda

Dear Mr. and Mrs. Bryant:

Enclosed is a copy of a certification of possible production which has been issued pursuant to the terms of the subject contract. This relates to the Lien and Subordination Agreements signed by you on March 5, 1962.

The Government's prior lien on the land and upon any production therefrom will continue in existence for the length of time mentioned in the enclosed copy of certification to the Operator. You are obligated during that period to commit no act and to assert no claim in conflict with the Government's rights under the agreement signed by you, and to give advance notice of the Government's rights to any transferee or lessee of any part of your interest in the land or the production therefrom.

Sincerely yours,

George Turnich

Memorandum

To: Chief, Contract Administration and Audit Division

From: Acting Field Officer, Region I

Subject: OME-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana
Contract 2148

Work under the subject contract was terminated effective September 30, 1963, by which date work under the contract had been completed.

The number of units of work completed by the Operator and accepted by the Acting Field Officer as conforming to contract specifications are:

Bulldozing access roads	69.6	hours
Drifting	1,500.0	feet
Drift timbering	143.52	"
Raising	200.0	"
Long hole drilling	2,794.0	" ? 2,749.0
Assays	786	each

An acceptable final engineering and geological report* was received from the Operator December 2, 1963.

A Report of Review, in lieu of a final audit, is in order and requested. Original copies of the final (September 1963) MME-60 and 61 were forwarded to the Fiscal Section on October 31, 1963.

Re: Docket No. OME-6236
Contract No. 14-23-090-2148

Gentlemen:

Enclosed is the original and four copies of our final report.

Five copies of progress map to accompany the report are being sent under separate cover.

Very truly yours,

NORTHERN CONTINENTAL, INC.

J. O. Roscoe
Mine Superintendent

FINAL REPORT

Docket OME 6236
Contract No. 14-23-090-2148
Gold Bug, et al., Phillips County, Montana

This project was started in June 1962 to determine the downward and lateral extension of gold and silver mineralization exposed by old workings in shatter zone within Tertiary porphyry. It was proposed to explore these structures by drifting, drilling and raising from 200 feet below known ore and to carry the exploration 1000 feet beyond it. The proposal was modified to contract for exploration 200 feet directly below the extent of the old workings by drifting and raising with lateral probing by drilling.

The work completed under the contract consisted of:

Drifting	—	1500 feet
Raising	—	2 raises-100 feet each
Drilling	—	2749 feet, percussion
Attendant assaying and timbering		
Site preparation		

In addition, the following work was performed from the exploration level:

Drifting	—	104 feet
Crosscutting	—	802 feet
Raising	—	140 feet
Drilling	—	3235 feet

Contract specifications were completed in September 1963, but work described continued through October. Further exploration, excavation and drilling is currently in progress upon structures and trends exposed by this work so ultimate evaluation of the OME project will depend upon future information. At present it is evident that OME work proved that ore grade mineralization projects to the lower level, that favorable structure continues along strike and that structures parallel to this trend are mineralized.

Ore Reserves:

Ore reserves estimated from exposures known to date are mostly classified as Inferred, as defined by U.S.G.S. terminology, due to length of correlation necessary, variable grade of material and the geometry of various sample intervals. Known reserves prior to OME exploration were estimated as Indicated ore amounting to 10,000 tons assaying 0.36 ounces per ton in gold and 14.3 ounces per ton in silver. Exploratory raising has strengthened this assumption, but has not been extensive enough to change classification or quantity.

OPERATOR'S

Inasmuch as there is no experience data available concerning dilution, metallurgical recovery, or mining costs, ore reserve estimates at present are academic and arbitrary. Therefore the following tabulation is based upon a value of $20 per ton in place of using a factor of 13 cubic feet per ton to convert tonnage from volume. Gold valued at $35 per ounce and silver at $1.20 per ounce is the basis for valuation.

Indicated Ore

Location	Tonnage	Remarks
350 Level	10,000	280 ft. long, 8 feet wide, projected 25 ft. above and below the level. Oxidized structure.

Inferred Ore

Location	Tonnage	Remarks
350 Level	3,850	250 ft. long, 8 feet wide, 25 to 50 feet above level. Oxidized structures.
550 Level(OME adit)	11,500	250 ft. long, 8 feet wide, 60 to 135 ft. above level. Distance between levels is 160 feet back to sill. Oxidized and sulfide structures.
550 Level	3,300	100 ft. long, 5 ft. wide, 50' above level and 50' below level. Sulfide structures.
Total Inferred Tons	18,650	

The potential tonnage of immediate area covered by OME exploration could be expanded to about 4 times this figure by further exploration upon anomalies intersected in drill holes and crosscuts, but lack of definite correlation and the spread of intervals sampled prevents compilation of data into significant values.

Engineering Data:

Time elapsed	-	June 1962 thru Sept. 1963
Drift footage	-	1604
Crosscut footage	-	802
Raise footage	-	~~250~~ 340
Longhole footage	-	6084
Samples taken	-	1800 (approx.)

Average number of men underground - 4

It should be noted that the unit quantities of work exceed those specified in contract, and while the government did not participate in these expenditures the totals were used to derive unit costs. All work performed was done in the immediate area covered by the specifications and contributed to the aims of the program.

Unit Costs:

Drifting and Crosscutting	$ 55.60 per foot
Raising	$ 97.80 per foot ? overnight
Longhole Drilling	1.43 per foot

These costs include all direct and indirect charges to the project such as labor, supplies, supporting facilities, equipment depreciation, supervision, assaying, taxes, and insurance. No charges were included for general geologic studies, amortization of expenditure or for capitalized equipment.

The drifts were driven with an average cross-section of 8' high x 7' wide on a 1%. grade using 18 inch gage track. Crosscuts average 7'x 5' driven by a slusher without track. 21 sets of timber were installed to support the portal and blocky ground. 8 sets were used to support the drift at the base of the raises. Drifting encountered no particular problems - ravelly rock necessitated drilling short rounds and moisture required the use of electrical blasting. Water courses were intersected which hampered advance at times, but after a brief drainage period all the water flow was from the floor. About 1000 gallons per minute now flows out the portal.

Raises were driven with an average section of 15 feet along the strike of structure and 6 feet from hanging wall to footwall. They were timbered into 3 equal-size compartments with rock chutes on each end and a serviceway in the center.

Equipment used for drifting consisted of jackleg drills, alloy drill rods with integral tungsten carbide cross bits, overshot mine car loader, rocker dump cars, diesel locomotive, and axivane fans. A double drum air slusher and scraper were used for mucking crosscuts. Stoper drills and single drum air hoists were used in the raises.

Longholing was drilled with $3\frac{1}{2}$ and 4 inch screw feed drifters using $2\frac{1}{4}$ inch carbide bits on 4 foot sectional drill rods. Checks between cuttings assayed and crosscut sampling seem to show that drilling results are semi-quantitative. Heavy water flows and open fractures caused some trouble in drilling and in reliability of cuttings. Geologic data was quite reliable, although silicified and highly pyritized shales are difficult to distinguish from mineralized porphyry.

Surface equipment and plant consisted of a shop and change-room building, an office and sample building, a 50 kva diesel-electric power plant, a 600 cfm diesel compressor, an HD5 front end loader, an 8 x 15 sample crusher, a gasoline powered welder, a utility pick-up truck, and miscellaneous shop tools.

The working force at the project included 4 miners, 1 mechanic, and a project supervisor during most of the program. Currently there are 6 miners and 2 mechanics and the supervisor employed at the property.

No ore has been shipped or sold from the property since the contract began.

Geologic Data:

The area examined by the project lies along the southwestern edge of the Little Rocky mountains which were formed by a laccolithic intrusion of syenite porphyry into a series of sedimentary and metamorphic rocks. A vein system occupies a shatter zone which runs from the sediments into the porphyry. Sporadic mining over the past 70 years has partially explored these veins in the porphyry and exposed mineralization on a strike length of about 500 feet extending to 250 feet in depth. Preliminary examination indicated positive possibilities that mineralization could be expected beyond the limits previously established, and the program resolved as an underground project centered about 200 feet below the lowest workings.

Surface and underground mapping showed that the trend of mineralization was about N 45° E with a steep northwesterly dip along fractures and shears running parallel to the shatter zone. Ore concentrations were erratic in grade and size, but apparently maintained an en echeleon relationship as do the individual shears.

OME exploration has added a great deal to the knowledge of this area, but many questions have not been answered and many assumptions have not been verified.

The shatter zone is bordered by a light grey silicified syenite porphyry containing abundant chalky feldspar phenocryets in a glassy matrix. The shatter zone is principally occupied by two types of porphyry which appear to be related to the syenite porphyry, but seem to have been later phases of the intrusive.

The most abundant of these is a dark grey, brittle siliceous rock with larger fresher feldspars, locally called "Big Eye" porphyry. It is usually hard and dense, but near mineralized structures it may be somewhat vesicular and contain megoscopic pyrite, fluospar and quartz. In one area of contact with sediments it appears to have cooled rapidly to form a "chilled" zone on the contact. It has been the host rock for most of the mineralization on the lower levels.

The other porphyry, termed "Possum" from its fetid odor when struck, seems to be a dike rock in texture and attitude, but some evidence indicates that it is a facies of "Big Eye". In other mines in the area it is associated with ore bodies, but no definite relationship to ore has been noted here. No "dikes" have been found on the lower level, although minor amounts of possum porphyry appear as inclusions or segregations in the Big Eye.

Sedimentary rocks, probably of the Cambrian Emerson or Flathead formation, occur as a tongue in porphyry running at least 1000 feet into the igneous rocks. Locally termed "shale", these rocks are thin bedded argillaceous sandstones. Near mineralized areas they have been highly altered by silica and pyrite, and contain ore grade mineralization in some places. It is suspected that the presence of large zenoliths of this material has had an effect upon the structural pattern of the vein system.

The shatter zone is an indefinite area several hundred feet wide and probably 3000 feet long in which "veins" have developed from shearing and fracturing. The strongest features are more or less parallel and strike N 40° to 50° E with both northwesterly and southeasterly dips within the main zone. It has not been ascertained whether the veins are arranged in a true en echelon manner or if this is merely apparent due to pinching and tightening of structure accompanied by slight changes in strike. At 1315' from the portal on the OME level 3 parallel structures are known, though only the central vein has been explored along strike to any extent.

Vein structure on the OME level is in general more evident and more continuous than on upper levels. They are characterized by open fissuring that is now breccia filled with rubble well cemented with pyrite and silica. Widths vary from a few inches to several feet. Walls are usually indefinite due to horsetailing of subsidiary structures into both walls. The degree of mineralization is usually directly proportional to the amount of pyrite. It is believed that the veins were originally open fractures and that the breccia accumulated from material dislodged up dip, as open cavities are abundant on the lower, but none were found more than 25 feet up dip.

Veins of the upper levels are accompanied by a higher degree of horsetailing and less definite walls. Mineralization shows a tendency to follow the smaller fractures in a random pattern. Brecciation is less developed and the veins have the appearance of small angular rock fragments tied together with a network of veinlets.

Contacts between shale and porphyry seem to be fault surfaces and are generally mineralized. Most contacts show silicification and pyritization. The main vein structures change character and direction somewhat where they cut across contacts, but they seem to continue thru the shale. Little is yet known about the degree of mineralization along the veins in the shale sections, but ore is known to occur in shale.

Gold and silver mineralization cannot be detected except by assay in areas examined to date. On the lower levels profuse quantities of botryoidal pyrite obscures mineralization. Pyritic portions of the veins are seldom barren, though mineralization may not be ore grade. Updip the pyrite is oxidized to limonite and iron oxides, and only minor quantities of pyrite occur on the upper levels. With the exception of one specimen of tellurides no gold-silver minerals have been identified. In continuously mineralized areas gold-silver ratio varies from 1:15 to 1:47 by weight. No significant amounts of base metals occur.

Summary of Progress:

550 Level

Feet from Portal	
0	The OME adit (550 Level) was portalled at a track elevation of 4576 feet on a bearing of N 53° E to intersect projection of Gold Bug vein system. Rock formation is shale, containing no significant structure or mineralization.
40	Cut 7-10 feet of syenite porphyry. Barren. Dike-like in attitude, but probably only a stringer from main contact.
106	Shale - syenite porphyry contact. Contact dips 50° southwesterly.
210-420	Weak fractures developing in porphyry, running parallel to course of adit. Shows some pyrite, gouge and minor flourite, mineralization too weak to warrant assaying.
278	2 short crosscuts driven for storage places. Adit continues along weak structure in barren syenite porphyry.
-420	Fractures cut off by shear with 2' of gouge striking N 73° E, dip 80°NW. Ground blocky and dangerous, timber required. Barren.
420-465	Syenite porphyry, blocky, barren.
465	Brecciation developing in porphyry with iron oxides on joints. No visible mineralization.
493	Strong shear zone with 6" of gouge cuts adit with strike of N 40° W, dip 80°NE. Barren. Brecciation becomes more pronounced, up to 4½' wide, following adit, dip 70°NW.
493-520	Brecciated structure in syenite porphyry. Veinlets of pyrite, marcosite and silica, with some oxidation. Structure is essentially barren.
520	2 crosscuts driven to check porphyry for parallel structures. Left crosscut (x.c.#3) cut strong structure 10 feet from adit, 2½' assayed $2.69/ton. Appears to be principal structure in brecciated zone about 20 feet wide. Zone weakly mineralized. x.c.#3 continued to 73 feet from center of adit with no significant structures or mineralization. x.c.#4 runs 61 feet to the right in blocky barren porphyry. 8 longholes totalling 688 feet were drilled ahead and above crosscuts, encountered only weak mineralization.

Feet from Portal	
525-565	Breccia zone. Somewhat mineralized, averages $1.51/ton.
565	Structure cut in x.c.#3 enters drift.
565-630	Breccia zone continues along adit. Some oxidation and pyrite, dips 75°NW. Some mineralization, averages $1.50/ton.
620	2 short crosscuts. Strong brecciation and vein structure in right hand x.c. Zone 24' wide runs $3.78/ton.
630-655	Breccia develops vein structure up to 2' wide, strikes N 35° E, dips 75° NW. Drift assays average $8.23/ton. 6" of vein assays $155/ton.
655	Vein pinches and enters left rib, apparently cut by normal fault and/or shale pendant.
655-720	Complex maze of syenite porphyry, and shale inclusions, numerous indefinite structural features. Drift assays average $1.69, no distinct structure to sample.
718	OME drill station #1 - Holes #9, 10, 11, 12, 13, 14. 3 holes more or less 100 feet in each rib, see map for geology.
720-756	Syenite porphyry, essentially barren, virtually no structure.
756	Intersect barren vertical structure strikes, N 42° E, up to 4' breccia with 1 foot strongly oxidized and gougy.
756-834	Syenite porphyry. Follow barren vertical structure, course of adit changes to N 42° E.
834	Shale contact, strikes N 80° W, dips 10° SE. Some horizontal movement on contact.
834-1075	Shale, thin bedded, limey with varying amounts of silicification with pyrite. Barren. Bedding strike averages N 80° E, with dips from 10° to 45° South. Several barren bedding plane faults.
907	OME Drill Station #2. Holes #15, 16, 17, 18, 19, 20. 3 holes in each rib, see map for geology.
1075	Big Eye porphyry contact. Strikes N 85° E, dips 30°S. Contact strongly brecciated and mineralized. Strong water flow when cut. Drift assays $17.30/ton. 2 ft. of shale on contact assays $8.45/ton.

Feet from Portal	
1078-1115	Contact changes abruptly to strike N 42° E, dip 60° SE, runs along right side of drift, swings into rib at 1115. Drift in Big Eye porphry, barren, fracturing parallel to drift.
1109	OME Drill Station #3 (labelled #4 on progress sketches). Left station in porphyry, right station in shale. Holes 21, 22, 23, 24, 25, 26, see map.
1109	G15 crosscut, runs N 45° W 49', minor structure, minor mineralization, all porphyry.
1115-1170	Barren Big Eye porphyry, pyrite filled fractures enter from left.
1170-1200	Cut series of vertical, narrow fractures striking N-S, with $\frac{1}{4}$-$\frac{1}{2}$ inch white talcey gouge, one fracture 1-2" wide is open.
1200-1317	Ore zone, all in Big Eye porphyry. Drift assays average $24.14/ton. A 1' channel sample at 1270 runs $492/ton (not included in average). Specimens assay $100-$150/ton. Vein formed by brecciated shears striking N 45° E, dip 60-70°SE. Shears merge and split with tight places, open cavities, breccia filled openings. Breccia is pyrite and quartz cemented. No visible valuable minerals. Some indication of possum porphyry.
1217	Hole B, bearing N, inclined 10°, 16' long. Some mineralization, all porphyry, 13-16 feet assayed $9.69/ton.
1225	Crosscut "B", runs 59 feet at N 45° W. Narrow open fractures 8-14 feet, strike N 40-60 E, dip 45-65° SE, average $3.50/ton. Intersect "chilled" Big Eye porphyry at 39 feet. Shale contact at 55 feet, strikes N 30° E, dips 30° SE.
1226	Center of OME Raise #1, bears N 53° W, inclined 65° at base, averages 71°. See below for further description.
1240	Hole A, bearing S 60° E, inclined 15°, 37 feet long, 5-9 runs $2.49, 21-25 runs $160, all porphyry.
1313	OME Drill Station #4 (#5 on progress maps). Drilled holes 27, 28, 29, 30, 31. Collared "17 NW" x.c., bears N 45° W, 117 feet from center of adit. See description below. Collared "17 SE" x.c., bears S 40° E, 210 feet from center of adit. See description below.

Feet from Portal	
1317-1340	Big Eye porphyry. 4-6 foot chilled zone on left, contacts Big Eye at 27°SE dip. Ore bearing structures tighten and splay out. Drift course changes to N 54°E. Assays average $3.57/ton.
1340-1430	Shale and chilled porphyry. Contact along drift dips 27° SE. Weak structure in shale parallel to drift dips 69° SE. Strong breccia structure developing from left rib. Drift assays average $5.51/ton. Course of drift changes to N 47° E.
1348	Hole C, bears S 45° E, inclined 16°, 8 feet long, slightly mineralized, all porphyry.
1405	Hole D, bears S 25° E, inclined 19°, 25' long. 21-25 assays $11.81/ton. All in porphyry.
1409	Hole E, bears N 23° W, inclined 14°, 24 feet long. All in shale, hole averages $6.44/ton. Pink quartz 21-24. Water flow at 13'.
1411	Collar "18" Crosscut. Bears N 85° E, 70 feet from center of adit. All in Big Eye porphyry. Vertical structures with strong gouge and talc from 36-65, do not appear to project thru to adit. Crosscut assays average $1.92/ton. Hole F at 40 feet bears S 51° E, inclined 10°, 21 feet long,assays $4.66 at 13-17 feet. Hole G in face bears N 85° E, inclined 5°, 15 feet long, assays $1.43 at 8-15 feet.
1430-1550	Ore structure. Strong breccia structure with fairly well defined hanging wall bears along course of drift. Dips S 47° E, up to 5 feet wide, abundant pyrite and silicification, some fluorite, some oxidation, numerous open cavities. All in Big Eye porphyry, some chill zone and possum porphyry. Hanging wall steepens and enters right rib. Drift assays average $8.93/ton. 5 foot channel at 1468 runs $276/ton, specimens assay over $100/ton. High grade not in averages.
1476	Center of OME Raise #2 bears N 43° W, inclined 47°, see description below.
1497	Drill Station #5. Drilled holes 33, 34, 36, 37, 38, completed OME drilling.
1500	End of OME participation in adit.
1550-1613	Footwall vein structure, dips 45° SE, abundant pyrite and silicification, some fluorite, all in Big Eye porphyry with suggestion of gradation to syenite porphyry on footwall. Drift assays average $9.63/ton.

Feet from Portal	
1613-1760	Vein structure joined by steep hanging structure and course changes to N 38° E. All in Big Eye porphyry. Drift assays average $2.59/ton. Structure at face tightening similar to Portal plus 1317.

Raise #1

0-66	Big Eye porphyry. Structure narrows and steepens into hanging wall, 8 foot longholes at 5 foot intervals in hanging wall are mineralized. Footwall holes barren. Structure too erratic to follow with raise. Raise assays average $7.82/ton over 6 feet width, highest values along and in hanging wall.
66-169	Shale. No definite structure. Shale silicified, abundant pyrite, mineralization erratic. Holes in hanging and footwalls erratically mineralized, some ore grade. Raise assays average $6.14/ton. 12 foot crosscut in hanging wall at porphyry contact assays $13.48/ton, shale silicified and brecciated, abundant pyrite. Longhole assay $197/ton 4-8 feet in hanging wall, 10 feet south of crosscut.
100	End of OME participation in Raise #1.
169-172	Syenite porphyry, oxidized zone, intersect 350 level.

Raise #2

0-70	Big Eye porphyry. Structure 4 to 6 feet wide, brecciated. No open cavities above 20 feet from sill. 8 foot longholes in both walls at 5 foot intervals, with sub-ore mineralization. Inclination averages 47°. Raise assays average $8.20/ton.
70-100	Big Eye porphyry, structure steepens abruptly to 85° and weakens. Stronger structures enter from hanging wall, dipping 60° NW. Gradational change to oxide zone on hanging wall. Raise assays average $5.35/ton. Crosscut in hanging wall at 80 feet, averages $9.82 from 0-13 feet, $129.00 from 13-17, $7.57 from 17-27, in NW dipping structures, oxidized breccia zone. End of OME participation in Raise #2.
100-107	Big Eye porphyry, thin structures.
102-170	Bean hole raise in hanging wall, inclination about 60°, will be driven to connect 350 level in 156 N drift. Oxidized zone, following NW dipping structures. Assays average $15.81/ton.

Feet from Portal

"17 NW" Crosscut (follows Hole 27)

0-46	Shale, bedding plane movement dipping 25° SE cut at 24, 28, 26 feet, brecciated and pyritized. Assays average $3.22/ton.
46	Syenite porphyry contact, strikes N 60° E, dips 20-40° SE, open fractures, pyrite and silica. 0.3 feet on contact assays $31.76/ton.
46-95	Syenite porphyry, bolcky. Assays less than $1/ton.
95	Open fractures, 4-6 inches wide, strikes N 50° E, dips 77° NW, flows about 1000 gpm artesion water. Walls silicified with some pyrite. Drift at fractures assays $4.06/ton.
95-113	Syenite porphyry, barren. Drill station for 9A,9B, 9C,10A,10B,10C,10D.

"17 SE" Crosscut (follows Hole 30)

0-78	Big Eye porphyry. Massive, blocky, essentially barren. Vertical jointing parallel to crosscut.
62	Drill Station for Holes 2A,2B,2C.
78-95	Contact zone, evidence of considerable movement, strikes about N 60° E, dips 60° SE, strong silicification and brecciation on hanging wall side. Runs $2/ton.
95-162	Shale, first 15 feet runs $3.50/ton, ramainder essentially barren, bedding dips 65° SE.
110	Drill station for holes 4A,4B,4C.
162-177	Syenite porphyry, barren.
177-200	Shale, barren, bedding dips 42° SE, syenite porphyry appears in back at face.

Respectfully submitted,

J. G. Roscoe

Contract 2148

With reference to your memorandum of November 4, 1963, we infer that the termination agreement is requested because some units of timbering, raising, and long-hole drilling provided for in the contract have not been used. Reviewing the August voucher suggests that for all practical purposes the work under the contract has been completed and seemingly a termination agreement is not necessary.

AUG 19 1963

Memorandum

To: Acting Field Officer, Region I

From: Acting Chief, Division of Field Operations

Subject: OMR-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana
Contract 2148

With reference to car samples 5465 through 5490 mentioned on page 3 of your memorandum of August 7, 1963, these samples may be approved, if otherwise acceptable, since the zone obviously contained significant values and therefore would be eligible under the terms of Amendment No. 2.

The amendment allows car samples to be substituted for channel samples in such zones. The wording of the amendment is not too clear but it was intended to allow car samples in zones where significant mineralization was visible in the rock.

Memorandum

To: Chief, Division of Field Operations

From: Acting Field Officer, Region I

Subject: OME-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana
Contract 2148

This refers to an over-claim and over-approval of car samples. For background please refer to:

Letter May 1, 1963, A.F.O. to Operator
Interim Report, May 2, 1963 - page 2, last paragraph
Letter May 9, Operator to A.F.O.
Letter June 19, A.F.O. to Operator
Letter June 27, Operator to A.F.O.
MME Form 61, May 1963, "Remarks"
Assay maps accompanying October 1962, April 1963, and May 1963 vouchers

The first channel sample taken is 4946 located 615 feet from the IP at the tunnel portal. This sample is not located on the assay maps but was taken between Samples 2598 and 2599. The high number relative to other nearby samples suggests that it was taken after the drift had been driven considerably farther and therefore after the more easterly car samples but had it been taken when the face of the drift was at that point, it would have justified approval of ensuing car samples. In processing the May voucher the following samples in this area were approved:

4946	Channel
2599	Car
4944	Channel (not on map - IP + 620 feet)
4651	Car
4652	"

4653	Car
4656	Channel
4654	Car
4660	Channel
4661	Car
4662	Car
4663	"
4664	"

Another group of channel and car samples starting with 5450 at IP + 1,069 feet were approved as follows:

5450	Channel
5424	Car
5452	Channel
5426	Car
5471	"
5425	Car
5472	"
5428	"
5427	"
5435	Channel (not on map - IP + 1,085 feet)

A third group of channel and car samples were approved starting with 5860 at IP + 1,427 feet as follows:

5860	Channel	5870	Car
5861	Car	5871	"
5862	"	5872	"
5863	"	5873	"
5864	"	5874	"
5865	"	5875	"
5866	"	5876	Channel
5867	"	5878	Car
5869	"		

Sample 5485 is a composite of two channel cuts at IP + 1266 and IP + 1270. This was not included in the 660 assays approved through May which comprised the following:

9	Channels
31	Cars
620	Drill holes
660	

Not approved in the May voucher are 21 car samples that might be properly approved under a broad interpretation of the spirit of the contract. These comprise samples starting with 5465 and ending with 5490 at Drill Station No. 5. By strict adherence to the terms of Amendment No. 2, the car samples do not follow prior channel sampling. However, during my inspection of April 25, report dated May 2, I cut a channel of the sheared contact that was included in Car Sample 5465. The Operator, subsequently to taking some of the car samples in this zone, took Composite Channel Sample 5485 mentioned above. While the composite channel might properly be disallowed, it seems that disallowance of the car samples, which certainly show that the zone is well mineralized, simply because they were not preceded by a favorable channel sample, although technically correct, might be waived.

See Feb. Op. Report

I would appreciate your comments on the above-approved assays and the possibility of approving those from Sample 5465 through Sample 5490.

Phillips County, Montana
Contract 2148

Dear Mr. Roscoe:

Authorization to drive the No. 2 raise at the location indicated in your letter of July 2, 1963, and on the map which accompanied it is hereby given.

No amendment to the contract will be necessary to permit driving the raises three compartments as contract specifications are minimums and may be exceeded; however, the fixed unit cost figures are maximums and cannot be exceeded.

I am sorry for the delay in replying to your letter of July 8, 1963, but I have been out of the office.

I plan to visit the property July 25 for an interim inspection.

Sincerely yours,

D. R. Maclaren
Acting Field Officer, OMX

Gold Bug, et al. claims
Contract No. 14[illegible]-000-214[illegible]

Dear Mr. MacLaren:

Pursuant to the description of [illegible] under the terms of the contract, we propose to locate the second of the two raises at a point about 1[illegible]0 feet from the portal, as indicated upon the enclosed sketch.

The raise will follow [illegible] of the vein (45°). The vein at this point carries the highest values [illegible] along the adit, although its appearance is similar to the entire structure between portal plus 1[illegible]0 and the face. It is believed that more information concerning this localization of ore can be obtained by raising at this point than in selecting a lower grade point nearer the face.

The first raise has been collared and timbered as a 3 compartment structure. The specifications stipulate a 2 compartment raise, therefore we would like to know if an amendment to that effect is necessary. We also intend to drive the second raise with 3 compartments. No

Re: OMS-6836 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana
Contract 2148

Dear Mr. Reeves:

This is in further reference to my letter of May 1, and your reply of May 9, 1963, regarding vouchering of samples.

Under the terms of Amendment No. 2, our samples are authorized in lieu of channel samples in zones shown (i.e. by channel samples) to contain significant values in gold and/or silver.

In your May 9 letter you remark that you have not vouchered certain channel samples which have been taken. In order to clarify which our samples may now be approved for payment it will be necessary that I have the following data on all channel samples taken to date: sample number, location, and sampled width. I believe the information is on the Gendall Assay sheets which you have submitted. The number would be in the left-hand column of those sheets, however, the survey stations shown on the map are not numbered so the location should be referred to the start of drifting (IF plus ___ft) or a drill station (DS plus or minus ___ft). A simple tabulation headed as follows will do it:

Sample No.	Location	Width

If you will give me this information, I will be able to carry the ball from there; without it, all our samples except those in the vicinity of Sample No. 5450 and 5452 will have to be disallowed and adjustment made in your May voucher to compensate for those for which payment has already been made.

Sincerely yours,

D. R. MacLaren
Acting Field Officer, OMS, Region I

Contract 2148

Gentlemen:

We are enclosing the original and four copies of a proposed Amendment No. 2 to your OME contract signed by the Director of OME for the Government.

If the proposed amendment is satisfactory, please sign all copies, retain the Operator's copy, and return the other copies to this office.

If the amendment is not satisfactory, please return all copies unsigned with a statement of your proposed changes for consideration.

You will note that car sampling is authorized only in those zones in which prior channel samples have shown significant values in gold and/or silver, and that channel samples are authorized where either structure and/or mineralization indicate their advisability.

Sincerely yours,

D. R. MacLaren
Acting Field Officer, OME

Re: [redacted] (Subsidiary)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana
Contract 14-[redacted]-2148

Dear Mr. Mackaren:

Thank you for calling our attention to the discrepancy between our procedure in sampling and that specified by the referred provisions in the contract. The following list of samples is included to comply with requested data for a contract amendment. We are in agreement that bulk car samples, split, crushed, and resplit are more desireable than the channel samples in view of the nature of the mineralization and the character of the rock sampled. Unquestionably, an amendment should have been requested, but has been neglected due to inertia and misunderstanding, as well as to lack of decision that a combination of car samples and channels might be required to valuate particular areas of mineralization. For example, instances where a series of channels across the drift were necessary to differentiate the mineralized portion from country rock our procedure has been to do so at our sole expense while submitting invoices to OME for the car sample only. A check of sample tags shows that the preponderance of assays invoiced were car samples of rounds and the following samples were the only channel samples invoiced to OME.

Sample No.	Sample Width	Location, Portal Line
[redacted]	2'	[redacted]
[redacted]	2'	[redacted]

Samples numbered which were car samples are as follows:

4653	4656	2542	2556	2596	4656	4657
4654	4655	2543	2557	2596	4654	4658

EXPLORATION CONTRACT
NORTHERN CONTINENTAL, INC.
OMM-6236

(Docket copy)

AMENDMENT NO. 2

It is agreed this _____ day of _____, 1963, between the United States of America, acting through the Department of the Interior, Office of Minerals Exploration, hereinafter referred to as the "Government," and Northern Continental, Inc., hereinafter referred to as the "Operator," that Contract No. 2148 (OMM-6236), dated May 17, 1962, as amended, is further amended, effective May 17, 1962, as follows:

1. In Exhibit A, under General Provisions, the first paragraph is deleted and replaced as follows:

"When structure and/or mineralization indicate the advisability, drift and raises shall be sampled by cutting channels normal to the trend of the mineralization or structure. In zones shown to contain significant values in gold and/or silver, similar channel samples shall be taken at intervals of not more than 10 feet. In these zones composite car samples from each round may be substituted for channel samples. The cuttings from long-hole drill holes shall be recovered and if they show significant mineralization shall be sampled. Each such sample shall represent not more than a 5-foot length of hole. [redacted] ct."

This amendment shall not be construed to increase the amount of any item designated as maximum, the fixed unit cost of any item of work, the estimated total cost of the contract, nor the aggregate total amount which the Government may be required to contribute.

Executed in quintuplicate the day and year first above written.

May 1, 1963

Mr. J. G. Roscoe, Superintendent of Mines
Northern Continental, Inc.
P. O. Box 1550
Grand Junction, Colorado

Re: OME-6836 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana
Contract 2148

Dear Mr. Roscoe:

During an interim inspection at the Gold Bug property April 23, 1963, it came to my attention that sampling of the drift has been done by taking car samples rather than "by cutting channels normal to the vein at intervals of not more than 10 feet," as specified in the first paragraph under General Provisions in Exhibit "A" of the contract. According to Mr. Franklin, car sampling in lieu of channel samples was started "at about G-16 plus 22 feet," which would be sample No. 5462 or 5463, but "some car samples" were taken before that point was reached.

In view of the irregularity of the gold values within short distances along the veins and in the wall rock, car sampling undoubtedly will give a better concept of the true value of any ore shoots, but without an amendment to the contract OME can participate in the cost of assaying only channel samples from the drift. In order that I may request a suitable amendment, will you please send me the sample widths of all channel sample assays for which payment has been claimed on past vouchers, identifying each by the sample numbers shown on your progress maps. Without this information, we can only assume that all drift samples have been car samples, and, without an amendment, adjustment will have to be made on a future voucher to reimburse OME for payments already made for this item.

The cost of assaying long-hole samples is not involved, and rather than hold up your March voucher until this question is settled I will simply delete the amount claimed for drift sampling. To avoid confusion, you should continue to voucher the car sampling, and, if the contract is amended to allow it, the amount withheld will be released for payment.

Sincerely yours,

D. R. MacLaren

Contract 21[illegible]

Dear Mr. MacLaren:

Thank you for the return of our copy of the September voucher.

I am sorry about the confusion concerning the amount of bulldozing units performed; apparently the explanation was not been sufficiently clear. The units vouchered in June, July and August were not actual hours of work performed, and perhaps the 4th paragraph of the narrative report for June should be amplified.

The actual hours performed for June amounted to 83.5 with the D-6 dozer. Inasmuch as we did not realize that this variation from contract specifications was not acceptable (at the time), we reported the number of hours spent as the equivalent of fewer hours at the authorized rate: viz. 83.5 hours x $12.50 = 69.6 hours x $15.00. Therefore, when the amendment was approved, the hours vouchered in September were the actual hours of work performed for June, pro-rated against appropriate work items to total 80 hours which was the total authorized by the amendment.

The units on MMC Form 61 for September were intended to replace those carried in June, July and August. We feel this is justifiable inasmuch as the amount currently vouchered for is less than amount originally set up in the contract and that 3.5 more hours were performed than are vouchered for. No additional dozer work has been done since June.

Re: OME-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana
Contract 2148

Dear Mr. Roscoe:

Returned herewith is the Operator's copy of your September, 1962, voucher, which was apparently inadvertently included with the original and three copies we require.

Your attention is called to the last sentence, Article I(b) of the contract, which states, "The Government will contribute 50 percent of the total fixed unit costs of the work performed, etc." It appears that you have misunderstood this contract specification. In your vouchers for June, July, and August, you indicated that 47.5 bulldozer units were performed under "Roads and Trails" and that 22.1 units were performed under "Other Surface Work," described as excavation and preparation of portal site. These two work items appeared to have been satisfactorily completed when I inspected the property August 29, 1962. Because a D-6 dozer was used in place of the D-8 specified in the original contract, Amendment No. 1 was prepared so that the smaller dozer could be used, and the hourly rate was reduced to $12.50, as outlined in my letter of July 25, 1962.

In your September voucher, you have raised the number of hours of bulldozing under each heading mentioned above to 54.6 and 25.4 hours, respectively. The total of these figures equals the maximum 80 hours allowable, but as the increases are not accounted for only the hours previously certified as having actually been performed will be authorized for payment at this time. If the additional work has actually been done, you may reclaim the difference in your next voucher, accompanying your claim with an invoice from the dozer operator.

I plan to visit the property November 8, 1962. Hope I can beat any serious snowfall and that I will meet Mr. Franklin or you if your schedule conforms.

Sincerely yours,

D. R. MacLaren

Re: OME-6036 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana
Contract 2148

Dear Mr. Roscoe:

The certification on the back of the Form MME-60, which, of course, does not appear on the photocopies, must be signed by the field representative before the voucher can be processed. The photocopies of the Form 61 might be acceptable, but I am not sure. Therefore, in order not to delay processing any longer than necessary, I am returning herewith the three photocopies of each form which you submitted as part of your voucher for August, along with the appropriate MME forms for completion. I am keeping the original copies, which are on the printed form, as well as the supporting data to accompany the three copies. Also enclosed for your future use is a three months' supply of forms MME 60 and 61. If you will notify us when you run out of forms, we will endeavor to have a new supply in your hands in time for your next voucher.

I made an interim inspection of the contract work August 29. Unfortunately it was not feasible to give any advance notice of the inspection, and Mr. Franklin had gone to Malta for supplies. I did not have the time to go over the surface with any thoroughness, but after traversing the road cut northwesterly and southeasterly and talking to the miner it looked to me as if the tunnel was northwest of and almost parallel to the vein zone. The miner said that topographic considerations governed the location of the portal, which makes sense, and that when you got out of the faulted and blocky ground you intend to turn the workings to the right until you cut the structure. In view of my hasty look and possible misconception on the part of the miner, is this correct?

Hope I will stumble on you during a future inspection.

Sincerely yours,

D. R. MacLaren

EXPLORATION CONTRACT
NORTHERN CONTINENTAL, INC.
OME-2148

AMENDMENT NO. 1

It is agreed this _____ day of _____, 1962, between the United States of America, acting through the Department of the Interior, Office of Minerals Exploration, hereinafter referred to as the "Government," and Northern Continental, Inc., hereinafter referred to as the "Operator," that Contract No. 2148 (OME-6236), dated May 17, 1962, is amended, effective May 17, 1962, as follows:

1. In Exhibit A:

(a) Under Description of the Work, the specification "D-8 Caterpillar bulldozer" in the last sentence of the first paragraph is revised to read "D-6 Caterpillar bulldozer."

(b) Under Estimated Cost of Project, Fixed Unit Costs, the first specification is deleted and replaced as follows:

80 hours bulldozing access road and portal site, @ $12.50/hr. $1,000.00

and the figures $76,300.00 and $38,150.00 for the Total Estimated Cost of Project and Government Participation @ 50% are replaced by the figures $76,100.00 and $38,050.00, respectively.

(c) In Article I.(b) of the contract the figures $76,300.00 and $38,150.00 are replaced by the figures $76,100.00 and $38,050.00, respectively.

This amendment reduces the cost of bulldozer work, the estimated total cost of the project, and the aggregate total amount which the Government may be required to contribute.

Executed in quintuplicate the day and year first above written.

Memorandum

To : Chief, Division of Field Operations

From : Acting Field Officer, Region I

Subject: Amendment OME-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al. claims
Phillips County, Montana
Contract 2148

The subject contract specifies that "The bulldozer used in constructing the road and portal site shall not be smaller than a D-8 Caterpillar bulldozer or equivalent unit of any other make."

The Operator's Narrative Report accompanying his voucher for June 1962 states:

> "Efforts to secure a D-8 bulldozer, or its equivalent, were begun May 28, but such a machine could not be procured except at prohibitive rates and transportation costs due to missile site construction, highway building programs and local construction in the area. Repetitive, heavy rains in Montana during May and June contributed to road washouts and agricultural activity, resulting in a heavy demand for such equipment. Therefore a D-6 bulldozer was procured following the lengthy delay and has performed satisfactorily.
> "This unit has operated at a cost of $12.50 per hour which has been converted to the equivalent rate of $15.00 per hour permitted under the contract for the accounting required on OME Forms 60 and 61."

The Operator's claim for bulldozing was not approved and he has been advised that it cannot be unless the contract is amended.

In view of the Operator's difficulty in obtaining a D-8 bulldozer and his statement that the D-6 has performed satisfactorily, it is recommended that the contract be amended to allow the use of a D-6 dozer for 80 hours at $12.50 per hour. This will reduce the authorized dozer cost from $1,200.00 to $1,000.00, the total project cost from $76,300.00 to $76,100.00, and the Government's participation from $38,150.00 to $38,050.00.

Re: OME-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug et al Claims
Phillips County, Montana
Contract 2148

Dear Mr. Roscoe:

The claim for bulldozing an access road and a tunnel site made in your voucher for June 1962 could not be approved.

The contract specifies that this work shall be done with a bulldozer "shall not be smaller than a D-8 Caterpillar bulldozer or equivalent unit of any other make." The contract price of $15.00 per hour is contingent upon this specification. As your Narrative Report states that the work was done satisfactorily with a D-6 dozer at a rate of $12.50 per hour I am requesting that an amendment be prepared to authorize use of a D-6 at $12.50 per hour. If the contract is so amended you may reclaim the dozer work.

Sincerely yours

Gentlemen:

We are enclosing a 3-month supply of Operator's Monthly Voucher and Progress Report, MME Forms 60 and 61. The completed report forms, as well as the narrative, maps, assays, and all technical data, should be submitted in quadruplicate for each month in which costs have been incurred under the contract. However, in the event that you do not wish to submit a voucher for any month, the narrative report for the work done for that month is required. Delay in processing can be avoided if reports are submitted promptly to this office.

Also enclosed are three copies of Standard Form 38, entitled "Notice to Labor Unions or Other Organizations of Workers--Nondiscrimination in Employment." In accordance with Executive Order 10925, which is Exhibit B. of your contract, you should complete one copy and send it to any labor union that may be involved in your OME contract work and should post one or more copies in conspicuous places available to employees or applicants for employment.

In addition, enclosed is a copy of a poster which should be posted in a conspicuous place available to both employees and applicants for employment.

Sincerely yours,

Mr. W. R. Griswold, Chief
Division of Minerals
United States Department of the Interior
Office of Minerals Exploration
Washington 25, D.C.

Dear Mr. Griswold:

Our office has just received the contract for exploring the subject property. I have had appropriate information inserted, the copies have been executed and they have been forwarded to Mr. D. R. MacLaren at Spokane, Washington.

On behalf of Continental Materials Corporation and all of us who have worked on the application, I want to extend our sincerest thanks to you and your staff for your cooperation, and for the efficient, expeditious manner in which you handled our matter.

C. H. Reynolds, our General Superintendent, and I are most grateful for the time you were kind enough to spend with us and for the attention you have given to this contract.

Sincerely,

CONTINENTAL MATERIALS CORPORATION

Chicago 39, Illinois

Re: OME-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana

Dear Mr. Gidwitz:

Enclosed are the original and four copies of a proposed contract for the subject property, Gold Bug, et al., Claims. The contract consists of MME Form 51 (Short Form) as revised, Annex I (two pages), and executed Lien or Subordination Agreement, Exhibit A (three pages), Exhibit B, and two maps.

If the contract meets with your approval, kindly insert in Article 1(a) the date on or before which work will commence, and sign the original and all copies; keep the Operator's Copy and return the original and remaining three copies to this office. Please note that the signer must be certified by the secretary of the company (page 6 of MME Form 51).

If any part of the contract does not have your approval, please return all copies unsigned with a statement of the proposed changes for consideration.

The 6 percent interest mentioned in Article 1(c) accrues from the dates upon which individual payments are made by the Government and, like the principal, is repayable from royalty on production.

Sincerely yours,

D. R. MacLaren

Memorandum

To: Acting Field Officer, Region I

From: Chief, Division of Field Operations

Subject: OMK-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana

Enclosed are the original and four copies of a proposed exploration contract with Northern Continental, Inc., signed by the Director for the Government. The contract consists of MMK Form 51 (Short Form) as revised, Annex I (two pages), an executed Lien or Subordination Agreement, Exhibit A (three pages), Exhibit B, and two maps. Also enclosed for your use is an "Extra Copy for Field Office" (MMK Form 51 as revised, Annex I, and Exhibit A).

If the contract is satisfactory to you and the Applicant, kindly insert the starting date and have an authorized representative of the corporation sign the original and four copies. You will note that the signer must be certified by the secretary (page 6 of MMK Form 51). Thereafter, please distribute the copies in the usual manner.

Please advise the Applicant that the 6 percent interest accrues from the dates on which the individual payments are made by the Government and like the principal is repayable from royalty on production.

If any part of the proposed contract does not have your approval or that of the Applicant and cannot be altered within your delegated authority, the original and all copies are to be returned to this office together with the proposed changes for consideration.

Mr. Sidney M. Gunther and Mr. C. H. Reynolds of the applicant corporation visited the Washington Office to discuss the program outlined in Mr. Griswold's letter of April 24, 1962, copies of which were forwarded to you. After considerable discussion, they agreed to accept the program as outlined in the attached contract.

Memorandum to the File

From: W. R. Griswold, Chief
Division of Minerals

Subject: OME-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana

On Friday, April 27, the undersigned received a phone call from Sidney M. Gunther, Chicago, Illinois. With reference to our April 24 letter to the Applicant, in which we suggested that their proposed program be trimmed down, Mr. Gunther suggested that he and the company's engineer come to Washington to see us and discuss the matter. Their engineer is presently in Grand Junction, Colorado. I told Mr. Gunther that, of course, any applicant was always welcome to come to see us at any time and they might come if they wished.

Later in the afternoon, after the undersigned had gone home, Mr. Gunther's secretary spoke with Mrs. Grace Ault and suggested that Mr. Gunther and Mr. Reynolds would arrive in Washington May 2, by plane, at 10:45 a.m., and would like to take me to lunch. According to my previous instructions to Mrs. Ault that we do not accept luncheon engagements, she told Mr. Gunther's secretary that I would be glad to see them at any time and suggested that Mr. Gunther phone from the airport when he and Mr. Reynolds arrive.

Mr. Willard Gidwitz
President
Northern Continental, Inc.
4534 West North Avenue
Chicago 39, Illinois

APR 24 1962

Re: OME-6236 (Gold-Silver)
Northern Continental, Inc.
Gold Bug, et al., Claims
Phillips County, Montana

Dear Mr. Gidwitz:

The information submitted with your application for financial assistance in exploring the subject property has been reviewed by this Division.

We find that the requests to the banks were made by Continental Materials Corporation rather than the Applicant. Will you, therefore, kindly submit new requests made by Northern Continental, Inc., and the banks' replies. Also, please submit a statement from the Continental Materials Corporation advising that it would not finance the entire cost of the proposed exploration work.

see May 1 letters left-hand side

With respect to the proposed project, it appears that the work outlined is excessive in relation to the presently known potential of the Gold Bug vein system. However, we would consider a part of the work proposed under Stage I, such as the access road, about 1500 feet of drifting, some long-hole drilling, and two 100-foot raises to further explore favorable areas in the drift.

If you wish us to continue processing your application based on this reduced program, please advise and submit the above-requested letters and statement.

This letter should not be construed as an assurance that a contract would be granted.

Sincerely yours,

W. R. Griswold (gla)

W. R. Griswold, Chief
Division of Minerals

April 16, 1962

Northern Continental, Inc.
P. O. Box 1550
Grand Junction, Colorado

Subject: OME - 6236

Gentlemen:

Your application for exploration assistance, dated March 5, 1962 submitted to our office at Spokane, Washington has been assigned Docket Number OME-6236.

Please identify all future correspondence relating to your application by this docket number.

Sincerely yours,

Allen S. Dakan, Chief
Division of Administrative
Management
