Re: DMA-1802X
Steatite Talc

A. E. C.

Dear Mr. Lawest:

Your application for aid for an exploration project on Steatite Talc deposit located in Esmeralda County, Nevada, and docketed as DMA-1802X, has been reviewed by this office.

Projects approved by the Defense Minerals Administration must, in its judgment, show definite promise of yielding material of acceptable grade, physical character and specifications, in quantities that will significantly improve the mineral supply position for National Defense.

Exploration projects as defined in MO-5, Regulations Governing Government Aid in Defense Exploration Projects, must be confined to work necessary to search for unknown or undeveloped sources of strategic minerals; the work must be confined to a reasonable delineation and sampling of the ore and may not include work prosecuted primarily for mining or preparation for mining.

A very careful study of your proposal revealed the following:

1. No sound geological basis for expecting to find strategic grade steatite has been demonstrated.

2. Samples submitted from the deposit were tested by the Emergency Procurement Service who reported that "the talc samples have been tested and due to cracks, seams and inclusions, talc of this quality would be suitable only for grinding and would not be acceptable for Stockpiling".

3. Work program proposed consisted principally of mining or preparation for mining, and would not qualify as exploration under MO-5.

Under these circumstances, your application for exploration aid to the extent of 90% of $2,500, is denied. Should additional information become available, we would be glad to have you resubmit your proposal for consideration.

Unless we receive a request within thirty days, we will consider the case closed.

Sincerely yours,

Tom Lyon

DMA

Subject: Block Talc Nev. 1802

Dear Mr. Barr:

The sample of block talc received with your letter (undated) was cut into specimens. Several were heated to 1025°C (about 1880°F) and the heated specimens are being returned to you under separate cover together with one specimen of the sample as received.

Following receipt of the letter, we telephoned Mr. Hans Thurnauer, Ceramic Engineer at the American Lava Corporation in Chattanooga, and he kindly detailed to us the series of tests that they make in order to determine whether or not an unknown sample of talc has possibilities in the massive form for industrial use. A copy of our notes resulting from this telephone call is inclosed. According to their standards, this material would be thrown out on two counts. In the first place all of the pieces, regardless of thickness, were badly cracked and in the second place the chocolate-brown color indicates an excess of iron.

9/5/51 phoned Hans Thurnauer re [Ph: Chattanooga 53411]

SCREENING TESTS FOR MASSIVE TALC

1. Cut discs 2 in. diam. by 3/16 in. thick.

2. Fire oxidizing on straight line schedule to about 1850°F in 4 hrs, hold 1/2 to 1 hr, and cool in not less than 4 hrs (this is their tunnel kiln schedule).

3. Record proportion of discs obtained free from cracks.

4. Note fired color as an indication of iron content - if buff it is OK, if brown it is NG.

5. Measure discs for linear shrinkage in thickness and diameter. The maximum should be 2% and the difference should not exceed 1/4%. Note uniformity from disc to disc.

6. Metallize the sound discs and test for:

	Room temp.	350°C
Power factor	Difficult to determine - not considered important.	Critical; should not exceed 0.2%.
Resistance	(did not get values) a/	b/
Dielectric constant at 1 mg	usually OK	usually OK c/

7. Note if laminated. If so, cut bars 3/16 in. by 3/16 in. by 2 in. and 1/2 in. by 1/2 in. by 2 in., parallel to the laminations.

8. Fire as before and note proportion free from cracks.

9. Determine M/R in bending on sound bars. Good material will average about 10,000 psi. d/

10. Power and examine petrographically for particle size and shape. Non-fibrous is preferred.

11. If above test results are promising, tube spacers are made and sent to customers for life tests.

From Amer. LavaCorp. literature

a/ $>10^{14}$

b/ 4 to 5×10^{9}

c/ 5.6

d/ 7000 to 10 000 psi.

Phone call and notes!

rec. 8-16

Dear Sir:

I am mailing directly to you by parcel post two grades of Talc, the low grade and the high grade. You may make your test but please give me a report on same. This property as I have been informed has produced 20,000 tons of high grade talc and it was practically all taken from the surface and the greatest depth was an incline shaft 110 feet of about 40 degree angle which I would consider a 60 foot depth. The top of the property is so badly butchered that it is not safe for further operation on the surface. Therefore, it is necessary to run a tunnel down the hill 200 feet below the top workings. I should judge that a good body of ore can be struck from 50 to 100 feet in said tunnel which would be much cheaper to operate than a shaft. Also, it would give me about 150 feet of backs and it would be much easier to stope and cross cut as there is no question in my mind or other engineers who examined the property stated that it is necessary to run a tunnel between 50 and 150 feet in order to get under the big body of ore as the top has only been operated and butchered and produced of high grade talc from stringers going every direction and therefore, they are under the opinion that the big body of talc is at a much greater depth. I believe that a tunnel would be much cheaper to operate and produce the high grade talc. This requires capitol. I am fully equipped with compressor, hoist and small truck. I do not need equipment but I do need supplies and labor cost. I also believe that there are other strategic metals such as tungsten and uranium and if your engineers can make examination of this property with a high grade gauger counter and make the thorough assays of the various vein matters on this property, it may be found.

Trusting to hear from you at an early date, I beg to remain,

Yours truly,

M Dawes

Dear Mr. Dawes:

Subject: DMA-1802X, Talc

Regarding your application for aid for an Exploration Project on talc deposit in Esmeralda County, Nevada, docketed as DMA-1802X, it is necessary to establish that strategic grade talc (block steatite) is present in the deposit.

Please send us samples, say, 5 or 10 pounds, of block talc from the deposit so that we may determine whether it qualifies as strategic grade. The pieces sent should be large enough so that blocks not less than 2 x 2 x 3 inches may be cut from them.

Sincerely yours,

James A. Barr

July 25, 1951

Memorandum

To: Robert Waskey, Defense Minerals Administration

From: J. J. Norton, U. S. Geological Survey

Subject: Application DMA-1802-X, talc, Esmeralda County, Nevada.

Application 1802-X from Mr. M. Dawes is for exploration of the Dawes talc prospect, formerly the James talc prospect, Esmeralda County, Nevada. This property was apparently not examined by the Geological Survey during its rather intensive investigations of talc deposits in Esmeralda County during World War II.

I suggest that you write to Mr. Dawes explaining that only block steatite is on the exploration list and that if he has any such material a 5 to 10 pound sample should be sent to you. I will be surprised if he actually sends a sample. If a sample shows any promise whatsoever, a field examination should be made.

Defense Minerals Administration
RECEIVED
JUL 9 - 1951
LAND & MINERAL
Executive Secretary

THE APPLICANT

*1. Is applicant an individual, partnership, or corporation? Individual

*2. If a partnership, state names and addresses of partners.

*3. If a corporation, state names and addresses of officers, directors, and five largest stockholders.

*4. Describe the mining and general business experience of (*a*) the applicant, and (*b*) the person or persons who will manage the project. Owned mining property since 1936

*5. Are you the owner or the lessee of the property? Owner on lease and bond

6. If owner, state what claims, liens, or encumbrances, if any, are against the property. none

7. If lessee, attach a copy of the lease and state if it is in good standing. It is in good standing

NOTE.—It will be necessary to procure and attach to the exploration project contract agreements of claimants, lienors, encumbrances and lessors subordinating their interests in the property to the interest of the Government under the contract.

8. Furnish current financial statement, showing assets and liabilities, and a profit and loss statement.

9. How much money is applicant prepared to invest in proposed project? Is it sufficient to pay your part of the cost of the project as detailed in question 23 of this application form, in accordance with the regulations on Government participation (Section 9 of Mineral Order 5)?

*If you have already answered these questions on MF-100, you are not required to answer the questions for this application.

16—64067-1

THE PROPERTY

10. (*a*) Give a description of the real property that will be in any way involved in the exploration project, including any existing mine or operating property. 1 claim

(*b*) Give the legal description of the exact parcel, plot, or area upon which the exploration is to be conducted.

NOTE.—If both areas are the same, so state. The only obligation to repay the Government is from the net earnings from any commercial discovery made in the area specified in (*b*) above in which the exploration is to be conducted, and the expenditure of funds which may be charged as costs of the project must be limited to that area or to work necessary to perform the exploration in that area.

*11. State the present and former names of the property, if any. Dawes Talc Mine formerly James Talc

*12. State, in detail, the location of the property with reference to towns, railroads, roads, shipping points, including distances and directions and kinds and conditions of roads.

*13. State source and quantity of water available for operations and its sufficiency at all seasons. Available 3½ miles State amount of power to be used, rate per hour or other cost, and source. below mine. Haul it in.

*14. Describe any existing useable facilities, equipment, buildings, or structure now on the property that will be devoted to the exploration work.

15. State in detail how the ore could be shipped and how and where milled.

*16. History:

(*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for any past suspensions of operations.

(*b*) State briefly the known history and production of adjoining and neighboring properties.

(*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.

*17. Production:

(*a*) If mine is in production, furnish the following information:

	Tons per day	*Grade or analysis*	*Cost per ton*	*Net value per ton*
(1) Mining (2) Milling (3) Shipped or sold	cannot estimate	high grade	$8.00 per ton for mining & trucking. Cost will be much less when big body of Talc is reached.	$8.50

*18. Ore or mineral reserves: (If property is or has been operating.)

(*a*) Describe the ore or mineral deposits briefly.

(*b*) Submit available maps and assay data.

(*c*) Give estimated tonnage and grade of each class of ore reserves.

19. State any conditions or circumstances regarding the property not sufficiently brought out by the foregoing questions.

THE EXPLORATION

20. For what mineral or minerals and for what types of deposits and ores will the exploration be conducted? Talc

21. Describe briefly, but concisely, the proposed work and the estimated time required to complete it.

NOTE.—The Government will not participate in a project that will require more than 2 years to complete.

22. Furnish statement of the geological basis of the project with particular emphasis on factors leading the operator to expect the finding of commercial ore bodies. This statement should be accompanied by supporting maps such as geological maps, maps of the proposed openings and assay maps, sample lists, and other pertinent data.

THE REQUIREMENTS AND COSTS

23. Tabulate in the form of an itemized statement with a sum for each item the estimated requirements and costs of the project so that the total will give the estimated cost of the project in which the Government will participate, as follows:

(*a*) Labor, by numbers and classes (miners, muckers, millmen, etc.), with wages of each.

(*b*) Supervisors, by numbers and positions, with salaries of each.

(*c*) Cost of necessary repairs to existing facilities, structures, and buildings.

(*d*) Cost of necessary installation or construction of additional facilities, structures, and buildings.

(*e*) Cost of items of equipment, not now owned by the applicant which must be purchased for operations at a cost of $50 or more each.

(*f*) Cost of rental for equipment which the operator proposes to rent.

(*g*) Rental value of items of equipment which the operator now owns and which will be devoted to the work.

(*h*) Cost of materials and supplies, including items of equipment costing less than $50 each.

(*i*) Cost of power, water, utilities, and any other items not provided for above.

24. Furnish a time schedule of the project, stated in terms of months after project is approved, showing progress expected to be accomplished and the money expected to be spent.

*Same as footnote on page 1.

16—64067-1 U. S. GOVERNMENT PRINTING OFFICE

9. Property is owned and fully equipped with Ingersol-Rand compressor, hoist, jeep and two cars.

14. Two cabins, 1 tent. 105 Ingersol-Rand compressor, 7½ horsepower hoist for shallow work, 2 ore buckets, 250 feet of rail, 50 ties, Conchete drill, small,and 1 large drill, 100 feet of hose, plenty of steel, bits, shovels and picks and crowbars. Also powder, caps, and fuses. A 20 ton ore ben convenient for loading without delay.

15. Talc is sold to the Blue Star Mill at Zurock Station. The cost of trucking is $4.00 per ton, price paid $16.50 per ton making $12.50 net.

16. a. The reason is the shaft work is expensive and requires a hoisting engineer. This can all be avoided by running a drift of tunnel 5' X 7' to be properly timbered at a cost of about $20.00 per foot including timbering. Property is an old producer and has a large production record. I started operating said property in November 1950. Have made three truck load shipments. The delay was caused by considerable dead work. I have complied with my lease and payments.

b. The Sierra Talc Company is about 7½ miles west of me. The Blue Star Mines are also 7½ miles west. Nichols has a camp 1 mile below the camp. The Nichols mine joins my line.

c. The mine has been operated for many years and quite a lot of Talc has been shipped to the Sierra Talc Company at Keller, Calif. and also the Blue Star Mine Company at Big Pine, California.

17. The mine is on production but owing to dead work have made only three shipments of better than 7 tons each during the time I have owned the mine.

~~18.~~ This is high grade talc, present price is $16.50 per ton. After paying trucking charge the net is $12.50 per ton.
No milling is done.

18. a. Talc appears in large pockets, therefore, it is necessary to continue on development work and to operate on an economical basis.

b. To give you estimated tonnage would be impossible because it is discovered in small and large pockets.

19. The reason for applying for this loan is not for equipment but for supplies, labor, grub, repairs and upkeep of equipment including jeep and 1 car. The jeep does all of the hauling and delivering of supplies. I contract out the trucking of the Talc ores.

21. By only working an 8 hour shift with three men, it will take about 20 days to complete 100 feet of tunneling and timbering and the upkeep of the compressor, placing rails and assorting the muck from the talc.

22. I cannot give map necessary. It will be necessary for an engineer to look over the property and draw his own conclusions as to the future production. This is old productive property and many hundreds of tons have been shipped. I do not intend to go into any of the old holes to work as I wish to tunnel in and drift on the vein cross cutting the talc and if necessary to stope and wins the said tunnel.

23.a I expect to pay $10.00 per day for a miner and $10.00 per day for a mucker.

b.No manager receiving any salary except the owner will draw the necessary funds for actual expenses. Also the necessary monies requiring the repairs, supplies and upkeep of equipment, jeep and car.

c No expense on building. There are two buildings and one sleeping tent. One building is the cook house. However, we do require the purchase of 2' x 12' of rough lumber at a cost of $75.00 per thousand square feet delivered to property.

d None whatsoever

e No equipment necessary

f None whatsoever as property is fully equipped and is owned under the lease and bond.

g.No rental

h. Cannot estimate cost of repairing the hoist and compressor but it can be considered very small, such as necessary gaskets, rings, oil at $2.50 per 5 gallons, and gas per drum at $16.50 (55 gallons).

i.Water to be delivered 3½ miles from Pigeon Springs. This is hauled with the jeep.

24. Being operated now and will be operated each and every day until we are on full production as I am now operating under contract basis and furnishing grub and supplies. The lease is in full force and effect and the payments of $100.00 per month have been met each and every month and the 40 shifts per month have been more than complied with as there have been three men plus myself which would make four men working each day.

All payments made applies to the lease and bond and all ores shipped apply to monthly payments and to lease and bond.

INSTRUCTIONS

Read Mineral Order 5, Regulations Governing Government Aid in Defense Projects, before completing this application. Submit four signed copies of the application to Defense Minerals Administration, Department of the Interior, Washington 25, D. C., or to the nearest field executive officer thereof, with your name and address on each sheet of the application and all accompanying papers. If any question is inapplicable, or if you cannot answer it, so state on the form. Where the space provided for answer is insufficient, answer on a separate sheet, annex it to the application form, and refer to it in space for answer. If the application is approved, you will be presented with an exploration project contract on Form MF-200, for your signature.

DEPARTMENT OF THE INTERIOR
Defense Minerals Administration
RECEIVED
JUL 9 - 1951
Executive Secretary

THE APPLICANT

*1. Is applicant an individual, partnership, or corporation?
*2. If a partnership, state names and addresses of partners.
*3. If a corporation, state names and addresses of officers, directors, and five largest stockholders.
*4. Describe the mining and general business experience of (a) the applicant, and (b) the person or persons who will manage the project.
*5. Are you the owner or the lessee of the property?
6. If owner, state what claims, liens, or encumbrances, if any, are against the property.
7. If lessee, attach a copy of the lease and state if it is in good standing.

NOTE.—It will be necessary to procure and attach to the exploration project contract agreements of claimants, lienors, encumbrances and lessors subordinating their interests in the property to the interest of the Government under the contract.

8. Furnish current financial statement, showing assets and liabilities, and a profit and loss statement.
9. How much money is applicant prepared to invest in proposed project? Is it sufficient to pay your part of the cost of the project as detailed in question 23 of this application form, in accordance with the regulations on Government participation (Section 9 of Mineral Order 5)?

*If you have already answered these questions on MF-100, you are not required to answer the questions for this application.

16—64067-1

THE PROPERTY

10. (*a*) Give a description of the real property that will be in any way involved in the exploration project, including any existing mine or operating property.

    (*b*) Give the legal description of the exact parcel, plot, or area upon which the exploration is to be conducted.

    NOTE.—If both areas are the same, so state. The only obligation to repay the Government is from the net earnings from any commercial discovery made in the area specified in (*b*) above in which the exploration is to be conducted, and the expenditure of funds which may be charged as costs of the project must be limited to that area or to work necessary to perform the exploration in that area.

*11. State the present and former names of the property, if any.

*12. State, in detail, the location of the property with reference to towns, railroads, roads, shipping points, including distances and directions and kinds and conditions of roads.

*13. State source and quantity of water available for operations and its sufficiency at all seasons. State amount of power to be used, rate per hour or other cost, and source.

*14. Describe any existing useable facilities, equipment, buildings, or structure now on the property that will be devoted to the exploration work.

15. State in detail how the ore could be shipped and how and where milled.

*16. History:

    (*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for any past suspensions of operations.

    (*b*) State briefly the known history and production of adjoining and neighboring properties.

    (*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.

*17. Production:

    (*a*) If mine is in production, furnish the following information:

	Tons per day	*Grade or analysis*	*Cost per ton*	*Net value per ton*
(1) Mining				
(2) Milling				
(3) Shipped or sold				

*18. Ore or mineral reserves: (If property is or has been operating.)

    (*a*) Describe the ore or mineral deposits briefly.

    (*b*) Submit available maps and assay data.

    (*c*) Give estimated tonnage and grade of each class of ore reserves.

19. State any conditions or circumstances regarding the property not sufficiently brought out by the foregoing questions.

THE EXPLORATION

20. For what mineral or minerals and for what types of deposits and ores will the exploration be conducted?

21. Describe briefly, but concisely, the proposed work and the estimated time required to complete it.

    NOTE.—The Government will not participate in a project that will require more than 2 years to complete.

22. Furnish statement of the geological basis of the project with particular emphasis on factors leading the operator to expect the finding of commercial ore bodies. This statement should be accompanied by supporting maps such as geological maps, maps of the proposed openings and assay maps, sample lists, and other pertinent data.

THE REQUIREMENTS AND COSTS

23. Tabulate in the form of an itemized statement with a sum for each item the estimated requirements and costs of the project so that the total will give the estimated cost of the project in which the Government will participate, as follows:

    (*a*) Labor, by numbers and classes (miners, muckers, millmen, etc.), with wages of each.

    (*b*) Supervisors, by numbers and positions, with salaries of each.

    (*c*) Cost of necessary repairs to existing facilities, structures, and buildings.

    (*d*) Cost of necessary installation or construction of additional facilities, structures, and buildings.

    (*e*) Cost of items of equipment, not now owned by the applicant which must be purchased for operations at a cost of $50 or more each.

    (*f*) Cost of rental for equipment which the operator proposes to rent.

    (*g*) Rental value of items of equipment which the operator now owns and which will be devoted to the work.

    (*h*) Cost of materials and supplies, including items of equipment costing less than $50 each.

    (*i*) Cost of power, water, utilities, and any other items not provided for above.

24. Furnish a time schedule of the project, stated in terms of months after project is approved, showing progress expected to be accomplished and the money expected to be spent.

CERTIFICATION

DEPARTMENT OF THE INTERIOR
Defense Minerals Administration
RECEIVED
JUL 9 - 1951
LANSON F. STROBEL
Executive Secretary

June 8, 1951

Mr. M. Dawes
2410 Atlantic Avenue
Long Beach 6, California

Dear Mr. Dawes:

We acknowledge your undated letter received in this office today, with four copies of MF-103, Application for Aid for an Exploration Project, forms dated June 5 attached.

This application for Government financial assistance arrived too late to be included in this fiscal year's program, for which applications had to be in this office by midnight of May 31. The Congress now has the extension of the Defense Production Act of 1950 under consideration, and we believe that the provisions of that act governing giving financial aid to producers and small operators to help them explore deposits of strategic minerals, will be extended for another year or two. However, until the Congress passes on extending the act and the President signs it, we can give no consideration to your application. It will therefore be held in our files, pending the signing of the act. When the act has been signed, your application will be sent to the Defense Minerals Administration in Washington for consideration.

No engineer can be sent to your property until we are requested to make an examination, after the Washington Office decides that the property has merit and warrants further investigation. When we are requested to examine your property, you will be notified of the date the engineer is due to arrive.

Sincerely yours,

H. C. MILLER

Review of Application for Exploration Assistance

Docket No. DMA-1202-Y

Commodity Talc

Total Amount $2500

Govt. Participation

1. Name and Address of Applicant M. Davies 640 Atlantic Ave Long Beach 6, California

2. Location of Property Escondido County, Mexico

3. Mineral or metal Talc Is it listed in Section 9 of MO-5? Yes (Critical Strategic)

If not, application will be rejected.

4. Geologic probability of discovery—based on data in application (question #16, 17, 18, 20 and 22)*

Mines or Survey reports, etc., do you rate chances:

a) Good

b) Poor Suggest applicant be asked for

c) None sample of block talc

d) Don't know—needs field examination ✓

e) Is there an alternative and favorable project? (If so, attach an explanation)

5. Is the applicant's right to the property clearly stated? Yes Lessee (question 5, 6, 7)*

6. If applicant is a lessee, is a copy of the lease attached? Yes

Does the lease have sufficient time to run to cover a future productive period? Yes

*question numbers are those of MF-103

1802-π

7. Are subordination agreements necessary? Yes

a) MF-201? NO

b) MF-202 ✓ Not Furnished

8. From the data presented, does the proposed project appear feasible from the point of view of:

a) Available manpower Yes

b) Equipment and supplies Yes
(Question 14 plus general knowledge of availability)*

c) Accessibility (question 12)* Yes

d) Water (question 13)* Yes

e) Power (question 13)* Yes

Is a field check needed on any of these points? NO

9. Does the experience of the applicant appear to be adequate to assure that he can properly conduct the proposed project? (question 4)* Yes

Is a field check needed on this point? Check whether applicant would know steatite ~~t~~ and necessity of producing block

10. Exhibit A. (questions 21 and 22)*

a) Is the project adequately described? Yes

If not, are there sufficient data given so that you can describe the project? Yes - 100' Tunnel If so, attach a draft.

b) Is there an adequate map or sketch of the proposed work? NO

c) Is the proposed work "exploration" under the definition of Section 8, MO-5? Not as described - It appears

If not, what part of it is? entirely development - However it might qualify if it can be established that there is a chance of finding Block Steatite -

1802-X

7. Are subordination agreements necessary? Yes

a) MF-201? NO

b) MF-202 ✓ Not Furnished

8. From the data presented, does the proposed project appear feasible from the point of view of:

a) Available manpower Yes

b) Equipment and supplies Yes
(Question 14 plus general knowledge of availability)*

c) Accessibility (question 12)* Yes

d) Water (question 13)* Yes

e) Power (question 13)* Yes

Is a field check needed on any of these points? NO

9. Does the experience of the applicant appear to be adequate to assure that he can properly conduct the proposed project? (question 4)* Yes

SAN FRANCISCO, CALIFORNIA

Dear Mr. Miller:

I am sending you under separate cover the data required for a prospectors loan. I would appreciate having your engineer look over the property and suggest where would be advisable to start tunneling the main vein of talc.

The property is located 3½ miles south of the Old Palmento Smelter on the West Guard Pass known as the Lida Highway in the Palmento Mining district, about 55 miles out of Big Pine toward Goldfield and 45 miles west of Goldfield. You turn off at the Alta Davis Talc road 100 feet from the Lida West Guard Pass. Also past the Palmento Smelter. You keep to the left at all times up to Nichols camp which is an old Talc property. You will note that there is a wire line stretched across the road and says private road. Remove this private sign and go up straight to the camp 1 mile or 1¼ miles and that is the Dawes Talc Mine. You can't miss it as the Nichols camp is well known in this district and is known as the Nichols Blue Talc Mine. I have placed an old rag on bushes and posts directing you to the proper road. In other words the engineer should keep to the left after turning from Old Palmento Smelter and Alta Davis sign.

The County of Esmeralda agreed to grade the road for me to the mine without cost. You may verify this through Mr. Davidson, the road manager in Goldfield, Nevada.

If your engineer has any trouble locating me, he can get in touch with a rancher, Mr. Taylor, below the Palmento Smelter who will direct him to the proper road. You may address me at Goldpoint, Nevada as I call for my mail each week.

If you can let me know just when the engineer will be there, I shall gladly meet him.

I sincerely hope the information in the application meets with your approval and that some action will take place as soon as possible for developing valuable property.

Yours truly,

M. Dawes

On a Mine

Know all Men by these Presents, *That* NINE #. JAMES & EDNA M. TOWERS (widows)

of the LONE PINE *County of* [illegible], *and State of* California *hereinafter called the part*ies *of the first part* are *held and firmly bound unto* M. Dawes a single man

of the Long Beach *County of* Los Angeles, *and State of* California, *hereinafter called the part*y *of the second part, in the penal sum of* twenty thousand ($20,000.00) *Dollars, lawful money of the United States, for the payment of which sum well and truly to be made by the part*y *of the* ~~first~~ second *part to the part*ies *of the* ~~second~~ first *part,* their *heirs, executors, administrators or assigns, the part*ies *of the first part hereby bind* sel*f* to M. Dawes his *heirs, executors and administrators firmly by these presents. Witness* our *hand*s *and seal*s *this* 16th *day of* November, *A. D. 19*50

Whereas, *the above bounden part*ies *of the first part, on the day of the date hereof, ha*ve *agreed to sell to the said part*y *of the second part the following described property, situated, lying and being in* The Palmento *Mining District, in the County of* Esmeralda, *and State of* Nevada *to-wit:*

The property will be known as the White Cloud unpatented claim 1500 feet, 750 feet northerly from Discovery Monument, 750 feet southerly from Discovery Monument and 300 feet east and 300 feet west from said Discovery Monument.
This shall include all of the equipment which said inventory is hereto attached and made a part thereof.

for the sum of twenty thousand ($20,000.00) *Dollars, which said sum is to be paid to the part*ies *of the first part, or deposited to* their *credit in the* First Nat'tl Bank of Reno, Tonopah, Nev. *in the manner following, to-wit: On or before the* 20th *day of* each month *A. D. 19*..., *the sum of* $100.00 per month

And Whereas, *the said part*ies *of the first part hav*e *further agreed to make, execute and acknowledge within* 30 *days from the date hereof, unto the said part*y *of the second part, a good and sufficient deed of all the foregoing property, showing a clear and perfect title (except as against the United States), free from all incumbrance, which said deed shall be placed, within* 30 *days from the date hereof, with* bill of sale for equipement *in escrow, to be delivered to the said part*y *of the second part, or* his heirs or *assigns, on the payment in full of said purchase money, and,*

Whereas, *the said part*ies *of the first part ha*ve *further agreed to place the said part*y *of the second part, or* his *assigns, in full and peaceable possession of said property, to mine, remove and sell ore therefrom; the said part*y *of the second part, or* his *assigns, agree*s *to commence work on said premises before the* 20th *day of* December *A. D. 19*50..., *and thereafter to work the same continuously in a thorough and workmanlike manner, employing at least* two (2) *men underground, working at least* 20 *shifts to the man each calendar month, and to permit the part*ies *of the first part to have access to all parts of said property at all times and to allow no person not in privity with the parties hereto to take or hold possession of said property or any part thereof under any pretense whatever, and during the continuance of this*

Bond and Lease to deposit in First National Bank of Tonapah, Nevada.

*to the credit of said part*ies *of the first part* *of the net smelter or mill returns of all ore taken from said property as and when received, said sum so deposited to be a part payment of said purchase money*

For each and every ton sold and delivered to the Talc buyers or mill $1.00 per ton. And in the event that any other metals or gold, silver, copper, lead or zinc should be mined from the above described property, a royalty of 10 % of the net mill or mint returns shall be paid to the above bank and credited to the account of the parties of the first part and any and all monies paid shall be applied to the purchase price and the said monthly payments.

1 large powder groom
1 sack blacksmith coal
75 ft. hose
2 hammers, Ing. L.
4 picks
1 cut stool
bits
1 box cons
1 box powder

INSTRUCTIONS

Read Mineral Order 5, Regulations Governing Government Aid in Defense Projects, before completing this application. Submit four signed copies of the application to Defense Minerals Administration, Department of the Interior, Washington 25, D. C., or to the nearest field executive officer thereof, with your name and address on each sheet of the application and all accompanying papers. If any question is inapplicable, or if you cannot answer it, so state on the form. Where the space provided for answer is insufficient, answer on a separate sheet, annex it to the application form, and refer to it in space for answer. If the application is approved, you will be presented with an exploration project contract on Form MF-200, for your signature.

THE APPLICANT

*1. Is applicant an individual, partnership, or corporation? Individual
*2. If a partnership, state names and addresses of partners.
*3. If a corporation, state names and addresses of officers, directors, and five largest stockholders.
*4. Describe the mining and general business experience of (*a*) the applicant, and (*b*) the person or persons who will manage the project. Owned mining property since 1956
*5. Are you the owner or the lessee of the property? Owner on lease and bond
6. If owner, state what claims, liens, or encumbrances, if any, are against the property. none
7. If lessee, attach a copy of the lease and state if it is in good standing. It is in good standing

NOTE.—It will be necessary to procure and attach to the exploration project contract agreements of claimants, lienors, encumbrances and lessors subordinating their interests in the property to the interest of the Government under the contract.

8. Furnish current financial statement, showing assets and liabilities, and a profit and loss statement.
9. How much money is applicant prepared to invest in proposed project? Is it sufficient to pay your part of the cost of the project as detailed in question 23 of this application form, in accordance with the regulations on Government participation (Section 9 of Mineral Order 5)?

*If you have already answered these questions on MF-100, you are not required to answer the questions for this application.

16—64067-1

1 claim

THE PROPERTY

10. (*a*) Give a description of the real property that will be in any way involved in the exploration project, including any existing mine or operating property.
    (*b*) Give the legal description of the exact parcel, plot, or area upon which the exploration is to be conducted.

    NOTE.—If both areas are the same, so state. The only obligation to repay the Government is from the net earnings from any commercial discovery made in the area specified in (*b*) above in which the exploration is to be conducted, and the expenditure of funds which may be charged as costs of the project must be limited to that area or to work necessary to perform the exploration in that area.

*11. State the present and former names of the property, if any. Available 3 miles
*12. State, in detail, the location of the property with reference to towns, railroads, roads, shipping points, including distances and directions and kinds and conditions of roads.
*13. State source and quantity of water available for operations and its sufficiency at all seasons.
State amount of power to be used, rate per hour or other cost, and source.
*14. Describe any existing useable facilities, equipment, buildings, or structure now on the property that will be devoted to the exploration work.
15. State in detail how the ore could be shipped and how and where milled.
*16. History:
    (*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for any past suspensions of operations.
    (*b*) State briefly the known history and production of adjoining and neighboring properties.
    (*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.
*17. Production:
    (*a*) If mine is in production, furnish the following information:

	Tons per day	*Grade or analysis*	*Cost per ton*	*Net value per ton*
(1) Mining	cannot estimate	grade	$3.00 per ton for mining & crushing. Cost will be much less when big body of ore is reached.	
(2) Milling				
(3) Shipped or sold				

*18. Ore or mineral reserves: (If property is or has been operating.)
    (*a*) Describe the ore or mineral deposits briefly.
    (*b*) Submit available maps and assay data.
    (*c*) Give estimated tonnage and grade of each class of ore reserves.
19. State any conditions or circumstances regarding the property not sufficiently brought out by the foregoing questions. Talc

THE EXPLORATION

20. For what mineral or minerals and for what types of deposits and ores will the exploration be conducted?
21. Describe briefly, but concisely, the proposed work and the estimated time required to complete it.

    NOTE.—The Government will not participate in a project that will require more than 2 years to complete.
22. Furnish statement of the geological basis of the project with particular emphasis on factors leading the operator to expect the finding of commercial ore bodies. This statement should be accompanied by supporting maps such as geological maps, maps of the proposed openings and assay maps, sample lists, and other pertinent data.

THE REQUIREMENTS AND COSTS

23. Tabulate in the form of an itemized statement with a sum for each item the estimated requirements and costs of the project so that the total will give the estimated cost of the project in which the Government will participate, as follows:
    (*a*) Labor, by numbers and classes (miners, muckers, millmen, etc.), with wages of each.
    (*b*) Supervisors, by numbers and positions, with salaries of each.
    (*c*) Cost of necessary repairs to existing facilities, structures, and buildings.
    (*d*) Cost of necessary installation or construction of additional facilities, structures, and buildings.
    (*e*) Cost of items of equipment, not now owned by the applicant which must be purchased for operations at a cost of $50 or more each.
    (*f*) Cost of rental for equipment which the operator proposes to rent.
    (*g*) Rental value of items of equipment which the operator now owns and which will be devoted to the work.
    (*h*) Cost of materials and supplies, including items of equipment costing less than $50 each.
    (*i*) Cost of power, water, utilities, and any other items not provided for above.
24. Furnish a time schedule of the project, stated in terms of months after project is approved, showing progress expected to be accomplished and the money expected to be spent.

*Same as footnote on page 1.

16—64067-1 U. S. GOVERNMENT PRINTING OFFICE

9. Property is owned and fully equipped with Ingersoll-Rand compressor, hoist, jack and two cars.

14. Two cribs, 1 tent. 100 Ingersoll-Rand compressor, 7½ horsepower hoist for shallow work, 2 ore buckets, 200 feet of rail, 50 disc, Sullivan drill, small, and 1 large drill, 100 feet of hose, plenty of steel, bits, shovels and picks and crowbars. Also powder, caps, and fuses. A 20 ton ore bin convenient for loading without delay.

15. Sale is sold to the Dixie Star Mill at Barnes Station. The cost of trucking is $6.00 per ton, price paid $10.00 per ton making $12.00 net.

16. a. The access to the shaft work is excessive and requires a hoisting engineer. This can all be avoided by sinking a drift or tunnel 8' x 8' to be properly timbered at a cost of about $20.00 per foot including timbering. Property is an old producer and has a long production record. I started exploring said property in November 1930. Have made three trust loan advances. The ending one issued for crystal while dead work. I have complied with my terms and payments.

b. The Sierra Gold Company is about 25 miles west of us. The Dixie Star Mines are also 75 miles west. Nichols has a camp 1 mile below the camp. The Nichols mine joins my mine.

c. The mine has been operated for many years and quite a lot of gold has been shipped to the Sierra Gold Company at Nelson, Nevada, and also the Dixie Star Mine Company at Big Pine, California.

17. The mine is an production but owing to dead work have made only three shipments of better than 7 tons each during the time I have owned the mine.

18. Gold high grade gold, present price is $18.00 per ton. After paying trucking charge the net is $12.00 per ton.
No milling is done.

19. a. Gold occurs in large pockets, therefore, it is necessary to continue on development work and to operate on an economical basis.

b. To give you estimated tonnage would be impossible because it is discovered in small and large pockets.

20. The reason for applying for this loan is not for equipment but for supplies, labor, grub, repairs and upkeep of equipment including jeep and 1 car. The jeep does all of the hauling and delivering of supplies. I continue out the crushing of the gold ores.

21. By only working on 8 hour shift with three men, it will take about 20 days to complete 100 feet of tunneling and timbering and the upkeep of the compressor, placing rails and assorting the rock from the gold.

23. I cannot give you necessary. It will be necessary for an engineer to look over the property and then his own special advice as to the future production. This is all speculative property and many hundreds of fees have been all set. I do not intend to go into any of the old holes to look as I plan to travel in and drive on the vein cross cutting the hole and if necessary to clean and open the old tunnel.

23.a I expect to pay $10.00 per day for a driver and $10.00 per day for a engineer.

b. No expense providing any orders etc. of the owner will cover the necessary funds for actual expenses. Also the books and records pertaining the results, and price and values of equipment, tools and c.e.

c. No expense on buildings. There are two buildings and one already built. One building is the cook house. Later, to do away the purchase of 8' x 10' of panel lumber at a cost of $75.00 per thousand board feet delivered to property.

d. None whatsoever

e. No equipment necessary

f. None whatsoever as property is 2 1/2 miles and is based under the lease and bond.

g. No permit

h. Cannot estimate cost of re-start the hole and exploration but it can be considered very small, such as necessary vehicle, time, oil of $2.50 per 5 gallons, and one box dynamite $1.00 (8 gallons).

i. There is no Gallonner 8" mine Steam Lucas Springs. This is marked with the lease.

24. Being operated out and will be operated once and every day until we are on full production as I am not an expert under contract hoist and furnishing crew and supplies. The lease is in full force and effect and the payments of $100.00 per month have been met each and every month and the $5 dollars per month have been more than complied with as there have been three men also should which would make four men working each day.

All payments made applies to the lease and bond and all area charged apply to monthly payments and to lease and bond.
