OFFICE OF MINERALS EXPLORATION
CONTRACT ADMINISTRATION AND AUDIT DIVISION

REPORT OF ROYALTY REVIEW

I have reviewed the files of the Washington office pertaining to Contract Idm-2412, Docket OMEA-2277 (Mica), dated October 1, 1952, with

Lin Carpenter, Norman Mashburn, and John Phillips
d/b/a Burke John Mica Miners
Spruce Pine, North Carolina

for the purpose of determining the amount of royalty payable to the U. S. Government on sales of minerals from property referred to as the Burke John and N. L. Barnard Mine located in Macon County, North Carolina, during the period May 8, 1959, through June 22, 1962.

A certification of discovery or development was issued on June 30, 1954, and, in accordance with Article 9 of the contract, royalty is payable on all minerals produced from the land described in Article 2 of the contract for a period of 10 years from the date of the contract or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first. A Report of Review dated June 9, 1954, indicated accepted costs under the exploration contract amounting to $8,000.00 with the Government's contribution on a 90 percent basis being $7,200.00.

The status of the project, the scope of review, and the reasons therefor are stated on page 2.

This review established no sales subject to the Government's royalty subsequent to the period covered by a prior Report of Royalty Review which found the sales subject to the Government's royalty through May 7, 1959, to be $445.36. The royalty account as of May 7, 1959, was:

Total Royalty Payable	$22.27
Total Royalty Paid	22.27
Balance of Royalty Due	$ -0-

As of June 22, 1962, the royalty account of this project was found to be:

Total Royalty Payable	$22.27
Total Royalty Paid	22.27
Balance of Royalty Due	$ -0-

E. D. Talbert

E. D. Talbert, OME Auditor

July 20, 1962

Idm-8412 Burke John Mica Miners OMEA-2277

STATUS OF PROJECT, SCOPE OF REVIEW
AND REASONS THEREFOR

This contract provides that the Operators or their successors in interest shall pay to the Government a percentage royalty on all minerals produced from the property thereunder. At the time the contract was executed the Operators were in possession of the main parcel by virtue of an August 9, 1951, lease from Eliza Cobb Grist and Paul Grist, Auburn Gap, Georgia, and of an adjoining strip by virtue of a July 26, 1952, lease from L. B. Liner, Tressie Liner, R. G. Ray, Lillie Ray, and Donnie Duvall. The landowners executed Owner's Consents to Lien which secure the payment of royalty under the terms of the contract; however, the contract contains the so-called "abandonment" provision.

Exploration work under the contract was completed in April 1954. Mica produced during the exploration work resulted in the sale of 45.03 pounds of sheet mica to the G.S.A. Mica Purchase Depot at Spruce Pine, North Carolina, for $445.36 in proceeds. This sale, in the name of Sam L. Phillips on January 19, 1954, is covered by a prior Report of Royalty Review.

Subsequent inspections of the property, the last on April 24, 1961, have disclosed no further work on the property other than a small amount of unproductive bulldozing by Roy H. Routs during the latter part of 1957. A May 23, 1962, reply by Sam L. Phillips to a MME Form 63 addressed to one of the partners, John Phillips, states that since May 19, 1961, there has been no production from the land subject to the contract. An examination by a Contract Administration and Audit Division representative during the week of June 18, 1962, of the records of the G.S.A. Mica Purchase Depot at Spruce Pine did not disclose any unreported production.

This review was made in lieu of an on-site audit of the Operator's accounts and records for the following reasons:

(1) Examinations of the Mica Purchase Depot records, inspections of the property, and inquiries have not disclosed any unreported production; and

(2) The administrative cost to the Government of an on-site royalty audit at this time would be excessive in relation to the amount of possible additional royalty which might be disclosed.

OFFICE OF MINERALS EXPLORATION
CONTRACT ADMINISTRATION AND AUDIT DIVISION

REPORT OF ROYALTY REVIEW

I have reviewed the files of the Division of Nonmetallic Minerals, Office of Minerals Exploration, Washington, D. C., pertaining to Contract No. Idm-E412, Docket No. DMEA-2277 (Mica), dated October 1, 1952, with

Lin Carpenter, Norman Mashburn and John Phillips
d/b/a Burke John Mica Miners
Spruce Pine, North Carolina

for the purpose of determining the amount of royalty due the U. S. Government on sales of minerals from property referred to as Burke John Mine located in Macon County, North Carolina, during the period March 10, 1955, through May 7, 1959.

A certification of discovery or development was issued on June 30, 1954, and accordingly royalty is payable on all production from the land described in Article 2 of the contract for a maximum period of 10 years from the date of the contract. A Report of Review in lieu of final audit dated June 9, 1954, indicated accepted costs under the exploration contract amounting to $8,000.00 with the Government's contribution, on a 90 percent basis, being $7,200.00.

A prior report of royalty review dated March 21, 1955, indicated total sales subject to Government royalty amounting to $445.36 for the period October 1, 1952, through March 9, 1955, and that the royalty due the Government amounting to $22.27 had been paid. No royalty has been received by the Government applicable to this project since the latter date.

This review was made in lieu of an on-site royalty audit of the Operator's accounts and records for the following reasons:

(1) Periodic inspections by a representative of the Field Team, Region V, have failed to disclose any evidence of production or sales of minerals from this project during the period covered by this review, and

(2) The administrative cost to the Government of an on-site royalty audit at this time would be excessive in relation to the amount of possible royalty which might be disclosed.

REPORT OF ROYALTY REVIEW

I have reviewed all copies of settlement sheets on file with the Executive Officer, DMEA Field Team, Region V, applicable to royalties collected on the sales of mica for the period October 1, 1952, to March 9, 1955, by:

Lin Carpenter, Norman Mashburn and John Phillips
d/b/a Burke John Mica Miners
Spruce Pine, North Carolina

produced from property referred to as the Burke John Mine located in Macon County, North Carolina, under terms of Contract Idm-E412, Docket No. DMEA-2277.

My review included a conference with Mr. William A. Beck, Mining Engineer, U. S. Bureau of Mines, Knoxville, Tennessee, who is thoroughly familiar with the project.

This review was made in lieu of an on-site audit of the Operator's accounts and records for the following reasons:

(1) The production involved was incidental to the exploration operations;

(2) A review of the records of General Services Administration Mica Purchase Depot, Spruce Pine, North Carolina, did not disclose any other sales of mica from this mine since the effective date of the exploration contract; and

(3) The administrative cost to the Government of an on-site royalty audit at this time would be excessive in relation to the amount of possible additional royalty which might be disclosed.

The audit established the total sales of mica for this period to be $445.36. Royalty due the U. S. Government at the contract rate of 5 percent is $22.27. The royalty paid and balance due are as follows:

Total Royalties Due	$22.27
Total Royalties Paid	22.27
Balance of Royalties Due	$ -0-

WASHINGTON 25, D. C. 600

CERTIFICATION BY THE UNITED STATES OF AMERICA OF A DISCOVERY OR DEVELOPMENT UNDER AN EXPLORATION PROJECT CONTRACT

To: Burke-John Mica Mineral
Spruce Pine, North Carolina

Pursuant to the provisions of Exploration Project Contract No. Idm-E412, dated October 1, 1952 (Docket No. DMEA-2277), hereinafter called the "contract" between you and the United States of America, hereinafter called the "Government"; to establish and fix the Government's percentage royalty on production and its lien thereon and on the land described in the contract, the Government considers and therefore certifies that discovery or development from which production may be made has resulted from the exploration work.

The nature of said discovery or development is described broadly or indicated as follows:

Underground exploration of a conformable zoned pegmatite in biotite-chlorite and hornblende gneiss disclosed reserves of feldspar.

REPORT OF REVIEW

I have reviewed the Monthly Reports of:

Sam L. Phillips, John Phillips and Lin Carpenter
d/b/a Burke-John Mica Miners
Spruce Pine, North Carolina

pertaining to Exploration Project Contract No. Idm-E412, Docket No. DMEA-2277, including Amendment Nos. 1, 2, 3 and 4, for the months of October, 1952 to April, 1954, inclusive, covering a project for the exploration of mica on property, known as Burke-John Mica Mine, located in Macon County, North Carolina.

My review included an examination of the Monthly Reports (Forms MF-104) and supporting documents attached thereto, comparison of the costs claimed with the contract and pertinent schedules, consultation with the Executive Officer of the DMEA Field Team, and a determination of the reasonableness and propriety of the costs.

This review was made in lieu of a final audit of the Operator's accounts and records for the following reasons:

(a) the administrative cost to the Government of an audit would be excessive in relation to value of the contract or the estimated amount of possible further disallowances thereunder;
(b) the Monthly Reports were supported by documentary proof of the costs incurred under the contract; and
(c) a large portion ($4,628.00) of the costs incurred were under a contract provision for payment by the Government on the basis of agreed estimated costs of units of work actually performed.

The review disclosed the following facts in regard to the amount paid or to be paid the contractor:

Total cost as billed by Contractor		$8,160.00
Less: Proceeds from property disposition		100.00
Net cost as claimed by Contractor		8,060.00
Exceptions:		
By DMEA Finance Officer	$ 60.00	
Herewith	-0-	60.00
Total Accepted Cost		$8,000.00

The contract calls for a 90 percent participation of exploration expenses by the United States Government. Therefore, payment to the contractor by the Government in the amount of Seven thousand two hundred and no/100 Dollars,

$7,200.00

is considered valid and proper, provided that the Regional Executive Officer, the Administrator, or other competent official has accepted or will accept the project as having otherwise met the terms of the contract.

AMENDMENT No. 3

Contract Docket No. DMEA-2277, Idm-E 412, dated 1st October 1952, between the UNITED STATES OF AMERICA and Lin Carpenter, Norman Mashburn, and John Phillips, partners, d/b/a under firm name of BURKE-JOHN MICA MINERS, at Spruce Pine, North Carolina is hereby amended as follows:

1. Article 3 is amended to read....."....; and shall bring the project to completion within a period of sixteen (16) months from the date of this contract....." instead of twelve (12) months from date of contract as written in Amendment No. 2, dated May 15, 1953.

This amendment is necessary due to a delay in getting equipment for the operation.

This amendment shall not be construed to increase the estimated total cost of the project, the aggregate total amount which the Government may be obligated to pay, or the percentage of the cost which the Government may be obligated to pay, under the provisions of Article 8 of the contract form.

EXPLORATION PROJECT CONTRACT

Lin Carpenter, Norman Meshburn, and John Phillips, Partners, doing business as Burke-John Mica Miners

Docket No. 2277, Idm-8412 (mica)

AMENDMENT NO. 1

It is agreed this 15th day of April, 1953. between the UNITED STATES OF AMERICA, ACTING through the Department of the Interior, Defense Minerals Exploration Administration, and Lin Carpenter, Norman Meshburn, and John Phillips, doing business as Burke-John Mica Miners, each acting in consideration of the agreement of the others to the terms hereinafter set forth that Exploration Project Contract Idm-8412, Docket No. A-2277, dated October 1, 1952, between the parties hereto be modified and amended as of January 2, 1953 as follows:

(A) In Exhibit "A" under "Estimated Costs of the Projects"

(a) Stage I, delete Items (2) and (8) and in their place substitute the following items respectively-

(2) Labor, Supervision, Consultants

1 - Working foreman 80 shifts @ $12.00 per 8-hr. Shift,	$ 960.00	
2 - Laborers, 80 shifts ea. @ $8.00 per 8-hr. shift,	1280.00	
Surveyors	100.00	
		$2340.00

(8) Contingencies $360.00

and after item 8 change the total estimated cost of Stage I from $2900.00* to $3200.00*

(b) Delete the last two lines on page 3 and substitute in place thereof the following:

Total Estimated Costs of Stage I and II	$8100.00 *
Government participation @ 90%	$7290.00*

(B) In Article 8 of the contract form change the figures $6,800.00 and $6,120.00 to $8,100.00 and $7,290.00 respectively.

Executed in sextuplicate the day and year first above written.

EXPLORATION PROJECT CONTRACT[1]

IT IS AGREED this 1st day of October, 1952, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, hereinafter called the "Government," and[2] Lin Carpenter, Norman Mashburn and John Phillips, partners, doing business under the firm name and style of Burke John Mica Miners, at Spruce Pine, N. C.

hereinafter called the "Operator," as follows:

ARTICLE 1. *Authority for contract.*—This agreement is entered into under the authority of the Defense Production Act of 1950, as amended, pursuant to DMEA Order 1 entitled "Government Aid in Defense Exploration Projects."

ARTICLE 2. *Operator's property rights.*—With respect to that certain land situated in the State of North Carolina, County of Macon County, described as follows:[3] See Annex I.

the Operator represents and undertakes:[4]

(*a*) ~~That the Operator is the owner in possession and entitled to possession, and that the property is subject only to the~~ ~~[illegible]~~ ~~of which the subordination agreement of the holder is attached:~~

(*b*) That the Operator is a lessee, in possession and entitled to possession, and the Owner's Consent to Lien is attached.

The Operator shall devote the land and all existing improvements, facilities, buildings, installations, and appurtenances to the purposes of the exploration project without any allowance for the use, rental value, depreciation, depletion, or other cost of acquiring, owning, or holding possession thereof.

ARTICLE 3. *Exploration project.*—The Operator, within 30 days from the date of this contract shall commence work on a project of exploration for[5] Mica

in or upon the described land; and shall bring the project to completion within a period of 8 months from the date of this contract. The work to be performed is more fully described in Exhibit "A" attached hereto, which, with any maps or drawings thereto attached, are made a part of this contract. The Government will contribute to the cost of this work as hereafter provided.

ARTICLE 4. *Performance of the work.*—(*a*) *Operator's responsibility.* The work shall be performed efficiently, expertly, in a workmanlike manner, in accordance with good mining standards and State regulations for health and safety and for workmens' compensation and employers' liability insurance, with suitable and adequate equipment, materials, and labor, to bring the project to completion within the time fixed. To the extent specified in Exhibit "A," attached hereto, the work may be performed by independent contractor or contractors; and work not specified in Exhibit "A" for performance by independent contractor may nevertheless be so performed upon amendment of Exhibit "A," as agreed to by the parties, to state the work to be so performed and the estimated unit costs thereof, as provided hereafter.

(*b*) *Independent contracts.*—Any independent contract for the performance of work shall be on a unit-price basis (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved), or on some basis that will indicate the amount due for work performed at any stage of the work to be performed under such independent contract. The Government shall not be nor be considered to be a party to any such independent contract, and the Government's right to terminate the exploration project contract under any of its provisions shall not in any manner be affected by reason of any such independent contract. If the reference in Exhibit "A" to any such independent contract states that the Government's approval thereof is required, the Government may refuse to participate in the cost thereof unless and until it has given its written approval of the independent contract.

(*c*) *Government may inspect.*—The Government shall have the right to enter and observe and inspect the work at all reasonable times, and the Operator shall provide the Government with all available means for doing so. The Government may consult with and advise the Operator on all phases of the work.

ARTICLE 5. *Estimated costs of the project.*—A statement of the estimated cost of the project is set forth in Exhibit "A," attached hereto. Except insofar as any item of requirement or the estimated cost thereof set forth in Exhibit "A" is there or elsewhere designated as an "allowable maximum," such items of requirement and of related cost are estimates only, and may be exceeded to the extent that the Government may from time to time approve for the most economic and beneficial performance of the work within the limitation of the total aggregate estimate of costs. The Government's approval of any such excess over the estimate for an item of requirement or related cost will be signified by its approval and payment of any invoice or voucher for payment which expressly calls attention to such excess. Items expressly designated in Exhibit "A" or elsewhere as "allowable maximum," and the total aggregate estimated cost are limitations, and any excess therein will be for the sole account of the Operator in which the Government will not participate.

ARTICLE 6. *Allowable costs of the project.*—(*a*) The costs of the project in which the Government will participate are limited to the following:

(1) *Independent contracts.*—Payments to independent contractors under independent contracts listed in Exhibit "A." The estimated cost of any work to be performed under an independent contract is or shall be included in the estimate of costs in Exhibit "A" in terms of the estimated numbers of units of work to be performed, the estimated amount to be paid per unit, and the estimated total amount to be paid to the independent contractor, and such estimates shall be allowable maximums above which the Government will not contribute. Regardless of the provisions of any such independent contract, the Government will participate in the payments to the independent contractor only on account of work actually performed and that conforms with the provisions of the exploration project contract, and only to the extent that the Government deems the unit prices for the work under the independent contract to be reasonable and necessary. No such independent contract shall have the effect of increasing the estimated total cost of the exploration project contract nor the maximum amount which the Government will pay as provided in the exploration project contract.

(2) *Labor, supervision, consultants.*—Labor, supervision and technical services (including engineering and geological consultants), a schedule of which is included in the estimate of costs set forth in Exhibit "A." The requirements and related estimated costs for supervision and technical services are allowable maximums.

(3) *Operating materials and supplies.*—Necessary materials and supplies including items of equipment costing less than $50.00 each, and power, water, and fuel, a schedule of which is included in the estimate of costs in Exhibit "A."

(4) *Operating equipment.*—Any operating equipment to be rented or purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or the allowable depreciation, as the case may be, a schedule of which is included in Exhibit "A." Any items listed as owned and to be furnished by the Operator, and related allowable depreciation, are allowable maximums.

(5) *Rehabilitation and repairs.*—Any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and to be devoted to the purposes of the exploration contract, a schedule of which is included in the estimate of costs set forth in Exhibit "A." These items are allowable maximums.

(6) *New buildings, improvements, installations.*—Any necessary buildings, fixed improvements, or installations to be purchased, installed, or constructed for the purposes of the exploration work, with the estimated cost of each, a schedule of which is included in the estimate of costs in Exhibit "A." All of these items are allowable maximums.

(7) *Miscellaneous.*—Repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance and payroll taxes.

(8) *Contingencies.*—Such other necessary, reasonable direct costs of performing the exploration work, within the limit of the total aggregate estimate of costs, whether or not included in any schedule of costs in Exhibit "A," as may be approved by the Government in the course of the work, as indicated by its approval and payment of invoices and vouchers.

[1] If sufficient space is not provided in any blank, use an extra sheet of paper and refer to it in the blank.
[2] State name, address, and nature of organization if any.
[3] Give legal description or enough to identify the property, particularly excluding any land or interest therein to which the Government's lien is not to attach or the production from which is not to be subject to the Government's percentage royalty.
[4] Strike out the provision not applicable.
[5] Name of mineral or minerals.

(*b*) The Government's payments in a[illegible]ases will be based on actual, necessary co[illegible] (including contract unit prices) incurred not in excess of any "allowable maximum," and not in excess of the fixed percentage [illegible] the total aggregate estimated cost. Costs will be considered to be incurred only as they are or become due and payable.

(*c*) No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes) or any other indirect costs, or work performed or costs incurred before the date of this contract, shall be allowed as costs of the project in which the Government will participate.

ARTICLE 7. *Reports, accounts, audits.*—(*a*) *Progress reports.* The Operators shall provide the Government with monthly reports of work performed and costs (including contract unit prices) incurred under the contract, in quintuplicate (five copies), upon forms provided by the Government. These progress reports shall be certified by the Operator, and shall constitute both the Operator's invoice of costs incurred on the project during the period covered by the report and his voucher for repayment by the Government, unless the Government requires the use of a standard voucher form with invoice attached. Progress reports shall include surface and/or underground engineering-geological maps or sketches showing the progress of the exploration, with assay-reports on samples taken concurrently with the advance in mineralized ground.

(*b*) *Final report.*—Upon completion of the exploration work or termination of the contract the Operator shall provide the Government with an adequate geological and engineering report, in quintuplicate (five copies), including an estimate of ore reserves resulting from the exploration work.

(*c*) Compliance with requirements.—If, in the opinion of the Government, any of the Operator's reports are insufficient or incomplete, the Government may procure the making or completion of such reports and attachments as an expense of the exploration work; and the Government may withhold approval and payment of any vouchers depending upon insufficient or incomplete reports.

(*d*) *Accounts and audits.*—The Operator shall keep suitable records and accounts of operations, which the Government may inspect and audit at any time. The Government may at any time require an audit of the Operator's records and accounts by a certified public accountant, the cost thereof to be treated as a cost of the project. The Operator shall keep and preserve said records and accounts for at least 3 years after the completion of the project or the termination of this contract. Upon the completion of the project or termination of the contract the Operator shall render a final account as provided in Article 12.

ARTICLE 8. *Payments by the Government.*—(*a*) The Government will pay 90 percent of the allowable costs incurred, as they accrue, in an aggregate total amount not in excess of $ 6,120.00, which is 90 percent of $ 6,800.00, the agreed, estimated total cost of the project in which the Government will participate; *Provided,* that until the Operator's final report and final accounting have been rendered to the Government, and any final auditing required by the Government has been made, and a final settlement of the contract has been made, the Government may withhold from the last voucher or vouchers such sums as it sees fit not in excess of ten (10) percent of the maximum total which the Government might have been called upon to pay under the terms of the contract.

(*b*) The Government may make any payment or payments direct to independent contractors and to suppliers, for the account of the Operator, rather than to the Operator.

ARTICLE 9. *Repayment by Operator.*—(*a*) If, at any time, the Government considers that a discovery or a development from which production may be made has resulted from the exploration work, the Government, at any time not later than 6 months after the Operator has rendered the required final report and final account, may so certify in writing to the Operator. The certification shall describe broadly or indicate the nature of the discovery or development. In the event of such certification, any minerals mined or produced from the land described in Article 2 within 10 years from the date of this contract, including any mined or produced before the certification, shall be subject to a percentage royalty which the Operator or his successor in interest shall pay to the Government, upon the net smelter returns, the net concentrator returns, or other net amounts realized from the sale or other disposition of any such production, in whatever form disposed of, including ore, concentrates, or metal, until the total amount contributed by the Government, without interest, is fully repaid, or said 10 years have elapsed, whichever occurs first, as follows:

(1) One and one-half (1½) percent of any such net amounts not in excess of eight dollars ($8.00) per ton.

(2) One and one-half (1½) percent of any such net amounts, plus one-half (½) percent of such net amounts for each additional full fifty cents ($0.50) by which such net amounts exceed eight dollars ($8.00) per ton, but not in excess of five (5) percent of such net amounts.

(For instance: The percentage royalty on a net amount of five dollars ($5.00) per ton would be one and one-half (1½) percent; on a net amount of ten dollars ($10.00) per ton, three and one-half (3½) percent.)

(*b*) As here used, "net smelter returns," "net concentrator returns," and "other net amounts realized from the sale or other disposition," mean gross revenue from sales; or if not sold, the market value of the material after it is mined in the form in which and the place where it is held. In the case of integrated operations in which the material is not disposed of as such, these terms mean what is or would be gross income from mining operations for percentage depletion purposes in income-tax determination.

(*c*) To secure the payment of its percentage royalty, the Government shall have and is hereby granted a lien upon the land described in Article 2 and upon any production of minerals therefrom, until the royalty claim is extinguished by lapse of time or is fully paid.

(*d*) This article is not to be construed as imposing any obligation on the Operator or the Operator's successor in interest to engage in any mining or production operations.

ARTICLE 10. *Assignment, transfer, or loss of Operator's interest.*—Without the written consent of the Government, the Operator shall not assign or otherwise transfer or hypothecate this contract or any rights thereunder. The Operator shall not make any voluntary nor permit any involuntary transfer or conveyance of the Operator's rights in the land described in Article 2, without making suitable provision for the preservation of the Government's right to a percentage royalty on production and lien for the payment thereof; *Provided,* that mere failure by the Operator to maintain the Operator's rights in the land, without any consideration running to the Operator other than relief from the cost of maintaining such rights (as by surrender of a leasehold, failure to perform assessment work, or failure to exercise an option), coupled with complete abandonment by the Operator of all interest in or operations on the land for a period of 10 years from the date of this contract, shall not constitute such a transfer or conveyance. Should the Operator make or permit any transfer or conveyance in violation of this provision, the Operator shall be and remain liable for payment to the Government of the same amounts, at the same times, as would have been paid under the terms of the percentage royalty on production. If for any reason the net smelter returns, net concentrator returns, or other net amounts realized from the sale or other disposition of such production are not available as a means of measuring the amount of the Operator's liability, the amount thereof shall be estimated as well as may be, and in the event of dispute as to such estimates, the determination thereof by the Administrator of Defense Minerals Exploration Administration or by his successor shall be final and binding upon the Operator.

ARTICLE 11. *Title to and disposition of property.*—All facilities, buildings, fixtures, equipment, or other items costing more than $50.00 each, paid for or purchased with funds contributed jointly by the Operator and the Government, although title may be taken in the name of the Operator, shall belong to the Operator and the Government jointly, in proportion to their respective contributions, and upon the completion of the work or the termination of the contract shall be disposed of promptly by the Operator for the joint account of the Government and the Operator, either by return to the vendor, by sale to others, or purchase by the Operator at a price at least as high as could otherwise be obtained, as may appear to be for the best interest of the Government, unless the Government, in writing, waives its interest in any such item. If necessary to accomplish such disposition, the Operator shall dismantle, sever from the land, and remove any such item, the cost thereof to be for the joint account of the parties in proportion to their respective interests. If the Operator, within 90 days after the receipt of written notice from the Government, fails, neglects, or refuses to dispose of such property, the Government may itself enter upon the land, take possession of, and remove and dispose of any such property as above provided.

ARTICLE 12. *Termination and completion.*—The Government may, at any time, by written notice to the Operator, terminate this contract: (*a*) If the Operator fails to provide his share of the money necessary to prosecute operations pursuant to the terms of the contract; (*b*) if the Operator, in the opinion of the Government, fails to prosecute operations pursuant to the terms of the contract; or (*c*) if in the opinion of the Government, operations up to the time of the notice have not indicated the probability of making any worth while discovery and in the opinion of the Government further operations are not justified. Upon the completion of the project or any termination of the contract the Operator shall dispose of any remaining materials, supplies, facilities, buildings, fixtures, and equipment in which the Government has an interest, for the joint account of the Operator and the Government in the proportion of their respective interests; shall render to the Government a full and final accounting of his operations under the contract and his expenditures of money; and shall pay to the Government its pro rata share of any money remaining.

ARTICLE 13. *Changes and added provisions.* ----------

Executed in sextuplicate the day and year first above written.

BURKE JONES MICA MINERS
(Operator)

By John Phillips Partner

By Lin Carpenter Partner

By Norman Washburn Partner

I, [illegible], certify that I am the [illegible] secretary of the corporation named as Operator herein; that [illegible], who signed this contract on behalf of the Operator, was then [illegible] of said corporation; that said contract was duly signed for and in behalf of said corporation by authority of its governing body, and is within the scope of its corporate powers.

[CORPORATE SEAL]

BURKE JOHN MICA MINERS
EXPLORATION PROJECT CONTRACT
DOCKET NO. DMEA-2277

ANNEX I

The Operator has all the mineral rights and mining privileges in that part of the property of Eliza Cobb Grist and her husband Paul Grist situated on the waters of Iotla Creek (as set forth in a deed from J. Frank Ray, Trustee to M. D. Billings dated September 15, 1923, and recorded in the office of the Register of Deeds, Macon County, North Carolina, in Deed Book J-4, page 229, and in a deed from N. L. Barnard and wife, to Mrs. T. O. Havener and M. D. Billings dated January 20, 1917, and recorded in Deed Book X-3, page 571, and Book I-4, page 270) which is described as follows:

Beginning at the caved portal of the old adit at the eastern end of the mine and running 130 feet S 60°E to a hickory tree (corner tree), thence 172 feet N 7° E to a double chestnut stump, thence 1200 feet N 75° W to a spur ridge, thence along the crest of the spur in a southwesterly direction to the crest of the main ridge, thence approximately 1400 feet in a S 75° E direction to the point of beginning (the hickory tree corner).

The Operator also has all the mineral rights and mining privileges in a strip of land 200 feet in width adjoining the Grist property on the south, said strip beginning on a hickory on the southeast corner of the Grist land, thence S 7° W 200 feet to a stake; thence N 75° W 750 feet to the Willis line; thence N 7° E 200 feet; thence with the south boundary of the Grist property to the beginning.

BURKE JOHN MICA MINERS
EXPLORATION PROJECT CONTRACT
DOCKET NO. DMEA-2277

EXHIBIT "A"

Description of the Work

The work shall be done in two stages.

Stage I

Clear caved portal of the lower adit as indicated on the sketch map attached hereto and made a part hereof, entitled "Sketch Map of Burke John Mica Mine, Macon Co., N. C. - DMEA-2277."

Rehabilitate and survey the lower adit and establish its relationship to the mica shoots previously mined.

Stage II

Drive a maximum of 150 feet of 5' x 7' crosscuts and drifts. The location, direction, and length of these workings are to be specified by the Government. The new drifts and crosscuts are shown schematically on the aforementioned map.

Estimated Costs of the Project
(*Indicates allowable maximum)

Stage I

(1) Independent Contracts

None

(2) Labor, Supervision, Consultants

1 - Working foreman, 40 shifts @ $12.00 per 8-hr. shift	$ 480.00	
2 - Laborers, 40 shifts each @ $8.00 per 8-hr. shift	640.00	
Surveyors	100.00	$ 1,220.00

Lin Carpenter,
Norman Mashburn
John Phillips

DMEA-2277

Mica

(3)	**Operating Materials and Supplies**		
	Timber 6 M.B.M.	$ 360.00	
	Hand tools	100.00	$ 460.00
(4)	**Operating Equipment**		
	To be rented		
	Bulldozer - 30 hrs. at $10.00 per hour including Operator, fuel, oil, and repairs		300.00
	To be purchased		
	Mine rail - 350 feet at $1.00 per foot including accessories	350.00	
	Mine car	150.00	500.00
(5)	**Rehabilitation and Repairs**		
	None		
(6)	**New buildings, Improvements, Installations**		
	None		
(7)	**Miscellaneous**		
	Workmen's compensation, Employers' Liability Insurance, and payroll taxes	120.00	
	Office expense, bookkeeping, etc. 4 months at $30.00/mo.	120.00	240.00
(8)	**Contingencies**		180.00
	Total Estimated Cost of Stage I		$2,900.00*

Stage II

The Government will contribute to the cost of drifting and crosscutting in this stage on the basis of the below agreed unit costs per foot (which shall include all costs) in lieu of actual costs, as they accrue for units of work actually performed.

Drift and crosscut 150 feet at $26.00* per foot	3,900.00*

Total Estimated Cost Stages I and II	$6,800.00*
Government Participation at 90%	$6,120.00*

DMEA 2277

OWNER'S CONSENT TO LIEN

WHEREAS, the undersigned, as owner, co-owner, lessor, or seller has an interest in certain property in the State of North Carolina, County of Macon, which is the subject of a proposed Exploration Project Contract, hereinafter called the "Contract", between the United States of America, hereinafter called the "Government", and 1/

Burke John Mica Miners, Lin Carpenter, Norman Mashburn and John Phillips, partners.

hereinafter called the "Operator"; and

WHEREAS, under certain provisions of said Contract which are set forth on the reverse side hereof, the Government will acquire certain rights and equities which do or may conflict with or be adverse to the interest of the undersigned in said property;

NOW THEREFORE, the undersigned, in consideration of said Contract and as an inducement to the Government and Operator to enter into same, undertakes and agrees as follows:

1. The Government's equity in and right to remove facilities, buildings, fixtures, and equipment, as provided in the Contract, shall prevail over and be prior and superior to any conflicting or adverse rights of the undersigned.

2. The Government's percentage royalty on net smelter returns or other net proceeds realized from ore, concentrates, or metal produced within ten (10) years from the date of the Contract, and the Government's lien for the payment of said percentage royalty shall attach to the mineral deposit and the production therefrom in the amount of the Government's contribution, not in excess of 2/ $8,000.00, all upon the terms and conditions set forth in said Contract.

3. The undersigned shall commit no act nor assert any claim that may contravene or conflict with the lien, claim, or rights of the Government under the provisions of the said Contract. This agreement shall be binding upon the heirs, executors, administrators, successors, and assigns of the undersigned.

Dated this 15th day of September, 1952.

Eliza Cobb Hunt

Pearl S. Hunt

1/ Insert the name of the Operator as it will appear in the Exploration Project Contract.

2/ Insert the maximum amount of the Government's contribution.

UNITED STATES OF

LANDLORD'S SUBORDINATION AGREEMENT

KNOW ALL MEN BY THESE PRESENTS:

WHEREAS, the undersigned is the owner in fee simple of that certain parcel of ground in the county of Macon, State of North Carolina, described in a certain Exploration Project Contract dated _____, 195__, between Burke John Mica Miners--Lin Carpenter, J. C. Buchanan and N. E. Mashburn, the Lessee of said property, and the United States of America;

NOW, THEREFORE, the undersigned, as Lessor of said property under lease dated 9th day of August, 1951, does by these presents subordinate all of his right, title, and interest under the provisions of said lease to the right, title, and interest of the United States of America under the provisions of said Exploration Project Contract, and agrees that the lien and claim of the United States of America under the provisions of said contract shall be prior to the undersigned's rights to rentals or royalties under the terms of said lease; and

The undersigned further agrees that if said leasehold interest should be surrendered or if said lease should terminate at any time prior to the expiration of the rights of the United States of America under said Exploration Project Contract, the undersigned shall assume and does hereby assume all of the obligations of the Lessee under said Exploration Project Contract to make repayment to the United States of America according to the terms of said contract; and

The undersigned agrees to commit no act, nor assert any claim under judicial process or otherwise that may contravene or conflict with the prior lien and claim of the United States of America under the provisions of said Exploration Project Contract.

This undertaking and covenant shall be binding upon the heirs, successors, and assigns of the undersigned.

Dated this 1st day of December, 1951

OWNER'S CONSENT TO LIEN

WHEREAS, the undersigned, as owner, co-owner, lessor, or seller has an interest in certain property in the State of North Carolina, County of Swain, described as follows:1/

All the mineral rights and mining rights in a strip of land 200 feet in width adjoining the Grist property (referred to in the exploration project contract) on the south, said strip beginning on a hickory on the northeast corner of the Grist land, thence S 7° E 100 feet to a stake; thence N 75° E 750 feet to the Hills line; thence N 7° E 200 feet; thence with the south boundary of the Grist property to the beginning

which is the subject of a proposed exploration project contract, hereinafter called the "contract", between the United States of America, hereinafter called the "Government", and

2/ Turko Joint Venture [illegible] Carpenter, [illegible] Hills, partners

hereinafter called the "Operator"; and

WHEREAS, under certain provisions of said contract which are set forth on the reverse side hereof, the Government is entitled to a percentage royalty on production and to certain other rights and equities which do or may conflict with or be adverse to the interest of the undersigned in said property;

NOW THEREFORE, the undersigned, in consideration of said contract and as an inducement to the Government to enter into same, undertakes and agrees as follows:

1. The Government's equity in and right to dismantle, sever, take possession of, and remove and dispose of facilities, buildings, fixtures, equipment, or other items as provided in the contract, or any amendment thereof, shall prevail over and be prior and superior to any conflicting or adverse rights of the undersigned, and the Government is authorized to enter upon the land for such purposes.

2. To secure the payment to the Government of the percentage royalty on production3/ provided for under the terms of said exploration project contract, or any amendment thereof which does not increase the maximum amount of the Government's claim here stated or alter the provisions for repayment, there is hereby granted to the Government a lien upon the land herein described and upon any production of minerals therefrom, until the royalty claim is fully paid in the amount of the Government's contribution, not in excess of 4/$ 8,000.00, or ten years have elapsed from the date of the contract.

3. The undersigned shall commit no act nor assert any claim that may contravene or conflict with the lien, claim, or rights of the Government under the provisions of said contract. This agreement shall be binding upon the heirs, executors, administrators, successors, and assigns of the undersigned.

Dated this 15th day of September, 195 2.

Tressie Liner [Seal] L B Liner

Lillie Ray [Seal] R. R. Ray

Donnie Dwane Ada. [Seal]

1/ Either (a) insert the legal description of the land, or (b) strike out the words "as follows" and insert "in a lease [or contract, deed, or other document] dated _____, and recorded in book _____ page _____ official records of said county." If (b) is used, the book and page of recordation cannot be dispensed with. If the space provided is insufficient, use an Annex, and refer to the Annex in the space.

2/ Insert the name of the Operator as it will appear in the exploration project contract.

3/ Mining or production from the land is not required, and in the absence of production there is no obligation to repay the Government.

4/ Insert the maximum amount of the Government's contribution.

RELEVANT CONTRACT PROVISIONS

Repayment by Operator. (a) If, at any time, the Government considers that a discovery or a development from which production may be made has resulted from the exploration work, the Government, at any time not later than six months after the Operator has rendered the required final report and final account, may so certify in writing to the Operator. The certification shall describe broadly or indicate the nature of the discovery or development. In the event of such certification, any minerals mined or produced from the land described in Article 2 within 10 years from the date of this contract, including any mined or produced before the certification, shall be subject to a percentage royalty which the Operator or his successor in interest shall pay to the Government, upon the net smelter returns, the net concentrator returns, or other net amounts realized from the sale or other disposition of any such production, in whatever form disposed of, including ore, concentrates, or metal, until the total amount contributed by the Government, without interest, is fully repaid, or said 10 years have elapsed, whichever occurs first, as follows:

(1) One and one-half (1½) per cent of any such net amounts not in excess of eight dollars ($8.00) per ton.

(2) One and one-half (1½) per cent of any such net amounts, plus one-half (½) per cent such net amounts for each additional full fifty cents ($0.50) by which such net amounts exceed eight dollars ($8.00) per ton, but not in excess of five (5) per cent of such net amounts.

(For instance: the percentage royalty on a net amount of five dollars ($5.00) per ton, would be one and one-half (1½) per cent; on a net amount of ten dollars ($10.00) per ton, three and one-half (3½) per cent.)

(b) As here used, "net smelter returns", "net concentrator returns", and "other net amounts realized from the sale or other disposition", mean gross revenue from sales; or if not sold, the market value, the market value of the material after it is mined in the form in which and the place where it is held. In the case of integrated operations in which the material is not disposed of as such, these terms mean what is or would be gross income from mining operations for percentage depletion purposes in income tax determination.

(c) To secure the payment of its percentage royalty, the Government shall have and is hereby granted a lien upon the land described in Article 2 and upon any production of minerals therefrom, until the royalty claim is extinguished by lapse of time or is fully paid.

(d) This article is not to be construed as imposing any obligation on the Operator or the Operator's successor in interest to engage in any mining or production operations.

Title to and disposition of property. All facilities, buildings, fixtures, equipment, or other items costing more than $50.00 each, paid for or purchased with funds contributed jointly by the Operator and the Government, although title may be taken in the name of the Operator, shall belong to the Operator and the Government jointly, in proportion to their respective contributions, and upon the completion of the work or the termination of the contract shall be disposed of promptly by the Operator for the joint account of the Government and the Operator, either by return to the vendor, by sale to others, or purchase by the Operator at a price at least as high as could otherwise be obtained, as may appear to be for the best interest of the Government, unless the Government, in writing, waives its interest in any such item. If necessary to accomplish such disposition, the Operator shall dismantle, sever from the land, and remove any such item, the cost thereof to be for the joint account of the parties in proportion to their respective interests. If the Operator, within 90 days after the receipt of written notice from the Government, fails, neglects, or refuses to dispose of such property, the Government may itself enter upon the land, take possession of, and remove and dispose of any such property as above provided.

OWNER'S CONSENT TO LIEN

WHEREAS, the undersigned, as owner, co-owner, lessor, or seller has an interest in certain property in the State of North Carolina, County of Macon, which is the subject of a proposed Exploration Project Contract, hereinafter called the "Contract", between the United States of America, hereinafter called the "Government", and 1/

Burke John Mica Miners, Lin Carpenter, Norman Mashburn and John Phillips, partners.

hereinafter called the "Operator"; and

WHEREAS, under certain provisions of said Contract which are set forth on the reverse side hereof, the Government will acquire certain rights and equities which do or may conflict with or be adverse to the interest of the undersigned in said property;

NOW THEREFORE, the undersigned, in consideration of said Contract and as an inducement to the Government and Operator to enter into same, undertakes and agrees as follows:

1. The Government's equity in and right to remove facilities, buildings, fixtures, and equipment, as provided in the Contract, shall prevail over and be prior and superior to any conflicting or adverse rights of the undersigned.

2. The Government's percentage royalty on net smelter returns or other net proceeds realized from ore, concentrates, or metal produced within ten (10) years from the date of the Contract, and the Government's lien for the payment of said percentage royalty shall attach to the mineral deposit and the production therefrom in the amount of the Government's contribution, not in excess of 2/ $8,000.00, all upon the terms and conditions set forth in said Contract.

3. The undersigned shall commit no act nor assert any claim that may contravene or conflict with the lien, claim, or rights of the Government under the provisions of the said Contract. This agreement shall be binding upon the heirs, executors, administrators, successors, and assigns of the undersigned.

Dated this _____ day of _____, 195_.

INSTRUCTIONS

Read Mineral Order 5, Regulations Governing Government Aid in Defense Projects, before completing this application. Submit four signed copies of the application to Defense Minerals Administration, Department of the Interior, Washington 25, D. C., or to the nearest field executive officer thereof, with your name and address on each sheet of the application and all accompanying papers. If any question is inapplicable, or if you cannot answer it, so state on the form. Where the space provided for answer is insufficient, answer on a separate sheet, annex it to the application form, and refer to it in space for answer. If the application is approved, you will be presented with an exploration project contract on Form MF-200, for your signature.

THE APPLICANT

*1. Is applicant an individual, partnership, or corporation?
*2. If a partnership, state names and addresses of partners.
*3. If a corporation, state names and addresses of officers, directors, and five largest stockholders.
*4. Describe the mining and general business experience of (*a*) the applicant, and (*b*) the person or persons who will manage the project.
*5. Are you the owner or the lessee of the property?
6. If owner, state what claims, liens, or encumbrances, if any, are against the property.
7. If lessee, attach a copy of the lease and state if it is in good standing.

NOTE.—It will be necessary to procure and attach to the exploration project contract agreements of claimants, lienors, encumbrances and lessors subordinating their interests in the property to the interest of the Government under the contract.

8. Furnish current financial statement, showing assets and liabilities, and a profit and loss statement.
9. How much money is applicant prepared to invest in proposed project? Is it sufficient to pay your part of the cost of the project as detailed in question 23 of this application form, in accordance with the regulations on Government participation (Section 9 of Mineral Order 5)?

*If you have already answered these questions on MF-100, you are not required to answer the questions for this application.

16—64067-1

THE PROPERTY

10. (*a*) Give a description of the real property that will be in any way involved in the exploration project, including any existing mine or operating property.

(*b*) Give the legal description of the exact parcel, plot, or area upon which the exploration is to be conducted.

NOTE.—If both areas are the same, so state. The only obligation to repay the Government is from the net earnings from any commercial discovery made in the area specified in (*b*) above in which the exploration is to be conducted, and the expenditure of funds which may be charged as costs of the project must be limited to that area or to work necessary to perform the exploration in that area.

*11. State the present and former names of the property, if any.

*12. State, in detail, the location of the property with reference to towns, railroads, roads, shipping points, including distances and directions and kinds and conditions of roads.

*13. State source and quantity of water available for operations and its sufficiency at all seasons. State amount of power to be used, rate per hour or other cost, and source.

*14. Describe any existing useable facilities, equipment, buildings, or structure now on the property that will be devoted to the exploration work.

15. State in detail how the ore could be shipped and how and where milled.

*16. History:

(*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for any past suspensions of operations.

(*b*) State briefly the known history and production of adjoining and neighboring properties.

(*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.

*17. Production:

(*a*) If mine is in production, furnish the following information:

	Tons per day	*Grade or analysis*	*Cost per ton*	*Net value per ton*
(1) Mining				
(2) Milling				
(3) Shipped or sold				

*18. Ore or mineral reserves: (If property is or has been operating.)

(*a*) Describe the ore or mineral deposits briefly.

(*b*) Submit available maps and assay data.

(*c*) Give estimated tonnage and grade of each class of ore reserves.

19. State any conditions or circumstances regarding the property not sufficiently brought out by the foregoing questions.

THE EXPLORATION

20. For what mineral or minerals and for what types of deposits and ores will the exploration be conducted?

21. Describe briefly, but concisely, the proposed work and the estimated time required to complete it.

NOTE.—The Government will not participate in a project that will require more than 2 years to complete.

22. Furnish statement of the geological basis of the project with particular emphasis on factors leading the operator to expect the finding of commercial ore bodies. This statement should be accompanied by supporting maps such as geological maps, maps of the proposed openings and assay maps, sample lists, and other pertinent data.

THE REQUIREMENTS AND COSTS

23. Tabulate in the form of an itemized statement with a sum for each item the estimated requirements and costs of the project so that the total will give the estimated cost of the project in which the Government will participate, as follows:

(*a*) Labor, by numbers and classes (miners, muckers, millmen, etc.), with wages of each.

(*b*) Supervisors, by numbers and positions, with salaries of each.

(*c*) Cost of necessary repairs to existing facilities, structures, and buildings.

(*d*) Cost of necessary installation or construction of additional facilities, structures, and buildings.

(*e*) Cost of items of equipment, not now owned by the applicant which must be purchased for operations at a cost of $50 or more each.

(*f*) Cost of rental for equipment which the operator proposes to rent.

(*g*) Rental value of items of equipment which the operator now owns and which will be devoted to the work.

(*h*) Cost of materials and supplies, including items of equipment costing less than $50 each.

(*i*) Cost of power, water, utilities, and any other items not provided for above.

24. Furnish a time schedule of the project, stated in terms of months after project is approved, showing progress expected to be accomplished and the money expected to be spent.

CERTIFICATION

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this form and accompanying papers is correct and complete to the best of their knowledge and belief.

*Same as footnote on page 1.

16—64067-1 U. S. GOVERNMENT PRINTING OFFICE

Burke John Mica Miners
c/o Lin Carpenter, Manager
Spruce Pine, North Carolina

1. Applicant is a partnership, a joint venture of persons named in answer to question 2.

2. Lin Carpenter, J. C. Buchanan, of Spruce Pine, North Carolina, and N. E. Mashburn of Franklin, North Carolina.

3. Not a corporation.

4. For mining and general business experience of persons in this joint venture, see Exhibit A.

5. Lessee--See Exhibit B.

6. Not owner of property.

7. Lease is in good standing, copy is attached as Exhibit B.

   Note: Six copies of landlords subordination agreement is attached to original copy of this application as Exhibit B.

8. No financial statement. New joint venture.

9. Applicant will donate the rental value of its air compressor, hoist, hand tools, two jackhammers, and station wagon. It will also donate the drill steel that will be consumed. It will be seen that the value of this participation approximates 20% of the cost of the project. See answer 23.

10. (a) Legal description is a matter of record in the land records of Macon County. See Lease in Exhibit B which sets forth Book and Page of records in which legal description is incorporated.

    (b) Exploration to be conducted within 300 foot radius of center of abandoned shaft marked on map of mine. See Exhibit C.

11. Burke John Prospect.

12. Roads are generally good for this area. Access to mine needs improving, and will be improved when and if commercial production is attained. Prospect is five miles N.W. of Franklin, Macon County, North Carolina. See map at Exhibit C. Ore can be trucked to Franklin where it can be sold, or shipped by the Tallulah Falls R.R. to the Government purchasing depot or stockpile. Ore can also be trucked to Spruce Pine which is approximately 110 miles northeast of Franklin.

13. Strategic grade mica. No flow plant operations are now contemplated. However, if sufficient columbite, tantalum, and other pegmatite hevies are discovered, a small plant may be installed on the Iotla creek that will reduce these hevies to a saleable conglomerate.

14. None.

15. Ore can be shipped by truck to Franklin, 5 miles southeast of mine, or to Spruce Pine, 110 northeast of mine. See answer to question 12.

16. There is no production history. However this prospect was viewed by the USGS during World War II, and that Government agency probably has an approximation of its potentialities. Mica from this prospect has been tested by Dr. Jahns and Lancaster. See USGS paper 225, page 56.

17. Not now in production.

18. Ore reserves not known. The purpose of this exploration project is to determine the mineralization of this pegmatite dyke at the places it will be penetrated by the shafts as explained in answer to question 21.

19. None.

20. Strategic sheet mica.

21. It is proposed to begin with a dozer cut fifty feet downgrade from the abandoned shafts. (See Exhibit C.) This first dozer cut will be run parallel with an' imaginary line running throught the shaft openings. The cut will be 100 feet long, 15 to 20 feet deep, and 12 feet wide at its lowest depth. A second cut will be made 50 feet lower downgrade and parallel to both the first cut and the line of abandoned shafts. This second cut will also be 100 feet long, 15 to 20 feet deep and 12 feet wide at its lowest depth.

    Mr. Mashburn, a member of the partnership, has reason to believe that the past workings were done too high upgrade. It is his belief that the pegmatite dyke lies in a plane parallel with the surface grade or dipping at less angle than the surface grade. It appears that the major portion of the dyke has never been contacted but rather that the prior prospectors were on the fringe of the dyke on its upgrade side.

    To outline the width of the dyke as well as its length it is proposed to make a dozer cut perpendicular to the line of abandoned shafts starting at the base of this imaginary line and going downgrade for a distance of one hundred feet to intersect the lowest level dozer cut.

    To determine the mineralization of the dyke it is proposed to sink a shaft at opposite ends of each of the parallel dozer cuts and to lower these shafts through the dyke. If mica bearing gneiss is contacted in lowering these shafts it is desired to drive a tunnel toward the old shafts to determine the extent and proportion of the mica gneiss to the pegmatite dyke.

    This prospect lies in the immediate vicinity of mines that have produced large quantities of ruby muscovite of high quality. It is felt that this prospect should be explored at least to the extent set forth above. If the USGS or the DMEA field team feel that the exploration should be conducted in a different manner, their suggestions will be graciously received.

22. Possibilities are a matter of record with the USBM and USGS.

23.

	per week	12 week total
(a)		
2 muckers at $40 each	$80	1920
2 drillers at $50 each	100	2400
(b)		
1 supervisor	50	1200
(c) none.		
(d) none.		
(e) *Misc. hand tools		250
(f) none.		
(g) *1 105 cu. ft. air compressor		450
*1 hoist complete		300
*2 jackhammers		420
*1 station wagon		360
(h) *Drill steel		100
Drill bits		300
(i) Gas and oil	25	600
Dynamite	25	600
Bulldozing 80 hrs. at $12.50		1000
		$9900.00

* Value total $1880

24. Applicant anticipates that the dozer cuts and shafts can be completed in the three month period. However, if the dyke is further underground than is now expected, an extension of the contract might be requested.

INSTRUCTIONS

This form is to be filed with Defense Minerals Administration, Department of the Interior, Washington 25, D. C. It should be accompanied by appropriate application form when a specific type of Government assistance is requested, in the form of (1) loan, (2) purchase contract, (3) Government guarantee of a private loan, (4) priorities or allocation of mining equipment, and maintenance, repair and operating supplies, and (5) other forms of Government assistance that might arise under the Act. Submit four (4) signed copies of the form and accompanying papers. Name and address should be stamped or typed on each sheet of this form and all accompanying papers. *When a question is inapplicable it should be so stated on the form.* Additional sheets may be attached in answering any questions or in supplying additional information. (IF YOU CANNOT ANSWER A QUESTION, SO STATE.) If a question is answered elsewhere indicate where answered. It is not necessary to answer it again.

GENERAL TECHNICAL DATA

Supply the following information on separate sheets, arranged, numbered, and lettered as indicated:

1. Materials produced:
   (*a*) What are the chief mine, mill, or smelter products?
   (*b*) What are the byproducts, if any?
2. Name(s) and type(s) of mine(s), mill(s), smelter(s), refinery(ies), pit(s), quarry (ies), drilling operation(s). Include old names of property, if any. Show extent of workings, including the following:
   (*a*) Linear feet of shafts.
   (*b*) Linear feet of drifts and crosscuts.
   (*c*) Linear feet of tunnels or adits.
   (*d*) Linear feet of other mine openings (explain briefly).

   Indicate whether mine is flooded or not. Describe any pumping problems. Give size or productive capacity.
3. For each operation listed above supply the following:
   (*a*) Distance and direction from nearest town and shipping point.
   (*b*) Mining district.
   (*c*) Township, Section, Range.
   (*d*) County, State.
4. (*a*) State whether or not property is now in operation, and if in operation, by whom operated.
   (*b*) Are you operating this property as:
   - ☐ Owner.
   - ☐ Lessee.
   - ☐ Contractor.
5. Number of years in production _____

   If not in production or operation, estimated date when production will begin _____
6. Experience of operators:
   Describe the mining and general business experience of (*a*) the applicant, and (*b*) the person or persons who manage the project.
7. History:
   (*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for suspension of operation.
   (*b*) State briefly the known history and production of adjoining and neighboring properties.
   (*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.

8. Names and addresses of Officers, Directors, or Partners, and in addition thereto, the five largest stockholders if applicant is a corporation.

Name and Address (a)	Official Title (If officer is also director indicate by "D") (b)	Total of Annual Salary, Commissions, Bonuses, Etc., Received From Applicant and Affiliates During Last Fiscal Year (c)	Estimated Net Worth Outside of Interest in Applicant (d)	Number of Shares Held in Applicant Corporation: Common (e)	Number of Shares Held in Applicant Corporation: Preferred (f)	Life Insurance Carried for Benefit of Applicant: Amount (g)	Life Insurance Carried for Benefit of Applicant: Net Cash Surrender Value After Loans (h)
Lin Carpenter	gen. part.	----	75,000	----	----	----	-----
Spruce Pine, N. C.							
J. C. Buchanan	gen. part.	----	20,000	----	----	----	----
Spruce Pine, N. C.							
N. E. Mashburn	gen. part.	----	15,000	----	----	----	-----
Franklin, N. C.							
	Total		x x x x x			x x x x x	x x x x x

If more lines are needed continue on separate sheet.

9. Capital Stock Issues:

Not applicable

For Corporate Applicants

Item	Authorized (a)	Outstanding (b)	Par Value (c)	Number of Shares Outstanding (d)	Dividend Rate Last Paid* (e)
Common stock	$	$	$		
Preferred stock	$	$	$		

*Indicate period covered.

10. Production:

Item	Kind of Product (a)	1948 Total (b)	1949 Total (c)	1950 Total (d)	Present Average Monthly (e)
1. Quantity of product mined or quarried (Short, long, metric tons; barrels; pounds; etc.)					
2. Quantity of product processed (specify unit of measure and type of process)					
3. Quantity and grade of product sold or shipped (specify units of measure)					

11. Do you contemplate a change in the present average monthly rate of production? If so, state estimated maximum monthly production and basis of change.

12. Ore or Mineral Reserves:

(a) Describe the ore or mineral deposit briefly. Accompany the application by any available report on the geology and ore reserves.

Burke John Mica Miners
c/o Lin Carpenter, Manager
Spruce Pine, North Carolina

1. (a) Strategic mica.
   (b) Feldspar.

2. New project. Old prospecting shafts have been abandoned. Proposed workings are not flooded.

3. (a) Prospect is five miles NW of Franklin, Macon County, North Carolina.
   (b) Franklin--Sylvan
   (c) Not applicable
   (d) Macon County, North Carolina.

4. (a) Not now in operation.
   (b) Lessee

5. Not now in production. Will be placed in production if requested exploration contract work reveals commercial mineralization of pegmatite.

6. See attached personal history sheets.

7. History not known by applicant.

8. Answered on form.

9. Not applicable.

10. Not now in production.

11. Production depends on results of exploration.

12. Not known. It is anticipated that exploration will aid in determining mineral reserve.

13. Access road is useable. Will be improved if commercial production is commenced.

14. Iolta creek is within 500 feet of mine. No flow operation contemplated.

15. Gasoline fuel will be used.

16. It is proposed to hire
    2 muckers
    2 drillers
    1 supervisor

17. 1 105 cu. ft. air compressor
    1 hoist complete
    2 jackhammers
    1 station wagon

18. This prospect is located in an area that is well known for its mica deposits.

(*b*) If deposit is other than placer:

(1) Submit assay plans and/or sections showing location and size of proved (measured) and probable (indicated) ore or mineral reserve.

(2) State the tonnage (indicate type of ton) and grade of each class of ore reserve, as above, and show how computed. Tabulated total ore reserve as follows:

TOTAL ORE OR MINERAL RESERVES

Ore or Mineral Reserve	Estimated Tons (a)	Metal or Mineral Content Per Ton (Grade) (b)	Gross Value Per Ton (c)	Recoverable Unit Value Per Ton (d)	Estimated Cost of Production Per Ton (e)
Measured (proved)					
Indicated (probable)					

(*c*) If placer:

(1) Give estimated total yardage and average marketable mineral content of each deposit.

(2) Submit map showing location of placer deposit and surrounding area, with all test holes or pits. Submit logs of each hole and test pit with depth and average value of each.

(3) Describe gravel, stating whether fine, medium or coarse; loose, tight, cemented, or frozen, and whether it contains stumps or boulders more than 1 foot in diameter; if so, how large, and in what proportion.

(4) Describe bedrock, giving type (granite, sandstone, shale, etc.) and state whether it is hard or soft, smooth, uneven or rough.

(5) Describe overburden, stating whether loose, tight, or cemented; fine or coarse textured; furnish estimate of average thickness and total amount.

(6) Tabulate the reserves using the form outlined above for ore or mineral reserves.

13. Access Roads:

Give road distances to shipping, supply and residence points, stating kind and condition of roads.

14. Water Supply:

State source and quantity of water available for operations and whether sufficient for all seasons of year.

15. Power:

State amount of power used, rate per hour, and source thereof.

16. Labor:

State number and classes (miners, muckers, millmen, etc.) of men employed during a recent representative payroll period.

17. Equipment and Facilities:

Describe present equipment on the property, including buildings. (State condition.) List major pieces of equipment now owned or controlled and in serviceable condition available for this operation.

18. Are there any particular conditions or circumstances affecting your operations that are not described above? If so, explain.

U. S. GOVERNMENT PRINTING OFFICE 16—63792-1

VEIN

NORTH CAROLINA

MACON COUNTY

THIS LEASE AGREEMENT, Made and entered into this the 9th day of August, 1951, by and between ELISA COBB GRIST and her husband, PAUL GRIST, of Macon County, North Carolina, parties of the first part, and N. E. MASHBURN, of Macon County, North Carolina, and LIN CARPENTER and J. C. BUCHANAN, of Mitchell County, North Carolina, parties of the second part;

W I T N E S S E T H:

That said parties of the first part in consideration of One ($1.00) Dollar paid to them by parties of the second part, the receipt of which is hereby acknowledged, and subject to the terms and conditions hereinafter set forth, have let and leased and by these presents do hereby let and lease unto said parties of the second part, their heirs and assigns, the mica and all mica mining privileges as hereinafter set forth, upon the following described lands in Macon County, North Carolina:

> Situated on the waters of Totla Creek, and consisting of all the lands described in a deed from J. Frank Ray, Trustee, to M. D. Billings, dated 15 September, 1923, and registered in the office of the Register of Deeds for Macon County, in Deed Book J-4, page 229, and also all the lands described in a deed from N. L. Barnard and wife, to Mrs. T. O. Havener and M. D. Billings, dated 20 January, 1917, and registered in the office of the Register of Deeds for Macon County, in Deed Book X-3, page 571, and the lands described in a deed from W. R. Morgan and his wife, Ellen Morgan, to M. D. Billings, dated 24 April, 1919, and registered in the office of the Register of Deeds for Macon County, in Deed Book I-4, page 270.

The terms and conditions of this lease are as follows:

1. Parties of the second part shall have the right under the terms hereof to enter upon said property and explore, prospect for, mine, dig, mill, process and remove all mica now in, under or upon the above described lands; to construct such roads or trails, and erect such structures and buildings upon said property as may be necessary or convenient to properly conduct mining operations, and the right to use the water in any stream upon said land for such mining operations.

2. Parties of the second part agree to pay to parties of the first part the following royalty:

(a) Twelve and one-half ($12\frac{1}{2}\%$) per cent of the gross selling price of all sheet mica recovered from said property.

(b) One and one-half ($1.50) Dollar per ton for all scrap mica recovered from said property.

3. Parties of the second part agree to make all royalty payments, monthly, on or before the 10th day of each calendar month on all mica sold the preceding month.

4. Parties of the second part agree to keep a correct and itemized record of all sales, which record shall be open for inspection of parties of the first part, and parties of the second part shall furnish to parties of the first part at the time of each monthly payment a copy of each sales report or invoice.

5. The duration of this lease shall be three (3) years from the date hereof, but it is understood and agreed that if mining operations upon said property shall prove profitable, then parties of the second part shall have the right to renew this lease for one (1) year at the end of said time, provided that they shall have operated the mine continously for the preceding eight (8) months.

6. As a part of this lease, parties of the first part give and grant unto the parties of the second part such necessary right-of-way, as the parties of the first part own or have power to convey, to build such trails or roads upon said property as may be necessary for the installation of machinery or the proper operation of the mines.

7. Parties of the second part further agree to pay the dumping fee of Twenty-five ($25.00) Dollars per annum for dumping muck on the adjoining property owned by Fred Willis.

8. If the parties of the second part shall fail to operate the mine for any period of sixty (60) full working days, the parties of the first part, at their option, may declare this lease terminated and of no further force and effect, and upon notice to parties of the second part of such termination, the said parties

of the second part shall surrender to parties of the first part immediate possession of the property.

9. So long as this lease shall be in effect the parties of the second part shall operate the mines in such manner as not to unnecessarily damage the property for further operation, and shall keep the mines properly timbered, and either remove all muck as they operate or place it on well-timbered lofts.

TO HAVE AND TO HOLD said mica and mining privileges hereinabove set forth according to the terms hereof, unto the said parties of the second part, their heirs and assigns, to their only use and behoof.

IN TESTIMONY WHEREOF, the parties hereto have hereunto set their hands and seals, the day and year first above written.

NORTH CAROLINA
MACON COUNTY

THIS LEASE AGREEMENT, Made and entered into, this the 26th day of July, 1952, by and between L. B. LINER and wife, TRESSIE LINER, R. G. RAY and wife, LILLIE RAY and DONNIE DUVALL and ROY H. FOUTS ~~and wife,~~ ~~FOUTS~~ of Macon County, North Carolina, parties of the first part, and NORMAN MASHBURN of Macon County, North Carolina, LIN CARPENTER and JOHN PHILLIPS of Mitchell County, North Carolina, parties of the second part,

W I T N E S S E T H

That said parties of the first part for and in consideration of the sum of ONE ($1.00) DOLLAR to them paid by the parties of the second part, receipt of which is hereby acknowledged, and subject to the terms and conditions hereinafter set forth, have let and leased, and by these presents do hereby let and lease unto said parties of the second part, their heirs and assigns, all the minerals, mineral rights, mining privileges and all other rights, easements and privileges in the following described portion of the lands set forth and described in that certain mining lease made and entered into on the 4th day of April, 1952 by L. B. Liner and wife, Tressie Liner, R. G. Ray and wife, Lillie Ray, Donnie Duvall, to Roy H. Fouts. The portion of the lands conveyed in this lease is described as follows:

A strip of land 200 feet in width adjoining the Grist property on the South, said strip beginning on a hickory, the Southeast corner of the Grist land, thence S 7 W 200 feet to a stake; thence N 75 W 750 feet to Willis line; then N 7 E 200 feet; thence with theSouth boundary of the Grist property to the BEGINNING.

THE TERMS AND CONDITIONS OF THIS LEASE ARE AS FOLLOWS:

1. Parties of the second part shall have the right,

under the terms hereof, to enter upon said property and explore, prospect for, mine, dig, mill, process and remove all minerals now in, under or upon the above described lands; to construct such roads or trails and erect such structures and buildings upon said property as may be necessary and convenient to conduct mining operations, and the right to use the water of any streams upon said land for said mining operations.

2. Parties of the second part agree to pay to parties of the first part the following royalty: Twelve and one-half (12½) per cent of the gross selling price of all minerals recovered from said property, with the exception of scrap mica, for which the royalty shall be $1.50 per ton.

3. Parties of the second part agree to make all royalty payments monthly, on or before the 15th day of each calendar month on all minerals sold the preceding month.

4. Parties of the second part agree to keep a correct and itemized record of all sales, which record shall be open for inspection of parties of the first part, and parties of the second part shall furnish to parties of the first part, at the time of each monthly payment, a copy of each sales report or invoice.

5. The duration of this lease shall be Three (3) years from the date hereof.

6. As a part of this lease, parties of the first part give and grant unto parties of the second part such necessary rights-of-way as said parties of the first part own or have power to convey to build such trails or roads upon

said property which may be necessary for the installation of machinery or the proper operation of the mines.

7. If the parties of the second part should fail to commence to operate the mines upon said property on or before three (3) months from this date, or fail to operate the mines for any period of 120 full working days, the parties of the first part at their opetion may declare this lease terminated and of no further force and effect, and upon notice to parties of the second part of such termination, said parties of the second part shall surrender to said parties of the first part immediate possession of of such property.

8. The parties of the second part agree to commence operation of said mines as soon as possible and to work the same continually during the term of this lease, unless it is necessary to close the same on account of weather conditions or other causes beyond the control of parties of the second part.

9. So long as this lease shall be in effect, said parties of the second part shall operate the mines in such manner so as not to unnecessarily damage the property for further operation, and shall keep the mines properly timbered.

TO HAVE AND TO HOLD said mica and mining privileges hereinbefore set forth according to the terms hereof, unto the said parties of the second part, their heirs and assigns, to their only use and behoof.

IN TESTIMONY WHEREOF, the parties hereto have set their hands and seals, the day and year first above written.

Project Summary Report

By: Lawrence G. Houk June 24, 1954

1. DMEA Docket No. 2277 - Mica
Contract No. Idm-E412
Burke John Mine
Macon County, North Carolina

Operator: Burke-John Mica Miners
Spruce Pine, North Carolina

Operator's property rights:
Lease Agreement dated August 9, 1951.
Lease Agreement dated July 26, 1952.
Owner's Consents to Lien (two) dated September 15, 1952.

2. Contract - dated October 1, 1952

Work authorized:
Stage I:

Labor, Supervision, Consultants		$1,220.00
Operating Materials and Supplies		460.00
Operating Equipment		
Rented	$300.00	
Purchased	500.00	800.00
Miscellaneous		240.00
Contingencies		180.00
		2,900.00

Stage II:

Drift and crosscut 150 feet @ $26.00/ft.	3,900.00
Total estimated cost Stages I & II	$6,800.00
Government participation at 90%	$6,120.00

Amendments:
No. 1 - 4/15/53 - Increases cost of authorized contract from $6,800.00 to $8,100.00, and Government participation from $6,120.00 to $7,290.00.
No. 2 - 5/15/53 - Extends completion date from 8 mos. to 12 mos.
No. 3 - 9/28/53 - Extends completion date from 12 mos. to 16 mos.
No. 4 - 2/1/54 - Extends completion date from 16 mos. to 19 mos.

Work completed:

136 ft. of drifting at $26.00/ft.	$3,536.00
14 ft. crosscutting at $26.00/ft.	364.00
Rehabilitating adit, etc.	3,900.00
Surveying	60.00
Bulldozing	300.00
Total	$8,160.00
Less disallowed surveying	(60.00)
Less salvage value of equipment	(100.00)
Total accepted cost	$8,000.00
Government participation at 90%	$7,200.00

Work began on October 6, 1952, and was completed on April 30, 1954.
Final Field Team Report received 6/14/54
Final Operator's Report received 5/25/54

3. Audit - Report of Review dated June 9, 1954.

Total cost as billed by Contractor		$8,160.00
Less proceeds from property disposition		100.00
Net cost as claimed by Contractor		$8,060.00
Exceptions:		
By DMEA Finance Officer	$60.00	
Herewith	-0-	60.00
Total accepted cost		$8,000.00
Government participation 90%		$7,200.00

4. Certification of discovery _____.

5. Comments:

How conducted - In an efficient and satisfactory manner.

Operation - good.

Engineering - good.

Geological premise - The previously mined mica shoot, about 50 ft. in length, continued to depth.

Geological criteria upon which work was based: Zoned pegmatite of minimum thickness of 19 feet.

Criteria developed during project: None. The shoot did not continue to depth.

Future possibilities: Possitilities for feldspar production exist. No additional exploration warranted.

Recommendations: The Nonmetallic Minerals Division concurs in the Field Team's recommendation to certify. The Bureau of Mines and the Geological Survey concur.

Re: DMEA-2277 (Mica)
Burke John Mica Miners
Burke John Mine
Mitchell County, North Carolina
Contract Lds-8412

Gentlemen:

By the terms of the subject Exploration Project Contract, as amended, and the certification of discovery or development dated June 30, 1954, all minerals mined or produced from October 1, 1952, to October 1, 1962, were subject to the Government's royalty as set forth in said contract.

As the period during which production was subject to royalty has now expired, the Government according to its present records retains no claim or lien against the property subject to the contract or any future production therefrom. We, therefore, are closing our books and records on this contract. Your attention, however, is called to the provisions of the contract which require the Operator to keep and preserve certain records for the periods indicated.

Sincerely yours,

George Fumich, Jr.

Director

Mr. Sam L. Phillips, Partner
Burke-John Mica Miners
Spruce Pine, North Carolina

Dear Mr. Phillips:

After the completion of the approved exploration work under the contract identified above, we asked to be informed about changes in the status of the property and production from it during the period of royalty obligation.

To assist you to furnish this information and to assure the accuracy of our records, please answer the questions on the back of this letter and return two copies to this office with copies of any pertinent documents.

If you will be kind enough to bring us up to date we shall be able to release the Government lien against production from this property.

Royalty expired 10/1/62

DMEA EXPLORATION PROJECT

SEMI-ANNUAL REPORT OF CERTIFIED PROJECT

DMEA-2277, Idm-E412 (mica) BURKE-JOHN MINE
Macon County, North Carolina

Reporting Period: July 1, 1957 to January 1, 1958

Operators: Lin Carpenter, Norman Mashburn and John Phillips, d/b/a Burke-John Mica Miners, Spruce Pine, N.C.

This mine was visited January 23, 1958. The only work done on the property since the last inspection was a few passes with a bulldozer by Roy H. Fouts on the north side of the pegmatite. A little ruled mica of no value was uncovered.

The old adit cannot be entered as it has caved.

Contract Number --- Idm-E 412

Date of Contract October 1, 1952

Date of Certification June 30, 1954

Expiration Date of Royalty Payments October 1, 1962

Total Amount of Contract	$8,100.00
Total Expenditures under Contract	7,200.00
Amount of Government Participation at 90 %	7,290.00

Royalty Payments this Period	None
Previous Royalty Payments	$22.27
Total Royalty Payments to Date	22.27
Percent Government Participation Repaid	0.309 of 1% (Based on total expenditures)

Royalty Due on Production to Date None

Royalty Remarks

Royalty has been paid in full on mica production to date. No feldspar has been sold or mined since contract has been terminated, hence no royalty is due.

Feldspar:

Original Estimate of Reserves (from final Engr.-Geol. Report): Indicated - 3,250 tons; Inferred - 15,000 tons

Increase (or Decrease) of Reserves by work performed subsequent to original and last Field Team estimates: None

Revised Estimate of Reserves:

Production this Period (Ore or Concentrates) in suitable detail None

Amount of Previous Production (since date of contract) $445.36

Total DMEA Production to Date $445.36 ; 45.03 lbs. sheet mica.

Percent of Revised Reserves Mined None

Production Remarks:

No production during this period.

Other Remarks:

(Investments, description of additional exploration or development work, production facilities, and plant installations, etc. since completion of the exploration project work.)

Chalmers Mashburn, who lives about 50 yards from this mine on the lease property, reports that the operator has stated recently that some additional work for mica may be attempted in the near future.

Mr. Irving Gumbel, Acting Director
Materials Division
Emergency Procurement Service
General Services Administration
Washington 25, D. C.

Re: Docket No. DMEA-2277 - Mica
Burke-John Mica Mineral
Burke John Mine
Macon County, North Carolina
Contract No. Idm-E412

Dear Mr. Gumbel:

I am enclosing one copy of a certification of discovery or development relating to the subject contract.

The exploration contract was signed October 1, 1952, with the Government participating to the extent of 90% of $6,800.00 or $6,120.00, and amended to total $8,100.00, April 15, 1953.

The project was started on October 6, 1952, and completed April 30, 1954, after the expenditure of $8,000.00, which is the total net accepted cost according to the Audit Review. The Government paid 90% of the total accepted cost or $7,200.00.

The work performed on this project consisted of rehabilitation of an existing 178-foot adit and driving 150 feet of levels in pegmatite. The exploration work encountered only a small quantity of strategic mica; however, commercial grade feldspar was found which the DMEA Field Team estimates amounts to 3,250 tons of indicated ore above level of adit, and 15,000 tons of inferred ore to 60 feet below the adit and extended 50 feet on each end of exposed pegmatite. Equipment purchased for the contract was one mine car at $115.00, and mine rail at $350.00. This was sold as salvage for $150.00, and 90% of this amount was deducted from the Operator's final voucher.

The DMEA concurs with the field team evaluation of the work performed and has certified that a discovery or development has resulted from the work under this contract.

Sincerely yours,

C. O. Mitteadorf

Re: Docket No. [illegible]77 - Mica
Marks John Mine
Marks-John Mica Mines
Mason County, North Carolina
Contract No. Im-[illegible]

Dear Mr. Phillips:

Transmitted herewith is a certification of discovery or development on Contract No. Im-[illegible] on the Marks John Mine, Mason County, North Carolina.

By the terms of the Exploration Project Contract and of the certification, all production from the property from the date of the Exploration Project Contract, October 1, 1954, is subject to the Government's percentage royalty as set forth in the contract until the sum of $7,200.00 is paid or until October 1, 1962, whichever occurs first.

Payments should be made to Mr. Robert A. Laurence, Executive Officer, Defense Minerals Exploration Administration Field Team, Region VII, Room 13, Post Office Building, Knoxville 2, Tennessee. Checks should be drawn payable to the Treasurer of the United States. The purchaser should be advised to deduct the royalties from the amount due on each shipment and forward check direct to the Executive Officer.

Royalty payments to the Government should be accompanied by suitable evidence, such as copies of settlement sheets showing quantity and grade of ore sold, the name of the purchaser, and the price and charges certified to be correct by the purchaser.

You are requested to notify Mr. Laurence of any changes in ownership or production rights that may have any effect on the Government's right to its percentage royalty. Also, if production ceases at any time for any extended period, please notify Mr. Laurence at six-month intervals that no production has been made.

Sincerely yours,

C. O. Mittendorf (for)

Memorandum

To: Nonmetallic Minerals Division
Defense Minerals Exploration Administration

From: Acting Chief, Ceramic and Fertilizer Materials Branch

Subject: DMEA-2277 (mica)

Contract Number: Idm-412

Applicant: Burke-John Mica Miners

Name and Location of Property: Burke-John Mine
Macon County, North Carolina

Date of Field Team's Final Report: June 10, 1954

Date Rec'd. by Ceramic & Fertilizer Materials Br.: June 18, 1954

Field Team's Recommendation:

1. Certification of discovery or development.

Comments:

1. Exploration began October 6, 1952 and was completed April 20, 1954.

2. Exploration was by rehabilitation of adit 178 feet, extension of adit 136 feet, and crosscutting 14 feet.

3. Mica obtained through DMEA exploration was sold for about $400.

4. A total reserve of 18,250 tons of feldspar has been estimated.

5. Expenditures

Total approved	$8,100
Total cost	8,100
Gov't. share of cost	7,290
Value	400

Recommendation:

I concur in the field team's recommendation to approve certification of discovery or development.

June 17, 1954

Memorandum

REVIEW OF FIELD TEAM REPORT ON APPLICATION DMEA-2277 (Mica).

To: L. G. Houk, Defense Minerals Exploration Administration
From: D. A. Brobst, U. S. Geological Survey
Applicant: Burke-John Mica Miners % John Phillips, Spruce Pine, N. C.
Name of property: Burke-John Mine
Location of property: 3 airline miles N. 60° W of Franklin, Macon Co., N. C.; also 1200 ft. west of Piondexter Branch at Iotla Creek.
Date of field team report: June 9, 1954
Authorship of field team report: K. H. Teague and D. H. Amos, USGS and L. E. Shirley, USBM.
Field team's recommendation: Issue a certificate of discovery, mainly on the basis of the indicated and inferred reserves of commercial feldspar estimated to be 3,250 tons (indicated) and 15,000 tons (inferred).

Comments: Some mica was found although the quality was not very good. With some possible mica recovery, in addition to the known commercial feldspar, certification of the deposit will protect our interest in the property.

ACTION RECOMMENDED: Follow field team's recommendation.

FINAL REPORT
ON
DMEA#2277, BURKE-JOHN MINE (mica)
Idm-E 412

Operator: Burke-John Mica Miners, c/o John Phillips, Spruce Pine, N.C.

The Burke-John Mine is located 3 airline miles and 5 miles by road N. 60° W. of Franklin, Macon County, N. C. It is about 1200 feet west of Poindexter Branch at Iotla Creek.

Work completed under the contract consisted of rehabilitation of an existing 178 foot adit and driving 150 feet of levels in pegmatite. Only a small quantity of strategic mica was recovered during the project, but considerable feldspar of high quality was discovered. As feldspar production is economically feasible from this mine a certification of discovery should be issued. No additional exploration is warranted.

Work began on the project October 6, 1952, and was completed April 30, 1954. The caved portal of an existing adit was cleared by bulldozing and the adit was rehabilitated a total of 178 feet. Heavy ground necessitated continuous timbering through the adit. This adit was extended 136 feet northwestward along the hanging wall of the pegmatite. A 14-foot crosscut northward to the footwall was made 116 feet from the head of the drift.

A survey was made at the Operator's expense to establish the relation of this work to the mica shoot previously mined. It indicated that the head of the adit was beyond the projection of the mica shoot mined above.

A zoned pegmatite, maximum thickness 19 feet with a quartz core 0-2 feet thick was revealed by the drifts and crosscut. The core thickens to the northwest. The pegmatite strikes N. 70°- 80° S.W. and is conformable to the country rock, biotite-chlorite and hornblende gneiss. It consists of plagioclase, microcline, quartz, occasional ruby muscovite and garnet. The feldspar occurs in large crystals with negligible included foreign material.

One block of ruled mica which weighed about 150 pounds was recovered about 14 feet from where the pegmatite was first intersected by the adit. It was sold for a little over $400. About 100 pounds of poor quality book mica was recovered in or near the crosscut. Most of the latter was small and cracked.

Reserves of feldspar are estimated as follows:

Indicated	(above level of adit)	3,250 tons
Inferred	(to 60 feet below drift level and extended 50 ft. on each end of exposed pegmatite)	15,000 tons

Expenditures:

(a)	Total approved	$8100.00
(b)	Total cost of project	8100.00
(c)	Government's share of cost	7290.00
(d)	Government's share unexpended	- none
(e)	Value of production during Opr.	400.00 +
(f)	Government's royalty	20.00 +

The operation was conducted in a satsifactory and efficient manner.

Equipment purchased for the contract:

1	Mine Car	$115.00
	Mine Rail	350.00
		$465.00

This equipment was sold as salvage for $100.00. Ninety percent of this amount ($90) wasdeducted from the Operator's final voucher making the total cost of the project to the Government $7200.00.

Memorandum

To: Operating Committee, D M E A - Washington

From: Field Team, D M E A Region VII

Subject: Completion of Contracts

Reference is made to your letter of May 24, concerning completion dates of four contracts.

DMEA-2277, Idm-E 412. Completed April 30, 1954. Report in preparation.

DMEA-2784, Idm-E 519. Amendment sent to the Operator in February has not been returned. Attempts to contact Operator (the latest on May 20) have been unsuccessful. Will send a registered letter this week requesting immediate action.

DMEA-3099, Idm-E 609. Amendment sent to Operator in March has not been returned. Registered letter sent to Operator on May 13, we received by him at Jacksonville Beach, Florida on May 17, but no answer to the letter has been received yet.

DMEA-3132, Idm-E 618. Completion date is June 2, instead of May 2 as stated in your letter. Work is progressing satisfactorily and is expected to be completed during May.

JUN - 1 1954

INTERIM REPORT

DMEA-2277 Idm-E412 (mica) BURKE-JOHN MINE

OPERATOR: Burke-John Mica Miners, c/o John Phillips, Spruce Pine, North Carolina.

LOCATION: 3 miles airline and 5 miles by road N 60° W of Franklin, Macon County, N. C. It is about 1200 feet west of Poindexter Branch of Iotla Creek.

Drifting and crosscutting has been completed on this contract for a total distance of 150 feet. The last 82 feet of drift has been driven about N 75° W in feldspar and quartz. Material in the present heading is composed of a quartz core 1.5 feet in thickness on the right side flanked by barren feldspathic zones. Wall rock, a hornblende gneiss, is exposed on the left wall. Some movement is indicated at the contacts with pegmatite where wall is exposed.

About 3 powder boxes of badly bent mica and one single large block of good quality mica has been recovered from this operation. Disposition of the large block has been made. Certification cannot be made on the basis of mica recovery, but could possibly be recommended on the quality feldspar present. It is not known whether the present operators will continue work or not, but the chances are very good that additional work will be attempted after the present lease expires.

All work performed under the contract was conducted in a satisfactory manner. The operators were cooperative and followed all suggestions made by the Field Examiners.

Re: DMEA-2277, Idm-E 412 (Mica)
Final Geologic and Engineering Report
Burke-John Mine, Macon County, N. C.

Dear Mr. Laurence:

Work was commenced on the Burke-John Prospect in Macon County, N. C. in October of 1952. The first work consisted of bulldozing at the mouth of the old workings in preparation to start a tunnel. Work progressed at a reasonably satisfactory pace until the old workings were reached with the tunnel, at which time the operators encountered extreme difficulty in holding up the overburden that kept coming down into the tunnel. However, this was eventually overcome at extremely high cost for timbering. The tunnel was run along old workings for approximately 200 feet at which time a pegmatite containing feldspar, quartz and some scrap mica was encountered. After driving on the foot wall of this vein for a distance of approximately 14 feet, the operators found a ruled block of mica weighing about 150 lbs, out of which we sold something over $400.00 worth of strategic quality mica.

The tunnel was then extended to a total of 292 feet, the latter part of which was in vein, but no more mica of strategic grade was encountered. Approximately 20 feet after we encountered the pegmatite we cross-cut a distance of 14 feet, and found only scrap mica, feldspar and quartz. It was suggested by the Government Field Team that we make a survey of our workings andof the old workings further up on the hill to determine the relationship of our workings to the dip of a shoot of mica that was supposed to be coming down in our direction from the old workings. This survey revealed that we were approximately 86½ feet below the old workings and that a 40 ft. extension of our tunnel would possibly contact any mica shoot that might be coming down from the old workings.

We continued to drive the tunnel for an additional 42 feet, but no mica of strategic quality was found. The pegmatite continued to pinch down until there was practically no vein left.

The operators of this project wish to take this opportunity to thank the DMEA Field Team for their cooperation and efforts on the Burke-John project.

If there is any further information that you require, please contact us and we will be glad to forward it to you.

Very truly yours,

John Phillips

Re: Idm-E412, DMEA-2277
Burke-John Miles Minerals

Dear Mr. Lawrence:

Reference is made to the March, 1954, Form MF-104 covering the subject Exploration Project Contract.

This MF-104, claiming costs of $60.00 was certified for payment on Voucher No. 264, dated April 14, 1954, in the amount of $54.00, the Government's 90 percent contribution.

A copy of an invoice dated March 15, 1954 from the Mitchell Lumber Company, Spruce Pine, North Carolina, as attached to the copy of the Form MF-104 received by this Division, indicates that the costs claimed covered "2 days surveying".

The contract specifies an "allowable maximum" for actual costs of $4,200.00 for Stage I and "agreed unit costs" of $26.00 per foot of drifting and crosscutting for Stage II. The "allowable maximum" of $4,200.00 was reached with the submission of the March, 1953 Form MF-104, at which time presumably the Stage I work was completed. All subsequent Forms MF-104, except for the March, 1954 voucher, have been claims for Stage II work performed at "agreed unit costs".

Accordingly, it appears that this $60.00 charge for surveying is not an allowable cost under the terms of the contract and, in accordance with Article 5 thereof, is for the sole account of the Operator. It is suggested that either a refund be obtained from the Operator or a deduction be made in the payment of the next Form MF-104.

Sincerely yours,

(Signed) J. L. Chambers

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature Robert A. Lawrence Title EXECUTIVE OFFICER DMEA REGION VII Date APR 12 1954

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Mr. John Phillips
Burke-John Mica Miners
Spruce Pine, North Carolina

Re: DMEA-2277, Idm-E 412 (mica)
Burke-John Mica Mine-Macon County, N. C.

Dear Mr. Phillips:

Your February 1954 Monthly Report and Voucher has been received in this office and is being sent to the finance office today for processing. A deletion of $364.00 is being made on your voucher because our engineers have measured only a total of 108 feet of drifting and crosscutting accomplished to date and you claim 122 feet.

We also wish to call your attention to your narrative which accompanied this report. This narrative leads one to believe that you worked the entire month on the property, yet our engineers claim that no work was done after February 8 when your crew was transferred to the Washburn Prospect.

Please read the instructions on the reverse of Form MF-104 in regard to the type of narrative required with your report. A sample of a well written narrative is enclosed with this letter. Your narrative is not at all informative. Anyone knows that in order to drift, crosscut or sink a shaft one has to drill, shoot and muck. ?

You were informed that no crosscutting was authorized by the contract. This was in error. Todate you have performed 94 feet of drifting and 14 feet of crosscutting. The amounts under these headings on Form MF-104 for February should be as follows: "Crosscutting" - monthly total --None; Totals previously reported --$364.00; Totals to date --$364.00. "Drifting" - Monthly total - $104.00; Totals previously reported--$2,340.00; Totals to date--$2,444.00.

Your total at the bottom of the page will now be, $104; $6,904.00 and $7,008.00. Please correct your copy of the report to conform with ours.

Yours very truly,

Wm. A. Beck, Acting Executive Officer
DMEA Field Team, Region 7

Memorandum

To: Administrator

From: Nonmetallic Minerals Division

Subject: Amendment No. 4 - Time Extension - Docket No. DMEA-2277 - Mica
Burke-John Mica Miners
Burke John Mine
Macon County, North Carolina
Contract No. Idm-E412

The Nonmetallic Minerals Division concurs in Amendment No. 4 which revises Amendment No. 3 to bring the date of completion of the contract to May 1, 1954, as written and executed in the field. Delay due to winter weather made extension of the contract necessary.

INTERIM REPORT

DMEA-2277 Idm-E412 (mica) BURKE-JOHN MINE

OPERATOR: Burke-John Mica Miners, c/o John Phillips, Spruce Pine, N. C.

LOCATION: 3 miles airline and 5 miles by road N 60° W of Franklin, Macon County, N. C. It is about 1200 feet west of Poindexter Branch of Iotla Creek.

Drifting continues on this contract and now totals 108 feet. This is inclusive of 14 feet of lateral work mentioned in the Interim Report of January 25, 1954. Material encountered remains unchanged with feldspar and quartz the predominant minerals encountered. Two large lenses of quartz have been cut recently, one of which is observable in the face and the other exposed in the roof. A small amount of badly bent and cracked mica was recovered at about 90 feet in the drift on the hanging wall side. Progress on this contract is satisfactory.

INTERIM REPORT

DMEA-2277 Idm-E412 (mica) BURKE-JOHN MINE

OPERATOR: Burke-John Mica Miners, c/o John Phillips, Spruce Pine, North Carolina.

LOCATION: 3 miles airline and 5 miles by road N 60° W of Franklin, Macon County, N. C. It is about 1200 feet west of Poindexter Branch of Iotla Creek.

Drifting continues on this contract and is now at 77.5 feet. Material encountered is pegmatite composed of feldspar and quartz and is wholly barren of mica. A drift lateral was driven north at a point 20 feet from the pegmatite-biotite gneiss contact and required 14 ft. of drift to intercept the north wall. About 10 to 15 pounds of block mica was recovered from a kaolinized zone about 12 inches from the floor in this lateral. All mica recovered to date has been confined to this small area.

The operator was advised to have a survey made that would place the present drift position with relation to previous producing areas of old works. Results of this survey, when complete, will be considered in planning additional drift work. Progress on this contract is satisfactory.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

REMARKS:

(Instructions on reverse)

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

INTERIM REPORT

IMEA-2277 Idm-E412 (mica) BURKE-JOHN MINE

OPERATOR: Burke-John Mica Miners, c/o John Phillips, Spruce Pine, North Carolina.

LOCATION: 3 miles airline and 5 miles by road N 60° W of Franklin, Macon County, North Carolina. It is about 1200 feet west of Poindexter Branch of Iotla Creek.

Drifting continues on this contract and is now at 68.5 feet. Material encountered has not changed from that last reported and consists of feldspar and quartz. No mica has been encountered in recent work. It was suggested that a lateral be driven on the right wall at a point about 20 feet from the contact or beginning point of the drift to trace the occurrence of a mica zone in this area. The present direction of the drift is N 70° W.

The workers were reminded to scale the working areas thoroughly after shooting and to set stulls where necessary. Progress on this contract is satisfactory.

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

INTERIM REPORT

DMEA-2277 Idm-E412 (mica) BURKE-JOHN MINE

OPERATOR: Burke-John Mica Miners, c/o John Phillips, Spruce Pine, North Carolina.

LOCATION: 3 miles airline and 5 miles by road N 60° W of Franklin, Macon County, N. C. It is about 1200 feet west of Poindexter Branch of Iotla Creek.

Drifting has been halted temporarily on this contract because of transfer of personnel to another mine. Drift measurement made from point of contact with country rock now totals 53 feet. Material encountered is principally feldspar and quartz and is barren of mica in most of the footage covered. Work is expected to resume in the near future.

Some timbering in the form of supporting stulls has been accomplished. The operator was advised to scale the drift thoroughly after shooting, particularly the dust covered areas.

Mr. R. A. Laurence, Executive Officer of DMEA, Region VII, accompanied the Field Examiners on this visit to the Mine.

DMEA-2277 Idm-E412 (mica) BURKE*JOHN MINE

OPERATOR: Burke-John Mica Miners, c/o John Phillips, Spruce Pine, North Carolina.

LOCATION: 3 miles airline and 5 miles by road N 60° W of Franklin, Macon County, N. C. It is about 1200 feet west of Poindexter Branch of Iotla Creek.

Drifting continues on this contract and is now at 42 feet. All of the material encountered is pegmatite consisting principally of feldspar with minor amounts of quartz. One large block of mica has been found during recent operations and remainder of drifting has been in barren material. The need for thorough scaling and timber requirements in this type of material was pointed out to the foreman. Progress made since this operation has resumed work is satisfactory.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INTERIM REPORT

DMEA-2277 Idm-E412 (mica) BURKE-JOHN MINE

OPERATOR: Burke-John Mica Miners, c/o John Phillips, Spruce Pine, N. C.

LOCATION: 3 miles airline and 5 miles by road N 60° W of Franklin, Macon County, N. C. It is about 1200 feet west of Poindexter Branch of Iotla Creek.

Stage I of this contract, which consisted of 178 feet of rehabilitation, was completed March 23, 1953. No work had been attempted on Stage II, which consists of 150 feet of crosscuts and drifts, until recently. Stage II is now underway and 14 feet of drifting to the west has been accomplished. Material encountered in this work is principally kaolinized feldspar, scattered and massive quartz and small muscovite mica. The mica was observed near the margins of a massive quartz zone in the lower section of the present face. The drift cross section is completely in pegmatite and due to the weathered condition of this material, the need for adequate timbering was stressed. Recent progress on this contract is satisfactory.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

REMARKS:

(Instructions on reverse)

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Signature Robert A. Lawrence Title DMEA EXECUTIVE OFFICER REGION VIII Date MAY 24 1954

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc.". The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

GPO 83-38475

OPERATORS
MONTHLY REPORT OF PROGRESS

April, 1954

DMEA-2277
Idm-E-412

Work Accomplished:

We tried to follow the shoot wall of the mine, and there was some vein showing which consisted of feldspar and quartz. We followed this vein in a direction that was suggested by the DMEA field team, hoping to find a shoot of mica coming down from old workings. However, we did not find any mica at all, and the vein material which we were shooting in continued to narrow down until no vein was left.

Daily Notes:

April 1 - 2	Drilled, shot
April 5 - 9	Continued drilling in vein material containing quartz and feldspar.
April 12 - 16	Drilled, mucked, following vein material which began diminishing.
April 19 - 23	Continued to shoot and drill along wall of mine, looking for mica from old workings.
April 26 - 30	Completed 42 feet of drifting, gradually running out of vein material entirely. No mica found.

Spruce Pine, N. C.

Re: DMEA-2277, Idm-1412 (mica)
Burke-John Mine, Macon Co., N.C.

Dear Mr. Phillips:

This will acknowledge receipt of your Final Engineering and Geological report on the subject mine, and your letter in regard to the disposition of the mine car and rail.

The Government accepts the offer of $100.00 for the mine car and rail, and we are deducting this amount from your final voucher which we have been holding, and which is being sent to the Finance office today for processing. It was also necessary to delete the $60 for surveying you claimed, and for which you were paid on your March Invoice, because the "allowable maximum" of $4200 set up in the contract for Stage I was reached with the submission of the March 1953, MF-104 form.

Please send us the name and address of the purchaser of the mine car and rail so that we may advise him that the Government has no further interest in this equipment.

Very truly yours,

Robert A. Laurence

Re: DMEA-2277 Idm-E 412 (Mica)
Disposition of Property

Dear Mr. Laurence:

We have been trying to find a buyer for the jointly owned property purchased at the beginning of work on the Burke-John Mine. This property consists of one Mine Rail purchased at $350.00 and one Mine Car purchased at $115.00, making a total purchase price of $465.00.

We have been unable to find anyone interested in buying this property, and have found only one party who made us an offer. This party has agreed to go to the mine property, dismantle and remove the rail and mine car and pay us $100.00 for both. This property has been used for two years and the value has fallen considerably. If it is satisfactory with the Government, you may deduct the portion of this price due you (90%) from our final report settlement. Otherwise, please advise us what you would like to have done with these two items.

Very truly yours,

John Phillips

INTERIM REPORT

DMEA-2277 Idm-E412 (mica) BURKE-JOHN MINE

OPERATOR: Burke-John Mica Miners, c/o John Phillips, Spruce Pine, North Carolina

LOCATION: 3 miles airline and 5 miles by road N 60° W of Franklin, Macon County, North Carolina. It is about 1200 feet west of Poindexter Branch of Iotla Creek.

Rehabilitation of the lower adit has been completed, but no work has been done on this project since the last report on March 23, 1953. As soon as necessary equipment is obtained by the operators drifting will begin along the west extension of the pegmatite.

Mr. Robert D. Thomson, Commodity Industry Analyst, U. S. Bureau of Mines, accompanied the Field Examiner on this visit to the mine.

Contract No. Idm-E412

Dear Mr. Laurence:

Please find herewith the original and five copies of Amendment No. 1 to the subject exploration contract which have been signed by the Administrator and dated in this office.

Please present the amendment to the operator for approval and signature. If any part of this amendment does not have either your approval or that of the Operator, the original and all copies are to be returned to this office together with the proposed changes for consideration.

After execution of the amendment, the copies are to be distributed in the usual manner.

Sincerely yours,

J.C. 4/16/53

Memorandum

To: Chairman, Operating Committee

From: Nonmetallic Minerals Division

Subject: Review of proposed Amendment No. 1, Docket No. DMEA-2277 - Mica
Burke John Mica Miners
Burke John Mine
Macon County, North Carolina
Contract No. Idm-E412

Purpose: This amendment provides additional funds for Stage I of the contract by increasing the total amount from $6,300 to $3,100 to permit completion of the rehabilitation.

Justification: According to the best information available to the Government and the Operator when the contract was written, 50 feet or less of the tunnel was badly caved. The remaining 200 feet (approximately) was believed to require only clean-up and installation of track, air and water lines, and a small amount of timber. Pursuance of the work disclosed the fact that very heavy ground extended for approximately 150 feet instead of 50 feet. Portions of caved area that had been recovered were lost through subsequent caving. For this reason, the cost of rehabilitating the tunnel was greater than anticipated by either the Operator or the Government.

The additional funds provided by this amendment are, in effect, to pay for necessary work which was not foreseen when the contract was prepared, and it is in the interest of the Government to have the proposed work completed.

After the amount provided for rehabilitation was spent, the Field Team advised the Operator to continue the rehabilitation as part of Stage II. This method of providing the additional funds was improper and the subject amendment is intended to correct this error and provide the money in the proper manner.

Recommendation: The Nonmetallic Minerals Division concurs with the field team and recommends approval of the amendment as written.

Stanley A. Feitler

INTERIM REPORT

DMEA-2277 Idm-E412 (mica) BURKE-JOHN MINE

OPERATOR: Burke-John Mica Miners, c/o John Phillips, Spruce Pine, North Carolina

LOCATION: 3 miles airline and 5 miles by road N 60° W of Franklin, Macon County, North Carolina. It is about 1200 feet west of Poindexter Branch of Iotla Creek.

Rehabilitation of the lower adit has been completed for a distance of 178 feet from the portal. 150 feet of this distance required heavy timbering, but the last 28 feet was in hard, solid material and the only work necessary was the removal of muck left from a previous operation. Pegmatite material, consisting of hard, barren feldspar is now showing in the face. The body strikes essentially E-W and is enclosed by mica schist containing quartz stringers. Adit direction at this point is approximately N 15° W. Drifting is expected to begin immediately along the ~~eastern~~ western extension of the pegmatite body. It was suggested that ventilation by fan and blower be provided to the working face.

W. A. Beck, a member of the DMEA Field Team, Region VII, accompanied the Field Examiners on this visit to the mine.

Subject: Docket No. DMEA-2277 - Mica
Burke John Mine
Macon County, North Carolina
Contract No. Idm-2412

Dear Mr. Laurence:

Reference is made to the subject contract proposed amendment, the January "Operator's Monthly Report and Voucher", and your telephone conversations of March 25 and 31, 1953, with Mr. Houk.

It is not possible to amend the contract as you have suggested. Please prepare the draft of a proposed amendment and justification for increasing the allowable maximum in Stage I about $1,500. The justification for this amendment is that the ground was much heavier than was anticipated and that the costs for doing the work were, therefore, in excess of the estimated costs. The January and February vouchers cannot legally be approved for payment here until the amendment is approved. Please hold the March voucher until the amendment is completed.

Sincerely yours,

George C. Selfridge

Memorandum

To: Operating Committee - D M E A - Washington

From: Field Team, DMEA-Region VII

Subject: Amendment No. 1, to Docket No. 2277, Idm-E412 (mica)
Burke-John Mica Miners. North Carolina

On March 19 we sent you six copies of a proposed amendment to the subject contract for your approval and the Administrator's signature. We have learned through Mr. Houk that the amendment could not be approved in the form submitted. Please destroy the copies you first received and substitute in their stead the ~~six~~ 8 transmitted herewith.

Stage I of the contract allowed a maximum of $2900 for rehabilitating the portal and an old adit. By the end of December the operators had spent this amount and considerable more of their own money and had advanced but 100 feet through the caved ground. They continued through caved ground to 150 feet where they found the tunnel open to 178 feet and in a firm condition to the pegmatite.

The Field Team recommends that due to the unforeseen condition of the old adit an additional allowance of $1300.00 be made the operator for rehabilitation. This will change the amount of the contract from $6,800.00 to $8,100.00, and the Government participation from $6,120.00 to $7,290.00.

IMEA-2277 Idm-E412 (mica) BURKE-JOHN MINE

OPERATOR: Burke-John Mica Miners, c/o John Phillips, Spruce Pine, N.C.

LOCATION: 3 miles airline and 5 miles by road N 60° W of Franklin, Macon County, N. C. It is about 1200 feet west of Poindexter Branch of Iotla Creek.

This project is progressing slowly because of heavy ground conditions consisting of caving and slides. Subsequent heavy timbering is necessary to control these conditions. The lower adit has been driven 137.5 feet and the last 25 feet has required stulls set about 1 foot apart with top and side lagging. Cut timbers are being used for stulls and caps and split timbers are being used for lagging. Material in the heading consisted of weathered schist.

Mr. R. A. Laurence, Executive Officer of IMEA, Region VII, accompanied the Field Examiners on this trip to the mine.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

REMARKS:

(Instructions on reverse)

(For Government use only)

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MAR 23 1953

Memorandum

To: Operating Committee - D M E A - Washington

From: Field Team, D M E A - Region VII

Subject: Amendment to Docket No. 2277, Idm-E412 (mica) Burks-John
Mica Miners. N. C.

Transmitted herewith are six copies of a proposed amendment to the subject contract for your approval and the Administrator's signature.

Stage I of the contract allowed a maximum of $2900 for rehabilitating the portal and an old adit. By the end of December the operators had spent this amount and considerable more of their own money and had advanced but 100 feet through the caved ground. At the end of February they were still in bad ground and were 135 feet from the portal.

The Field Team recommends that due to the unforseen condition of the old adit an additional allowance be made the operator for rehabilitation beyond the 100 foot mark on the basis of actually drifting or crosscutting at the cost of $26.00 per foot as set up in Stage II of the contract. This has been done by changing the wording in the Description of the Work, Stage II and the wording of the first paragraph of Stage II of the Estimated Cost of the project.

EXPLORATION PROJECT CONTRACT

Lin Carpenter, Norman Mashburn, and John Phillips, partners, doing business as Burke-John Mica Miners

DOCKET NO. 2277, Idm-E-412

AMENDMENT NO. 1

It is agreed this _____ day of _____ 1953, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, and Lin Carpenter, Norman Mashburn, and John Phillips, doing business as Burke John Mica Miners, each acting in consideration of the agreement of the other to the terms hereinafter set forth that Exploration Project Contract Idm-E 412, Docket DMLA-2277, dated October 1, 1952, between the parties hereto be modified and amended as of January 2, 1953 as follows;-

(A) In Exhibit "A" under description of the work, "Stage II", change the first line to read, "Drive a maximum of 150 feet of 5' x 7' crosscuts, drifts or rehabilitate old works.

(B) In Exhibit "A", under Estimated Costs of the Project "Stage II" change the first paragraph to read, "The Government will contribute to the cost of drifting, crosscutting and rehabilitation in this Stage on the basis of the below agreed unit cost per foot (which shall include all costs) in lieu of actual costs, as they accrue for units of work actually performed.

This amendment shall not be construed to increase the estimated total cost of the project, the aggregate total amount which the Government may be obligated to pay, or the percentage of the costs which the Government may be obligated to pay, under the provisions of Article 8 of the contract form.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(*a*) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(*b*) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(*c*) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

REMARKS:

(Instructions on reverse)

(For Government use only)

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

OPERATORS
MONTHLY PROGRESS REPORT
for the
Month of February 1953

DMEA No. 2277

Work Accomplished

Much diffculity has been encountered in going through old work. The whole top of mountain seems to be falling down into head of tunnel. There are two large holes on top of the ground that have continuely been sinking as a result of our taking out the muck in the head of tunnel. We have been forced to go out on top of the ground and try to prevent these big holes continuing to sink and be taken out through the tunnel.

Daily Notes

February 2	Attempted to set timbers which was unsuccessful on account of slide in at head of tunnel.
February 3 - 4	Mucked
February 5 - 6	Set in timber
February 9	Mucked
February 10	Set timber & mucked
February 11	More slide in
February 12	Mucked
February 13-16	Cut timbers "Logs for the large opening on top of ground."
February 17-20	Mucked
February 23-25	Set timber
February 26-28	Mucked

Defense Minerals Administration
RECEIVED
FEB 2 1953

IMEA-2277 Idm-E412 (mica) BURKE-JOHN MINE

OPERATOR: Burke-John Mica Miners, c/o John Phillips, Spruce Pine, North Carolina.

LOCATION: 3 miles airline and 5 miles by road N 60° W of Franklin, Macon County, North Carolina. It is about 1200 feet west of Poindexter Branch of Iotla Creek.

The lower adit is still in the process of rehabilitation; the old works have extended further than originally assumed. About 111 feet of this old works has been cleaned out and timbered. Timbering required top and side lagging due to nature of material. Operator was advised to load top lagging with about 2 feet of material. This work has followed essentially the previous workings, which in turn has caused deviation from the target. Operator was advised at this visit to make a gradual turn in order to pick up the pegmatite. Most of the material removed has consisted of weathered micaceous schist and no pegmatite material has been reported.

Progress on this project has been slow because of heavy ground and extensive timbering that has been necessary to take care of the above conditions.

Dear Mr. Houk:

In reply to your letter of January 29, in the beginning of the operation of the Burke-John Mine, we used a bulldozer and dozed from surface down to the old drift advancing in the old drift 16 feet from mouth.

We started where our bulldozing stopped with a car line, and have advanced in the old drift to a total depth of 115 feet; including bulldozing 16 feet. The above work was accomplished with our December Report.

Sincerely yours,

Sam L. Phillips

SAFETY INSPECTION REPORT
BURKE-JOHNS MICA MINERS PROSPECT (MICA)
(NEAR) FRANKLIN, MACON COUNTY, NORTH CAROLINA

January 6, 1953

by

Roy G. Stott
Mining Health and Safety Engineer

INTRODUCTION

This report is based on an inspection made at the request of the Defense Minerals Exploration Administration to determine conditions and practices relating to health and safety and to propose recommendations for correcting hazards. The inspection party consisted of Roy G. Stott, mining health and safety engineer, Bureau of Mines, William A. Beck and Laurence E. Shirley, mining engineers, Defense Minerals Exploration Administration, and Norman E. Mashburn, mine foreman.

GENERAL INFORMATION

The Burke-Johns Mica Miners Prospect is operated by a partnership of Norman Mashburn, Lin Carpenter, and John Phillips. An exploration loan has been granted by the D. M. E. A. under Docket Number 2277, Contract Idm E412. The mine is situated near the Iotla-Bowers mine and is located about 4.0 airline miles N57°W of Franklin, Macon County, North Carolina.

The prospect contract is for reopening old caved workings through an old adit reportedly 100 to 200 feet long trending northwesterly from its hillside entrance. To date the old adit has been reopened and timbered for a distance of 100 feet. The cross-section of the timbered adit is 5-1/2 feet by 6-1/2 feet inside the timbers. The opening is timbered with sets on 3-foot centers. Posts and caps are of 6- to 10-inch round split oak and the tops and sides of the timber sets are lagged with similar material.

Three men are employed.

All men wear hard hats while working in the heading and use carbide lamps for illumination. No drilling and blasting is being done at present. The caved material is removed by hand and trammed to the dump in a 1-ton capacity mine car. When they have advanced 3 feet the next set is erected and lagged; however the top lagging is not covered with broken rock or with blocking. There is an open space above the sets of 2 to 10 feet for a distance of at least 30 feet from the heading. Men are not allowed to work under the loose roof at the heading to shovel a cover on the sets.

SAFETY RECOMMENDATIONS

1. The top lagging on the drift sets should be covered by at least 24 inches of fill. To cover the present lagged sets it is recommended angled up-holes be drilled in the sides through the lagging and blasted with light charges of explosives.

   Note: It is <u>not</u> recommended or intended the miners shovel loose muck back from the face onto the sets and expose themselves to dangerous roof.

2. To minimize the hazards of derailments the ties should not be spaced further than 30 inches apart, and a tie should be placed under each track joint.

3. Compressed air or blower ventilation should be supplied to the face.

4. Timber caps should be of a cross-sectional strength equivalent to a 6-inch by 6-inch oak timber. It was observed many caps were deeply notched for placing on the posts thereby greatly reducing their strength.

ACKNOWLEDGMENT

The cooperation of the foreman, Norman E. Mashburn, and the employees during this inspection is gratefully acknowledged.

Respectfully submitted,

/s/ Roy G. Stott

Roy G. Stott

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Contract No. Idm-E412

Dear Mr. Phillips:

Reference is made to the subject exploration contract and your Operator's Monthly Report and Voucher for December, 1952.

The number of feet advanced during the period and the total to date do not appear in the Unit Cost and Progress Report nor in the narrative section. Please supply this information so the cost records will be complete.

Thank you for your cooperation.

Sincerely yours,

SIGNED

Re: DMA-2277, Idm-Eh12 (mica)

Dear Mr. Phillips:

Your December Operator's Monthly Report and Voucher is being sent to our Norris Office today for processing.

With your report you sent an invoice in the amount of $350.00 for rail from Carpenter & Phillips Mica Company, and a certified copy of an invoice from M & F Equipment Company. In as much as you have been paid for these items we would like to have your receipts to cover these payments.

With this months report you included an invoice for $22.10 for supplies purchased from Blackburn Hardware Company, please send us a receipt showing that this item has been paid.

On the form MF-104A, all your costs to date should have been placed under initial Rehabilitation & Repairs, and when you start the new work the spaces for drifting or crosscutting should be used.

Very truly yours,

Mr. A. Beck, Acting
Executive Officer, DMA
Field Team, Region 7

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature L. M. Beck Title Acting Exec. Officer Region VII Date 1-19-53

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

GPO 83-38475

OPERATORS
MONTHLY PROGRESS REPORT
for the
Month of December 1952

DMEA No. 2277

Work Accomplished

Continued cleaning out of the odd drift and timbering as we went. We found that there is more waste that continue to slide in. We have spent considerable more time moving this than was anticipated. We still have not reached solid gronnd. Our payroll runs more than our allowable maximum. We are only showing on our reports the maximum for stage I.

The reason we did not show any supervision on this contract we have had the Iola-Bowers Supervisor, supervising this and carrying his time on that job.

INTERIM REPORT

DMEA-2277 Idm-E412 (mica) BURKE-JOHN MINE

OPERATOR: Burke-John Mica Miners, c/o John Phillips, Spruce Pine, North Carolina.

LOCATION: 3 miles airline and 5 miles by road N 60° W of Franklin, Macon County, North Carolina. It is about 1200' west of Poindexter Branch of Iotla Creek.

This mine was visited in the company of Norman Mashburn. The lower adit has been rehabilitated for a distance of 93 feet from the portal. Material encountered consists principally of muck and weathered micaceous schist. Some heavy ground and loose boulders have been overcome and progress on remaining rehabilitation should speed up in the near future. It is estimated that it is only about 20 - 25 feet to pegmatite material. This project is progressing satisfactorily.

Re: DMEA-2277, Idm-Ell2 (mica)

Dear Mr. Phillips:

Your October-November Operator's Monthly Report and Voucher has been received by this office and is being forwarded to our Norris, Tennessee office today for processing.

You did not break down your labor as to Supervision and labor. We are assuming that F. H. Willis is the foreman on the job and have placed his earnings under supervision. We are also allowing the full amount of your payroll or $1,276.50 instead of $1,120.00 as this item is not an allowable maximum. The amount of $2,900.00 for Stage I, however, is an allowable maximum and cannot be exceeded.

We have revised your report as follows:

Item 2, Labor	$984.00
Supervision	292.50
Item 3, Timber	300.00
Other hand tools	39.24
Item 4, Operating Equipt.	
Rental-Bulldozer	300.00
Purchase, mine rail	350.00
Mine car	115.00
Item 7, Miscellaneous	
Office expense	60.00
	$2,440.74

Please correct your copy to coincide with ours.

You have presented receipts for all items except the $350.00 for rail and the $20.00 for tools from the M & F Equipment Company. These receipts should be sent in with your next report.

Yours very truly,

Wm. A. Beck, Acting Executive Officer

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(For Government use only)

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

OPERATORS
MONTHLY PROGRESS REPORT
for the
Months of October & November 1952

DMEA no. 2277

Work Accomplished

Commenced operation on the week beginning October 6, 1952. Bulldozed and cleared caved portion of lower adit in preparation for cleaning out old drift. Hired workmen to clean out old drift. Have cleaned out, timbered and laid rail in drift a distance of about 72 feet. As yet the head in the drift has not been reached. Not sure just how much farther we will have to go before reaching it. Progress has been from ~~to~~ good to slow in some cases, due to difficulties encountered in timbering.

Dear Mr. Laurence:

Please find herewith the original and five copies of a contract covering the subject exploration project which have been signed by this office for the Government with register number and effective date as shown.

If the contract meets with your approval, present it to the operator for his approval and signature. If any provisions are unsatisfactory to the operator, return all copies to this office along with suggested changes for consideration.

After signing of the contract, one copy is to be given to the operator, one copy retained for your files, one copy for the Regional Finance Officer, and the remaining copies, including the original, are to be returned to this office as soon as possible.

Memorandum

To: Administrator

From: Nonmetallic Minerals Division

Subject: Resume Docket No. DMEA-2277 - Mica
Burke John Mica Miners
Burke John Mine
Macon County, North Carolina

Conclusion: Based on the Field Team's observations and recommendation, the Burke John Mine warrants exploration.

Recommendation: Approval of the proposed contract for a $6,800.00 exploration program consisting of rehabilitation of the lower adit and driving 150 feet or crosscuts and drifts. This allows for 30 feet more of drifting than the Field Team's proposal.

Application received 12/10/51
Proposes $9,900.00 program to bulldoze, sink test pits and drive a crosscut.
U.S.G.S. memo - Jahns to Kupfer - mine last worked in 1905 and 1906. Brief description of the geology.
U.S.B.M. - memo 2/13/52
Recommends field examination.
U.S.G.S. - memo 2/20/52
Recommends denial.
Referred to Field 3/10/52.
Report from Field Team received 4/14/52.
Recommends program involving $5,670.00 expenditure to rehabilitate lower level and crosscut to probable downward extensions of two mica zones with short drifts in the pegmatite.
U.S.G.S. - memo 4/18/52.
Agrees with Field Team.
U.S.B.M. memo 4/28/52.
Agrees with Field Team.
Since then we have been trying to obtain a satisfactory area and description of land as well as Owner's Consent to Lien.

Applicant through his local lawyer submitted the last necessary Owner's Consent to Lien 9/12/52.
Contract prepared 9/17/52.

Report of Field Team Examination on

DMEA-2277 (mica)

BURKE JOHN MINE -Burke John Mica Miners
Macon County, North Carolina

This mine is located 3 miles airline and 5 miles by road N.60° W. of Franklin, Macon County, N. C. It is about 1200 feet west of Poindexter Branch of Iotla Creek.

At this place numerous caved drifts, shafts, and pits occur along a N.68° W trending zone. These openings are scattered along a strike distance of more than 300 feet. At present only the northwestern most drift is accessible. This drift has explored a pegmatite along a distance of 112 feet, on the hanging wall contact and about 50 feet on the footwall contact (see attached map).

Where exposed in the drift the pegmatite varies in thickness from 12 to 21 feet. It is well zoned with kaolinized feldspathic zones adjacent to both the hanging and footwall, and a massive quartz core in the center. The quartz core where examined ranges in thickness from 4 to 12 feet with a corresponding thinning and thickening of the feldspathic zones. The feldspar is too severely weathered to permit determination of its variety. Mica occurs along both contacts of the pegmatite with the mica gneiss wall rock; however, the mica examined along the footwall appears to occur only in small sizes. The mica shoot mined from the accessible drift on the hanging wall varies in thickness from 3 to 5 feet and appears to be about 50 feet in length. It has been stoped up the dip to the "grass roots." Drag folds in the wall rock plunge about 60° SE, which appears to be the rake of the mica "shoot." Strike of the pegmatite is N. 68° W and dip is 60° SW.

Mica examined from the pegmatite is ruby colored, hard, clear, and splits well. Some of it is ruled and cracked. Size of the mica is unknown.

From the distribution and amount of openings it would appear that another concentration of mica occurs approximately 120 feet northwest of the lower drift; however, there are no accessible openings to verify this theory.

The lower drift shown on the attached map is inaccessible. It is reported to be from 240 to 280 feet in length, but there is no pegmatite material in the dump to indicate that the pegmatite was cut by this drift. From the direction that it starts underground it would appear that it runs parallel to the pegmatite, but is from 10 to 40 feet from it in the hanging wall.

The Field Team believes that this deposit justifies exploration. It is recommended that the caved portal of the lower drift be cleared with a bulldozer, and the drift be cleaned out and reconditioned where necessary. At the conclusion of this phase, the drift should be surveyed and the position of its heading established, especially in relationship to the probable down plunge extension of the mica shoot mined from the accessible upper drift. A drift or crosscut should then be extended to intersect and explore this mica shoot. Also the possible mica concentration between the portal of the upper and lower drifts should be explored by a short crosscut and drift from the lower drift.

ESTIMATED COST:

STAGE 1: To consist of bulldozing to prepare drift portal (approx. 600 cu. yds.) and clean out and recondition 240-280(?) feet of drift.

Fixtures and Improvements

None

Operating Equipment

To be rented:

1 - Bulldozer*, 30 hrs @ $10/hr	$300.00

To be purchased:

Timber, 4000 bd.ft. @ $60/M	240.00
Mine rail **, 350 ft. @ $1/ft.	350.00
Mine car	150.00
Hand tools, miscellaneous	100.00

Labor and Supervision

1 - Working foreman, 40 shifts @ $1.50/hr.	480.00
2 - Laborers, 40 shifts @ $1/hr.	640.00
Insurance, Social Security, etc.	200.00

Rehabilitation and Repairs

None

Stage 1, estimated total cost..... $2,460.00

* Rental to include operator, fuel, oil, and repairs.

** Additional rail will be required, but operator will supply it without cost to the project.

STAGE 2: To consist of approximately 120 feet of new drifts and crosscuts:

Estimated Cost:

Fixtures and Improvements

None

Operating Equipment

To be rented:

1 - 105 Compressor * 2 mos. @ $175/mo.	$350.00
1 - Jackhammer drill with column and arm, 2 mos. @ $60/mo	120.00

To be purchased:

Dynamite and exploders	375.00
Drill steel and bits	200.00
Pipe, 350 ft. @ 30¢ per ft.	105.00
Gasoline and oil	125.00
Miscellaneous	165.00

Labor and Supervision

1 - Working foreman, 40 shifts @ $1.50/hr.	480.00
1 - Miner, 40 shifts @ $1.25/hr.	400.00
2 - Laborers, 40 shifts @ $1/hr	640.00
Insurance, Social Security, etc.	250.00

Rehabilitation and Repairs

None

Stage 2, estimated total cost..... $3,210.00

$76.58 3/

* Rental cost does not include gasoline and oil, but includes repairs.

Estimated total costs of Stages 1 and 2 $5,670.00

Docket No. DMEA-2277 - Mica
Burke John Mica Miners
Macon County, North Carolina

Notes from letter by Dr. Richard H. Jahns, on examination of Burke John Mica Mine made during World War II.

"Mine worked prior to 1905 or 1906.
No data on production.
Numerous shallow shafts and adits.
(upto 30 feet in depth and length).
One adit 240 feet to 280 feet, from south east end reaches under old workings. No data available as to what showed in this adit.
Dike up to ~~show~~ 15 to 20 feet in width.
Mica clear and medium brown in color, books are small.
Caved conditions prevent satisfactory appraisal of commercial possibilities."

Enclosures

Docket No. DMSA-2277 - Mica
Burke John Mica Mines
Mason County, North Carolina

Notes from letter by Mr. Richard H. Jahns, on examination of Burke John Mica Mine made during World War II.

"Mine worked prior to 1905 or 1906.
No data on production.
Numerous shallow shafts and adits.
(upto 30 feet in depth and length).
One adit 240 feet to 280 feet, from south east end reaches under old workings. No data available as to what showed in this adit.
Dike show 15 to 20 feet in width.
Mica clear and medium brown in color, books are small.
Caved conditions prevent satisfactory appraisal of commercial possibilities."

Subject: Docket No. DMRA-2277 - Mica
Exploration Loan
Burke John Mica Mine
Macon County, North Carolina

Dear Mr. Carpenter:

Your application for assistance in exploring the Burke John Mica Mine, Macon County, North Carolina, has been reviewed by the Staff of the Defense Minerals Exploration Administration and has been referred to Mr. Robert A. Lawrence, Executive Officer, DMRA Field Team, Region VII, Room 13, Post Office Building, Knoxville 1, Tennessee, for field examination.

The Regional Office will contact you at an early date in regard to your project.

Sincerely yours,

C. O. Mittendorf (for) S.N. 3-10-52

Memorandum

To: Nonmetallic Minerals Division
Defense Minerals Exploration Administration

From: W. F. Dietrich, Chief
Ceramic and Fertilizer Materials Branch

Subject: DMEA-2277: Mica: Burke John Mica Mineral

It is recommended that a field team investigation be made. Samples from this prospect were reported by the United States Geological Survey to be of high quality for capacitor use, but there is no production history. Applicant's plan of exploration seems feasible, subject to approval or revision by the field team.

Signed

W. F. DIETRICH

Dear Don:

Here are a few remarks on the Burke John mine, in reply to your letter of several days ago.

The Burke John (N. L. Barnard) mine, which is about 1/4 mile south of the Iotla Bowers mine, is 3.1 airline miles N. 60° W. of Franklin, Macon County, North Carolina. The workings are on the west side of Poindexter Branch, and extend for 1,000 feet N. 70° W. from the edge of a field to the top of the ridge. They consist of short caved adits, shafts, and pits, none of which appears to have been more than 30 feet deep. At the southeast or lowest end of the mine area, however, is an adit reported to be 240 to 280 feet long, but this working is caved 50 feet from its portal. The mine was last operated by N. L. Barnard in 1905 and 1906/

The country rock, a weathered quartz-mica gneiss, encloses a discordant pegmatite body that strikes N. 70° W. and dips 45° south-southwest to vertical. The pegmatite-wall rock contacts are poorly exposed, but the dike may be as much as 15 or 20 feet thick in some places. Most of the pegmatite is a fine-grained aggregate of kaolinized feldspar, granular quartz, muscovite, and garnet. A quartz core, 1 to 2 feet thick, appears to be centrally disposed but segmented. The most coarsely crystalline muscovite occurs along the margins of the core segments. The mica is clear and medium brown in color, but most of the books are small. The caved condition of the workings prevents a satisfactory appraisal of the commercial potentialities of the deposit.

This is the works, Don, so far as my files are concerned. I hope that it is of some help.

Best regards.

Sincerely,

(sgd.) Dick

14. The proposed plan of exploration is based on the assumption that "the pegmatite dyke lies in a plane parallel with the surface grade." In other words the applicants assumed a dip slope. The property was examined by a member of the U. S. Geological Survey during the last war and the pegmatite strikes N 70° W and dips 45 to 90 degrees southwest as exposed in numerous shafts, adits, and pits up to 30 feet deep. This dip is confirmed by the position of an adit that is 240 to 280 feet long and under the above workings.

The proposed plan of exploration does not appear likely to make a discovery or uncover extensions of the known pegmatite.

LIN M. CARPENTER

Lin M. Carpenter was born November 3, 1897, in Spruce Pine, North Carolina, and has lived there all of his life. His father, Jess E. Carpenter, a jeweler, was one of the early settlers of this area.

Mr. Carpenter finished the seventh grade at Spruce Pine, North Carolina, and has been unable to attend school beyond that grade.

In 1910 he worked as a mining hand for his father in several mica and feldspar mines around Spruce Pine. In 1912 he first became familiar with the characteristics of mica in his employment at the J. E. Burleson Mica Company, Spruce Pine, North Carolina, where he carried sheeted mica to the punch machines, and prepared fabricated mica for shipment. He had been with this company for only two years when he was made supervisor of the plant having under his immediate direction one hundred ten persons who sheeted and punched mica. He retained that position until 1919.

His next employment was with the Spruce Pine Mica Company, Spruce Pine, North Carolina, (1919) where he was employed as mica buyer and general manager. He retained this position for twenty-two years which afforded him the opportunity to become very familiar with the value, grade, the physical characteristics and dialectic properties of mica used in the electronics and electric appliance industry.

At the commencement of World War II he and Mr. John Phillips formed a partnership, "Carpenter and Phillips Mica Company" and established a business of fabricating mica, by hydraulic punch methods. Mr. Carpenter is the general manager;'that is, the operation of this business is under his immediate control, and he personally buys the domestic and foreign mica in book and sheeted form which is the raw material for this plant.

Mr. Carpenter, due to his forty years experience in the purchase of mica and the supervision of mica sheeters and punch operators is considered by many to be the most qualified man to judge the quality of mica, and what probably is more important is his ability to render a large quantity or percentage of sheet mica from mica ore or books.

JAMES C. (CORBE) BUCHANAN

"Corbe" Buchanan was born June 14, 1894, in Mitchell County, North Carolina, and has lived in Spruce Pine, and its vicinity for the major portion of his life. He is married, and has five children who reside with him at his home in Spruce Pine.

His formal education consists of the completion of the Tenth grade at Harris High School in Spruce Pine, North Carolina, in 1912. His inability to attend school beyond this point has not inhibited his business success.

In 1912, at the age of fourteen, he was employed by the J. E. Burleson Mica Company as a rifter and sheeter of mica. In 1918 he obtained a slight raise in salary in his employment by the Universal Mica Company also located in Spruce Pine, North Carolina, as a rifter and sheeter, which job he held until 1922.

In 1922 the Creelman Mica Company, Waynesville, North Carolina, employed him as supervisor of twenty employees that sheeted book mica. This company became insolvant in 1923, and Mr. Buchanan began mining mica and feldspar as an individual.

Some of the mines which he has recently mined are listed below:

Jimmy Cut Mine on the property of
Mrs. Bunny Wiseman,
Mitchell County, North Carolina

Henry Young Mine
Cleveland County, North Carolina

George Young Mine
Catawba County, North Carolina

Bowen Mine
Cleveland County, North Carolina

In 1940 the Custer Mining Company of Custer, South Dakota, employed Mr. Buchanan as foreman of its sheeters and rifters. His immediate superiors were Mr. Edwin Wray and Mr. Ray Sharpe. He held this position until Colonial Mica Company employed him as a mica buyer in 1941, at which time, he returned to Spruce Pine, North Carolina, where he bought mica under the direct supervision of Mr. B. C. Burgess. His salary was $300 per month plus expenses. His ability as a mica buyer, and the satisfaction of his superiors in him is evidenced by the fact that he was not discharged from his position until the mica buying program was terminated in 1945.

Since 1945 Mr. Buchanan has mined several properties for feldspar and mica in and around Spruce Pine, North Carolina. Within the past few years he has established himself in business as owner of the "Army Surplus" store in Spruce Pine, North Carolina and the owner of pool halls in Irwin, Tennessee, Bristol, Virginia, Elk Park, North Carolina, and Spruce Pine, North Carolina.

N. E. MASHBURN

N. E. Mashburn was born on a farm near Franklin, North Carolina in 1904. His father was one of the early mica miners of this area, having produced commercial quantities of mica before the turn of the century. "N. E." has known mica all his life.

He completed the 10th grade in high school, at which time, due to his father's health, he found it necessary to help supplement his father's income by devoting his time in the wintertime working in mines as a mucker, and in the summer months as a farm hand.

Mr. Mashburn is now married and he lives with his family on a small farm just a few miles outside Franklin.

Because of his many years mining experience and his desire for safe mining operations, he has no difficulty in obtaining mining employees for the operations he supervises.

Re: Exploration Loan
Burke John Prospect

Mr. Lin Carpenter, Manager
Burke John Mica Miners
Spruce Pine, North Carolina

My dear Mr. Carpenter:

This will acknowledge receipt of your application dated December 1, 1951 for a loan under the Defense Production Act of 1950.

Your application was assigned Docket Number DMEA-2277 and referred to the Non-Metallics Branch.

Kindly refer to DMEA-2277 in any future correspondence relating to your application.

Sincerely yours,

ROBERT E. ADAMS
