Re: Docket
DMEA-654
Contract No. Idm-E58

Dear Mr. Johnson:

Recently we received some forms from OME to fill out in a report of production or change of ownership of leases in South Dakota as per our DMEA 654, Contract No. Idm-E58. The forms may have been left in South Dakota when we were there last week. We wish to advise that there has been no production in our placer gravel deposits and no change of ownership of leases.

Yours very truly,

Peggy Keenan

Subject: Docket No. DMMA 654X (Tin, Columbium-Tantalum, Tungsten)
Contract No. Ide-198, Northwest Defense Minerals, Inc.,
(Rawlins Mining District) Lawrence County, South Dakota -
FINAL SETTLEMENT OF ACCOUNT

The subject Operator did not render a final report as required by the contract; therefore, the account is to be closed on the following basis which is in accordance with enclosed instruction from the Washington Office, OME, and in accordance with Report of Review of reported project costs by the Contract Administration and Audit Division, OME, dated July 13, 1959:

Basis for Closing the Account

Total Accepted Costs		$32,384.34
Payment to the Operator	$23,267.69	
Direct Payments by the Government to Independent Contractors	5,878.22	
Total Government participation at 90 percent		$29,145.91

Re: Docket No. DMEA 654X (Tin, Columbium-Tantalum, Tungsten)
Contract Idm-858
Northwest Defense Minerals, Inc.
(Rawlins Mining District)
Lawrence County, South Dakota

Dear Miss Keenan:

Reference is made to our letter of March 20, 1959, and to our previous correspondence, relative to your furnishing to the Government a final engineering and geologic report and final accounting report, as required under Articles 14 and 17 of the captioned contract.

We wish to cooperate fully with you in allowing ample time for submission of the reports, but if they have not been received by June 10, 1959, we will then consider that you do not intend to submit them. In this case, the estimated cost of the final engineering and geologic report will be charged against the amount being withheld from reimbursement to you, and any remaining balance will be paid upon final settlement of the account.

Very truly yours,

July 28, 1959

Memorandum

TO: Chairman, Operating Committee, OME

From: OME Field Team, Region III

Subject: Docket No. DMEA 654X (Tin, Columbium-Tantalum, Tungsten) Contract No. Idm-E58, Northwest Defense Minerals, Inc., (Rawlins Mining District) Lawrence County, South Dakota - FINAL SUMMARY REPORT

The original and two copies of a Final Engineering and Geologic Report were forwarded by memorandum of May 25, 1959.

The Operator failed to submit a final report as required by the contract by the deadline date established by this office of July 10, 1959; therefore, the account was closed in accordance with instructions by memorandum from W. S. Martin, Acting Chairman, Operating Committee, OME, dated July 26, 1959, and in accordance with Report of Review of reported project costs by the Contract Administration and Audit Division, OME, dated July 13, 1959.

Total accepted work under the contract consisted of excavation of 9 surface trenches under Phase I which aggregated 1,089 lineal feet, and 1,577 cubic yards, and the drilling of 18 churn drill holes, and sinking of 3 test pits under Phase II which aggregated 348.5 feet of drilling, and 31.5 feet of test pit, all at a total accepted cost of $32,384.34, toward which the Government contributed 90 percent or $29,145.91.

The exploration work completed resulted in the discovery or development of a significant quantity of tin, columbium, tantalum, and tungsten minerals on which a Certification of Discovery or Development was issued May 29, 1959.

Dear Mr. King:

We are interested in the alluvial deposits of the Tinton, South Dakota area under lease or owned by Northwest Defense Minerals, Inc., Peggy Keenan, President. We were informed by the Bureau of Mines in Rapid City that the Defense Minerals Exploration Administration could furnish us with the data acquired in the study of these deposits but that permission to do so would have to come from Northwest Minerals.

We hereby request that this permission be obtained from Miss Keenan and that the information be sent to us. I am sending a copy of this letter to Miss Keenan.

This company manufactures tantalum metal in all commercial forms and we are purchasers of tantalite. Our interest in these deposits is related to the tantalite content therein.

Dear Miss Keenan:

Reference is made to your letter of December 9, 1957, concerning discrepancy between the amounts shown on your pencilled copy of Form MF-104, Operator's Monthly Report and Voucher, and Form MF-104A, Operator's Unit Cost and Progress Report, as these forms were not prepared by this office we do not know the reason for the discrepancy but we note that the totals on both forms differ from tentative records kept in this office.

We are enclosing a sample copy of each form showing the tentative amounts accepted to date, subject to adjustment by the Finance Office, Region III, and subject to audit or review by the Contract Administration and Audit Division, DMEA. Also enclosed are your pencilled copies of Voucher and Accounting Forms MF-104 and MF-104A.

Please note that items of costs which are not otherwise specifically provided for in the contract have been included with Contingencies, on sample Forms MF-104 and MF-104A. Processing of subsequent reports by this office will be facilitated if this procedure is continued on all subsequent reports submitted.

If you require any further information concerning the preparation of voucher and accounting forms, please feel free to contact this office.

Yours very truly,

E 58

Dear Mr. Marshman:
Enclosed please find our pencil copies of M7104, M7104A for the period Oct 14, 1957 through November 2, 1957, total cost of period $988.38.
The enclosed M7104 costs to date totals $8327.11 less $650 disallowed on June 27, 1956. The enclosed M7104A to date totals $8675.11 less $650 disallowed same date.
Will you please ask your auditor or Mr. Bunyon why these two papers do not balance in an amount of $348.63.
Please do us the favor of correcting and return to us so that we may proceed with the documentation for reimbursement.

Yours very truly,

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(*a*) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(*b*) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(*c*) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

REMARKS:

(Instructions on reverse)

(For Government use only)

Note: All figures are tentative and subject to subsequent adjustment by the Finance Office, Region III, and subject to audit by the Contract Administration and Audit Division, DMEA.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Dear Miss Keenan:

Your letter of November 22, 1957, to Mr. E. O. Binyon, has been referred to this office for reply.

Enclosed are one copy each of Form MF-104, "Operator's Monthly Report and Voucher," and Form MF-104A, "Operator's Unit Cost and Progress Report," for the period from April 23, 1955 through April 15, 1956, as requested in your letter.

Also enclosed is a copy of the "Administrative Audit Difference Statement," dated June 26, 1956, covering deductions made in processing the voucher for the above period.

Very truly yours,

Re: DMEA 654X,
Idm, E-58

Dear Mr. Binyon:

With reference to our 1957 MF104,104A, we have lost our copies of report 3, Phase II, MF104,104A for the period November 1955-April 1956.

The claim for this period was $1548.12 and in documents dated May 17, 1956 and June 26, 1956 our Corporation was disallowed $650.12.

Please send a photostat copy of our MF104 for report 3, Phase II, November 1955-April 1956 so that we may attempt to carry forward the records to our current MF104,104A, report 4, Phase II.

You can see the enclosed first draft of our MF104, report 4 is incorrect in the 2 and 3 columns.

Thanking you for your courtesies,

Very truly yours,

NORTHWEST DEFENSE MINERALS, INC.

Peggy Keenan, President

Re: Docket DMEA-654X (Tin, Columbium, Tantalum, Tungsten)
Contract Idm-E58
Northwest Defense Minerals, Inc.
(Rawlins Mining District)
Lawrence County, South Dakota

Dear Miss Keenan:

Reference is made to your letter of November 12, 1957, in which you inquire as to whether Northwest Defense Minerals, Inc. will be reimbursed for the expense of assaying concentrates from the test pits.

Reimbursement will be made for the Government's percentage of the allowable cost for analysis of one combined concentrate sample from each test pit, in conformance with the provisions of Amendment No. 14 to the contract.

Very truly yours,

Contract No. Idm-K58
Northwest Defense Minerals, Inc.
Keenan Properties
Lawrence County, South Dakota

Dear Mr. Harshman:

This refers to our teletypes, dated November 5 and 15, 1957, regarding the action to be taken in connection with the subject project.

Please advise when the excavated material from all drill holes and the sample splits recovered from all the test pits have been delivered to the Government. When the material is delivered, we propose to draft a termination agreement in which there will be included an extension of time (until November 1, 1957) to complete the processing of excavated material from the test pits; also, a period of four months, or until March 1, 1958, will be allowed to complete the analyses of the sample splits recovered from the test pits.

In the meantime, please proceed to process the Operator's MF-104 and MF-104A for the work performed, but you should not make any payment for the work until the termination agreement is signed by the Operator. Also, in this connection, you should withhold funds for the Operator's final report.

Subject: Docket DMEA-654X (Tin, Columbium-Tantalum, Tungsten)
Contract Idm-E58, Northwest Defense Minerals, Inc.
(Rawlins Mining District) Lawrence County, South Dakota

Enclosed are three copies of a letter, from the subject Operator, dated November 12, 1957, regarding delivery of sample splits from the test pits excavated under the subject contract and requesting information as to whether or not reimbursement will be made for the Government's share of assaying costs.

It is our understanding that the Operator will be reimbursed for the Government's share of the assaying costs for one composite sample from each test pit; however, we are referring the matter to your office for reply directly to the Operator.

Dear Mr. Harshman:

On November 12, 1957, we delivered to Mr. J. M. Riley, Bureau of Mines, Rapid City, South Dakota 18 splits of samples recovered from the Caisson gravels excavated from Beaver and Bear Creeks in 1955. 6 bottles of gold representing as nearly as possible, onehalf the gold recovered.

Five copies of the Engineer's report were enclosed in the delivered package, no assays have been made. Inquiry is herewith made, is Northwest Defense Minerals, Inc. going to be reimbursed for expense of assays on these samples?

As soon as our documented expenditure MF104,104A is reimbursed, we plan on processing the churn drill cuttings.

Yours very truly,

NORTHWEST DEFENSE MINERALS, Inc;

Peggy Keenan, President

Lawrence County, South Dakota

Dear Miss Keenan:

Reference is made to your letter of November 11, 1957, requesting information regarding preparation of Forms MF-104 and MF-104A covering the work recently completed by Northwest Defense Minerals, Inc.

The amounts to be carried over from 1956 can be determined by deducting the net amount disallowed from the total amount reported for each item of work under Phase II. The total costs reported on the two forms must be in agreement.

We cannot verify any cost figures for Phase II at this time as this can be accomplished only by an audit or review of the reported project expenditures by the Contract Administration and Audit Division, DMEA.

Yours very truly,

Nov 11, 1957

Mr. E N. Harshman,
Acting Executive Officer
DMEA Field Team, Region III
U.S. Department of Interior
Denver, Colorado.

Re
Project
DMEA, Idm E 58,
654x.

Dear Mr. Harshman:

The Northwest Defense Minerals, Inc. is in process of documenting the Operators MT 104, 104A, from the records, to be submitted to your office for reimbursement. Will you please refer to our MT 104 and 104A dates April 21, 1956 and April 26, 1956 and verify whether we should use these records to carry our records forward from 1956 to 1957?

Our April 21, 1956 MT 104 shows a total expenditure to date of $7686.52 on Phase II, — is this figure correct and should we use it on our current MT 104?

Thanking you for your courtesy,

Yours very truly,
Northwest Defense Minerals, Inc.,
Peggy Keenan, President

November 1, 1957

Memorandum

To: Chairman, Operating Committee, DMEA

From: Acting Executive Officer, DMEA Field Team, Region III

Subject: Docket DMEA-654X (Tin-Columbium-Tantalum-Tungsten), Contract Idm-E58, Northwest Defense Minerals, Inc., Rawlins Mining District, Lawrence County, South Dakota

Enclosed are three copies of a letter dated October 26, 1957, from the subject Operator, requesting Voucher and Accounting Forms MF-104, and MF-104A, on which to report the cost of work performed during October, 1957. The forms have been forwarded to the Operator as requested.

According to the Operator's letter, all of the material from the test pits has now been processed. No mention is made of processing of the material from the drill holes, or of delivery to the Government of sample splits, as outlined in the Acting Administrator's letter of September 12, 1957, to the Operator. It is the opinion of this office that no further payment should be made to the Operator until all of the material from the test pits and drill holes has been processed, and complete analytical results are received by the Government. We will appreciate your advice in the matter.

Amendment No. 15 extended the completion date to November 15, 1956, only for the purpose of completing the processing of, and analytical work on, the samples from test pits and drill holes completed prior to January 1, 1956. The completion date will have to be further extended before reimbursement can be made to the Operator for work performed subsequent to November 15, 1956. This office has received no request from the Operator for an Amendment to extend the completion date; however, as the Operator has been negotiating with your office for several months regarding the processing and analytical work, it is possible that a request for extension may have been submitted to your office. If this is not the case we will contact the Operator regarding the matter upon instructions from you as to how we should proceed.

for E. N. Harshman

DENVER, COLORADO

Administrator,
Region III Field Team,
DMEA,
Dept of Interior,
224 New Customhouse,
Denver, Colorado.

Dear Sir:

With reference to DMSA 654 Northwest Defense Minerals, Inc. all of the materials excavated in 1955 in Beaver and Bear Creeks - from the Caissons - have been processed during October 1957 in the Corporation mill.

We are advised by Mr. C.O. Mittendorf of Washington DC to request MS 104 Monthly Progress Report Blanks so that we may document for reimbursement

Please mail 8 copies to the above address.

Yours very truly,
Northwest Defense Minerals, Inc

OFFICE OF THE PRESIDENT

October 23, 1957

Mr. C. O. Mittendorf, Administrator
D. M. E. A.
Rare and Miscellaneous Metals and Minerals
Department of the Interior
Washington, D. C.

Dear Mr. Mittendorf:

The Northwest Defense Minerals, Inc. has processed and concentrated all of the 1955 excavated gravels recovered from the Caissons in Beaver Creek and Lower Bear Creek, 70 Flats. The jig and Humphrey Spiral Concentrates recovered from each horizon, plus the balance of bedrock gravels from Beaver are in process of drying and weighing. The one half of each recovered sample will be delivered to the Rapid City office of the Bureau of Mines, c/o Mr. J. M. Riley, this week. The Engineer's documentation and report will follow soon after.

The Corporation has expended approximately $ 1,054.[illegible] for Engineer, labor, gas, oil, transportation and food. The Board of Directors have advised that they have expended the limit of funds available and to advise the DMEA that as soon as the Corporation is reimbursed for the expenditures they will advise us to proceed to use these funds to process the materials also stored in our mill which were excavated from Beaver and Bear in 1955 by Churn drill.

Will you therefore advise exactly how to handle the documentation for reimbursement, We wish to cooperate.

Yours very truly,

NORTHWEST DEFENSE MINERALS, INC.

Peggy Keenan, President

SOLICITOR

Re: Docket No. DMEA-654 (Tin, ~~tungsten~~)
columbium-tantalum,
Contract No. Idm-E58
Keenan Properties
Lawrence County, South Dakota

Dear Miss Keenan:

We note in your letter of August 28, 1957, that you will complete the processing of the samples recovered during 1955 from the test pits and drill holes not later than October 31, 1957. Also that you will immediately thereafter deliver to the Government one half of the concentrate recovered from each of these samples.

Since there were three severe snow storms the past winter between October 24 and November 6 that stopped this work, the processing of the samples should be completed and a split of the concentrates delivered to the Government by October 15.

If you are unable to complete the processing of the samples and deliver the split portions of them to the Government before weather conditions will stop the work, you should deliver, to our Field Team, all of the samples for testing and analyzing as suggested in our letter of March 1, 1957.

Unless either one or the other of the above-mentioned procedures is completed by October 31, 1957, we will proceed to turn this case over to the Attorney General for appropriate action, in accordance with our letter of July 9, 1957.

Sincerely yours,

FEJohnson/EWEllis

August 28, 1957

Mr. C. O. Mittendorf, Administrator
D. M. E. A.
Department of Interior
Washington, D. C.

Dear Mr. Mittendorf:

The Northwest Defense Minerals, Inc. wish to advise that the processing of the DMEA samples recovered in 1955 and stored in the mill will be processed between Oct. 15 and Oct. 31, 1957. Shortly thereafter the one half of the concentrates will be delivered to the Rapid City Bureau of Mines. Approximately the same circuit will be used, as in 1955.

The material will be concentrated from each 6 foot level in order to determine, if possible, the depth of the overburden in these deep placers. Thanking you for your patience and many courtesies,

Yours very truly,

NORTHWEST DEFENSE MINERALS, INC.

Columbium - Tantalum, Gold, Tin, Tungsten

July 20, 1957

Mr. C. O. Mittendorf, Administrator
Defense Minerals Exploration Administration
Department of Interior
Washington, D. C.

Mr. Mittendorf:

With reference to your letter dated July 9, 1957, I cannot understand why you have never received a short letter from me in June, which was written while I was travelling for our Corporation.

It is urgent that you are again advised as to the non-activity of our Corporation in 1956,1957. The financial propositions submitted to our Board of Directors were not accepted during this period. Our Securities and Exchange status was cleared and amended on May 29, 1957 and our common stock sales began after July 4, 1957. This is the first time since 1955 that our Corporation has seen the light of day and I have carried the project personally.

There was no money to advance to carry on any Government contract work and we expected each month to consummate satisfactory finance and proceed under the direction of our Board to meet contract obligations. We could not agree to a suggested obligation of a pro rata share of any cost of processing and assaying the material recovered in the 1955 DMEA work until we had finance.

The current finance is progressing well during the last 10 days. The money from the sale of our securities is clearly obligated for production, equipment and operation in an area tested under the 1951 DMEA work in the placer stream gravels of Bear Creek.

The equipment set up in our mill to process the 1955 DMEA material recovered still stands there awaiting our processing(with the exception of a small trommel screen). Since we will have workmen and engineers on the property, paid for out of our current financing, who could also process the stored gravels -

We request consideration to allow us to run the balance of the recovered material under R. M. Atwater's supervision and keep the cost responsibility similar to the process amendments written in late1955-56 by Mr. Knouse. I personally request an affirmative consideration of this proposal because I have, at all times, done my best, almost alone, to keep the project in good standing.

Since 1955, many changes and discoveries have taken place on our properties when we allowed finance to investigate - such as the presence of the Rare Earths, Beryllium, Titanium, re-constituted Mica and other materials in Pegmatite Dikes now needed for the Jet Age, Electronic Indistrues and A.E.C. requirements. We control an area of approximately 20 square miles containing as many as 20 Pegmatite Dikes. Recently we have been investigated by a large utility corporation who request a proposition to set up our underground documented investigation and operation.

Since we are now not at long last getting underway again with a reputable underwriter and with a bright future, will you please hold up any legal action and give us time to finish our finance and prodeed with our serious intentions and proposal as outlined above?

I will be in the Spearfish area for the next 30 days, address Spearfish Hotel.

Yours very sincerely,

NORTHWEST DEFENSE MINERALS, INC.

Peggy Keenan

Re: Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Contract No. Idm-E58
Keenan Properties
Lawrence County, South Dakota

Dear Miss Keenan:

Our letter of May 27, 1957, informed you that it would be necessary for us to take some action in the near future to assure completion of your contract. The last field work done under the terms of the contract was the latter part of 1955, and various time extensions have been provided since then to complete the project work.

Under the terms of the contract, one-half of the concentrate sample recovered from each drill hole and/or test pit was to be delivered to the Government. Since the material recovered from the drill holes and test pits was stored without processing, we offered in our letter of March 1, 1957, to have all the processing and analytical work done and to furnish Northwest a copy of the laboratory report when it paid its pro rata share of the cost. To date, your corporation has not rendered and submitted a decision on the offer.

Since the contract, as amended, provided that the project work would be completed by November 15, 1956, the contract is now in default. Therefore, unless you either deliver to the Government the split of the concentrates from all the drill holes and test pits as required by the contract, or all the drill hole and test pit samples as suggested in our letter of March 1, within thirty days from the date of this letter, we have no alternative but to turn the case over to the Attorney General for appropriate action, which may subject you and Northwest Defense Minerals, Inc., to repayment of the full amount of the Government's contribution to the project.

Dear Miss Keenan:

Reference is made to your letter of April 11, 1957, in reply to our previous correspondence. It was noted therein that you were in the process of reorganizing your company and preparing for new finances.

I feel sure that you will agree that some action on our part will be necessary in the near future in view of the extreme period of time required to complete your contract.

Action on our part is awaiting your company's decision on the proposal made in our letter of March 1, 1957. Accordingly, please let us have your decision at the earliest date possible.

Sincerely yours,

C. O. Mittendorf (for)

Dear Mr. Mittendorf:

With reference to your letters of March 1 and 29, 1957, please forgive the delay in answering. I have been away on a mission.

We are in the process of reorganizing our Corporation and preparing to receive new finance. As soon as our Board of Directors approves or disapproves your very kind proposal to dispose of our 1955 work we will advise you. We appreciate your consideration and cooperation over the years.

This time, Mr. Mittendorf, I am sure I will make the grade. Please convey my personal regards to Mr. Ellis, Mr. Knouse and all those who have been so patient.

Yours very sincerely,

Re: Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Contract No. Idm-E58
Keenan Properties
Lawrence County, South Dakota

Dear Miss Keenan:

Your letters, dated November 6, 1956, to Messrs. Ernest Wm. Ellis and W. M. Traver, indicated that you would not be able to finish the processing of the samples recovered from the drill holes and test pits completed under Phase II before November 15, 1956, which was the completion date of the project work.

As you are aware, there have been extra extensions of the contract which gave you ample time to complete the processing of these samples. However, since all parties concerned are interested in completing the processing and analyses of the samples at the earliest possible date, the Government is willing to have all the samples transported to a qualified independent laboratory and have the processing and analytical work done. Then "Northwest" would be furnished a copy of the laboratory report when it paid its pro rata share of the cost.

If this course of action meets with your approval, please inform us by return mail.

Sincerely yours,

R. O. Mittendorf

Re: Lucius Pitkin, Inc.
vs. Northwest Defense Minerals, Inc.

Dear Mr. Mittondorf:

We are the attorneys for Lucius Pitkin, Inc., the firm that Dr. Bell is associated with. Some time ago, Dr. Bell did some work for Northwest Defense Minerals, Inc. Prior to his undertaking of this work, we understand that he discussed the matter with you and you had indicated to him that you had some familiarity with this firm or their project. Dr. Bell is anxious to get in touch with this corporation or Miss Peggy Keenan, the president of this firm.

We wonder if you could assist him.

Very truly yours,

Black Varian & Simon

Memorandum

To: Chairman, Operating Committee, DMEA

From: Executive Officer, DMEA Field Team, Region III

Subject: Docket No. DMEA 654 (Tin, Columbium-Tantalum, Tungsten), Contract No. Idm-E58, Northwest Defense Minerals, Inc. (Keenan Properties), Lawrence County, South Dakota

Reference is made to your letter of December 28, 1956, wherein you outline two courses of action in connection with problems concerned with the subject Contract, on which you request comments and recommendations.

In conjunction with the matter, enclosed are the original and three copies of a joint memorandum report, dated January 17, 1957, from E. N. Harshman, Geologist, Geological Survey, Member of Field Team, Region III, and E. O. Binyon, Mining Engineer, Bureau of Mines.

Relative to course No. 1, from the standpoint of efficiency in obtaining results, the operation has been unsatisfactory from its inception and it is also apparent that the Operator cannot be relied upon to complete the mill work on test pit and churn drill samples as provided for in the Contract. It appears, however, that the operation, if conclusive results of the sampling are desirable, should be carried through, at least to the extent of obtaining analysis of representative samples from such test pits and drill holes as designated by the Government. We do not know how the mill work and analysis could be accomplished as a complete Government operation under the DMEA program or how it could be made certain that the Operator would reimburse the Government for 10% of the costs of concentrating and analyzing the samples.

Relative to Course No. 2, it is the opinion of personnel familiar with the situation that the entire amount of the samples should be milled, as it is deemed impractical to attempt to split the samples, because splits would, in all probability, fail to provide uniformly graded material.

From the results of the work completed under Stage I and the assay results of milling 1-1/4 cu. yds. from the bottom of test pit No. 1 on Beaver Creek, it is the opinion of this office that the expenditure of additional Government funds on the project is not warranted. However, we realize that there are many phases to the situation that must be considered.

The Contract stipulates that the cost of drilling and test pitting includes the mill work of concentrating the excavated material. That fact was inadvertently overlooked and the Operator has been reimbursed for a part of the drilling and test pitting costs without having completed the mill work. An analysis of the payments to the Operator for test pitting and drilling is as follows:

Churn Drilling - 18 Holes
(Maximum allowable unit cost - $5.50/ft.)

348.5 ft. drilled at $5.00/ft.	$ 1,742.50

Test Pit Excavation
(Maximum Allowable per foot $25.00)

Two pits accepted, 25¼ ft. at $25.00/ft.	631.25

(Note - Bear Creek Test Pit No. 1, 6¼ ft. deep was not accepted. Reimbursement to Operator deferred pending completion of processing all material from all test pits and drill holes.)

Yardage of Excavated Material on Hand at the Project to be Processed is as Follows:

Bear Creek

Test Pit No.1	4.2 yds.
Test Pit No. 2	6.9 yds.
9 Churndrill holes	1.6 yds.

Beaver Creek

Test Pit No. 1	16.0 yds. (Approx.)*
9 Churndrill holes	1.4 yds.
Total	30.1 yds.

(*About 1¼ yds. from the bottom of the pit was milled and analyzed.)

A tentative quotation from the Colorado School of Mines Research Foundation, Inc., Golden, Colorado, indicates that the cost of concentrating the samples from the three test pits and eighteen churn drill holes would cost in the neighborhood of $2,500.00.

If it is decided to complete the mill work and analyze the concentrate, it is recommended that consideration be given for the material to be processed at the Intermountain Experiment Station, Bureau of Mines, Salt Lake City, Utah.

The other alternative would be to submit the problem to three independent laboratories qualified to perform the experimental work and request firm bids on the basis of approximately 30 cu. yds. of material to be treated, to be delivered to their plants. We have in mind the following, in addition to the Experimental Plant at the Colorado School of Mines:

1. Denver Equipment Company

2. Humphreys Gold Corporation.

As stated above, the Experimental Plant at the Colorado School of Mines estimates a minimum price of $2,500.00. The Denver Equipment Company, by a telephone contact, estimates the cost of processing the material would run between $3,000.00 and $4,000.00, providing the job comes at a time when their plant can undertake it. The Humphreys Gold Corporation, by telephone contact, estimates the job would cost not less than $8,500.00, added to which must be considered the cost of transporting the material.

Memorandum

To: Executive Officer, DMEA Field Team Region III

Through: John F. Shaw, Supervising Mining Engineer

From: E. N. Harshman and E. O. Binyon

Subject: Docket DMEA 654 (Tin, Columbium-Tantalum, Tungsten) Contract Idm-E58, Northwest Defense Minerals, Inc., (Keenan Properties) Lawrence County, South Dakota.

From the results of the work completed under stage I and a review of the data submitted in the narrative report accompanying the monthly report for November, 1955--April 1956, as well as, review of the results of stage II work, it is our opinion that the expenditure of government funds in continuing the project is not warranted. It is further recommended that no Certification of a Discovery or Development be issued.

The recommendations are based on the following:

1) Reports by Bureau engineers on the property prior to and following completion of stage I work were adverse.

2) The recently completed work under stage II does not encompass sufficient area (excluding the area on Potatoe and Bear Creek that was included under stage I) to make the results of any value except in arriving at a conclusion as to whether or not additional test pits and churn drill holes should be put down.

3) The assay results of the 1 1/4 cu yd. from Test Pit No. 1, Beaver Creek do not indicate sufficient value in the gravel, especially when the results from Wah Chang Smelting and Refining Co., as to separation of Cb_2O_5-Ta_2O_5 and WO_3 content are considered.

4) As to the recovery: it is not known whether or not the results can be duplicated in the field, and if duplicated, whether or not the cost would permit a commercial economic operation.

OFFICIAL FILE COPY
D M E A
RECEIVED FEB 13 195
DATE | INITIALS | CODE

On the basis of stage I yardage and general conditions which would require hauling of at least a part of the gravel to the place of concentration it is believed that the gravel could not be treated profitably.

Other factors that have been considered in recommending shutting down the project are:

1) the inability to check the processing of the gravel under the present contract.

2) the poor supervision by the operator.

3) the difficulty in the administration of the contract.

However, if it is the intent of the Washington office to proceed with the processing of the samples, it is recommended that the procedure as outlined in Item 2 in the letter to Mr. W. M. Traver from Mr. George C. Selfridge dated December 28, 1956, be followed. It is further recommended that the operator also be charged the full cost of the processing of the samples. The full cost is to be charged the operator in as much as the government has already contributed 90 percent of the cost of the processing and sampling as done under stage II without obtaining reliable results.

The Colorado School of Mines Research Foundation, Inc., Golden, Colorado was contacted as to the cost of washing and concentrating twenty-one samples (3 test pits and 18 churn drill) and estimated the cost at between $2,000.00 and $2,500.00. The concern emphatically stated, however, that this was purely an estimate and not a firm bid.

Dear Mr. Traver:

This is with reference to your memorandum, dated December 6, in which you recommend that appropriate action be taken by this office in obtaining samples from the material excavated from drill holes and test pits on the subject property.

We are considering the following courses of action in connection with this problem:

1. Advise the Operator that, since all parties concerned are interested in completing the processing and analyses of the samples at the earliest possible date, the Government is willing to employ the necessary men and supervise the processing and analytical work done on the samples provided the Operator is willing to pay its proportionate amount of the cost for this work; or

2. Instruct the Operator to arrange to have its representative at the property at a mutually agreeable time so that the Government may obtain a representative split of the samples recovered from the drill holes and test pits for processing and analysing by the Government.

However, before proceeding with either course of action, we would appreciate your comments and recommendations. Also, in this connection, please explore the possibility of having these samples processed and analysed by a reputable laboratory in the area and furnish a detailed estimate of the cost required to do this work.

To: Chairman, Operating Committee, DMEA

From: Executive Officer, DMEA Field Team, Region III

Subject: Docket No. DMEA 654X (Tin, Columbium-Tantalum, Tungsten), Contract No. Idm-E58, Northwest Defense Minerals, Inc. (Keenan Properties), Lawrence County, South Dakota

Reference is made to the copy of the Operator's letter of November 6, 1956, forwarded to you by our memorandum of November 9, 1956, pertaining to lack of operations under the subject contract.

Our records indicate that the Operator has failed to pursue the work in the treatment of samples of material from test pits and drill holes, additional time for which was provided for by Amendment No. 15.

Inasmuch as the Operator has consistently failed to pursue the project work in a manner to obtain conclusive end results, therefore we recommend that appropriate action be taken immediately by your office to protect the Government's interest in the work performed in obtaining samples from the test pits and drill holes.

Please advise if you desire further action by this office.

Dear Mr. Traver:

I called Mr E O Binyon today and found that he was stationed in Denver.

I came out here Oct 24 and have experienced 3 snow storms, the last one a blizzard which snowed 2 people in at Northwest Defense Minerals Inc with 3 feet of snow and it snowed me out of the property.

The early bad weather has upset our plans to such an extent I am not sure we can get 2 pieces of equipment back up to the property and working by Nov. 15 expiration of DMEA contract time. It is snowing again here and I am endeavoring to return to Spearfish & get a snow plow to make the roads open to return in there. I have advised both you and Mr Wm Ellis of these adverse conditions.

Yours very truly

Dear Miss Keenan:

This will acknowledge receipt of your letter, dated September 8, 1956, in which you repeat your request of August 23 for an extension of time until November 15, 1956, within which to complete the project work.

We are processing an amendment to allow the extension of time requested. However, we wish to stress the importance of starting the processing of the samples you have collected at the earliest possible date and completing said processing and chemical analytical work thereon within the time you have requested to complete the project work.

We are unable to understand your statement that "The Corporation has been waiting decisions of the DMEA and has not processed any samples since November 20, 1955." Amendment No. 13, executed June 14, 1956, allowed until October 1, 1956, to complete the project work, and Amendment No. 14 was transmitted to you for execution by our Denver Office on July 12, 1956. In addition, a letter was written to you, dated July 27, by our Denver Office in reply to your July 20, 1956, letter, which explained the conditions of Amendment No. 14 relative to the analyses of samples recovered from drill holes and test pits at 6-foot intervals.

Sincerely yours,

AUG 31 1956

Re: Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Contract No. Idm-658
Keenan Properties
Lawrence County, South Dakota

Dear Miss Keenan:

This is with reference to your letter of August 23, 1956, addressed to Mr. Ernest Wm. Ellis in which you requested (1) an extension of time within which to complete the project work from October 1, to November 15, 1956, and (2) an amendment to the contract wherein the Government would contribute to the cost for chemical analyses (for tin-columbium-tantalum and tungsten) of each sample concentrate recovered from each six-foot interval of drill hole or test pit.

In connection with your request under the above item (1), we are interested to learn what samples have been processed from the drill holes and test pits since Amendment No. 13 was executed, and also the time period when the work was done.

With reference to your request under the above item (2), proposed Amendment No. 14 restates the sampling and analytical procedure set forth in Exhibit "A," "General Conditions," pages 2 and 3 of Amendment No. 3. However, we have carefully considered your proposal and feel that one sample analysis of the combined concentrates recovered from each drill hole and each test pit, as is described in Amendment No. 14, should furnish ample information for the purpose of this exploration project. If your company desires more detailed information concerning horizons of mineral concentration, such data may be obtained by concentrating the samples at the intervals desired, then analyzing a fraction of said sample (at the expense of your company) as is agreeable to the Field Team and recombining the concentrates for sample analysis as is required under the terms of the contract.

Upon receipt of the requested information relating to extending the period of time within which to complete the project work, we will advise you of our decision.

Re: Contract DMEA Idm E-58, Docket 654X

Dear Mr. Ellis:

In 1955, when the Northwest Defense Minerals, Inc. prepared for Phase II work, the Corporation outlined that the deep gravels in Beaver Creek and Lower Bear Creek would be excavated and kept separate in 6 foot intervals. This was done and part of the separated gravels were stored due to freeze-up. In the 1955 reports 1, 2 and 3, signed by R. M. Atwater, Jr., engineer, this proceedure was clearly set forth and approved at all times by Mr. E. O. Binyon, DMEA engineer field team III.

In July, 1956, the Corporation received Amendment 14 sent from Mr. W. M. Traver's Denver DMEA office which set forth that only composit samples on 18 drill holes and 2 test pits were to be processed and assayed.

On July 20, 1956 the Corporation wrote to Mr. Traver requesting permission to run each 6 foot interval sample separately, with reimbursable allowance for assay for each sample. This was requested because of the necessity of knowing the overburden horizon. On July 27, 1956 Mr. Traver gave permission to run each 6 foot interval separately, but denied the Government participation in the analysis costs.

The Northwest Defense Minerals, Inc. requests an amendment to Amendment No. 14 and to the original Amendment for Phase II and costs, allowing reimbursable funds for assay for each 6 foot interval sample out of "Contingency".

The Corporation requests an extension of time on Amendment No. 13 to Nov. 15, 1956. The Corporation cannot finish processing in the Oct. 1 time set forth.

We are grateful to you for your many courtesies.

Very truly yours,
NORTHWEST DEFENSE MINERALS, INC.

Dear Miss Keenan:

In compliance with your request of August 20, 1956, we are enclosing a copy of our letter to you of July 27, 1956, pertaining to chemical analysis of concentrates obtained from material excavated from drill holes and test pits.

Apparently you have not resumed work in processing the material excavated from drill holes and test pits. Neither have you returned executed copies of Amendment No. 14, which were forwarded to you by our letter of July 12, 1956.

Your attention is directed to the provision of Amendment No. 13 which provides that all of the processing work must be completed by October 1, 1956. Otherwise you are in default under the terms of the contract.

Very truly yours,

W. M. TRAVER

Contract Idm-858
Northwest Defense Minerals, Inc.
Lawrence County, South Dakota

Dear Miss Keenan:

Reference is made to your letter of July 20, 1956 regarding the provisions of Amendment No. 14 pertaining to the analysis of concentrates obtained from processing material excavated from drill holes and test pits.

The proposed Amendment stipulates that all concentrates obtained from processing the material from each drill hole or test pit will be combined into one sample for analysis purpose.

The stipulation was imposed by the Washington Office, DMEA, when the Amendment was prepared, as it was felt that analysis on that basis should furnish ample information for the purpose of the exploration project. However, if you desire more detailed information concerning horizons of mineral concentration, we do not object to your concentrating the material by sampling intervals to obtain the desired information. But under the terms of the proposed Amendment, the Government will not contribute to the costs of analysis of but one sample for each drill hole or test pit. Therefore your request for Government participation in the costs of the additional analysis is denied.

Very truly yours,

W. M. TRAVER

BUREAU OF MINES Denver, Colorado

Mr. W. M. Traver, Executive Officer
DMEA
Department of Interior
224 New Customhouse Bldg.
Denver, Colorado

118 E. 40th Street
New York City

RECEIVED JUL 30 1956

Dear Mr. Traver:

With reference to the receipt of Amendment No. 14 DMEA 654X and your letter of transmittal dated July 12, 1956:

In the event the amendment was accepted and signed, it is the understanding of the Corporation that the assay cost would only be allowed on the composite sample of each of 18 churn drill hole samples and on the composite sample of each of 2 test pit samples, the assay cost to include tin, columbium-tantalum and tungsten. The gold would be panned out separately and reported.

With reference to R.M. Atwater's Progress reports, September to November 21, 1955, the sludge from the churn drill holes was stored in drums and each 6 feet of excavated material was marked and sealed before storing in the NDM Inc. mill. The excavated gravel from the test pits was stored in bins separately and each bin contained material from 6 feet of gravel and was clearly marked.

With reference to the processing of the creek gravel bed materials concerned with Phase 2, (reports 1, 2, 3), the Corp. feels that since considerable ~~the~~ time and money has been expended on storing the 6 foot interval materials separately, that each 6 foot material should be processed separately to determine where the values in the gravels begin and how much gravel is barren overburden. This is in keeping with placer engineering practices and is in preparation for production. Since President Eisenhower has signed Senate Bill 3982, and since NDM Inc. has gravel reserves containing columbium-tantalum and tungsten (metals which are included in S 3982), the Corporation requests permission to run the 6 foot interval samples separately and requests allowance for assay for each sample.

With reference to costs of processing the stored excavated gravels, based upon costs in 1955, we estimate at least 2 weeks labor time will be involved in mill processing:

Labor	$ 531.98 *
Corporation engineer 10 days	500.00
Engineer travel from Colorado	200.00
Engineer Hotel expense	84.00
Meals (estimated) for labor	140.00
Gasoline and Miscellaneous	50.00
	$1505.98

Note: * The $531.98 may include an expert gold panner.

The Corporation has expended a large fund in 1955 already disallowed. We request that the contingency fund be allowed for the processing of the 6 foot interval gravels and for panning and assaying.

Yours very truly,
NORTHWEST DEFENSE MINERALS, INC.

Peggy Keenan, President

Subject: Docket DMEA 654X (Tin, Columbium, Tantalum, Tungsten), Contract Idm-E58, Northwest Defense Minerals, Inc., Lawrence County, South Dakota

In our teletype to you of June 25, 1956, we advised that sampling interval of material from drill holes and test pits excavated under the subject contract would be forwarded to you as soon as conclusive information was obtained.

In conjunction therewith and supplementing information forwarded to you concerning Amendment No. 14 to the Contract, we are enclosing four sets of data consisting of the following:

1. Memorandum dated July 9, 1956, from E. O. Binyon, Mining Engineer, Bureau of Mines, wherein he gives the sampling interval for the eighteen churn drill holes.

2. Memorandum dated July 9, 1956, from E. O. Binyon, wherein he comments on the invervals on which samples were taken in the drill holes and test pits.

3. Memorandum dated July 18, 1956, from E. O. Binyon, supplementing his memorandum of July 9 under item 2, and wherein he comments on sampling and analysis procedures.

The material is forwarded for your general information and in further support of Amendment No. 14.

From: E. O. Binyon

Subject: Docket DMEA 654X (Tin-Columbium-Tantalum-Tungsten) Contract 18m-198, Northwest Defense Minerals, Inc., (Rawlins Mining District) Lawrence County, S. Dak. -- Sample Intervals in churn drill holes and test pits on Bear and Beaver Creeks

The sample interval used for the 18 churn drill holes drilled to date, 9 in the 7B Flats Area on Bear Creek and 9 on Beaver Creek was 6 feet except for the last run in a hole, this being whatever footage might be included in the run. If the depth of a hole was 16 feet then three separate samples for depths 0 - 6 ft., and 6 - 12 ft., and 12 - 16 ft. were taken. In this instance the last sample represents a depth of 4 feet.

All churn drill hole samples are stored in drums on the property. Volume of churn drill samples (348.5 feet of 6 5/8" diameter hole) is 83.3 cu. ft. or 3.08 cu. yds.

For Test Pit No. 1 on Bear Creek the sample is separated into two samples, the first being for 0 to 6 feet and the second for 6 to 6½ feet. The samples from Test Pit No. 2 on Bear Creek represent depths 0 to 6 feet and 6 to 7 feet. As measured in the storage bins, the volume of material from Test Pit No. 1 is 4.19 cu. yds. and from Test Pit No. 2 is 7.00 cu. yds.

It was reported that the material excavated from Beaver Creek Test Pit No. 1 is stored as three separate samples representing depths 0 - 6 ft., 6 - 12 ft., and 12 - 18½ ft. However, that part of the third sample from approximately 16½ to 18½ or the bottom 2 feet consisting of 1.25 cu. yds. by volume was when excavated, hauled and kept separate from the material from the upper 4 feet (approximately). This 1.25 cu. yds. was the first and only part of the gravel from the 12 - 18½ feet run to be washed and concentrated. The concentrates of several products obtained from the run of the pilot mill test were analyzed.

Concentration and analyses of concentrates of only 1.25 cu. yds. of the total material from the 12 - 18½ ft. sample has resulted in splitting of this sample into two separate samples, if the gravel in any future test is to be washed and concentrated as a sample of a depth of 6 feet or of the entire depth, then the results obtained must be combined on the basis of volume with the results that are obtained from future test work.

In all, a total of approximately 31 cu. yds. of samples from all test pits and churn drill holes; 28 cu. yds. of test pit samples and 3 cu. yds. from churn drill holes are stored and are yet to be washed and concentrated.

Memorandum

To: Executive Officer, DMEA Field Team, Region III

Through: John F. Shaw
Supervising Mining Engineer

From: E. O. Binyon

Subject: Docket DMEA 634X (Tin, Columbium, Tantalum, Tungsten)
Contract Idm-458, Northwest Defense Minerals, Inc.
(Rawlins Mining District) Lawrence County, S. Dak.

1. Interval sampling of churn drill holes and test pits.
2. Washing and concentration test on a part of a sample from the bottom of Test Pit No. 1 on Beaver Creek.
3. Analyses of several concentrate products from the washing and concentration test.

Subject Item 1 - Interval sampling of churn drill holes

On October 3, 1955, when I visited the project to observe the start of the churn drilling under stage II on Bear Creek, the purpose of the work of the project in general and the sampling procedure in particular were discussed with Miss Peggy Keenon. In this discussion, I mentioned to Miss Keenon (the engineer had not arrived) that it might be advisable to take samples of the churn drill holes and test pits at regular intervals in order to determine more accurately the depth at which the gravel might contain sufficient recoverable values to be of a workable grade. Also, I mentioned that the sampling procedure was the responsibility of her supervising engineer who, reportedly was experienced in sampling placers.

This is the only time the subject was discussed or mentioned to either Miss Keenon or the engineer and no direct order, orally or in writing, was given to take the samples at intervals. However, as the subject did not come up again during the life of the project and the claims by the operator for payment for this part of the work were approved by me it can only be concluded that the suggestion could have been considered by the operator as an order and that the responsibility for sampling the holes and pits at intervals is mine.

Subject Item 2 - Washing and Concentration test on a part of a sample from the bottom of Test Pit No. 1 on Beaver Creek

I did not observe the excavation, handling and storing of the samples from the pit; on Beaver Creek, and the following is based in part on what the operator stated and on assumption.

In excavating the pit the gravel was loaded either directly to the pick-up or piled on a platform until a truck load was available, and it was then hauled to the mill building and stored in bins, the material for each sample interval being stored separately. It is assumed that the 1.25 cu. yds. from the bottom 2 feet of the 12-18½ feet sample interval was hauled separately to the mill and as it was the last of the material from the pit it was placed or stored so that it would be put through the washing and concentration process first. Whether or not the operator intended to wash and concentrate only the bottom 1.25 cu. yds. is not known. However, it is assumed that this is not the case but that weather conditions with inadequate heating facilities and to some extent the inadequate equipment forced the shut down, before all of the 12-18½ feet sample could be run. It might be mentioned that the statement by Miss Peggy Keenan that I ordered the shut down of the washing and concentration test is definitely a misstatement of fact. I did not know the test work had been stopped until the caretaker at the property informed me in the presence of S. M. Burke on Nov. 21 that the work had been shut down Nov. 17 (being in operation only 1 and ½ days from noon Nov. 15 until Nov. 17) and that Miss Keenan had left with the engineer Nov. 19 or 20.

Although I had no way of knowing that the operator would test only 1.25 cu. yds of gravel or a part of a sample, the fact that I approved a part of the operator's claim for payment for the work puts the responsibility for permitting the test of only a part of the sample from the 12-18½ feet sample of test pit on Beaver Creek on me.

Subject Item 3 - Analyses of several concentrate products from the washing and concentration test on a part of a sample from Beaver Creek Test Pit No. 1

In discussing the washing and concentration tests with the operator and the engineer I mentioned that since the purpose of the test work apparently was to determine the most efficient flow sheet as well as to obtain a concentrate from which the value of the gravel could be determined, it might be advisable to have analyses and sizing tests of the various products from the jig and Humphrey spiral, I also mentioned that the engineer should know what analyses would be necessary in order to obtain complete information on the test work and value of the gravel. I gave no order, either verbally or in writing, to have any analyses made. The contract allows $2,225.00 for analytical work and as I assumed the information obtained from the analyses of the various products was of value in determining the efficiency of the flow sheet, I approved payment of the operator's claim for the microscopic and chemical analyses.

In regard to continuation of the washing and concentration test by the operator on the churn drill hole and test pit samples, I am of the opinion that it would be to the advantage of the Government as well as to the operator to amend the contract so as to permit the testing of the remaining samples by some reliable firm, such as Denver Equipment or Galagher or any firm that is mutually acceptable. This I believe would eliminate any doubt as to the results and also could probably be done at less cost.

Re: Docket DMEA 654X
(Tin, Columbium-tantalum, Tungsten)
Contract Idm-N58
Northwest Defense Minerals, Inc.
Lawrence County, South Dakota

Dear Miss Keenan:

Enclosed are the Government's, Division, Docket, Finance Office, and Field Team copies of proposed Amendment No. 14 to Contract Idm-N58, which has been prepared to confirm an understanding relative to separate analysis of the concentrate products from jig and spiral in processing the material excavated from the bottom approximately 2 feet of Test Pit No. 1 on Beaver Creek.

Your attention is directed to the provision in the Amendment that concentrates from the entire material excavated from each test pit or drill hole will be combined into one sample for analytical purpose rather than to make a separate analysis of the concentrate from the material obtained from each sampling interval, or separate analysis of each of the jig or spiral products as was the case for the bottom 2 feet of material from Test Pit No. 1.

If the Amendment is satisfactory to you, all copies are to be signed by you, your title inserted, the corporate seal affixed, and all copies of the Amendment promptly returned to this office.

Upon return of the properly executed copies of the Amendment, the "Operator's Copy" will be forwarded to you.

Very truly yours,

W. M. TRAVER

Re: Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Contract No. Ida-858
Northwest Defense Minerals, Inc.
Keenan Properties
Lawrence County, South Dakota

Dear Mr. Traver:

As recommended in your teletype of June 25, 1956, there are enclosed for execution the original and five copies, with two extra copies, of Amendment No. 14 to the subject contract, signed by the Administrator.

You will note that the amendment provides for the payment for the six chemical analyses, six assays for gold, and extra copies of analytical reports that were not provided for in the contract. However, the subject amendment provides for only one chemical analysis of a combined concentrate recovered from the remaining material excavated from test pit No. 1 on Beaver Creek and from each other test pit or drill hole. We feel that such concentrate analyses should furnish ample information for the purpose of this exploration project. However, as suggested in your teletype, if the Field Team and Operator desire more detailed information concerning horizons of mineral concentration, such data may be obtained in the field by weighing the concentrates recovered from the drill hole or test pit interval desired, and separating the gold therefrom; then recombining the concentrate for the required analysis.

If the terms and conditions of the proposed amendment meet with your approval and the Operator's, please have the original and five copies signed by the Operator and make the usual distribution of the document.

In the event that any part of the proposed amendment does not meet with your approval or the Operator's and cannot be amended within your delegated authority, the original and all copies are to be returned with the proposed changes for consideration.

Sincerely yours,

George C. Selfridge

From: Rare and Miscellaneous Metals Division

Subject: Docket No. DMEA-654
(Tin, columbium, tantalum, tungsten)
Contract No. Idm-E58
Northwest Defense Minerals, Inc.
Keenan Properties
Lawrence County, South Dakota

Justification - Amendment No. 14.

(Reference is made to teletype from W. M. Traver, dated June 6, 1956)

Six chemical analyses for tin, columbium-tantalum and tungsten, and six assays for gold were made on concentrate fractions recovered from about 1½ cu. yards of material excavated from the bottom (on bedrock) in Test Pit No. 1 on Beaver Creek. The analyses of the six samples were not provided for under the terms of the contract. The examining engineer authorized the Operator to have these analyses made as such information would be beneficial to the project. The Executive Officer recommends that an amendment to the contract be executed which allows the cost of these analyses as a part of the project work. This division concurs with the recommendation of the Executive Officer of Region III that an amendment be executed which allows the cost of these analyses as a part of the project work.

CHAIRMAN, OPERATING COMMITTEE, DMEA

REURTT JUNE 18, DMEA 654, CONTRACT IDM-E58, NORTHWEST DEFENSE MINERALS, INC., SAMPLING AND ANALYTICAL PROCEDURE.

EXAMINING ENGINEER APPARENTLY AUTHORIZED SPLIT ANALYSES OF SAMPLES ACCORDING TO HIS INTERPRETATION OF TEXXX THE CONTRACT. UNDER THE IXXXX CIRCUMSTANCES, WE RECOMMEND THAT AN AMENDMENT BE PREPARED AUTHORIZING THE DISPUTED ANALYSES FOR THE TWO-FOOT BOTTOM SAMPLE FROM NO.1 TEST PIT ON BEAVER CREEK. ALL OTHER CONCENTRATES TO BE ANALYZED ON A COMBINED BASIS UNLESS THE CONTRACT IS FURTHER AMENDED. WE ARE PROCESSING VOUCHER FOR REIMBURSEMENT TO OPERATOR AS PREVIOUSLY CONCURRED IN BY YOU WITH THE ASSUMPTION THAT AN AMENDMENT AUTHORIZING THE DISPUTED ANALYSIS WILL BE PREPARED.

SAMPLES HAVE BEEN SAVED SEPARATELY BY INTERVALS IN EACH OF THE DRILL HOLES AND TEST PITS. SAMPLING INTERVAL ON ALL WILL BE FORWARDED TO YOU AS SOON AS CONCLUSIVE INFORMATION IS OBTAINED. IT APPEARS FROM PRACTICAL STANDPOINT THAT COMBINED CONCENTRATES OF EACH SAMPLING INTERVAL SHOULD BE ANALYZED SEPARATELY INSTEAD OF THE COMBINED CONCENTRATES FROM THE ENTIRE EXCAVATED MATERIAL OF EACH SEPARATE DRILL HOLE AND TEST PIT AS PRESENTLY STIPULATED IN THE CONTRACT, HOWEVER, THAT MATTER CAN BE RESOLVED LATER IF YOU DEEM SPLIT SAMPLING DESIRABLE.

Mr. Chambers

REFERENCE JUNE 12 DMEA-654 NORTHWEST DEFENSE MINERALS, INC. SAMPLING AND ANALYTICAL PROCEDURE. AMENDMENT NO. 3 REQUIRES AN ANALYSIS OF THE CONCENTRATE RECOVERED FROM EACH DRILL HOLE AND TEST PIT COMPLETED FOR TIN, TUNGSTEN, TANTALUM AND COLUMBIUM. LATER AMENDMENTS AUTHORIZING CHANGES IN METHOD OF RECOVERING CONCENTRATES DID NOT CHANGE IN ANY WAY THE REQUIREMENTS FOR ANALYSES. THEREFORE, THE ANALYTICAL WORK DESCRIBED AND APPROVED IN SIMYON'S MEMORANDA, DATED MAY 10 AND 11, TO YOU AND IN YOUR MEMORANDUM OF JUNE 12 TO THE OPERATING COMMITTEE ARE NOT IN ACCORDANCE WITH THE INTENT OF THE CONTRACT. OPERATOR INFORMS US OVER PHONE THAT SIMYON AUTHORIZED THE ANALYTICAL WORK LISTED IN THE ABOVE-DESCRIBED MEMOS. THE ACCURACY OF THE OPERATOR'S STATEMENTS SHOULD BE VERIFIED AND THE OPERATOR SHOULD BE INFORMED OF THE REQUIREMENTS OF THE CONTRACT CONCERNING ANALYTICAL WORK AS DISCUSSED IN TELEPHONE CONVERSATION WITH KNOUSE ON JUNE 12. IF ~~ADDITIONAL~~ DISPUTED ANALYSES ARE NECESSARY AS PART OF PROJECT WORK PLEASE FURNISH A JUSTIFICATION SO THE NECESSARY AMENDMENT CAN BE PREPARED HERE.

Reference June 12 DMEA-654 Northwest Defense Minerals, Inc. sampling and analytical procedure. Amendment No. 3 requires an analysis of the concentrate recovered from each drill hole and test pit completed for tin, tungsten, tantalum and columbium. Later amendments authorizing changes in method of recovering concentrates did not change in any way the requirements forcanalyses. Therefore, the analytical work described and approved in Binyon's memoranda, dated May 10 and 11, to you and in your memorandum of June 12 to the Operating Committee are not in accordance with the intent of the contract. Operator informs us over phone that Binyon authorized the analytical work listed in the above-described memos. The accuracy of the Operator's statements should be verified and the Operator should be informed of the real requirements of the contract concerning analytical work.

(Tin columbium-tantalum tungsten)
Contract No. Idm-E58
Northwest Defense Minerals , Inc.
Lawrence County, South Dakot

Supplement to Memorandum dated May ~~13~~ 31, 1956
N. Y. C. Telephone call from Miss Keenan, President.

Miss Keenan: I have submitted copies of all the invoice for work done including the cost for the sample analyses, and am unable to understand why these funds cannot be released.

Knouse: Mr. Traver will ~~receive~~ require an extension of time to allow the work done after January 1, 1956, before he can release funds for work done after that date. As I understand the report on the analytical work done, analyses were made of various concentrate fractions recovered from about $1\frac{1}{4}$ yards of gravel excavated on the bedrock or bottom of a test pit.

Miss Keenan: Yes, that is correct.

Knouse: The contract provides for only analysis for tin, columbium-tantalum, tungsten of a combined concentrate from each completed drill hole or test pit.

Miss Keenan: The analyses were made at the request of Mr. Binyon, the Bureau of Mines supervising engineer, and he authorizes this work, and the Government should pay their share of the cost.

Knouse: That question will have to be handled through Mr. Traver.

Subject: Docket No. DMEA-654
(Tin columbium-tantalum tungsten)
Contract No. Idm-E58
Northwest Defense Minerals, Inc.
Lawrence County, South Dakota
Supplement to Memorandum June 12, 1956

Telephone call from Mr. Traver, Denver, Colorado

Traver: What is your understanding of the contract concerning the analyses to be made of the concentrate samples recovered from the drill holes and test pits completed.

Knouse: The contract provides for an analysis for tin, columbium-tantalum and tungsten of the combined concentrate recovered from each drill hole and test pit completed. The Government project engineer can instruct the Operator concerning the drilling or test pit sinking interval that the gravel should be washed in order to determine the horizons of mineral concentration. I notice from the Operator's report that various analyses have been made of concentrate fractions recovered from the gravel in the bottom of one of the test pits. In a telephone call from the Operator she advised Mr. Binyon authorized this work. If Binyon authorized this work some action will have to be taken to see if the cost for this work can be approved provided it is to the benefit of the project work.

Traver: Then you in Washington want only analyses of a combined concentrate from each drill hole and test pit and not analyses of the various concentrate fractions.

Knouse: Yes, that is the intent of the contract.

Your telephone conversation 6-12-56, Contract Idm-258. Upon receipt of executed Amendment 13, it appears your suggested amount of $708.00 properly supported and work has been approved is a fair amount to pay operator, and you are authorized to make payment accordingly. Also the withholding of $240.00 from Operator for completion guarantee should accomplish its purpose.

Memorandum

To: Chairman, Operating Committee, DMEA

From: Executive Officer, DMEA Field Team, Region III

Subject: Docket DMEA 654 (Tin, Columbium, Tantalum, Tungsten) Contract Idm-E58, Northwest Defense Minerals, Inc., Lawrence County, South Dakota - Monthly Progress Report and Voucher for the period November 23, 1955 through April 15, 1956

Enclosed for your information is a copy of the subject report complete as received in this office except that a photocopy of Form MF-104 has been substituted for the copy which was submitted by the Operator. The original and three copies of the report are retained in this office.

Payment to the Operator is withheld pending execution of an amendment to extend the completion date of the contract. All of the allowable work for the above period was performed after January 1, 1956, the expiration date of the contract.

Of the total amount of $1,548.00 reported by the Operator on Form MF-104 only two items "Technical Services": $550.00 and "Assays" and "Copies": $348.00 are subject to reimbursement upon extension of the contract completion date. Government participation at 90 percent is $808.20, however a portion of this amount will be withheld to cover possible audit disallowances.

In addition to the above, an amount of $156.25, the maximum allowable cost of $6\frac{1}{4}$ feet of test pit work will become subject to reimbursement when the excavated material from all presently completed test pits has been concentrated. Government participation at 90 percent is $140.62.

Six analyses have been completed as follows on concentrates from a portion of the excavated material from one test pit.

1. Panned concentrates from material near bedrock
2. Cleaned jig concentrates
3. No. 2 jig concentrates
4. Jig bed concentrates
5. Jig residue from cleaned jig concentrates
6. Composite of Humphrey Spiral splits 1, 2, 3, and 5

Mineralogical examination was made of the cleaned jig concentrate, and the cost thereof is included with the cost of "assays" on Form MF-104.

If the above sampling and analytical procedure does not conform with your interpretation of the contract terms, please advise this office as soon as possible.

Memorandum

To: W. T. Frazer, Executive Officer, DMEA Field Team, Reg. III

From: E. C. Binyon, Rapid City, S. Dak.

Subject: Docket DMEA 6[illegible]4 (Tin, columbium-tantalum, tungsten), Contract Idm-858, Northwest Defense Minerals, Inc., Lawrence County, S. Dak. - Operator's Monthly Progress Report for the period Nov. 23, 1955 - April 15, 1956

Transmitted herewith are the original and four copies of the following:

1) Operator's MF-10A and MF-10A

2) Operator's Narrative Report, with copies of reports of analysis on six samples and a copy of a report on mineralogic l examination. Also attached to the report are five prints of a map of Beaver Creek showing churn drill holes and Test Pit No. 1 (Beaver Creek) with an attached sheet of analyses.

3) Bureau Engineer's Narrative Report.

Also enclosed are four extra copies of the Bureau engineer's report and the following:

1) A note from Miss Peggy Keenan concerning invoices for rental of classifier and trommel screen.

2) Letter of transmittal from the operator.

3) Invoices from E. [illegible] Atwater, Jr. for $550.00 for technical services on Progress Report 2, Dec. 26-27, 1955; maps for Report 2, January 2-3, 1956 and for Report 3, March 5 through March 9 and March 12-13, 1956.

4) Invoices from Lucius Pitkin, Inc. for $33[illegible].00 covering analytical work on six samples and $10.00 for preparation of extra copies of reports.

5) Copy of letter to Lemeaux and Company requesting prices on analytical work.

6) Letter from Walker and Whyte, Inc., quoting prices for assaying.

7) Invoice from New Era Mining Co. for $200.00 for rental of equipment: Humphrey Spiral, sand pump, power unit and Denver 14" x6" mineral jig.

Except for the preparation of Report No. 3 and the accompanying maps and preparation of maps for Report No. 2, the work for which payment is claimed was completed prior to January 1, 1956, as stipulated by amendment to the contract. The work under the items that have been allowed was done in conformance with the contract, and it is recommended that the government's share (90 percent) of the allowable cost, $1,054.25, or $948.82 be paid.

E. C. Binyon

cc: Traver (2)
files

RECEIVED
JUN 14 1956

May 10, 1956

Memorandum

To: W. L. Traver, Executive Officer, DMA Field Team, Rm. 181

From: E. C. Binyon, Rapid City, S. Dak.

Subject: Docket No. A 654 (Tin, columbium-tantalum, tungsten), Contract Idm-158, Northwest Defense Minerals, Inc., Lawrence County, S. Dak. - Operator's Monthly Progress Report, for the period Nov. 23, 1955 - April 15, 1956

The subject report was received in this office on May 8, 1956.

The work covered by the Operator's Engineer's Narrative Report was such that only a check of the calculations could be made. A few minor arithmetical errors in conversion of recovery from total yardage to pounds per cubic yard were noted. The errors make a difference of $.01 in the value per cubic yard.

Of the Operator's claims for payment on the Operator's Monthly Report and Voucher Form MF-104 dated Nov. 23, 1955 - April 15, 1956, the following allowances and disallowances are made:

Test Pitting

Three test pits were approved by this office. The pits and depths are:

Bear Creek Test Pit No. 1 - 6½ ft.
Bear Creek Test Pit No. 2 - 7 ft.
Beaver Creek Test Pit No. 1 - 18½ ft.

Payment through Report No. 2 - 25½ ft. @ $25.00 per ft. -	$631.25
Claimed in Report No. 3, 6, ft. 6½ ft. @ $25.00 per ft. -	156.25
	$787.50

Total Test Pit footage - 31½ ft. @ $25.00 per ft. - $787.50

Of the $325.12 claimed under "Test Pit Caisson Costs - Mill Run Process," $156.25 is allowed.

Mill Run Process

The balance of the $325.12, or $168.37, apparently is for Mill Run Process and is disallowed. Expenditures for this item are not provided for in the contract except that the cost of treating samples is included in the cost per foot for churn drilling and test pitting.

Technical Services

The $200.00 claimed for technical services, Progress Report No. 2, December 26 and 27, 1955, and maps for Report No. 2, January 2 and 3, 1956, may be a duplication, at least in part, of the charges submitted for technical services in Report No. 2. However, as this cannot be proved and the item is documented by invoice, the full amount claimed, $550.00, is therefore allowed.

Rental of Equipment

The amount claimed for rental of equipment, $375.00, although documented by invoices, is disallowed as it is a part of the Mill Run Process Cost and is not included under the terms of the contract.

Allowed		Disallowed	
Test Pit, 6 ft. @ $25 -	$156.25	$168.87	Mill Run Process
Technical Services	550.00	325.00	Equipment Rental
Assays, 6 samples	338.00		
Copies of Report	10.00	$493.87	
	$ 1,054.25		

It is recommended that the operator be paid $948.82, or 90 percent of the $1,054.25 allowed for expenditures under the terms of the contract.

Denver 2, Colorado

June 1, 1956

Memorandum

To: Chairman, Operating Committee, DMEA

From: Executive Officer, DMEA Field Team, Region III

Subject: Docket DMEA 654 (Tin, Columbium-Tantalum, Tungsten), Contract Idm-E58, Northwest Defense Minerals, Inc., Lawrence County, South Dakota

Enclosed is the following material pertaining to an amendment to the subject contract to extend the date fixed for completion of the project work:

1. Original and two copies of the Operator's letter of May 21, 1956.

2. Original and two copies of the Operator's letter of May 25, 1956.

3. Original and two copies of a memorandum report dated May 28, 1956 from E. O. Binyon, Mining Engineer, Bureau of Mines, Rapid City, South Dakota.

The Operator, in the letter of May 21, requests an extension of the contract to a date which will give the Operator a reasonable period of time to finish the mill run process.

If you will refer to our letter of May 17, 1956, to Miss Peggy Keenan, President, Northwest Defense Minerals, Inc., two copies of which were forwarded to you at the time of writing, you will see that a part of the costs reported by Miss Keenan in the accounting report No. 3 referred to in both her letters of May21 and May 25 could not be allowed because the costs were incurred subsequent to the date fixed for expiration of the contract.

The engineer, in his report under item 3, estimates that it will require from four to five months to complete the processing and analytical work connected therewith on the material obtained from

the drill holes and the first three test pits. Therefore we recommend that an amendment be prepared to extend the date fixed for completion of the work to provide only sufficient time to enable completion of the processing and analytical work that has been started.

Memorandum

BUREAU OF MINES
Denver, Colorado

To: W. M. Traver, Executive Officer, DMEA Field Team, Reg. III

From: E. O. Binyon, Rapid City, S. Dak. Through: S. M. Munke

Subject: Docket DMEA 654 (Tin, columbium-tantalum, tungsten), Contract E58, Northwest Defense Minerals, Inc., Lawrence County, S. Dak.

This is in reply to your memorandum dated May 15 requesting an estimate of the additional time that will be required to complete test work on churn drill and test pit samples taken during the preliminary stage of Phase II of the subject contract.

Any estimate as to the time the operator will require to wash and concentrate the remaining samples of gravel from the churn drill holes and test pits will be, at best, only a guess.

In all, approximately 25 cubic yards of material was obtained from the churn drill holes and test pits, 2 to 3 yards coming from the holes and about 23 yards from the pits. The exact sample interval is not known; however, churn drill holes were sampled about every 6 feet, and for the test pits the interval was about 5 feet, or the depth of each section of the caisson. Accordingly, a total of 64 samples was taken. Of these, 58 were from the churn drill holes and 6 from the test pits.

As it is possible that 1/3 to 1/2 the total number of samples will be eliminated by a lack of values in the upper parts of both churn drill holes and test pits, only 20 or 30 samples may have to be washed and concentrated. If so, between $1\frac{1}{2}$ to 3 months would be required to complete washing, concentrating and analytical work.

The operator spent 4 days in washing and concentration of the $1\frac{1}{4}$ cubic yards of gravel from Test Pit No. 1 on Beaver Creek. If the same amount of time is required for the remaining yardage, then it would take about 3 months for processing and probably another month or two for the analytical work and a report, or a total of 4 to 5 months to complete this stage of Phase II.

The continuation of churn drilling and test pitting under Phase II is dependent upon the results of the recently completed work and, as these results are far from complete, no estimate can be made as to the additional churn drilling and/or test pitting that will be required to adequately explore both Bear and Beaver Creeks. However, should the results of the work on the samples now on hand warrant all of the test pitting and/or churn drilling allowed under Phase II, then between $1\frac{1}{2}$ and 2 years would be required for completion by the operator. This estimate is based on the assumption that progress on future work would be no better than it has been in the past.

Mr. W. M. Traver, Executive Officer
DMEA Field Team Region III
Department of Interior
224 New Customhouse
Denver, Colorado

118 East 40th St.
New York, N. Y.

Dear Mr. Traver:

Progress reports 2 and 3, written by Mr. R. M. Atwater, Jr. made it clear that the Phase II work Contract Idm - E-58, 654X, was suspended by the DMEA because the extreme weather caused working conditions to be impossible. Mr. Binyon went to Northwest Defense Minerals, Inc. in November 1955 to check the mill run process then in operation and found the ice conditions and other considerations very bad. He advised Mr. Atwater to suspend operations.

With reference to the Technical Services, the allowance made in Amendment No. 3 was for $25.00 per sample per assay. It was found during December 1955 that no assay firm would accept the work for that price. It was necessary to contact Mr. Traver, who advised that if the Operator received bids for assay, the low bid price would be acceptable and reimbursable. All of this was accomplished by letter which consumed time.

The engineer could not possibly write report 3 or document the maps, without the assay reports, therefore, the engineers time was mostly spent after January 1, 1956. The assayor was extremely busy and this caused more delays which were unavoidable.

The above information has been transmitted to the field, and this is a review to clarify some of the reasons for request of extension of Idm E-58, 654X dated May 21 1956.

Will you please arrange to extend the contract and to service our expended funds of report 3 as soon as possible?

Yours very truly,
NORTHWEST DEFENSE MINERALS, INC.

Mr. W. M. Traver, Executive Officer
Field Team RegionIII
DMEA, Dept. of Interior
224 New Customhouse
Denver, Colorado

118 East 40th St.
New York City

Dear Mr. Traver:

Your letter of May 17 received and indicates that due to technicalities beyond the control of Northwest Defense Minerals, Inc., your division is holding between $1500 and $2000 in claims for work performed under report 2 and report 3.

In a letter dated March 10, 1956 to Mr. Ernest Wm. Ellis, Chief, Rare and Miscellaneous Metals Division, our Corporation made the request for an extension of the Contract Idm E-58, 654X. Knowing this request was in the hands of the executives who previously granted our Corporation extensions and amendments, we expected there would be no delay as outlined in your May 17 letter.

The Northwest Defense Minerals, Inc. requests an extension of the Contract Idm E-58, 654X to a date which will give the Operator a reasonable period of time to finish the mill run process and which allows the immediate release of funds for technical services etc., in report 3. Copies of this letter are being sent to Mr. Ellis and Mr. Binyon so that there will be no misunderstanding in the various offices of the DMEA with regard to our request for an extension.

With reference to the other items in your letter; the whole account is really devastating and we will have to take a few days to recover from the shock over the state of our finance tied up in the project.

Yours very truly,
NORTHWEST DEFENSE MINERALS, INC.

May 31, 1956

Memorandum

To: File

From: F. L. Knouse, Rare and Miscellaneous Metals Division

Subject: Docket No. DMEA 654
(Tin columbium-tantalum tungsten)
Contract No. Idm E-58
Northwest Defense Minerals, Inc.
Lawrence County, South Dakota

N. F. C. Telephone call from Miss Keenan, president

Miss Keenan: I am calling to determine how I can effect the payment of funds due us for work completed on the subject project. I have repeatedly written and telegraphed Mr. Traver for the release of these funds without success, and I am in dire need of these funds for use to complete the processing of the samples obtained from the drill holes and test pits completed during 1955 on my property. In addition I should like to have the contract amended to extend the period of time to complete this work. This extension of time should release about $1000 now being withheld by Mr. Traver for work I have completed, and I estimated I can complete the sample processing with these funds except for ~~requiring~~ engineering expenses to direct this work which is allowed in the contract.

Knouse: An amendment to extend the period of time to complete the work can be taken care of by this office after we have the recommendation from Mr. Traver as to the time that will be required to do this work. As to the release of the funds for the work you have completed, that question will have to be resolved by Mr. Traver after such an amendment has been executed. We will take the necessary step to prepare the amendment to extend the period of time, and this other question should be taken up with Mr. Traver.

Re: Docket DMEA 654X (Tin, Columbium, Tantalum, Tungsten)
Contract Idm-E58
Rawlins Mining District
Lawrence County, South Dakota

Dear Miss Keenan:

Your letter of April 20, 1956 and your Monthly Progress Report and Voucher for the period November 23, 1955-April 15, 1956 have been received in this office.

In your letter you have requested clarification of several items connected with Progress Report No. 2, Phase II. These items will be taken in the order mentioned in your letter.

a) The amount approved by the Finance Office for costs under Report No. 2 is $2,681.51. Government participation at 90 percent is $2,413.36, which is the amount received by your company.

b) Truck repairs disallowed: $150.09. Certain minor repairs were allowed in the amount of $110.92. The amount disallowed was for major repairs and purchase of tires and other equipment.

c) Food costs disallowed: $115.64. A review of the documentation of food costs will be made at a later date, at which time any amount still due will be reinstated. Several items of documentation were not clearly marked for the commisary and, therefore, were disallowed.

d) The 6 1/4 feet of test pitting disallowed is for the first pit sunk on Bear Creek. It has now been determined that the pit will be allowed when the "Mill Run Process" has been completed, including the treatment of material from this pit.

e) Mill Run Process

This item cannot be allowed separately, but must be considered as a part of the test pit work. Amendment No. 11 stipulates that the test pit work includes the washing and concentration of the excavated material, and separation of free gold.

In reference to the Monthly Progress Report and Voucher for the period November 23, 1955-April 15, 1956, payment on this voucher will be deferred for the reasons given below.

Category (1) Test Pit Caisson and Mill Run Process

No payment can be made under this category until the Mill Run Process has been completed. The cost of 6 1/4 feet of test pit work is the only cost that can then be allowed.

Category (2) Technical Services

Documentation furnished with the report indicates that the work was performed after January 1, 1956, the expiration date of the contract. No payment can be made until the completion date is further extended on request from you.

Category (4) Equipment Rental

There is no provision in the contract for rental of Mill Run Processing equipment under Category (4). This is an integral part of the maximum cost of $25.00 per foot for sinking test pits. Items 1 and 2 of Amendment No. 11 are quoted below.

"1. The Operator may elect to perform some or all of the work of sinking the 9 test pits authorized under Exhibit "A" attached to Amendment No. 3 dated October 28, 1952, either itself, or through independent

contractors. The said work includes washing excavated material, concentrating contained tin, tantalum, columbium, tungsten, gold, and other minerals or metals, and separating the free gold from the concentrates.

2. Irrespective of whether the aforesaid work is done under independent contracts, or by the Operator itself, the maximum amount to which the Government will contribute shall be the actual cost, but not in excess of $25 per foot, for sinking not more than 9 test pits with a total footage of not more than 180 feet. The total maximum allowable cost for this work shall be $4,500."

Category (8) Assaying

Documentation furnished with the report indicates that the analytical work was performed after the expiration date of the contract. No payment can be made until the completion date is further extended on request from you.

We hope that this answers all of your questions satisfactorily.

Very truly yours,

W. M. TRAVER

RECEIVED

MAY 21 1956

Mr. [illegible] Travers
Field Team, [illegible]
Department [illegible]
224 New Cus[illegible]
Denver, [illegible]

[illegible] East 40th Street
New York City

Dear Mr. Travers:

Progress Report #3 and MF104, MF104A with Vouchers have been forwarded to Mr. Binyon.

The Northwest Defense Minerals, Inc. is in receipt of the DMEA Administrative Audit Difference Statement dated April 4, 1956 and the audit has been studied.

The check received April 10, 1956, for report 2 claims was $2413.36. According to the Audit Difference Statement, the amount approved so far is $2681.51. There is an amount due according to the record, of $268.15 or the difference between the check and the audit.

With reference to disallowances, - "Truck Repairs" of $150.09, and "Food Costs" of $115.64, cancelled checks were sent as vouchers in support of expenditures. Are these not vouchers? With reference to the caisson test pit disallowances:

During the report 1 period, September 22 to October 28, 1955, 19 feet was reported excavated @ $25.00 a foot in the amount of $456.25 (see documentation of maps, 7 feet Bear Creek, 12 feet Beaver Creek). This amount was first disallowed, but on the April 4 audit was allowed.

During report 2 period, October 29 to November 22, 1955, a second caisson test pit 7 feet in depth, was excavated by order of Mr. Binyon, approved by Mr. Atwater. It was excavated upstream from caisson test pit #1 in Bear Creek (see reports 1 and 2). This 7 feet @$25.00 a foot is part of 13.25 feet claimed in report 2. It appears that the 7 feet was allowed on the audit. The balance of the 13.25 feet was 6.25 feet to bedrock in the Beaver Creek caisson in the amount of $156.25 (see maps of report 2). This amount is again claimed.

With reference to mill run process claims, was allowance for mill run made? We are sending additional vouchers for report 2 mill run process for rentals of equipment and they are included in report 3 MF104, 104A.

To summarize claims not paid:

6.25 feet Beaver Creek test pit	$156.25
Difference on Audit Statement with check received	268.15
Truck repairs covered by check vouchers	150.09
Food costs covered by check vouchers	115.68
Total	$680.17

May we please have these claims settled as soon as possible?

Yours very truly,
NORTHWEST DEFENSE MINERALS, INC.

Subject: Docket DMEA 654X (Tin, Columbium-Tantalum, Tungsten), Contract I4m-258, Northwest Defense Minerals, Inc., Fall River County, South Dakota

Reference is made to our teletype to the Chairman, Operating Committee, dated May 10, 1956, and his teletype reply of May 11, 1956, copies of which were forwarded to you, relative to further extension of the date for completion of the project work.

In order to supply the requested information to the Washington Office, please forward to this office as soon as possible an estimate of the additional time that will be required to complete the washing, concentration, and analytical work connected with the drilling and test pitting completed to date under Phase II of the contract.

If additional drill holes or test pits are deemed desirable or necessary to complete the exploration work, please include a statement to that effect, giving the number of drill holes and/or test pits, the estimated footage of each, and an estimate of the time required to complete the additional work, including the processing of the material and the analytical work involved.

Dear Mr. Traver:

Progress Report #3 and MF104, MF104A with Vouchers have been forwarded to Mr. Binyon.

The Northwest Defense Minerals, Inc. is in receipt of the DMEA Administrative Audit Difference Statement dated April 4, 1956 and the audit has been studied.

The check received April 10, 1956, for report 2 claims was $2413.36. According to the Audit Difference Statement, the amount approved so far is $2681.51. There is an amount due according to the record, of $268.15 or the difference between the check and the audit.

With reference to disallowances, - "Truck Repairs" of $150.09, and "Food Costs" of $115.64, cancelled checks were sent as vouchers in support of expenditures. Are these not vouchers? With reference to the caisson test pit disallowances:

During the report 1 period, September 22 to October 28, 1955, 19 feet was reported excavated @ $25.00 a foot in the amount of $456.25 (see documentation of maps, 7 feet Bear Creek, 12 feet Beaver Creek). This amount was first disallowed, but on the April 4 audit was allowed.

During report 2 period, October 29 to November 22, 1955, a second caisson test pit 7 feet in depth, was excavated by order of Mr. Binyon, approved by Mr. Atwater. It was excavated upstream from caisson test pit #1 in Bear Creek (see reports 1 and 2). This 7 feet @$25.00 a foot is part of 13.25 feet claimed in report 2. It appears that the 7 feet was allowed on the audit. The balance of the 13.25 feet was 6.25 feet to bedrock in the Beaver Creek caisson in the amount of $156.25 (see maps of report 2). This amount is again claimed.

With reference to mill run process claims, was allowance for mill run made? We are sending additional vouchers for report 2 mill run process for rentals of equipment and they are included in report 3 MF104, 104A.

RECEIVED

W. M. TRAVER

ALL MESSAGES TAKEN BY THIS COMPANY ARE SUBJECT TO THE FOLLOWING TERMS:

To guard against mistakes or delays, the sender of a message should order it repeated, that is, telegraphed back to the originating office for comparison. For this, one-half the unrepeated message rate is charged in addition. Unless otherwise indicated on its face, this is an unrepeated message and paid for as such, in consideration whereof it is agreed between the sender of the message and the Telegraph Company as follows:

1. The Telegraph Company shall not be liable for mistakes or delays in the transmission or delivery, or for non-delivery, of any message received for transmission at the unrepeated-message rate beyond the sum of five hundred dollars; nor for mistakes or delays in the transmission or delivery, or for non-delivery, of any message received for transmission at the repeated-message rate beyond the sum of five thousand dollars, unless specially valued; nor in any case for delays arising from unavoidable interruption in the working of its lines.

2. In any event the Telegraph Company shall not be liable for damages for mistakes or delays in the transmission or delivery, or for the non-delivery, of any message, whether caused by the negligence of its servants or otherwise, beyond the actual loss, not exceeding in any event the sum of five thousand dollars, at which amount the sender of each message represents that the message is valued, unless a greater value is stated in writing by the sender thereof at the time the message is tendered for transmission, and unless the repeated-message rate is paid or agreed to be paid and an additional charge equal to one-tenth of one per cent of the amount by which such valuation shall exceed five thousand dollars.

3. The Telegraph Company is hereby made the agent of the sender, without liability, to forward this message over the lines of any other company when necessary to reach its destination.

4. The applicable tariff charges on a message destined to any point in the continental United States listed in the Telegraph Company's Directory of Stations cover its delivery within the established city or community limits of the destination point. Beyond such limits and to points not listed in the Telegraph Company's Directory of Stations, the Telegraph Company does not undertake to make delivery but will endeavor to arrange for delivery by any available means as the agent of the sender, with the understanding that the sender authorizes the collection of any additional charge from the addressee and agrees to pay such additional charge if it is not collected from the addressee.

5. No responsibility attaches to the Telegraph Company concerning messages until the same are accepted at one of its transmitting offices; and if a message is sent to such office by one of the Telegraph Company's messengers, he acts for that purpose as the agent of the sender; except that when the Telegraph Company sends a messenger to pick up a message, the messenger in that instance acts as the agent of the Telegraph Company in accepting the message, the Telegraph Company assuming responsibility from the time of such acceptance.

6. The Telegraph Company will not be liable for damages or statutory penalties when the claim is not presented in writing to the Telegraph Company, (a) within ninety days after the message is filed with the Telegraph Company for transmission in the case of a message between points within the United States (except in the case of an intrastate message in Texas) or between a point in the United States on the one hand and a point in Alaska, Canada, Mexico, or St. Pierre-Miquelon Islands on the other hand, or between a point in the United States and a ship at sea or in the air, (b) within 95 days after the cause of action, if any, shall have accrued in the case of an intrastate message in Texas, and (c) within 180 days after the message is filed with the Telegraph Company for transmission in the case of a message between a point in the United States and a foreign or overseas point other than the points specified above in this paragraph; provided, however, that this condition shall not apply to claims for damages or overcharges within the purview of Section 415 of the Communications Act of 1934, as amended.

7. It is agreed that in any action by the Telegraph Company to recover the tolls for any message or messages the prompt and correct transmission and delivery thereof shall be presumed, subject to rebuttal by competent evidence.

8. Special terms governing the transmission of messages according to their classes, as enumerated below, shall apply to messages in each of such respective classes in addition to all the foregoing terms.

9. No employee of the Telegraph Company is authorized to vary the foregoing.

RECEIVED
MAR 19 1956

Dear Miss Keenan:

Re IMEA Docket #654X
Contract Idm-E58
Rawlins Mining District
Lawrence, South Dakota

You have shown me a copy of the letter from the DMEA Denver office dated January 4, 1956 in which they say that no allowance is made in the contract for gold analyses.

In the body of the contract it is shown that the "free gold shall be removed and the estimated value per cubic yard determined". It is obvious that on a very small amount of material no determinable value per cubic yard of the free gold can be removed, and were it possible it would still be meaningless on account of the fine gold and attached particles which do not respond to the simple methods of dry concentration which we have here. In other words, it is impossible to make an estimate or determine the value of the cubic yard by physical means with such a small sample.

Consequently, I make the suggestion that you forward a copy of this letter to the various interested parties in the Government and suggest that an amendment be made of the exact wording in the contract so as to read that the gold shall be determined by chemical analysis at the expense of Northwest Defense Minerals, if the Government so desires.

Further, on closely reading the contract, it is not clear as to the Government's desires regarding analyses. As stated above, in the DMEA letter of January 4, 1956 they state there will be no allowance for gold analyses. Does the Government wish to have the tin concentrate, the scheelite concentrate, the columbium-tantalum fraction, together with middlings and tailings, analyzed for the various elements, or do they desire to accept Lucius Pitkin's analyses of the unseparated portion of the sample which was given to us, being one-half of the concentrates, the other half being held by DMEA at Rapid City, South Dakota. If the Government wants them analyzed will laboratory payment thereof be authorized?

Yours very truly,
SEPARATIONS ENGINEERING CORPORATION

G.W.Jarman

SEPARATIONS ENGINEERING CORPORATION - COPY

DMEA-654
Contract 10M-E58

What was the weight of the sample of concentrates or nodules of all the processing products, and what percentage of pay was present in the original gross sample?

Test Report on sample for: March 15, 1956.

NORTHWEST DEFENSE MINERALS, INC.

This sample is a complex concentrate made by Mr. R.M. Atwater, Jr. on the property of Northwest Defense Minerals, Inc.

As explained in the legend and flow sheet recommended by Mr. G.W. Jarman, the sample was taken through the processing and refining state to isolate the pay minerals. Due to the sample being so small it was impossible to make a metallurgical balance.

The procedure in this dry method of gravity separation, electrostatic separation, and magnetic separation is dependent in some instances upon the collective building of a recirculating load. This is predominant in the low percentage pay materials. Also, in each instance, on each size, and on each concentration, there is a middlings that can be more properly handled, in a mill than on a small sample in the laboratory.

The laboratory procedure was as follows, on the samples listed below:

Sample No.	
532238	- Panned concentrates of bedrock
532235	- Cleaned Jig concentrates
532237	- No. 2 Jig concentrates
532236	- Jig residue from cleaned Jig concentrates
532789	- Jig bed concentrates
532234	- Humphrey splitters

Samples 532234, which was considered as tails (Lucius Pitkin showed extremely low values), was run first. It was put over the Air Table, with some loss to dust since the sample was extremely fine. Of the 5453 grams tabled 4 grams of heavies were recovered, and these 4 grams showed red flourescent and WO_3 content under the mineral light.

Samples 532789 (Jig bed concentrate), by chemical analysis showed the values to be in tin and WO_3. This sample was screened on a 20-mesh screen and under the dark light showed the WO_3 value of the sample to be in the -20 mesh. A hydrochloric powdered zinc test showed that the bulk of the tin was in the -20 mesh. The screen fraction of the 406 gram sample was 386 grams on 20 mesh, with 20 grams -20 mesh. The 386 gram fraction was not crushed as we wished tohandle the sample without crushing.

copy

The following samples were then combined:

Samples	532238	214 Grams
	532235	624
	532237	268
	532236	342
	532234	4
	532789	20
	Total	1472 Grams

Approx. 3.25 lbs recovered

The 1472 grams were then screened to -20/40, -40/65 and -65 fractions. Each fraction was put separately on the Air Table and a 426 gram tails was cut from the heavies and middlings; the remaining 996 grams was then passed over the Magnetic Separator at 0 amps, and 507 grams of highly magnetic material was removed. The remaining 489 grams were passed over the Magnetic Separator at 3 amps, with 82 grams magnetic and 407 grams nonmagnetic. The value in the 82 grams was CbTa and the red fluorescent mineral mentioned in Lucius Pitkin's report. A brush test on the Air Table gave us a contained CbTa 4.5 gram sample.

The remaining 77.5 gram fraction was passed over the Magnetic Separator at 3 amps, and a 4 gram sample of the red fluorescent was removed. This experiment proved that we had not cut deeply enough into the magnetic stream at the time of the previous separation. In other words, there apparently were three strams and we only cut the most magnetic of those fractions in the first separation, and in the repassage we cut the second stream.

The remaining 73.5 grams was combined with the 407 grams of nonmagnetic to give table backlog volume because the sample was so small. The 480.5 grams was passed over the Electrostatic Separator, producing 162.5 grams of nonconductors and 317.5 grams of conductors.

The 162.5 grams of nonconductors was passed over the Air Table and a WO_3 concentrate of 5.5 grams resulted. The 317.5 grams of conductors was passed over the Laboratory Air Table and a small concentrate of gold was recovered. Another pass on the table and an 11 gram concentrate of tin was removed. The 157 grams from the nonconductors and the 306.5 remaining grams from combined is the retained middlings.

With a larger sample the procedure in the above process for concentration may be slightly altered, but in essence the sample was handled with a view to concentration of values, leaving recovery percentage until a later date when more than a few grams can be handled. In general, we can report that the material responded as expected to the various stages of concentration and we believe the chemcial analyses will be of great interest. With larger samples, not only can purer concentrates be made but the volume of recovery can be ascertained.

James H. Moore

Memorandum

To: E. O. Binyon

From: Executive Officer, DMEA Field Team, Region III

Subject: Docket DMEA-654 (Tin, Columbium-Tantalum, Tungsten), Contract Idm-E58, Northwest Defense Minerals, Inc., Lawrence County, South Dakota - Monthly progress report and voucher for the period October 29-November 22, 1955

The subject operator has submitted revised Forms MF-104 for the period Oct. 29-Nov. 22, 1955 and has returned to us the completed Forms MF-104A which we requested in a letter to the operator dated February 29, 1956.

We are returning the following:

1) All copies of Form MF-104 and MF-104A, which require your review and signature.
2) One copy (original) of the Bureau Engineer's Narrative report.
3) One copy (original) of your transmittal memorandum.
4) One copy (original) of the Operator's Narrative Report including maps.
5) One copy of Engineer's Progress Report No. 2.
6) List of Documentation which was prepared in your office.

It will probably be necessary to revise the Bureau Engineer's narrative report and the transmittal memorandum in order to conform with the amounts claimed on revised Forms MF-104.

We request that you expedite the return of the above items as the operator has requested payment as soon as possible.

DMEA-654

Mr. Ernest Wm. Ellis, Chief
Rare and Miscellaneous Metal
DMEA
Dep't. of Interior
Washington, D.C.

Dear Mr. Ellis:

Thank you for sending a copy of the Form and the MF104 and 104A's. Enclosed ia an extra copy of report 2 which we have just redocumented in the hopes of receiving our revolving fund so urgently needed. (Report 2 closed November 22.) Also enclosed is an extra copy of the assays of the concentrates we were able to recover by process or panning before total freeze-up in November 1955. The Caisson Test Pit was located in the center of a gravel area representing at least 2 million cubic yards of gravel and the Test Pit was excavated where Mr. Knouse and later Mr. Atwater and Mr. Binyon directed. Report 3, Phase II should be in my hands within 5 days.

The work of the assays has taken a long while. Release of the concentrates was delayed because the assays prices were so high. Finally, Denver DMEA advised putting the cost overage into Contingency, providing our Corporation received bids from other assayers. We complied and got the Pitkin price down from $80.00 to $68.00 per assay. Then we realized Denver DMEA would not allow the cost of the gold assay becausethe gold was to have been removed and evaluated. As you see, the Pitkin assays report the gold value which would include some gold removable only by amalgamation.

We have always wanted to arrange for Separations Engineering Corporation to work on a sample of our concentrates. In a report now being prepared by Mr. James Moore of Separations Engineering Corporation it describes that one half of the concentrates recovered before freeze-up were left with Rapid City DMEA, one half was shipped to Lucius Pitkin. This firm removed one quarter, and sent three quarters of the one half to Separations. This firm protested the amount of materials, but did mix them all together and ran them over electro-static, electro-magnetic and air table. The firm members were surprised over the Tin and Gold content. The tin was then coated with the zinc hydrochloric acid test, the coarse gold removed. The scheelite and zircon were each separated in the last runs. Then Mr. Moore went away for 10 days, and when he returned the gold had disappeared from the container. The firm claims no weight was taken of the gold, but all along I had stressed that the gold removed would comply with our contract requirement which had been overlooked in South Dakota. Mr. Atwater had been present at Separations and had counted about 14 pieces of gold in the pan before removal. The separated gold in the container was impressive in ratio to the amount of the concentrate. The disappearance of the gold was extremely upsetting. I give you this detail exactly as I found

RECEIVED
MAR 14 1956

it because of lapse of time and the condition of the contract. In the event the Corporation needs an emended extension I herewith request it. I suggest the gold assay be accepted and included in the amendment. I believe report 3 will state the gold evaluation by assay will be $0.79 per C.Y. We believe that we will recover some free gold by dry method, the rest by amalgamation - when we produce commercially. Gold removed by panning is definitely only part of the gold contained and fine and flower gold is removable by amalgamation. This we proved in our pilot plant work in 1949 and we still have the amalgator.

I am sorry this has been a long story, but these are the facts. I urgently need 8 MF104's and 8 MF104A's for report 3.

Hoping to see you soon,

Yours very truly,

NORTHWEST DEFENSE MINERALS, INC.

Dear Miss Keenan:

This is with reference to your telephone call of March 5, 1956, concerning the preparation of Form MF-104 "Operator's Monthly Report and Voucher," and the collection of the amount due as DMEA's contribution for the work completed.

There are enclosed copies of the following:

1. Letter dated February 29, 1956, to Peggy Keenan, President, Northwest Defense Minerals, Inc., Standish Hotel, 45 East 61st Street, New York 24, New York, from W. N. Traver, Executive Officer, DMEA Field Team, Region III

2. Administrative Audit Difference Statement, dated November 28, 1955, to Northwest Defense Minerals, Inc., Spearfish, South Dakota. (R-IV-B & F Form No. 4)

We hope the above enclosures will enable you to prepare the forms requested by Mr. Traver.

Sincerely yours,

Re: Docket DMEA-654X (Tin, Columbium, Tantalum, Tungsten) Contract Idm-E58, Rawlins Mining District, Lawrence County, South Dakota

Dear Miss Keenan:

We are returning all signed copies of Form MF-104A for the period October 29-November 22, 1955, which were submitted in blank with your request that they be filled out by Mr. Binyon's office. Completing these forms is entirely the responsibility of the operator.

It will not be possible to process the November voucher, or any subsequent vouchers for which Forms MF-104A have not been properly completed; therefore, we request that the November forms be filled out by your company and returned to this office as soon as possible. It is a DMEA regulation that Forms MF-104 and MF-104A must be in agreement as to the amount of project costs.

As it has been determined that a breakdown of Phase I costs is not required, we suggest that you continue the same method that you used in completing the October 1955 Forms MF-104A, deleting all amounts which were disallowed from the October voucher.

In reference to your reclaim for costs which were disallowed from the October 1955 voucher, we must have the original of R-IV-B and F Form No. 4, Administrative Audit Difference Statement, which was mailed to you by the Finance Office on November 28, 1955. Please include this item when you return the completed Forms MF-104A.

Very truly yours,

RECEIVED
FEB 15 1956

Dear Sirs:

Several weeks ago our company received a submittal on a tin-gold-columbium-tantalum-tungsten property in the Tinton area of Lawrence County, South Dakota. The owners informed us that a D M E A exploration contract had been negotiated for work on this property and that phase one was already completed. Phase two is now in progress but temporarily suspended pending more favorable weather conditions.

The holders of this exploration contract are known as the Northwest Defense Minerals, Inc., Spearfish, S. D., and Miss Peggy Keenan is in charge. Miss Keenan informed us that the number of their contract was Idm E-58, Docket No. DMEA 654X. The owners were able to show us the results of the work completed to date on phase two of the project; however, they told us that the results and reports for phase one (on Potato and Bear Creeks) were still in your hands. Could you notify us if this is the case and also whether it would be possible to receive any of this information so that we might better evaluate the reports and maps presented to us.

If you desire any more data concerning the exact description of this property, we will be most happy to forward it as soon as possible.

Your kind assistance in this matter is deeply appreciated.

Very truly yours,

Eugene R. Caprio

Memorandum

To: Chairman, Operating Committee, DMEA

From: Executive Officer, DMEA Field Team, Region III

Subject: Docket DMEA 654X (Tin-Columbium-Tantalum-Tungsten) Contract Idm-E58, Northwest Defense Minerals, Inc., Lawrence County, South Dakota

In conjunction with matter discussed in your teletype of November 18, 1955 we are enclosing the original and two copies of Amendment No. 12 to Contract Idm-E58 which has been executed to modify the description pertaining to the plant that will be used in concentrating metals and minerals obtained from the material obtained from the test-pitting operations.

Also enclosed are four copies of a memorandum from S. M. Runke dated November 22, 1955 relative to the proposed concentrating plant. Copies of the amendment have been given to the Operator, Finance Office, Region III and distributed to other offices concerned.

Subject: Contract Idm E-58
Project 654X

Dear Mr. Traver:

Your letter dated January 4, 1956 received. With reference to Disallowances Report I:

Item 2. "Truck Rental":

Two months before Phase II work began, Northwest Defense Minerals, Inc. purchased a Dodge ½ Ton Pick-up truck suitable and for the purpose of transporting the excavated gravel to the mill, etc. No truck could be made available in the area for that type of work at the contract rate of $160 per month. The Operator was not aware that Corporation-owned equipment was an excluded item in the contract, in fact, the Operator had been advised otherwise.

In Report I. Gas and Oil items were re-imbursed to the Corporation. The Operator was advised that "no repairs will be allowed." Now you advise that minor repairs and operating expenses may be allowed. Out of the confusion I will try to document, and where some voucher slips are not available I am leaning the DMEA cancelled checks of the Corporation to be evidence as vouchers. In Phase I. cancelled checks were accepted as vouchers. The following paid items have not been submitted previously and document the truck for Report 1 and Report II, except the Gas and Oil accounts.

1.	Essentials purchased with which to operate truck in mud, gravel, deep snow, steep grades ice and frozen streams during Phase II.	$ 58.15
2.	Used storage battery purchased late September for Phase II	12.88
3.	Repair both rear springs broken hauling through Creek beds in October. Bill not paid until December 3, 1955.	40.60
4.	Depreciation on 1953 ½Ton Dodge Pick-up, September (Commissary preparation, hauling supplies, wood etc.) October, November. (Amendment 10 reads from September on)	149.38
		$ 261.01

Item 3. "COOK AND FOOD":

1. Wood Range - (cancelled check)	$25.00
2. Additional Cooking utensils.	17.50
3. Labor cutting, hauling & splitting wood supplies for cook ranges and heating cabins September preparation (Amendment 10)	
(a) Truck expense gas, oil.	35.00
(b) Wm.R.Rummans $50. week - 2 weeks	100.00
4. Cleaning bedding & preparing cabins	15.00
5. Gasoline for light plant, bulbs, miscellaneous items for water and bathing.	10.00
	$ 202.50

Food & Supply Vouchers, Report I. $ 170.42

Supplementary PROGRESS REPORT 2.

Commissary Cook & Food:

1. See attached Ruth Rummans,	Cook Salary	$ 204.51
	2% Tax	4.09
2. See attached Food and Supplies		$ 226.57

SUMMARY:

Truck	$ 261.01
Supplies, Cook and Food	202.50
Report I Food Supplies	170.42
Report II Food	226.57
Report II Cook	204.51
Tax	4.09
TOTAL	$1069.10

Re: DMEA Docket No. 654X
Contract Idm-E58
Rawlins Mining District
Lawrence County, South Dakota

Dear Miss Keenan:

Reference is made to your letter dated December 7, 1955 in which you requested clarification of the contract price for analyses of samples. The price mentioned in your letter is $80.00 per analysis for Tin, Columbium-Tantalum, Tungsten and Gold. This price was quoted by the Lucius Pikkin Company of New York. Incidentally, no allowance is made in the contract for Gold analyses.

The unit cost stipulated in Amendment No. 3 to the contract is not the maximum allowable cost per sample. If necessary, funds to cover excess costs of analysis can be drawn from the "Contingencies" allowance or from the allowance for any non-limited item which has not been spent in full.

It is requested that bids be obtained from a number of reputable analytic laboratories in order to take advantage of the lowest price for satisfactory work.

Very truly yours,

W. M. Traver

Re: DMEA Docket 654X
Contract Idm-E58
Rawlins Mining District
Lawrence County, South Dakota

Dear Miss Keenan:

Reference is made to your letters dated December 14, 1955, December 27, 1955 and December 30, 1955 wherein you request reinstatement of certain amounts disallowed from your voucher for the month of October, 1955. The items will be taken up separately and in detail.

1. Disallowance for "Test Pit" work

Amendment No. 11 to the contract allows Northwest Defense Minerals, Inc. to perform the test pit sinking on company account rather than by independent contract. The maximum allowable cost remains unchanged, as does the requirement that acceptable documentation be submitted with the original voucher or reclaim. To date such documentation has not been received; therefore, payment cannot be made.

2. Disallowance of "Truck Rental"

As we stated in our letter to your company dated November 23, 1955, company owned equipment cannot be charged on a rental basis. If the contract should be amended to allow it,

you can claim depreciation of the truck on a monthly basis. In addition, you can claim the actual operating expenses, including gas, oil and minor repairs if the costs are properly documented. Request for the amendment would have to be submitted to the Government by your company.

3. Disallowance for "Cook and Food"

The amount of $120.00 for Cook Salary was allowed on the October, 1955 voucher and payment for 90 percent of this amount was made to your company. An amount of $130.00 was disallowed because the documentation for food purchases was not itemised. This amount is subject to reclaim when itemised documentation is presented.

In your letter of December 14, 1955 you request payment at the rate of $8.00 per man day and submit a list showing 140 man days. We accept the tally of man days as correct. However, as stipulated in Amendment No. 3 (clarified by Amendment No. 10) payment will be made on the basis of the actual costs of "Meals and Quarters", not to exceed $8.00 per man per day. This does not mean that the maximum allowable cost can be claimed when the actual cost is less than the maximum. Complete documentation must accompany any supplemental claims.

Very truly yours,

W. M. Traver

Dear Mr. Traver:

With reference to the letter signed by Mr. J.W. Townsend, dated November 23, 1955:

Disallowance (a) "Test Pit Caisson", - we are advised that there may be an amendment to clarify this item and we will contact you at that time.

Disallowance (b) "Rental Truck" -- Please refer to Amendment 3, Exhibit "A", "Estimated Costs of the Project", Item#6, to be rented:

1. Pick-up truck @ $160.00 a month, 3½ months, includes all repairs, total $560.00.

Please re-instate this claim on report 1 MF104, exactly as per contract, and send check to cover for $160.00.

Disallowance (c) "Cook and Food" Item #7 under Miscellaneous, "Meals and Quarters", with reference to the disallowance of $136.00 for food: Please also disallow $120.00 cook's salary already reimbursed. Please refer to Amendment 10 clarifying the subject: Amendment 10 changes the $8.00 a day to $8.00 a man day. Please be advised that the claim is for 140 man days retroactive, and this claim is $1130.00. The following is the man day record:

Gus Nemitz	28	man	days
R.M. Atwater Jr., Supervising Engineer	14	"	"
Allison Kohler, Miner	17	"	"
Arthur Bailie, Miner	16	"	"
John W. Mac Donald, Miner	1	"	"
Wm. H. Rummans, Truck Driver	32	"	"
Ruth Rummans, Cook	32	"	"
	140	"	"

Please send check for a total of $1290.00. We request that you expedite the transaction.

Yours very truly,

NORTHWEST DEFENSE MINERALS, INC.

Re: Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Contract No. Idm-258
Northwest Defense Minerals, Inc. (Assignee)
Keenan Properties
Lawrence County, South Dakota

Dear Mr. Marshman:

This is with reference to your memorandum of December 19, 1955, in which you request to know if the amount of $25.00 is the maximum the Government will contribute to per sample to chemically analyze for tin, columbium-tantalum, and tungsten. Please note the contract requires the Operator to recover the gold from the concentrate, but does not require assaying for gold.

The amount of $25.00 per sample is not an allowable maximum for the analyses, and item (8) Contingencies, or non-limited items if not spent in full, may be drawn on for any excess. However, we suggest that the Operator be requested to obtain bids for this work from other reputable laboratories capable of doing satisfactory work.

Sincerely yours,

George C. Selfridge

Memorandum

To: E. N. Harshman, Acting Exec. Officer, DMEA Field Team, Reg. III

From: E. O. Binyon

Subject: Monthly Progress Report, Docket DMA 654X (Tin, Columbium-Tantalum, Tungsten) Contract Idm E58, Northwest Defense Minerals Inc., Lawrence County, South Dakota

The operator has submitted the Monthly Progress Reports covering work completed under the contract during the period October 29 through November 24. In this report a claim is made for labor which starts with the week beginning October 23, and this I believe is an overlap of a part of the labor claim made in the October reports.

As all papers, invoices, payroll sheet and weekly payroll slips were forwarded to your office with the October report, I have no record whatever in this office and therefore no way of checking the apparent overlap. The only data I have is the copy of the October Monthly Report, on which an allowance of $321.02 was made for labor for handling and storage of samples for the period covered by the report.

Would you please send a copy of the original of the October payroll with the weekly time slips, so that the current report can be checked.

Memorandum

To: Chairman, Operating Committee, DMEA

From: Acting Executive Officer, DMEA Field Team, Region III

Subject: Docket DMEA 654X (Tin-Columbium-Tantalum-Tungsten), Contract Idm-E58, Northwest Defense Minerals, Inc., Lawrence County, South Dakota

Enclosed are two copies of the Operator's letter of December 7, 1955, relative to the matter of assaying samples obtained from work under the subject contract. It states in the fourth paragraph of the letter that the corporation cannot be obligated on a questionable price (in excess to that provided in the contract) until the subject has been clarified as reimbursable.

Under the provisions of Exhibit "A" Amendment attached to Amendment No. 3, the amount of $25.00 is established as the unit price per sample for analytical work. The amount of $25.00 is not indicated as an allowable maximum. However, we are in doubt as to how to interpret it inasmuch as the contract form itself does not define the charges as indicated under Category (7) Miscellaneous of the Amended Exhibit "A".

When you have reviewed the matter, please advise us of your interpretation of the contract regarding the matter of analytical work for our information in replying to the Operator.

Also enclosed are two copies of a letter from this office to the Operator, dated December 16, 1955, forwarding a copy of the MF-104 report requested in the last paragraph of the Operator's letter of December 7, 1955.

Denver, Colorado

Subject: Project 654X
Contract Idm-E58

Dear Mr. Traver:

With reference to the assayer for the Northwest Defense Minerals, Inc. part of the sampling of the gravels in Phase II:

The project engineer recovered ten samples of concentrates from the process run on the Bear Creek Test Pit gravel. Ten samples, or a split half of each sample have been delivered to Mr. E. O. Binyon. Upon inquiry, the best price of assay per sample for Tin, Columbium-Tantalum, Tungsten and Gold is $80.00 per sample. With reference to Amendment 3, "Exhibit "A" of the Contract Idm E - 58, Project DMEA 654X, the allowance per sample is $25.00. This price was based on a Phase I price agreed upon by an assayer because the gross number of seventy samples were agreed by contract to be sent to him. This price of $25.00 is no longer available.

The project engineer has agreed that 5 of the 10 samples referred to as "Splitter" from the Humphrey Spiral unit should be combined, but requests the other 4 samples be assayed separately. That leaves 5 samples to be assayed.

I have advised the Lucius Pitkin Co. of New York that the maximum we can pay for 5 samples is $50.00 each and am trying for that figure. However, whether the price is $50.00 or $80.00 per sample, the Corporation cannot be obligated on a questionable price until the subject has been clarified as reimbursable.

Will you kindly send me a copy of the last Phase I 1951 settlement MF184 and MF184A, as it was settled in Washington, D. C. in 1952? Our copy is in files inaccessible now in another city.

The answer to your disallowances on Report I, Phase II is being prepared and will be sent under separate cover. Thanking you for all courtesies,

Yours very truly

AMENDMENT NO. 11
to
EXPLORATION PROJECT CONTRACT Idm-E58 (DOCKET NO. DMEA-654)
between
UNITED STATES OF AMERICA
and
NORTHWEST DEFENSE MINERALS, INC. (Assignee)

It is agreed this _____ day of _____, 1955, that Contract Idm-E58 (Docket No. DMEA-654) as amended, is further amended effective as of September 22, 1955, as follows:

I. The Operator may elect to perform some or all of the work of sinking the 9 test pits authorized under Exhibit "A" attached to Amendment No. 3 dated October 28, 1952, either itself, or through independent contractors. The said work includes washing excavated material, concentrating contained tin, tantalum, columbium, tungsten, gold, and other minerals or metals, and separating the free gold from the concentrates.

II. ~~In the event that~~ Irrespective of whether the aforesaid work is done ~~through~~ under independent contractors, or by the Operator itself, the ~~allowable~~ maximum amount to which the Government will contribute shall be ~~as set forth in the~~ the actual cost, but not in excess of $25 per foot, for sinking not more than 9 test pits with a total footage of not more than 180 feet. The total maximum allowable cost for this work shall be $4,500. second paragraph of Item (1) under the heading "Estimated Costs of the Project," in Exhibit "A" attached to the aforesaid Amendment No. 3, is deleted.

III. In the event that the aforesaid work is done by the Operator itself, the allowable maximum to which the Government will contribute shall be the sum of the following:

(a) $25.00 per foot, which shall include all costs of labor, supplies, and rental of equipment.

(b) All costs, subject to the allowable maximums, set forth in Items (4), (5), (6) and (7) under the heading "Estimated Costs of the Project" in Exhibit "A" attached to the aforesaid Amendment No. 3, which are necessarily incurred by the Operator for the following items required in the performance of work in sinking the test pits;

(i) transportation of equipment and supplies;

¶ III. The

(ii) gasoline and lubricants to pump water for the washing plant and operation thereof for the purpose of concentrating the material from the test pits;

(iii) meals and quarters for the workmen and supervisor; and

(iv) supervision.

IV. No payment shall be made for any part of the aforesaid work on any test pit until the particular test pit shall have been completed.

V. The labor schedule for said work is waived.

This amendment shall not be construed to increase the estimated total cost of the project, the aggregate total amount which the Government may be required to contribute, the allowable maximum cost of any item of work, or the agreed unit cost of any item of work.

IN WITNESS WHEREOF, these parties have executed this agreement as of the day and year first above written.

AMENDMENT NO. 11
to
EXPLORATION PROJECT CONTRACT I&m-858 (DOCKET NO. DMEA-654)
between
UNITED STATES OF AMERICA
and
NORTHWEST DEFENSE MINERALS, INC. (Assignee)

It is agreed this _____ day of _____, 1955, that Contract I&m-858 (Docket No. DMEA-654) as amended, is further amended effective as of September 22, 1955, as follows:

I. The Operator may elect to perform some or all of the work of sinking the 9 test pits authorized under Exhibit "A" attached to Amendment No. 3 dated October 28, 1952, either itself, or through independent contractors. The said work includes washing excavated material, concentrating contained tin, tantalum, columbium, tungsten, gold, and other minerals or metals, and separating the free gold from the concentrates.

II. In the event that the aforesaid work is done through independent contractors, the allowable maximum amount to which the Government will contribute shall be as set forth in the second paragraph of Item (1) under the heading "Estimated Costs of the Project, in Exhibit "A" attached to the aforesaid Amendment No. 3.

III. In the event that the aforesaid work is done by the Operator itself, the allowable maximum to which the Government will contribute shall be the sum of the following:

(a) $25.00 per foot, which shall include all costs of labor, supplies, and rental of equipment.

(b) All costs, subject to the allowable maximums, set forth in Items (4), (5), (6) and (7) under the heading "Estimated Costs of the Project" in Exhibit "A attached to the aforesaid Amendment No. 3, which are necessarily incurred by the Operator for the following items required in the performance of work in sinking the test pits;

(i) transportation of equipment and supplies;

(ii) gasoline and lubricants to pump water for the washing plant and operation thereof for the purpose of concentrating the material from the test pits;

(iii) meals and quarters for the workmen and supervisor; and

(iv) supervision.

IV. No payment shall be made for any part of the aforesaid work on any test pit until the particular test pit shall have been completed.

V. The labor schedule for said work is waived.

This amendment shall not be construed to increase the estimated total cost of the project, the aggregate total amount which the Government may be required to contribute, the allowable maximum cost of any item of work, or the agreed unit cost of any item of work.

IN WITNESS WHEREOF, these parties have executed this agreement as of the day and year first above written.

AMENDMENT NO. 11
to
EXPLORATION PROJECT CONTRACT IDm-K58 (DOCKET NO. DMEA-654)
between
UNITED STATES OF AMERICA
and
NORTHWEST DEFENSE MINERALS, INC. (Assignee)

It is agreed this _____ day of _____, 1953, that Contract IDm-K58 (Docket No. DMEA-654) as amended, is further amended effective as of September 22, 1953, as follows:

I. The Operator may elect to perform some or all of the work of sinking the 9 test pits authorized under Exhibit "A" attached to Amendment No. 3 dated October 28, 1952, either itself, or through independent contractors. The said work includes washing excavated material, concentrating contained tin, tantalum, columbium, tungsten, gold, and other minerals or metals, and separating the free gold from the concentrates.

II. In the event that the aforesaid work is done through independent contractors, the allowable maximum amount to which the Government will contribute shall be as set forth in the second paragraph of Item (1) under the heading "Estimated Costs of the Project," in Exhibit "A" attached to the aforesaid Amendment No. 3.

III. In the event that the aforesaid work is done by the Operator itself, the allowable maximum to which the Government will contribute shall be the sum of the following:

(a) $25.00 per foot, which shall include all costs of labor, supplies, and rental of equipment.

(b) All costs, subject to the allowable maximums, set forth in Items (4), (5), (6) and (7) under the heading "Estimated Costs of the Project" in Exhibit "A" attached to the aforesaid Amendment No. 3, which are necessarily incurred by the Operator for the following items required in the performance of work in sinking the test pits;

(i) transportation of equipment and supplies;

(ii) gasoline and lubricants to pump water for the washing plant and operation thereof for the purpose of concentrating the material from the test pits;

(iii) meals and quarters for the workmen and supervisor; and

(iv) supervision.

IV. No payment shall be made for any part of the aforesaid work on any test pit until the particular test pit shall have been completed.

V. The labor schedule for said work is waived.

This amendment shall not be construed to increase the estimated total cost of the project, the aggregate total amount which the Government may be required to contribute, the allowable maximum cost of any item of work, or the agreed unit cost of any item of work.

IN WITNESS WHEREOF, these parties have executed this agreement as of the day and year first above written.

Dear Mr. Traver:

With reference to the letter signed by Mr. J.W. Townsend, dated November 23, 1955:

Disallowance (a) "Test Pit Caisson", - we are advised that there may be an amendment to clarify this item and we will contact you at that time.

Disallowance (b) "Rental Truck" -- Please refer to Amendment 3, Exhibit "A", "Estimated Costs of the Project", Item#6, to be rented:

1. Pick-up truck @ $160.00 a month, 3½ months, includes all repairs, total $560.00.

Please re-instate this claim on report 1 MF104, exactly as per contract, and send check to cover for $160.00.

Disallowance (c) "Cook and Food" Item #7 under Miscellaneous, Meals and Quarters", with reference to the disallowance of $136,00 for food: Please also disallow $120.00 cook's salary already reimbursed. Please refer to Amendment 10 clarifying the subject: Amendment 10 changes the $8.00 a day to $8.00 a man day. Please be advised that the claim is for 140 man days retroactive, and this claim is $1130.00. The following is the man day record:

Gus Nemits	28 man days		
R.M. Atwater Jr., Supervising Engineer	14	"	"
Allison Kohler, Miner	17	"	"
Arthur Bailie, Miner	16	"	"
John S. Mac Donald, Miner	1	"	"
Wm. H. Rummans, Truck Driver	32	"	"
Ruth Rummans, Cook	32	"	"
	140	"	"

Please send check for a total of $1290.00. We request that you expedite the transaction.

Yours very truly,

NORTHWEST DEFENSE MINERALS, INC.

Peggy Keenan President

Subject: Docket No. DMEA-654
Contract No. Idm-258
(tin, columbium-tantalum, tungsten)
Northwest Defense Minerals, Inc. (Assignee)
Keenan Properties
Lawrence County, South Dakota

Please draft Amendment No. 11 to the subject amended contract, effective as of September 22, 1955, (the same effective date as Amendment No. 9), which will permit the Operator to do the test pitting in lieu of a contractor, as is described in Amendment No. 3 under Phase II Item (1):

> Independent Contracts. The maximum allowable cost per foot of $25.00 to include all cost of the work as follows: Labor, supplies and equipment rental or purchase and in addition a part of the costs set forth in Items (4), (5), (6), and (7) for the necessary transportation of equipment and supplies within the project area; gasoline and lubricants to pump water for the washing plant and operation thereof for the purpose of concentrating the material from the test pits; meals and quarters for the workmen and supervisor, and supervision cost.

Each test pit shall be completed before payment for any part thereof is made.

The Labor Schedule for said work is waived.

Re: Docket No. DMEA-654X,
Contract Idm-E58, Lawrence
County, South Dakota

Dear Miss Keenan:

Reference is made to your telephone call of November 21, 1955 to this office regarding payment of your monthly voucher (Form MF-104) for October, 1955. We have processed this voucher for payment after making several disallowances which may be partially or wholly reclaimed under the stipulated or indicated conditions. The disallowances are as follows:

a) "Test Pit Caisson" - The full amount of $456.25 claimed for this item is disallowed as we are unable to check documentation. Furthermore, Amendment No. 3, Exhibit A of the contract specifies that the work is to be performed by Independent Contract. Ordinarily for the work to be done on Company Account would require an amendment to the contract. This matter has been referred to the Washington Office and you will be further advised when we have received our instructions.

b) "Rental Truck" - The full amount of $160.00 is disallowed. Company-owned equipment can only be charged to the project on a depreciation basis, which is 1/60 of the value as a monthly depreciation rate. The change would require an amendment to the contract.

c) "Cook and Food" - The amount of $136.00 claimed for food is disallowed because of insufficient documentation. A

listing of checks paid to the various grocery stores is not acceptable documentation. We must have itemized statements from the food suppliers and if the bills have been paid they should be so receipted.

d) "Compensation 2% payroll" - An amount of $13.68 is disallowed. We have approved $8.82, which is two percent of $441.02 (Labor and Foreman plus salary of the cook).

Please make the necessary corrections on your future Forms MF-104 and MF-104A, and carry the corrections forward each month until the above items are resolved. Totals for work performed during the first phase of the contract are also to be carried forward.

Reclaim may be made on any of your subsequent vouchers or as a separate claim. Any reclaim must be accompanied by the original of the Administrative Audit Difference Statement (R-IV-B and F Form No. 4), which statement will be mailed to you in the near future by the Finance Office.

It is the desire and intent of this office to cooperate with your company as fully as possible in this matter; therefore, please feel free to contact Mr. Binyon or this office at any time.

Very truly yours,

W. M. Traver

November 22, 1955

Memorandum

To: W. M. Traver, Executive Officer, DMEA Field Team, Reg. III

From: S. M. Runke

Subject: Docket DMEA 654X (Tin, Columbium, Tantalum, Tungsten), Contract Idm-E58, Northwest Defense Minerals, Inc., Lawrence County, South Dakota

In reply to your memorandum of November 18, 1955 regarding the Northwest Defense Minerals, Inc. request to substitute a Humphrey Spiral in place of a Wilfley type table in their flow sheet for concentrating material excavated from test pits; I can see no reason for not allowing this substitution as I believe that a Humphrey Spiral will operate as efficiently as a table in recovering the subject minerals when employed as shown in the flowsheet submitted by the corporation on November 4, 1955.

With regard to a method for separating gold from the concentrates before they are analyzed, I do not believe that this is important since the gold can be readily separated by panning and amalgamation if desired.

I am returning herewith the set of data you sent with your memorandum, which consists of the following items:

Letter dated November 4, 1955, from Peggy Keenan, President, Northwest Defense Minerals, Inc., with attached copy of proposed concentrating installations;

Copy of memorandum, dated November 8, 1955, from this office to the Chairman, Operating Committee, DMEA;

Teletype from the Chairman, Operating Committee, DMEA, in reply to our memorandum of November 8;

Excerpt from Amendment No. 8 with attached flow sheet by G. W. Jarman, dated 3-22-54.

Subject: Contract Num S-56
654X

Dear Mr. Binyon:

I regret that I missed you and your associate on Monday Nov. 21.

Conditions were such that we could no longer continue to process the material excavated.

Please be advised that due to extreme cold beyond our control and due to frozen water supplies and solidly frozen excavated gravel stored in the bins in the mill, the processing of material was suspended on the evening of November 20, 1955.

The split half of 9 samples prepared by our engineer are to be delivered to you, together with the legend of the samples and progress report of the second month of Phase II Idn S-56, 654X. These samples are the result of the process as previously outlined to you which you saw in operation and the excavated gravels run were from Caisson Test Pit No. 1 Beaver Creek.

The other half of each of the 9 samples will be sent by our Corporation to the assayer in Denver, Colorado.

Thanking you for your many courtesies,

Yours Very Truly,
Peggy Keenan President

Memorandum

To: Chairman, Operating Committee, DMEA

From: Executive Officer, DMEA Field Team, Region III

Subject: Docket DMEA 654X (Tin, Columbium, Tantalum, Tungsten), Contract Idm-E58, Northwest Defense Minerals, Inc., Lawrence County, South Dakota

We have learned recently that the Operator is performing the test pit work on cost account instead of by Independent Contract as stipulated under item (1) in Exhibit "A" (Amendment) attached to Amendment No. 3.

A "Contract Agreement" pertaining to the matter was forwarded to you under item (a) of our memorandum of November 18, 1955.

The $25.00 per foot for test pit under item (1) includes washing excavated material, concentrating contained tin, tantalum, columbium, tungsten, gold, and other minerals and metals, and separating the free gold from the concentrate. However, some elements of the work and charges therefor appear to be duplicated under items (4) to (8) inclusive of the aforementioned attachment to Amendment No. 3, such as "Labor and Supervision," under item (4), and "Operating Materials and Supplies" for the washing plant under item (5). Consequently, we are at a loss as to how to proceed in the matter.

We are processing the current MF-104 and suspending the entire amount claimed under test pitting, which is 18.25 feet at $25.00 per foot, as the documentation provided does not include a breakdown of the component charges incident to the test pitting.

It appears to us that claim for reimbursement by the Operator should be on the basis of each test pit completed, including the washing and concentrating processes stipulated.

It also appears to us that an amendment to the contract would be necessary before payment could be made to the Operator for test pitting on actual cost basis.

After you have reviewed the matter, we will appreciate your advice by the most expeditious manner, as we will be awaiting it before writing to the Operator to clarify the matter of requirements for subsequent reports.

CONTRACT AGREEMENT

The Northwest Defense Minerals, Inc. agrees to excavate and sink Caissons in one Test Pit in Beaver Creek, MS 392, and excavate and sink Caissons in one Test Pit in Bear Creek, MS 393, for the Defense Minerals Exploration Administration Project Idm E-58, 654x in the following manner:

The test pits shall be sunk by using a caisson lining having a beginning diameter of not less than 48" and the caisson shall be continuously advanced ahead of the material being excavated. Each pit shall be sunk into the bedrock to where the enriched mineral values are recovered.

All of the excavated material from each separate pit is to be stored in bins in the mill on the property of the Northwest Defense Minerals, Inc. Each bin shall contain one caisson's worth of gravel excavated.

When the approved equipment is installed in the Northwest Defense Minerals, Inc. mill, the material is to be thoroughly washed by screens and the heavy minerals and gold concentrated to a concentrate satisfactory to the project engineer and the DMEA observing engineer.

It is understood and agreed that the total above described work of excavation and processing shall not exceed $25.00 a foot, and that the work is to proceed as rapidly as possible.

The Bear Creek MS 392 Test Pit is to be sunk within 1500 feet of the South boundary of the property.

The Beaver Creek MS 393 Test Pit is to be sunk within 1500 feet of the confluence of Potato, West Deer, and Beaver Creeks.

NOV 14 1955
BUREAU OF MINES
Denver, Colorado

Spearfish, South Dakota
Sept. 27, 1955

Mr. Kenneth Ellingson,
420 Eighth Street
Spearfish, South Dakota

Dear Mr. Ellingson:

This memorandum of agreement will serve to secure your services, required personnel and necessary equipment including ~~drive pipe and~~ bailer on contract with which to churn-drill 18 holes on the Northwest Defense Minerals, Inc. placer properties as specified by the Defense Minerals Exploration Administration Docket DMEA 654X, Contract Idm E-58. PK KE

There are to be drilled under the supervision of the Northwest Defense Minerals, Inc. engineer, Mr. R.W. Atwater, and of the DMEA field team engineer, Mr. E.O. Binyon, 9 churn drill holes in the placer gravels of Beaver Creek across the creek channel immediately below the confluence of Potato, West Deer and Beaver Creeks, of an approximate average depth of 20 feet to each hole, the spacing between the holes shall be approximately 50 feet. Each drill hole shall be cased shall be 6 inches in diameter, and shall be drilled to a depth in the bedrock to where the enriched mineral values are recovered. All material recovered from each drill hole shall be brought to the surface by a bailer and shall be carefully stored in drums and sealed by the project engineers, pending arrival of processing and separation equipment specified in the DMEA contract.

There are to be drilled under the same direction 9 churn drill holes in the placer gravels of lower Bear Creek across the creek channel within 1500 feet of the South boundary of the project, where the boundary crosses Bear Creek. The specifications are to be exactly the same as outlined for the Beaver Creek work.

Northwest Defense Minerals, Inc. agree to pay $5.00 per foot for churn drilling which includes carefully bailing the material and storing it in drums. In the event the processing and separation equipment arrives in time, other engineering personnel other than yours will attend to this work.

It is herewith agreed that the above work will start on or about September 27,1955, weather permitting.

It is agreed that you carry Workmen's Compensation Insurance acceptable to the State of South Dakota.

Mr. Ernest Wm. Ellis, Chief,
Rare and Miscellaneous Metals Division
DMEA
Department of Interior
Washington, D.C.

Dear Mr. Ellis:

Your letter of October 31, 1955 received.

The Amendment No. 10 has been received from Mr. W. M. Traver and all copies have been signed and forwarded to the Denver office.

Thank you so kindly for all the extra work you and the executives in Washington have spent in our behalf.

We expect -10 degree weather this week. A process in the mill is almost complete and we will proceed with the aid of an enormous barrel wood stove.

The first month's Progress Report is enroute to Mr. Traver. Mr. Binyon in Rapid City was most helpful and kind to me.

Sincerely and gratefully yours,

Peggy Keenan President
Northwest Defense Minerals, Inc.

November 8, 1955

Memorandum

To: Chairman, Operating Committee, DMEA

From: Executive Officer, DMEA Field Team, Region III

Subject: Docket DMEA 654X (Tin, Columbian, Tantalum, Tungsten), Contract Idm-E58, Northwest Defense Minerals, Inc., Lawrence County, South Dakota

Enclosed are the original and two copies of a letter from Peggy Keenan, dated November 4, 1955, with attached flow sheet showing the equipment set-up which they propose to use in lieu of the equipment specified under Amendment No. 3 to the Contract.

As there is no flow sheet attached to Amendment No. 3, we are in doubt as to the original intent. Therefore we are forwarding the matter for your consideration and advice to us as to how we should proceed. Please teletype advice as soon as possible, as undoubtedly the Operator will be telephoning this office for instructions as to how to proceed.

Re: Docket DMEA 654X
Contract Idm-E58

Dear Mr. Traver:

The 5 copies of the Progress report for the first month of the Phase II work of Docket 654X, Contract Idm-E58 has been submitted to Mr. E. O. Binyon. By now, you have probably received the Denver Regional copy. Because the Northwest Defense Minerals, Inc. arranged a limited revolving fund for Phase II use, it would be greatly appreciated by the Operator if your Agency can release the allowed check as soon as possible. The snows are sure to come and we are working against time, hold the men for processing work and finish up the outdoor work.

We have carefully studied the processing of the excavated gravels and sludge (from the current work) as set forth in Amendment No. 3 and No. 8. No. 8 is described as an alternate.

We must be completely frank in our reason to request permission to combine the equipment set forth in Amendment No. 3 and No. 8. We have not yet been able to acquire the equipment which the Government so courteously allowed us in No. 8. Since it is an alternate, we hereby formally request permission of the DMEA to allow our Engineer, Mr. R.M. Atwater to use the attached flow-sheet equipment which is available to Northwest Defense Minerals, Inc. at once. The attached sketch (3 copies) will enable us to process as much Creek material as possible before freeze-up.

Please advise us how to proceed. We appreciate your courtesies.

Yours very truly,

Northwest Defense Minerals, Inc.

Re: Docket No. DMEA-654X, Contract Idm-E58, Northwest Defense Minerals, Inc., Lawrence County, South Dakota

Dear Miss Keenan:

Enclosed are the Government's, Division, Finance, Docket and Field Team's copies of Amendment No. 10 to Exploration Contract Idm-E58 which was prepared in Washington as a result of your letter of October 13, 1955, and signed by the Administrator, Defense Minerals Exploration Administration. The amendment clarifies that portion of Exhibit A (Amendment) attached to Amendment No. 3, which under item 7 specifies a maximum allowance for "Meals and Quarters."

If the amendment meets with your approval, please sign all copies as indicated, affix the corporate seal, and return them to this office, leaving the date blank. Upon return of the properly executed copies of the amendment, the Operator's copy will be forwarded to you.

In conjunction with this amendment we now require two copies each of your independent contracts for drilling and test pit work. Please have the copies made and forward them to us when you return the amendment.

Very truly yours,

W. M. Traver
Executive Officer, DMEA
Field Team, Region III

Re: Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Contract No. Ida-858
Northwest Defense Minerals, Inc. (Assignee)
Keystone Properties
Lawrence County, South Dakota

Dear Mr. Travers:

There are enclosed for execution the original and five copies, with two extra copies, of Amendment No. 10 to the captioned contract.

This amendment was prepared to clarify an ambiguity to that part of Amendment No. 3, "(8) Miscellaneous. Meals and quarters -- 687 days at $8.00" per day $5,496.00." The original intent of the amendment was to contribute up to $8.00 per man day for subsistence. Clarification of this part of the amendment was requested by the Operator in its letter dated October 13, 1955, copies of which are enclosed.

If any part of this amendment does not have either your approval or that of the Operator and cannot be amended within your delegated authority, then the original and all copies are to be returned with the proposed changes for consideration. After execution of the amendment the copies are to be distributed in the usual manner.

Since the work in Amendment No. 3, Phase II, is based on maximum allowable cost for units of work and a part of the work will be done by a contractor, before approving payment for meals and quarters for the contractor's crew, the contract or contracts for any part of this work should be studied to determine if the Operator is liable for such payment.

Dear Miss Keenan:

This is in response to your letter of October 8, 1955, and your letter of October 6 to Mr. Traver, which concerns the data that you are assembling relative to the processing of samples procured under Phase II of the subject contract. You state you would like to send such data to Mr. Enouse in the Washington Office.

Since the administration of this project is to be under the direction of Mr. Traver's office, it is suggested that such material be handled directly through him or his designated field representative, and the information will reach this office in due course.

I hope you will have good success in completing the project.

Sincerely yours,

Office of the President

Oct 13 1955

Mr. J. L. Knouse
Defense Minerals Exploration Administration
Department of Interior, Rare & Minor Metals.
Washington DC.

Dear Mr. Knouse:

When the figures were set up for the Commissary under Amendment "A", an allowance was provided for $8.00 per day (meals and quarters) for 687 days, or $5496. for the total Phase 2.

As I understand the allowance, it was for $8.00 a day per man day for board and quarters.

On a basis of $8.00 a day, only our Corporation is losing money fast as the cook costs $6.66 per day plus food and then there are groceries, meat, fuel, delivery etc.

I feel sure that you estimated it per man day but I wanted to clarify before the Operators report is made out. We could not possibly operate a Commissary as we have 5, 6, & 9 at a meal plus quarters.

With best wishes to you,

Sincerely,
Northwest Defense Minerals Inc

Subject: Docket DMA 654X (Tin, Columbium-Tantalum, Tungsten), Contract Idm-E58, Northwest Defense Minerals, Inc., Lawrence, South Dakota

Enclosed are the Government's, Division, and Docket copies of Amendment No. 9, which have been signed by the Operator as requested by your letter of September 26, 1955. Other copies have been distributed in the usual manner.

We have received word from the inspecting engineer at Rapid City, South Dakota, that drilling under the exploration contract began in the Bear Creek area on October 3, 1955, and one hole was bottomed by October 6, 1955. However, because the Operator's supervising engineer failed to arrive on the project, the Operator was informed that no other drilling was to be done until competent supervision was available. This requirement is provided on page 3 of Exhibit "A" which is attached to and made part of Amendment No. 3.

Re: Docket DMEA 654X
Contract Idm-E58

Dear Mr. Ellis:

The Amendment No. 9 was received and churn-drilling work started October 3, 1955. I am sincerely grateful for the extension and wish to thank you and all executives who agreed to the Amendment.

Mr. Binyon remained on the project October 3, but when the Atomic Energy Commission delayed Mr. Atwater's arrival from New Mexico, Mr. Binyon asked me to recess. We are now going ahead with the project.

The enclosed letter to Mr. Traver dated October 6, refers to processing the material now being recovered from the churn-drill holes and test pits and mentions Mr. Knouse and his technical work in previous directives. Will you please give the copy to him and ask him to write to me?

Best wishes,

Yours very truly,

Re: Docket DMEA 654X
Contract Idm-E58

Dear Mr. Traver:

With reference to our telephone conversation October 5, 1955 relative to the supervision of DMEA Project Idm E-58, 654X on Northwest Defense Minerals, Inc.:

Thank you very much for accepting a substitute engineer, Mr. A. I. Johnson, in the enforced absence of Northwest Defense Minerals, Inc. engineer, Mr. R. M. Atwater, Jr. I will forward his background data.

Mr. Atwater is flying to Spearfish from New Mexico October 9, 1955 and will go to the Bear Creek churn-drilling site. I am advising Mr. E. O. Binyon to this effect, although Saturday and Sunday are not working days for the Government personnel.

With reference to the processing of the gravels recovered from churn-drill holes and test-pits:

The material recovered is ground so fine in the churn-drill holes that a few days study will enable to report a schedule of processing. I will have data assembled and would like to send it to Mr. F. L. Knouse, DMEA, Washington, D.C. who has co-operated with our engineers on techniques outlined in Exhibit A and on alternative in Amendment No. 8 (and G. W. Jarman flow sheet, March 22, 1954).

I have found a complete Humphrey Spiral closed circuit here in South Dakota which we may be able to rent. This would be especially important to use since the churn drilling is pulverizing our materials. You and Mr. Binyon will receive word from Mr. Atwater.

Thank you for your help and courtesy.

Memorandum

To: The Files

From: George C. Selfridge
Special Assistant

Subject: Docket No. DMA-654
(Tin, columbium-tantalum, tungsten)
Northwest Defense Minerals, Inc. (Assignee)
Keenan Properties
Lawrence County, South Dakota
Contract No. Idm-258

Mr. Traver, having received proposed Amendment No. 9 to the subject contract, telephoned the writer today and asked if it was necessary to have a full-time Government engineer checking the drilling and sampling of the 18 holes. Mr. Traver stated that it would be impossible to assign an engineer to the drilling. The writer explained that it was not the intent of the amendment to place a full-time Government engineer on the project but that the engineer should spend sufficient time to establish the modes of drilling and sampling and then leave the matter up to the Operator. It was suggested that the engineer visit more often than usual and that he take some check samples at the times of his visits.

Mr. Traver also wanted to know whether the Government or the Operator should store the drill hole samples as he was sure they would not be tested metallurgically this year. He explained that the samples could be stored in the Government warehouse at Piedmont, 40 miles distant, at no expense other than the transportation. The writer suggested that Mr. Binyon, the examining engineer in the area, learn of the storage facilities of the Operator. The integrity of the Operator was also discussed and it seemed that there would be no advantage for the Government to store the samples if the storage facilities of the Operator were suitable. As most of the drilling and sampling on the project would be done in the absence of a Government engineer, it did not appear to be too important what might happen to the samples contaminate during storage.

Re: Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Contract No. Ida-358
Northwest Defense Minerals, Inc. (Assignee)
Keenan Properties
Lawrence County, South Dakota

Dear Mr. Traver:

Enclosed are the original and five copies of Amendment No. 9 to the captioned contract, signed by the Administrator.

You will note that work must begin prior to November 1, 1955, and terminate not later than January 1, 1956, except that the Government may grant a further extension of time for the purpose of completing the analytical and metallurgical work. This last provision may be necessary because of weather conditions which might prohibit the outdoor processing of the bulk samples obtained from the sampling. If Operator is unable to process said bulk samples during the present season, the Government's field man should make certain that all such samples are properly stored until they can be processed. Furthermore, it will be necessary for the Operator to request in writing any processing delay, give the reasons therefor, and obtain Government approval.

We were assured by the Operator and Operator's Washington representative that the work would commence right away. A review of your office file will reveal some of the many reasons for delaying the work which, coupled with financing difficulties, has caused this project to proceed so slowly. After taking these matters into consideration and the fact that the Operator now intends to complete the contract, it was deemed advisable to grant this extension of time.

Kindly have Amendment No. 9 properly signed by the Operator's representative and make the usual distribution. It is our understanding that Miss Peggy Keenan, the Operator's official representative, will be in Spearfish, South Dakota, from September 23 on.

Sincerely yours,

George C. Selfridge

Sept. 12, 1955

Mr. Kirk Wiltse
434 So. Summit
Newcastle, Wyoming

Dear Mr. Wiltse:

This memorandum of agreement will serve to secure your services required personnel and necessary equipment on contract with which to churn drill 18 holes on the Northwest Defense Minerals, Inc. placer properties as specified by the Defense Minerals Exploration Administration Docket DMEA 654X, Contract Idm E-58.

There are to be drilled under the supervision of the Northwest Defense Minerals, Inc. engineer, Mr. R. M. Atwater, and of the DMEA field team engineer, Mr. E. O. Binyon, 9 churn drill holes in the placer gravels of Beaver Creek across the creek channel immediately below the confluence of Potato, West Deer and Beaver Creeks, of an approximate average depth of 20 feet to each hole, the spacing between the holes shall be approximately 50 feet. Each drill hole shall be cased shall be 6 inches in diameter, and shall be drilled to a depth in the bedrock to where the enriched mineral values are recovered. All material recovered from each drill hole shall be brought to the surface by a bailor and shall be carefully stored in drums and sealed by the project engineers, pending arrival of processing and separation equipment specified in the DMEA contract.

There are to be drilled under the same direction 9 churn drill holes in the placer gravels of lower Bear Creek across the creek channel within 1500 feet of the South boundary of the project, where the boundary crosses Bear Creek. The specifications are to be exactly the same as outlined for the Beaver Creek work.

Northwest Defense Minerals, Inc. will pay $5.00 per foot for churn drilling which includes carefully bailing the material and storing it in drums. In the event the processing and separation equipment arrives in time, other engineering personnel other than yours will attend to this work.

It is herewith agreed that weather may delay the above work but the specified starting date is to be on or about Sept. 20, 1955.

It is agreed that Northwest Defense Minerals, Inc. has an option to contract for your services, required personnel and equipment for 45 additional churn drill holes, in Beaver and Bear Creeks which, because of weather may not be exercised until April or May, 1956, or as soon as snow melt allows the work to proceed.

Northwest Defense Minerals, Inc. agrees to pay for the work at the end of each 7 day working week on a $5 a foot of drilling accomplished.

Yours very truly,

Peggy Keenan, President

Memorandum

To: Acting Assistant Solicitor, DMEA

From: Ernest Wm. Ellis, Chief
Rare and Miscellaneous Metals Division

Subject: Amendment to extend completion date of
Contract Idm-E58
Northwest Defense Minerals, Inc.
Docket No. DMEA-654

Northwest Defense Minerals, Inc., is the Assignee of Peggy Keenan d/b/a Keenan Properties. Due to acquiring new claims, difficulties in obtaining Owner's Consent to Lien, time consumed by Operator in incorporating, and other extenuating circumstances, there has been considerable delay in starting Phase II of subject contract. The last amendment provided for the work to be completed prior to October 1, 1955. Operator states the work will commence on or about September 20, 1955. However, the project will require additional time for completion.

Please amend the time for completion to July 1, 1956. The amendment should state that work must commence prior to October 1, 1955, or the contract is automatically terminated. Furthermore, if work does start prior to October 1, 1955, the amendment should state that by ~~July~~ January 1, 1956, the contract is automatically terminated. Repayment period should be extended to fifteen (15) years.

Because of the very short time remaining in which to get this amendment signed, sealed, and delivered, it should be expedited.

/s/ Ernest Wm. Ellis

Memorandum

To: Chairman of the Operating Committee, DMEA

From: Field Team, DMEA, Region III

Subject: Docket DMA 654X (Tin, Columbium-tantalum, Tungsten), Contract Idm-E58, Northwest Defense Minerals, Inc., Lawrence County, South Dakota

We are enclosing three copies of the following correspondence relative to a request from Miss Peggy Keenan, President, Northwest Defense Minerals, Inc. You have the originals of some of this correspondence but we are enclosing copies for your easy reference:

1. Letter, dated August 26, 1955, from Miss Keenan to the Chief, Rare and Miscellaneous Metals, DMEA, Washington, requesting extension of completion time and storage of churn drill samples until washing and separating equipment arrives on the project site.

2. Letter, dated August 31, 1955, from Miss Keenan to E. O. Binyon, Bureau of Mines, Rapid City, South Dakota, relative to her letter to the Washington Office of August 26, 1955.

3. Letter, dated September 6, 1955, from Miss Keenan to the Chief, Rare and Miscellaneous Metals, DMEA, Washington, referring to typographical error in her earlier letter and again asking for an extension of completion time.

4. Memorandum, dated September 9, 1955, from E. O. Binyon to the Executive Officer, Region III, recommending denial of the request if at all possible.

We are of the same opinion as Mr. Binyon. We think that an extension of the completion date is not in order. Since October 28, 1952,

at which time Amendment No. 3 was executed which approved and outlined Stage II of the project work, five amendments have extended the project life. A review of the past correspondence reveals that this contract has been difficult to administer. The Government has been very lenient and has given the Operator every opportunity to complete the project. We recommend that the request be denied.

Memorandum

To: W. M. Traver, Executive Officer, DMEA Field Team, Reg. III

From: E. O. Binyon

Subject: Docket DMEA 654X (Tin, columbium-tantalum, tungsten)
Contract Idm E-58, Northwest Defense Minerals Inc.,
Lawrence County, S. Dak.

Enclosed is the original copy (and an extra copy) of a letter from the operator to Mr. Ernest Wm. Ellis, received here the afternoon of September 9.

I know there is no way of disproving any of the operator's statements and, although the requests may in part be justified, another extension does not seem warranted. From past performance and the recent correspondence, it may be that the difficulties with the operator experienced by those connected with DMEA in old Region V will be repeated.

I might suggest that if it is at all possible to disapprove an extension, it would seem advisable to do so.

Washington, D. C.

Subject: Contract Idm, E-58, 654X

Dear Mr. Ellis:

Mr. James E. Bacon, executive Vice-President of Northwest Defense Minerals, Inc. has brought to my attention a typographical error in my letter to you dated Aug. 26, 1955.

In paragraph 1, line 2, I refer to my date of arrival in South Dakota to set up a churn drilling program as Oct. 5, 1955, it should read Sept. 5, 1955.

I enclosed a copy of a letter from D.K. Wiltse of Newcastle, Wyoming advising he is crowded with drilling work in September. I saw him in Spearfish in June and his outfit agreed to do the work and Kink Holwell, driller from Osage, Wyoming agreed to work with him. The latter has had placer drilling experience. A contract for Mr. Wiltse is being drawn by NDM, Inc. for churn drilling. Due to the fact that Mr. Wiltse has commitments up to late in Sept. and due to other factors which were beyond our control, I herewith make a formal request for an extension of contract Idm E-58, 654X. Weather in So. Dak. sometimes curtails outdoor activities early in the fall, sometimes late, and that, and the recent Uranium discoveries in the area, which keep churn drillers committed, are the reasons for asking for an extension.

Yours very truly,

Peggy Keenan President

Dear Sir:

With reference to the enclosed copy of a letter to Mr. Ernest Wm Ellis of DMEA, Washington, DC:

Mr. Ellis advised the Northwest Defense Minerals Inc that it was best to send a copy of the letter (received by him Aug 26, 1955) to you at once, so that you could expedite the situation. He said the Washington DMEA Office is swamped and therefore delays in action.

I will wait here in New York for an approval letter from you before leaving for South Dakota, and before advising the churn driller how to proceed. Could you please reply air mail with instructions to me?

Yours very truly,
Northwest Defense Minerals, Inc.

August 26, 1955

Mr. Ernest Wm. Ellis, Chief
Rare and Miscellaneous Metals
Defense Minerals Exploration Administration
Department of Interior
Washington, D.C.

Dear Mr. Ellis:

This is to advise that I plan to be on the Northwest Defense Minerals, Inc. property the week of Oct. 5, 1955, to set up the churn drill hole program in Beaver Creek (9holes) and Bear Creek (9holes) as specified in Amendment No. 8 dated November 29, 1954, Contract Idm K-58, Docket 654X.

In the event the washing and separating equipment does not arrive in time to process these bulk gravels recovered from the churn drill holes as outlined in Amendment No. 7, dated May 10, 1954, I request permission to seal these gravels in drums in the presence of the DMEA field team out of Rapid City, and store the drums until the equipment arrives. Decision will have to be made regarding the time of digging the test pits.

The separation units of this same equipment will also serve to process the gravels recovered from a commercial operation in the Phase 1 area of Bear Creek. The engineering work on the semi-portable placer gravel plant has been done and $91,000 worth of equipment earmarked for NDM, Inc. in St. Louis, Mo. The engineer in charge of the DMEA work will be Mr. R. M. Atwater, Jr, (background previously approved). There will be a superintendant and we have asked Mr. James Moore to act in that capacity (Reference for James Moore- Mr. James Everett Bacon, Mr. G. Wallace Jarman, Separations Engineering Corp) The engineering supervision cost will be kept as per the budget.

The stock of the Northwest Defense Minerals, Inc., finally got some push behind it and is suddenly selling which gives the corporation a revolving fund to advance for the expenses of churn drilling as described above. Mr. Kirk Wiltse of Newcastle, Wyoming will do the churn drilling.

Mr. Ellis, please advise Mr. Mittendorf that I have done my best. Request is made for approval of the a ove plan which may mean finishing the job in May, 1956 and the continuation of drilling the other holes specified and processing and separating. If this is the only way I can get it done and we can have the blessing of the Administrator and of your division, the Board of Directors of the NDM, Inc. will be most thankful for an extension.

The extension of the DMEA was glad news. The record of the Agency is known to be very fine, and it helps little fellows like us to keep up our courage in mining.

Sincere regards,

Northwest Defense Minerals, Inc.

Dear Miss Keenan:

I have your letter of August 30 and will send a reply Air Mail.

At the present time, I have enough work to take me through September which I will have to do. The weather up at Tinton could get bad early in the fall and stay so until spring or possibly summer again. This will no doubt be a factor to be considered in a contract.

When can I expedt the contract from you, to read?

We expect to leave Sept. 6th for a couple of weeks on the west coast. Jim will be here carrying on operations for us until we return. You might contact him in my absence.

I will endeavor to see Kink Holwell; however, I am crowded for time and I am not sure where I might find him at present. We can surely line up the bailer and pipe someway.

Yours very truly,

Black Hills' New Boom In Uranium

By Max Forester

There's a second big uranium field in the making far north of the booming Colorado Plateau, in the Black Hills of South Dakota.

The mining and construction men of the area, with others who have turned to uranium mining from other pursuits, are finding ore in good-sized quantities. The area is an infant yet compared with the Colorado Plateau, but it's a lusty infant giving every indication of readiness to burst from its swaddling clothes.

The Black Hills uranium activity was generated by the discovery in 1951 of carnotite ore along the sandstone walls of Craven Canyon, ten miles north of Edgemont, S. D. by a Rapid City attorney, and has ebbed and flowed.

Big Firms Pulled Out

Year before last United States Vanadium Corp. and Homestake Mining Co. did some drilling there, and then, as suddenly, U. S. V. curtailed its operations.

Local operators explain that since much more has been learned about the geology of the district, and the likelihood of finding deposits worth working. As a result, the boom has revived.

Meanwhile, the Atomic Energy Commission has kept up its survey work and test drilling in the area and, since the beginning of this year, local operators have widened operations substantially. Several are in production, but at this stage, exploration work and costs count the most. Hence, investment in local companies is purely speculative, and is only for those who can afford to lose their money should the admittedly big risks involved fail to pay off.

Clyde Boyle, who heads Sodak Mining Co., with more than 5,000 acres under claim near Belle Fouche, S. D., recounted last week some indications of growing activity and of expansion likely in the new field. He confirmed that local operators expect at least one mill to be built soon in the Black Hills.

Substantial quantities of ore are stockpiled at Edgemont and reserves in the area have increased rapidly since the first of the year, he said. Reserves proved up by private firms, according to Mr. Boyle, include 12,000 tons by Homestake and 45,000 tons by Edgemont Mining & Uranium Corp. Private concerns have produced about 35,000 tons of ore, he said.

One of the most attractive features of the South Dakota and Wyoming deposits is that the discoveries have been in two layers of rock, the Dakota and Lakota strata. Dakota deposits are often found at the surface, while uranium-bearing ores in the Lakota stratum have been no more than 200 feet deep.

Hence, underground operations will be at a higher level than on the Colorado Plateau, where some mines go down 800 feet. The underground deposits are also in harder rock than is the case on the Plateau, creating less of a problem in the support of mine walls and ceilings.

Cheaper to Work

Mr. Boyle estimated development costs would be half those of Plateau operators for these reasons. The ore found in the Black Hills has been of somewhat lower grade than that on the plateau.

But the South Dakota-Wyoming ores are of good commercial grade. Sodak's ore has had an average uranium oxide content of 0.28 per cent and an average vanadium content of 0.7 per cent. While all operations in the Black Hills have been of the strip mining type, some of the larger companies are getting set to go underground.

The A. E. C., which has had an ore-buying office at Hot Springs, S. D. for months, confirmed last week that another buying office soon would be opened at Riverton, Wyo.

Drilling by private operators has totaled about 125,000 feet, and about the same amount has been carried out by the A. E. C., Mr. Boyle said. A. E. C. discoveries, and the indicated reserves resulting from them, are unknown.

Contract No. Idm-58
Northwest Defense Minerals, Inc.,
assignee of Peggy Keenan, d/b/a
Keenan Properties
Lawrence County, North Dakota

Dear Miss Keenan:

This will acknowledge receipt of your letters dated December 8, 1954, enclosing the signed copies of Assignment of Contract and Assignee's Acceptance. Returned herewith is the Operator's copy with the endorsement of the Government's Consent to the assignment.

It is noted that you are taking steps to enter into the work under Phase II of the contract and furthermore are laying plans for the assembly of equipment for 1955 production. We trust you will be able to carry out these plans as anticipated.

Sincerely yours,

SIGNED

Administrator

Mr. Ernest Wm. Ellis, Chief
Rare and Miscellaneous Metals Division
Defense Minerals Exploration Administration
Department of the Interior
Washington 25, D. C.

Dear Mr. Ellis:

This will acknowledge receipt of your letter dated December 1, 1954, with six copies of Assignment of Contract, with six copies of Assignees' Acceptance.

The enclosed letter to Mr. C. O. Mittendorf, Administrator is to acknowledge receipt of the Operator's copy of Amendment No. 8.

The enclosed signed and dated documents, Assignment of Contract and Assignees' Acceptance with Northwest Defense Minerals, Inc. seal are executed as per your instructions and are being returned to you for the Administrator's signature.

I note that Northwest Defense Minerals, Inc. Bureau of Mines regional office is now Region IV of the Denver DMEA office, and we will act upon your instructions.

Have just returned from a very successful trip in South Dakota and we are advertising for bids for the phase 2 Churn drill holes and for assembly of equipment for our 1955 Placer production.

Thank you for bringing all documents to a perfected consummation.

Yours sincerely,

NORTHWEST DEFENSE MINERALS, INC.

224 New Customhouse Building
Denver 2, Colorado

Dear Mr. Brading:

Reference is made to a letter from C. O. Mittendorf to J. H. East, Jr., under date of November 23, 1954, in regard to several problems raised in Mr. East's letter of November 15, 1954. One problem was the status of audited projects among the contracts transferred from Region V to Region IV.

Contracts E58-Keenan Properties, E517-Ortmayer, Sullivan and Boyle, E520-Mining Research Corporation, are still open.

The first phases of the Keenan Properties have been finished and have been audited. If you do not have a copy of the audit you doubtless will find same in the Executive Officer's copies transferred to Mr. King. The other two projects, that is, E517 and E520 are agreed unit cost contracts and most probably can be reviewed with the information in the Finance Officer's and Executive Officer's files when such contracts are finished.

Sincerely yours,

(Signed) J. L. Chambers

Dear Miss Keenan:

The Operator's copy of Amendment No. 8, with attachments, to the subject contract was mailed to you under date of November 30. No doubt you have received your copy by this time.

Transmitted herewith are the original and five copies of the Assignment of Contract and Assignee's Acceptance to be executed by you as the assignor and assignee's representative, respectively. In addition to signing these documents, also please date said papers. The Assignee's Acceptance should be stamped with the Company's seal. Kindly return all copies to this office for the Administrator's signature, following which the Operator's copy will be forwarded to you.

Under a recent Bureau of Mines redistricting, your file has been transferred from Region V to the Denver DMEA Office, Region IV. Kindly address all future correspondence having to do with matters under the Executive Officer's jurisdiction to the following:

Mr. W. H. King
Executive Officer

To: The Administrator, DMEA

Attention: Mr. E. W. Ellis

From: Acting Assistant Solicitor, Defense Minerals

Subject: Docket No. DMEA-654, Peggy Keenan, d/b/a Keenan Properties, Contract Idm-458 (Tin, columbium-tantalum, tungsten)

Pursuant to Mr. Knouse's memorandum of November 5 to me, the information submitted by the Operator has been reviewed and Amendment No. 8 redrafted. The combination assignment form drafted at an earlier date is in proper form.

You will note that Amendment No. 8 is to be executed by Peggy Keenan. Therefore, that document should be executed prior to the execution of the assignment. Otherwise, the amendment will have to be prepared for the signature of the Assignee, Northwest Defense Minerals, Inc.

RE: Docket No. DMEA-654 (Tin, Columbium-Tantalum, Tungsten) Contract No. Idm-E58 - Peggy Keenan, d/b/a Keenan Properties, Lawrence County, South Dakota

Dear Mr. Ellis:

Thank you for your letter dated October 22, 1954 regarding the perfection of the records of the former Keenan Properties (Contract No. DMEA-654 No. Idm E-58), and with reference to the assignment of the Properties to Northwest Defense Minerals, Inc.

With reference to each item of paragraphs 1, 2, 3, and unnumbered 4 of your letter, I wish to clarify as follows:

1. Attached hereto is a dated notarized assignment of the Gold Bond, Gold Bond#1 and #4 and of the Three Jims claims, stating South Dakota as the State of location.

2. Attached hereto is a corrected copy of the current Dakota Tin and Gold Co. lease dated July 17, 1950. With reference to Appendix I of the original DMA contract dated July 16, 1951, under the heading "Bear Creek Area", the original lease referred to dated July 16, 1948, recorded in book 301, page 157 in Deadwood, South Dakota is replaced by the attached copy of the lease dated July 17, 1950, unrecorded.

NORTHWEST DEFENSE MINERALS, INC.

SPEARFISH, SOUTH DAKOTA

Office of the President

Mr. Ernest Wm. Ellis November 3, 1954

With reference to our investigation with Mr. Knause, Engineer, and Mr. Ruben, Attorney, in your office October 22, 1954, one of the copies of the Owner's Consent to Lien of the July 17, 1950 (Dakota Tin and Gold Co. lease) was dated 1954 in typographical error. The attached Owner's Consent to Lien corrects the error and also includes the Golden Star No. 2 MS-1879 claim, omitted previously. Attached hereto please find six copies of Owner's Consent to Lien signed by the Secretary, Mrs. Lillian G. Fillmore.

3. With reference to the undated instrument acknowledged before a Notary Public August 30, 1954, which assigns the Peggy Keenan Properties to the Northwest Defense Minerals, Inc.: attached is a copy of a dated assignment.

With reference to the August 8, 1948 lease referred to in the Appendix I, this August 8 date was in error. The current lease referred to in the assignment is dated August 7, 1948 and is known as the W. O. Fillmore properties in all files.

With reference to this same lease dated August 7, 1948, and to an original affidavit dated April 1951 and to a second affidavit dated October 16, 1952 concerning the Harkness, Harkness #1 - #8, inclusive claims: please find attached hereto a copy of an Amendment to the August 7, 1948 lease between Peggy Keenan and W. O. Fillmore which formally includes the Harkness, Harkness #1 - #8, inclusive claims in the August 7, 1948 lease. I have executed an assignment of this Amendment to the Northwest Defense Minerals, Inc. and enclose a notarized copy in case it is required.

With reference to the June 14, 1948 lease which claims are covered by the lease dated November 1, 1949, from W. O. Fillmore and Lillian G. Fillmore: attached hereto is a copy of an assignment of this old June 14, 1948 lease to the Northwest Defense Minerals, Inc.

I believe the foregoing information clarifies paragraph 4.

I regret that time and effort on your part and that of your staff had to be expended on these items. I do appreciate your help in this matter.

Yours sincerely,

Peggy Keenan d/b/a Keenan Properties

Re: Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Contract No. Idm-858
Peggy Keenan d/b/a Keenan Properties
Lawrence County, South Dakota

Dear Miss Keenan:

The Owners' Consents to Lien and the assignments by you of the land under the subject contract, submitted in connection with the proposed assignment of the subject contract by you to the Northwest Defense Minerals, Inc., have been reviewed. We find we will require certain corrections to the documents submitted and an additional document in order to complete this assignment. The corrections and document referred to are listed below, as follows:

1. Appendix I to the contract recites that the Gold Bond, Gold Bond No. 1, Gold Bond No. 4, and Three Jims No. 5 claims are owned by Peggy Keenan. In an undated instrument, acknowledged before a Notary Public on September 27, 1954, Peggy Keenan purported to assign all of her interest in these claims to Northwest Defense Minerals, Inc. The instrument fails to state that the claims are located in the State of South Dakota, and the assignment should be corrected to so state and dated.

2. In an undated instrument, acknowledged before a Notary Public on August 30, 1954, Peggy Keenan assigned all her interest in the following leases to Northwest Defense Minerals, Inc.:

Lease dated July 17, 1950, from Dakota Tin & Gold Company

Lease dated August 7, 1948, from W. O. Fillmore (incorrectly recited as August 8, 1948, in the Appendix to the contract).

Lease dated November 1, 1949, from W. O. Fillmore and Lillian Fillmore.

Lease dated November 1, 1949, from W. O. Fillmore.

No lease dated July 17, 1950, appears to be involved in the contract. Apparently, this assignment was intended to refer to a lease recited in the Owner's Consent to Lien executed by Dakota Tin & Gold Company as dated July 17, 1954. The assignment should be corrected, and we should be furnished with a copy of the lease.

3. Two leases, each dated November 1, 1949, one executed by W. O. Fillmore and one executed by both W. O. Fillmore and his wife, Lillian, cover four Union claims and Placer MS. 392. Owners' Consents to Lien from the Fillmores cover these claims. The Owners' Consents to Lien from the Fillmores also cover eight Elizabeth claims leased by both Fillmores by an instrument dated June 14, 1948, but this lease was not assigned by Peggy Keenan to Northwest Defense Minerals, Inc.

Appendix I refers to the Golden Star No. 2 claims and two Oma claims leased by Dakota Tin and Gold Company by an instrument dated July 16, 1948. These claims apparently were leased directly to Northwest Defense Minerals by the Instrument dated July 17, 1954, referred to above. The Owner's Consent to Lien refers to "Gold Star Claim" rather than the Golden Star No. 2 Claim, and this recital should be corrected by a new Owner's Consent to Lien covering this claim.

Upon the receipt of these corrected and additional documents, we will be able to continue processing the assignment of the contract.

Sincerely yours,

Ernest Wm. Ellis, Chief
Rare and Miscellaneous Metals Division

October 1[illegible], 1954

Memorandum

To: The Administrator, DMEA
Attention: Mr. E. W. Ellis

From: Acting Assistant Solicitor, Defense Minerals

Subject: Docket No. DMEA-654, Peggy Keenan, d/b/a Keenan Properties, Contract Idm-E58

In response to a memorandum dated September 30 from Mr. Knouse, we have reviewed the Owners' Consents to Lien and the assignments by Peggy Keenan of the land under the subject contract, submitted in connection with the proposed assignment of the subject contract by Peggy Keenan to Northwest Defense Minerals, Inc.

1. Appendix I to the contract recites that the Gold Bond No. 1, Gold Bond No. 4, and Three Jims No. 5 claims are owned by Peggy Keenan. In an undated instrument, acknowledged before a Notary Public on September 27, 1954, Peggy Keenan purported to assign all of her interest in these claims to Northwest Defense Minerals, Inc. The instrument fails to state that the claims are located in the State of South Dakota, and the assignment should be corrected to so state.

2. In an undated instrument, acknowledged before a Notary Public on August 30, 1954, Peggy Keenan assigned all her interest in the following leases to Northwest Defense Minerals, Inc.:

Lease dated July 17, 1950, from Dakota Tin & Gold Company.

Lease dated August 7, 1948, from W. O. Fillmore (incorrectly recited as August 8, 1948, in the Appendix to the contract).

Lease dated November 1, 1949, from W. O. Fillmore and Lillian Fillmore.

Lease dated November 1, 1949, from W. O. Fillmore.

No lease dated July 17, 1950, appears to be involved in the contract. Apparently, this assignment was intended to refer to a lease recited in the Owner's Consent to Lien executed by Dakota Tin & Gold Company as dated July 17, 1954. The assignment should be corrected, and we should be furnished with a copy of the lease.

3. Two leases, each dated November 1, 1949, one executed by W. O. Fillmore and one executed by both W. O. Fillmore and his wife, Lillian, cover four Union claims and Placer MS. 392. Owner's Consents to Lien from the Fillmores cover these claims. The Owner's Consents to Lien from the Fillmores also cover eight Elizabeth claims leased by both Fillmores by an instrument dated June 14, 1948, but this lease was not assigned by Peggy Keenan to Northwest Defense.

Appendix I refers to the Golden Star No. 2 claim and two Gem claims leased by Dakota Tin and Gold Company by an instrument dated July 16, 1948. These claims apparently were leased directly to Northwest Defense Minerals by the instrument dated July 17, 1954, referred to above. The Owner's Consent to Lien refers to "Gold Star Claim" rather than the Golden Star No. 2 Claim, and this recital should be corrected by a new Owner's Consent to Lien covering this claim.

4. It should be noted that the Black Hills Tin lease dated August 26, 1954, to Northwest Defense Minerals, Inc., of MS. 393 (70 flats), is for a term of one year, renewable for two additional one-year periods.

Subject: Docket No. DMEA-654 (Tin, columbium, tantalum, tungsten)
Contract No. Idm-E58
Peggy Keenan d/b/a Keenan Properties
Lawrence County, South Dakota
Re: Amendment No. 8 and Assignment of Contract

Please review all the Owners' Consents to Lien for attachment to the drafted Amendment No. 8 and also the Operator's property interest assignments which were cited as requirements in your memoranda dated July 15, and August 17, 1954.

Your attention is directed to the Owner's Consent to Lien executed by the Black Hills Tin Company in favor of the Northwest Defense Minerals, Inc., for an attachment to Amendment No. 8. As Amendment No. 8 is between the Government and Peggy Keenan d/b/a Keenan Properties, and Peggy Keenan is President of Northwest Defense Minerals, Inc., would this consent be a satisfactory addition to the amendment?

Please also review the property assignments submitted by the Operator and advise if they meet the legal requirements as are set forth in your memoranda, before we authorize execution of the "Assignment of Contract" prepared by your office.

Defense Minerals Exploration Administration
Department of Interior
Washington, D. C.

Dear Mr. Ellis:

It is regrettable that so many events beyond our control have delayed the Phase 2 exploration of the Exploration Project Contract, Docket No. DMA654X.

With reference to Amendment No. 7 signed May 10, 1954, by the Administrator, Mr. C. O. Mittendorf, I note that the time was extended to November 1, 1954.

Referring to our current correspondence, we are hopeful that Amendment No. 8 and the permission to assign the DMEA Contract to the Northwest Defense Minerals, Inc. will be granted.

As soon as those documents are completed, we request consideration of an extension of the contract because of the usual bad weather which will soon preclude outdoor work in South Dakota. We are submitting this request the usual thirty days in advance.

The Northwest Defense Minerals, Inc. plans production of 1,000 cubic yards per 24 hours in the Phase 1 area beginning May 1, 1955. Although I will personally be on the property lining up Phase 2 during the month of October 1954, we expect to finish Phase 2 in the spring at the same time that we are producing concentrates commercially. All of our plans are ready to proceed.

Received
SEP 20 1954

45 West 81st. St., N.
New York 24, N.Y.

September 17th, 1954

Mr. Ernest William Ellis, Chief,
Rare & Miscellaneous Metals Division,
D.M.E.A.
Department of the Interior,
Washington, D.C.,

Dear Mr. Ellis:

Please find enclosed five copies of the Owners' Consent to Lien, executed by the Black Hills Tin Company, and which refers to our leased placer claim M.S. 393, known as 70 Flats, on lower Bear Creek. These documents are made in favor of Northwest Defense Minerals, Inc., (formerly Keenan Properties.)

Also please find enclosed a true copy of the lease just executed between the Northwest Defense Minerals, Inc., (Formerly Keenan Properties) and the Black Hills Tin Company.

Referring to my recent correspondence with Mr. Knouse, these documents would appear to be the last of those which are required by the D.M.E.A. for the consummation of the pending amendment and which are required for the consent by the D.M.E.A. to assign the July 16th, 1951 contract Idm 654, E-58 to Northwest Defense Minerals Inc.

Thanking you for all of your courtesies,

Peggy Keenan, President

Yours very truly,

Peggy Keenan, President,
Northwest Defense Minerals, Inc.

DMEA-154
Copy to DMEA-Tech-ESL

Dear Mr. Knouse:

In answer to your letter of August 24, 1954, with enclosure of Black Hills Company letter, we herewith enclose a copy of the assignment of the Keenan Properties leases to the Northwest Defense Minerals, Inc.

The revised lease made directly between the Northwest Defense Minerals, Inc. and the Black Hills Tin Company has been signed by me and returned to Chicago for signature. A copy of the lease with the proper owner's consent to lien will be sent to your office in a few days.

I trust that this will complete our requirements satisfactorily so that we may receive the Amendment.

Yours very sincerely,

Northwest Defense Minerals Inc

Re: Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Contract No. Idm-E58
Peggy Keenan d/b/a Keenan Properties
Lawrence County, South Dakota

Dear Miss Keenan:

This is in response to your letter dated August 17, 1954, with the attached letter from the Black Hills Tin Company, dated August 5, 1954, concerning the Owner's Consent to Lien covering the 70-Flat Placer - MS 393 on Bear Creek. If the Black Hills Tin Company executes a lease in favor of the Northwest Defense Minerals, Inc., and an Owner's Consent to Lien which cites the lease, we will require a copy of the lease.

The local office of the Northwest Defense Minerals, Inc., was contacted and Mr. James Everett Bacon, Executive Vice President, was requested to furnish certain information to enable us to proceed with the review of Peggy Keenan d/b/a Keenan Properties' assignment to the Northwest Defense Minerals, Inc.

The Black Hills Tin Company's letter is returned herewith as requested.

Sincerely yours,

SIGNED

Subject: Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Contract No. Idm-E58
Peggy Keenan d/b/a Keenan Properties
Lawrence County, South Dakota

Telephone conversation with Mr. James E. Bacon, Executive Vice President, Northwest Defense Minerals, Inc., Washington, D. C. telephone HObart 2-4478, regarding the following requirements before assignment can be executed:

1. We will require six copies Owner's Consent to Lien covering land parcel MS 393 to Flat Placer on Bear Creek.

2. Assignment is unacceptable to Government as your letter or the assignment mentions transfer of the land concerned in the project to the proposed Assignee of the contract. We will require a copy of said instrument if there is one.

3. If you have not transferred all your interest in the land concerned in the contract to the Corporation, we will require a copy of the instrument giving the Corporation an interest in the land for the purpose of the exploration project, that is, a lease, etc.

Memorandum

To: The Administrator, DMEA
Through: Mr. E. W. Ellis

From: Acting Assistant Solicitor, Defense Minerals

Subject: Keenan Properties, Docket No. DMA-654X (Tin, Columbium, Tantalum, Tungsten), Contract Idm-E58

We have reviewed the operator's letter dated August 10, addressed to Mr. Ellis, and the proposed assignment of the operator's interest in the contract to Northwest Defense Minerals, Inc.

As the assignment is unacceptable to us, we have prepared the attached combination Assignment of Contract, Assignee's Acceptance, and Government's Consent.

Neither the operator's letter nor the assignment mentions the transfer of land to the proposed assignee of the contract. Accordingly, the second recital in the attached assignment contains a blank for the insertion of the date of an instrument transferring the operator's interests in the land to the assignee of the exploration contract. We should request and be furnished with a copy of said instrument.

Finally, the requirements of our memorandum dated July 15 in connection with Amendment No. 8 are not affected by the assignment, that is, we still require new Owners' Consents to Lien on the latest forms for all land described in the contract which is not owned by the operator or the assignee of the contract. In this connection, if Peggy Keenan does not transfer to the corporation all her interest in the land which she owns, we will require a copy of the instrument giving the corporation an interest in the land for the purposes of the exploration project, that is, a lease, etc.

August 5th,1954

Miss Peggy Keenan
Standish Hall
45 West 81st Street
New York, N. Y.

Dear Miss Keenan:

This will acknowledge receipt of your letter of July 30th, addressed to Mr. Beatty. I am enclosing herewith one copy of lease newly drawn to cover present situation. If this meets with your approval kindly execute and return to this office. We will then forward to you one copy of the lease duly executed. by Mr. Beatty, also executed DMEA documents.

In regard to the information you require about the Spodumene ore body, we can provide the following information:

1 - Lithia runs from 1.5% to 4% and 5%. It is our judgment that the average analyses is 1.8% and 2%.

2 - We estimate the present quite well defined ore body at 50,000 tons, including large quantity in the dumps. If the ore body plunges to the north as is indicated by certain workings at the 60 ft. level, the ore body could be developed in size. This would have to be established by diamond drilling.

3 - The ore body is sufficient width so that it is inducive to open cut shovel operation. Cost of mining per ton including trucking to the mill and a certain amount of hand sorting does not exceed $1.50. This, of course, assumes proper equipment.

4 - Mill cost including froth floatation, drying, pumping water, etc., does not exceed $4.00 per ton, and could be easily reduced with an increase in tonnage.

Very truly yours,

BLACK HILLS TIN COMPANY

SUBJECT: Northwest Defense Minerals, Inc.

Dear Mr. Knouse:

Mr. James E. Bacon, Executive Vice-President of Northwest Defense Minerals, Inc. has advised that you have telephoned to him for some required information regarding Northwest Defense Minerals, Inc. for the Legal Division. We will send this letter to Mr. Bacon for personal delivery and try to comply with your needs.

The original leases are in the files of the DMEA. There has been no change in the leases. These leases were assigned to the Northwest Defense Minerals on the bottom of the copies of each lease (except Sand Creek lease which is inactive). The Corporation is not entering directly into the leases. It now owns the leases by assignment. The leases were submitted to the DMEA July 16, 1951, with all owners' consents to lien, and the new owners' consents to lien were sent to Mr. Ernest Wm. Ellis in August 1954. I have asked Mr. Carey, the attorney, to make a document regarding these assignments so that you may have the formal document requested.

On August 18th, I sent an original of the Black Hills Tin Company letter to Mr. Ellis. This company agrees to our releasing MS 393 and to the owner's consent to lien. I will forward the documents as soon as received as follows:

1. Copy of Lease assignment.
2. Black Hills Tin Company lease.
3. Black Hills Tin Company consent to lien.

Yours very truly,

Peggy Keenan, President

Dear Mr. Ellis:

The Keenan Properties are being assigned to Northwest Defense Minerals, Inc., a Maryland corporation, on Monday, August 8, 1954. I will control the stock of the corporation and act as President.

I herewith formally request permission to assign my Government Contract Docket DMEA-654 Contract IdmE-58.

The lawyers for the corporation are drafting an assignment of my contract with the U. S. Government dated July 16, 1951, to Northwest Defense Minerals, Inc. with headquarters and offices at 2101 "S" St. N.W., Washington, D.C. I expect to submit this assignment through you to the DMEA Legal about Tuesday, August 9, 1954. Do I need to show any papers other than this assignment, such as the signed charter of the new corporation, when I submit the assignment?

Yours very truly,

Peggy Keenan

Re: Docket No. DMEA-654
(Tin, columbium, tantalum, tungsten)
Contract No. Idm-E58
Peggy Keenan d/b/a Keenan Properties
Lawrence County, South Dakota

Dear Miss Keenan:

This refers to my letter of July 19, 1954, in which I requested signed copies of the new Owner's Consent to Lien form covering all the land included in Phases I and II of the contract and our telephone call of July 29 in which I stated that we had received some of the signed forms but that not all of the land covered by the contract was mentioned. You explained that the 70 Flats area, known as Placer Claim Lot No. 393, was owned by a Chicago man who at this time of year was at his summer camp; however, you believed the forms you sent to him would be received in due time and would be properly executed.

Therefore, in accordance with your request, I am returning the three sets of forms herewith so that those claims that were not mentioned may be included. You will note that we received only five copies in each case and since these papers came direct from Spearfish, South Dakota, without a covering letter, I assume the landowner kept a copy for his file. However, it will not be necessary to call for the missing copies as we can take care of that matter here.

In addition to the Owner's Consent to Lien form covering Lot 393 (70 Flats) which, as stated before, you explained you believe will be forthcoming, the enclosed forms fail to mention the following claims:

Union No. 7 - Leased from L. C. and W. O. Fillmore (Connor's ground) by instrument dated November 1, 1949. Unrecorded.

Mayflower Nos. 1, 2, 3 and 4 - Leased from W. O. Fillmore by instrument dated August 8, 1948. Unrecorded.

Elisabeth Nos. 7, 8, 9, 10, 11, 12, 13 and 14 - Leased from L. C. and W. O. Fillmore (Connor's ground) by instrument dated June 14, 1948, recorded in book 301, pages 157 and 164.

R.C.H.

I am enclosing twenty-four copies of the new Owner's Consent to Lien, Form MF-203, revised July 1, 1954, for your use should they be required.

Sincerely yours,

Ernest Wm. Ellis, Chief
Rare & Misc. Metals Division

June 24, 1954

Memorandum

To: Chairman, Operating Committee, Defense Minerals Exploration Administration, Washington, D. C.

From: Executive Officer, Field Team, Region V

Subject: Docket DMEA 654, Contract E-58, Keenan Properties

Reference is to your correspondence of June 7, 1954, having to do with a change in the flow sheet for treatment of samples from the subject project.

After considerable study by the field team and its consultants, it is the opinion of this office that permission could be given the operator to use the flowscheme. However, the contract should be so amended to record the fact that any additional expense in connection with its use (and that includes freight on the flow sheet equipment) will be borne by the operator. Item 8, Contingencies, unforeseen expenses, $2,000, seems a good catchall for just such items and should be carefully audited. We are not receptive to having the operator re-run by the new flow sheet any splits of samples from Phase 1 on the Phase 2 expenses. If done at the operator's expense, we should be permitted the results.

The proposed flow sheet may or may not be feasible - we have no data on recoveries or grades and are in a position of approving a flowscheme on the operator's say so.

We concur with you that the contract should be followed in regard to the churn drill holes and the test pits.

We feel the total cost of the proposed work should not be changed from that of the present total cost.

Re: Docket No. DMEA-653
(Tin, columbium, tantalum, tungsten)
Contract No. Ida-258
Peggy Keenan d/b/a Keenan Properties
Lawrence County, South Dakota

Dear Mr. Needham:

Enclosed find copies of letters from Peggy Keenan, dated May 28, and the Separations Engineering Corporation, dated May 25, 1954, together with a copy of a proposed flow sheet for testing the samples taken under Phase II of the Keenan property project.

You will note from the enclosures that the proposed flow sheet is somewhat different than heretofore approved. However, as stated in the Keenan letter, the flow sheet for the test work was evidently designed after careful technical consideration based on physical work on samples taken from the property.

While we do not have a working knowledge of the equipment as shown in the flow sheet, since it has been put into actual use and the Applicant is willing to stand the expense of any overexpenditures under Phase II, we see no objection to the flow sheet as submitted. However, we thought it best to forward a copy of the flow sheet to you for your understanding and approval before going further. If you have no serious objection to the proposed flow sheet, kindly so state and we will draw up an amendment to take care of the change in testing equipment. Certainly if we go along with their idea in this matter they cannot blame this equipment in the event the values that are sought appear to be low.

Since we have only one copy of the flow sheet, it will be necessary to have duplicates made for your purposes and our own files. If you can have the enclosed copy duplicated, please have sufficient copies made for your own purposes and return the enclosed copy to this office. Otherwise, please return the flow sheet to this office and we will have photostats made and forward two copies to you.

R.C.G.

We are unable to understand the third paragraph of Mr. Jarman's letter wherein he requests permission ". . . not to drill but sink pits and put that material through this pilot plant . . .". We feel that the contract as drawn up should be followed; that is, so many lines of holes and so many pits. In other words, the sampling work as outlined in the contract should be followed. Please let us have your recommendation in this matter.

Sincerely yours,

George C. Selfridge

KEENAN PROPERTIES

Spearfish, South Dakota

Hotel Standish Hall,
45 West 81st. St.,
New York 24, N.Y.

May 28th, 1954

Mr. Ernest William Ellis,
Chief, Rare and Misc. Metals & Minerals,
DMEA.
Department of the Interior,
Washington, D.C.

Dear Mr. Ellis:

Thank you for your courtesy in sending the two small maps of Keenan Properties area and for your good wishes.

The attached Test Plant Flow Sheet marked "A", and a letter from Mr. G.W. Jarman, President, Separations Engineering Corporation, dated May 25, 1954, marked "B" are made a part of this letter and serve as a basis of request. But the request, if granted, and attendent expenses incurred over and above the authorized expenditure for Phase 2, dated October 28, 1952, will be borne by Peggy Keenan d/b/a Keenan Properties, and/or a corporation being formed which will be responsible, as outlined in the attached documents.

Our request to change the test plant specifications and equipment, methods of excavation, method of preparation of separated concentrates before being sent to the assayer and the elimination of the Humphrey Spiral (as approved September 1953) has been given careful technical consideration, including actual physical work on concentrates. The methods outlined are being used in successful commercial operations and we feel the approval of DMEA will aid our future testing materially.

Where possible we would like permission to rent the equipment to the Phase 2 project, without altering the total budget.

We wish to engage Mr. R.M. Atwater Jr., #1 Wall St., N.Y. as superintendent engineer of Phase 2. He is in complete accord with Mr. Jarman. Mr. Atwater was approved in 1953 by the DMEA Field Office.

We will submit a document assignment of our DMEA contract to a corporation with a request to assign it. I will await the approval of DMEA on the Phase 2 changes in specifications.

Thanking you for your courtesy,

Yours very truly,

Peggy Keenan

New York, N. Y.

Dear Peggy:

In response to yours of May 22nd, I am returning the flow sheets, as per your request, and suggest that you ask permission to set up this small pilot plant in the following language.

Permission is requested to treat the material in a small pilot plant of laboratory size, which will not include a Humphreys Spiral. The reason for this is that we intend to dry all the material, put it over a Model V-80 Sutton, Steele & Steele Air Table after it has been dried and screened. The recovery under this system may be a little better than the Humphreys but the cost of drying the original ore would outweigh this. Inasmuch as the object of this is to find out what is in the placers, tonnage recoveries can be gone into at a later date. For example, we know that panning loses some value but drying, screening into close fractional sizes and putting over air tables, electromagnetic separators and electrostatic separators will recover all of the values. In commercial work, Baum type jigs followed by Humphreys Spirals for the fines and then followed by air tabling, electrostatic and electromagnetic separation would give the same results. But the pilot plant does not intend to put in a Baum type jig as the smallest size unit is too expensive. Hence our request for permission to do no panning but to dry, screen size and put all the material from drill holes, pits, etc. into the pilot plant equipment.

We further request permission not to drill but to sink pits and put that material through this pilot plant so that we can separate all the heavies into their component parts for analyses. Thus, samples would be given only of finished material, not rough heavies, and the mineral value of the entire deposit can be more definitely ascertained in this manner.

We also request permission to run overburden through this plant and discard the depth that proves to be uneconomical. In other words, if we put the overburden of a pit to a certain depth through the plant and it turns out to be lacking in economic mineral value, this can be discarded before the placer is evaluated.

Yours very truly,
SEPARATIONS ENGINEERING CORPORATION

Dear Mr. Ellis:

The extension for Phase 2 has been received, and I appreciate this very much.

As mentioned last month, I expect to go to So Dak in a few days.

In the meantime, I have misplaced the small map which accompanied Phase 2. Could you please send me 2 copies to my New York address, one for my use and one for the engineer.

I will write again very shortly.

Yours, Sincerely

Peggy Keenan

Dear Mr. Needham:

Enclosed are the original and five copies of proposed Amendment No. 7 to the subject contract, signed by the Administrator for the Government, which was prepared at the request of the Operator.

If the terms and conditions of this amendment meet with your approval and the Operator's, please have the original and all copies signed by the official authorized to sign the document and make the usual distribution of the amendment.

If any part of this proposed amendment does not have either your approval or that of the Operator and cannot be amended within your delegated authority, the original and all copies are to be returned with the proposed changes for consideration.

We are enclosing copies of the Operator's letter (undated) requesting this amendment, in the event that you did not receive your copy.

Sincerely yours,

George C. Selfridge

Mr. C. O. Mittendorf, Director
Defense Minerals Exploration Administration
Department of Interior
Washington, D. C.

Dear Mr. Mittendorf:

Referring to the extension of DMEA contract Idm E-58 for Lawrence County, South Dakota, to June 30, 1954:

I herewith request an amendment extending the date to include the balance of 1954. The very heavy snow storms late this Spring and other conditions beyond my control make this request for extension necessary. We expect to start the Phase 2 work about May 1, or when testing equipment arrives in South Dakota by freight. The Phase 2 amendment specifies about 100 days for testing. Therefore, I believe we will need this summer to complete our planned work with DMEA.

Thanking you for your many courtesies,

Yours very truly,

Peggy Keenan

Keenan Properties
Lawrence County, South Dakota
Contract 14n-858

Dear Miss Keenan:

By the terms of the subject Exploration Project Contract, as amended, and the certification of discovery or development dated May 29, 1959, all minerals mined or produced from July 16, 1951, to July 16, 1966, were subject to the Government's royalty as set forth in said contract.

As the period during which production was subject to royalty has now expired, the Government according to its present records retains no claim or lien against the property subject to the contract or any production therefrom. We, therefore, are closing our books and records on this contract. Your attention, however, is called to the provisions of the contract which require the Operator to keep and preserve certain records for the periods indicated.

Sincerely yours,

FRANK E. JOHNSON

Memorandum

To: Chief, OME

From: Field Officer, Region III

Subject: DMEA-654X (Tin Columbium-Tantalum, Tungsten) Contract Idm-E-58, Northwest Defense Minerals Inc. (Rawlins Mining District) Lawrence County, South Dakota

The Chief, OME requested a final on-site examination be made on the subject property in view of the fact that the royalty period on the subject contract expired July 16, 1966. The request was made on August 17, 1966 and an on-site examination was made on August 26, 1966, in conjunction with another field examination. Miss Peggy Keenan was contacted by telephone and an examination date was established. Miss Keenan informed me that the Beaver Creek portion of the area was inaccessible due to heavy flash floods that occurred in the area during May 1965. Mr. A. I. Johnson, the operator's mining engineer accompanied the Field Officer on August 26, 1966 and the following areas were inspected; see attached figures (Figure 3--Map showing locations of project areas, Northwest Defense Minerals, Inc., Lawrence County, South Dakota DMA-654X, Contract Idm-E-58).

Area "A", Bear Creek Trenches: An inspection was begun on the south end near Tinton, South Dakota, and it was ascertained that trenches 5, 4, 3, 2 and 1 were still in evidence despite effects of the floods during May, 1965. The trenches had been pretty well grown over but had been cut deep enough and long enough to remain clearly visible, although no further work has been done along them and certainly no production has been made from any of the 5 trenches in this area.

Area "B", Potato Creek Trenches, were inspected, and trenches 6, 7, 8 and 9 were found to be in much the same state as the trenches in Area "A" along the Bear Creek drainage. No production has come from trenches 7, 8 and 9 as they were essentially the same dimension as originally dozed.

Area "C" Bear Creek Holes: Test pits 1 and 2 were difficult to find but there was enough dump material left near the sites to locate them. Test

holes 6 and 7 and holes 8 and 9 were somewhat visible but holes 1, 1A, 2, 3, 4 and 5 had been essentially obliterated. No production is in evidence from this area as well.

Area "D", Beaver Creek holes, near the road junction as Iron Creek along the Spearfish-Tinton road, Test Pit No. 1 was still in evidence and the site locations at Hole Nos. 1, 2, 3, 4, 5, 6, 7, 8 and 9 were mostly in evidence but were badly overgrown with vegetation, and definitely showed that no production had resulted from the test pit or in the area of the churn drill holes.

President, Northwest Beryllium Corporation
Room 240, American National Bank Building
Rapid City, South Dakota

Re: DMEA-654 (Tin, Columbium-Tantalum, Tungsten)
Northwest Defense Minerals, Inc., Assignee
Keenan Properties
Lawrence County, South Dakota
Contract Idm-R58

Dear Miss Keenan:

In reply to your inquiry of January 22, 1965, sent to our Denver office, all minerals mined or produced from the land in the contract are subject to the Government's percentage royalty until July 16, 1966. You will be officially notified when the contract lapses.

Sincerely yours,

George Fumich, Jr.

Acting Director

Re: DMEA 654

In my opinion this "no knowledge" 9/9/63
reply, as well as prior 4/18/62 reply, from
owner of only one of the numerous
claims under the contract is of no value.

Peggy Keenan, personally, and the Operator-
Corporation are both sureties for the
royalty. Either a reply should be
obtained from one of the sureties, replies
from the several owners, or Bu Mines man
in area should be requested to check.

The fact that last years survey
to Operator was returned by New York
post office marked "Moved - Left No
Address" does not mean it or Mrs.
Keenan cannot be located. Spearfish
is a small place and Mrs. Keenan
was a relatively well known person.

Dear Mr. Beatty:

After the completion of the approved exploration work under the contract identified above, we asked to be informed about changes in the status of the property and production from it during the period of royalty obligation.

To assist you to furnish this information and to assure the accuracy of our records, please answer the questions on the back of this letter and return two copies to this office with copies of any pertinent documents.

Sincerely yours,

Willis R. Griswold

REQUEST FOR INFORMATION ON CERTIFIED PROJECT AND PROJECT UNDER ROYALTY AGREEMENT

1. Since May 29, 1959, has there been a change in ownership, lease, or sublease? If yes, please state details of the transaction below and provide a true or signed copy of the pertinent documents, unless they have been provided before. Yes ☐ No ☐

not to my knowledge

2. Since May 29, 1959, has there been any production from the land subject to the contract? Yes ☐ No ☐

   A. If so and it was shipped, give quantity, value, and name and address of purchaser.

	Quantity	Value

   B. If stockpiled awaiting sale, state quantity, grade, and location.

Type	Quantity		Estimated Grade	Location
Ore		Tons		
Concentrates		Tons		
Other		Tons		

3. Since , has any production been transported through workings (see of contract)? Yes ☐ No ☐

   A. If so, state quantity, value, and disposition of material.

Disposition of Material	Quantity	Value

JUL 28 1959

To: Acting Director

From: Special Assistant to the Director

Subject: Docket No. DMEA-654
(Tin, Columbium-Tantalum, Tungsten)
Northwest Defense Minerals, Inc., Assignee
Keenan Properties
Lawrence County, South Dakota
Contract No. Idm-E58

On July 23, 1959, the writer telephoned Mr. Townsend to instruct him concerning his inquiry of July 17 relating to the closing of the subject account. It was suggested that Mr. Townsend write the operator immediately, in reply to her letter of July 14, informing her that the account had been closed as of July 11, that it would no longer be necessary for the company to submit a Final Report, and that the Government would not participate in the cost of a Final Report, in accordance with Mr. Townsend's letter of June 10 to Miss Peggy Keenan, President, Northwest Defense Minerals, Inc. Mr. Townsend informed the writer that everything was packed for moving to Federal Center, but that he would send a letter as quickly as possible.

The writer then asked Mr. Townsend what he had heard of the public's reaction to the OME program. Mr. Townsend replied that a large number of people had requested information and application forms, but none of them were submitting applications. He further stated that at present interest seemed largely centered around pegmatites, but as they had no targets (apparently meaning they were not zoned) they were not eligible for OME assistance.

At this point the writer explained one difference between the OME program and the old DMEA program, and that was that under the OME program we could now do some preliminary work which would allow the obtaining of pertinent geological and mineralogical information. After further discussion, Mr. Townsend had a better understanding of the new program, in that we were looking for new deposits, and said he would pass on the information to those working on OME matters.

Lawrence County, South Dakota

Dear Miss Keenan:

Reference is made to your letter of July 14, 1959, and prior correspondence regarding the rendering by your company of a final engineering and geologic report pertaining to work completed under the referenced contract.

The required report was not received on or before July 10, 1959; therefore, the account was settled July 11, 1959, in accordance with advice to you in the letter from this office dated May 7, 1959, and in accordance with the Report of Review by the Contract Administration and Audit Division, OME, dated July 13, 1959, a copy of which was forwarded to you July 22, 1959.

Since the Government cannot now participate in the costs of preparation of the final report, it will be unnecessary for you to submit the report.

Very truly yours,

Subject: Docket No. DMA-654X (Tin, columbium-tantalum, tungsten)
Northwest Defense Minerals, Inc.
Contract Idm-E479

Your Report of Review in lieu of a final audit of the subject contract is acceptable and normal distribution is authorized after revision of the original and all copies as follows:

(1) At the bottom of the report, between the balance due Operator and your signature, add the line:

"Total Government contribution (including 90% of $5,878.22) - $29,145.91"

(2) At the end of reason (a) of the attachment change the period to a comma and add:

"as amended on May 27, 1952."

These changes have been made on the Washington copies.

Field Team Region III
Dept. of Interior, 224 Customhouse
Denver 2, Colorado

Dear Mr. Townsend:

When I returned from my trip from South Dakota, I found that contrary to the impression I had in my mind, the deadline was July 10 instead of July 15. Therefore, we may be delinquent in our work. However, there was no way in the world to act otherwise because of my traveling and the urgent need of closing our financial channels to safe guard the Corporation at the earliest moment. We are happy to report we are successful.

We can this week turn our attention to the D.M.E.A.(O.M.E.) report by the Operator and by the Engineer, R.M. Atwater, Jr. We will accept the figures of the D.M.E.A. auditor for the final accounting and do the best we can with the expenses involved and the rules and deadline you had to lay down.

We have had a photostatic blow up made of the Certification of Discovery and have both the letter signed by you and the Certificate framed for the walls of our office. We are very proud of the documents.

We will send reports at the earliest moment.

From: Executive Officer, OME Field Team, Region III

Subject: Docket DMEA 654 (Tin, Columbium-Tantalum, Tungsten) Contract Idm-E58, Northwest Defense Minerals, Inc., Assignee (Keenan Properties) Lawrence County, South Dakota

The Operator has failed to render its final engineering and geologic report as required by the contract; therefore, the account is to be closed in accordance with instructions in the memorandum from W. S. Martin, Acting Chairman, Operating Committee, dated June 26, 1959, a copy of which is enclosed for your records.

Also enclosed is one copy each of the following: letter from this office to the Operator dated May 7, 1959; memorandum from this office to the Chairman, Operating Committee, dated May 7, 1959; and memorandum to this office from the Chairman, Operating Committee, dated May 22, 1959. A copy of the letter from this office to the Operator dated June 10, 1959, was forwarded to you at the time of writing.

Before the account can be closed, it is necessary that this office be furnished a Certificate and Report of Audit or Report of Review of reported project costs, whichever the case indicates.

The entire amount of otherwise acceptable costs on which reimbursement to the Operator has been deferred is now to be disallowed as indicated in our letter to the Operator dated May 7, 1959.

All work under the contract was performed on a cost incurred basis.

Memorandum

To: Chairman, Operating Committee, OME

From: Executive Officer, OME Field Team, Region III

Subject: Docket DMEA 654X (Tin, Columbium-Tantalum, Tungsten) Contract Idm-E58, Northwest Defense Minerals, Inc., Assignee (Keenan properties) Lawrence County, South Dakota

In reference to your letter of June 5, 1959, concerning additional reserves on the subject property, enclosed are the original and two copies of a memorandum dated June 16, 1959, from M. H. Marshall, Mining Engineer, Bureau of Mines.

Supplementing the above memorandum, if the matter of reserves is to be considered on gold content of the gravel deposit, then undoubtedly the Phase 2 drilling and test pitting would increase the volume of reserves over that indicated by the Phase 1 work.

Bedrock depth as determined by the drill holes in both the Bear and Beaver creek areas cannot be relied upon; therefore, the depth of gravel used in the following reserve computations is that found in the one test pit in the Bear creek area and the two test pits in the Beaver creek area.

The drill holes and test pits in both areas provide very limited knowledge as to the extent of the deposit, but on a conservative assumption that the deposit is of similar depth and grade for a distance of 200 feet each way up and down stream from the test pits would provide the following additional reserves as a result of the Phase 2 work:

	Depth	Width	Length	Cu. Ft.	Cu. Yds.	Value
Bear Creek	18'	200'	200'	720,000	26,700	$30,705.00
Beaver Creek	7'	200'	300'	420,000	15,600	$14,664.00

? Sn - Cb Ta - 0.10 lb/cyd
JMM

If a less conservative estimate is considered appropriate, the following approximate factors of cubic yards and values per lineal foot of deposit length may be used:

	Cubic Yards	Value
Bear Creek	133.5	$153.52
Beaver Creek	52.0	$48.88

Memorandum

To: Executive Officer, OME Field Team, Region III

From: Milton H. Marshall

Subject: Docket DMEA 654X (Tin, columbium-tantalum-tungsten) Contract Idm-E58, Northwest Defense Minerals, Inc., (Rawlins Mining District) Lawrence County, S. Dak.

June 16, 1959

The average values of $1.15 and $0.94 per cubic yard referred to in the Chairman's memorandum dated June 5, 1959 apparently refer to the values mentioned on pages 7 and 15 of the Bureau of Mines final report. Cursory inspection of the report might convey the impression that additional ore reserves should be increased in accordance with the results of work accomplished under Phase 2. Inspection, however, shows that from a strategic minerals or DMEA viewpoint, the reported values reflect no more than a negligible increase of strategic ore reserves.

The first value ($1.15/cu. yd.) reflects the total value represented as the result of Phase 2 drilling and test pitting on Beaver Creek. Of the total value, $1.05 is for the contained gold and but $0.10 or 0.10 pound for the combined value of strategic minerals.

Correspondingly, the second value ($0.94, sic. $0.954) represents the total values from the Bear Creek drilling and test pitting. Of the total value, $0.945 is the contained gold. In this case, the value of strategic minerals is less than one cent per cubic yard.

Accordingly, Phase 2 contributed only a negligible additional amount of ore reserves of strategic minerals to the national picture and it is believed that the statement on page 9 of the report, "The results of Phase 2 work were unfavorable inasmuch as the quantity and value of the strategic minerals, columbite-tantalite, tungsten WO_3, and tin were too small and low in grade to be significant or of economic importance.", remains valid.

Re: Docket No. DMEA-654
(Tin, Columbium-Tantalum, Tungsten)
Northwest Defense Minerals, Inc. (Assignee)
Keenan Properties
Lawrence County, South Dakota
Contract No. Idm-E58

Dear Mr. Beatty:

In reply to your letter of June 2, the Government's lien extends to all the real property described in the subject contract. The parcel of land referred to in your letter, Placer Survey No. 393 (our reference, 70 Flats Placer on Bear Creek M.S. 393) seems clearly to be included in the subject contract by Amendment No. 3, dated October 28, 1952. This amendment, like the contract, is signed by "Peggy Keenan d/b/a Keenan Properties," and we have two Owner's Consents to Lien - one dated October 14, 1952, and another dated August 26, 1954, executed by Black Hills Tin Company, by yourself as president, which grants the Government a lien on the land. This lien does not appear to be contingent upon maintenance of the lease on the land by Peggy Keenan. Therefore, all minerals mined or produced from the date of the contract (July 16, 1951) to July 16, 1966, are subject to the Government's percentage royalty as set forth in the contract until the amount contributed by the Government is repaid.

An audit will be made to determine the amount of the Government's contribution to the subject exploration project which is repayable by the company through royalty on production. When this audit is completed the subject operator and all lessors of land included in the contract will be advised the amount of the Government's contribution.

8623

Estimates of reserves made by the Government, based on the results of the exploration work, cannot be made public. You might request Northwest Defense Minerals, Inc., to give you its estimate of reserves.

Sincerely yours,

Frank E. Johnson (Lw)

UNITED STATES
DEPARTMENT OF THE INTERIOR
OFFICE OF THE SOLICITOR
WASHINGTON 25, D. C.

June 12, 1959

Memorandum

To: Acting Director
Office of Minerals Exploration

From: Acting Associate Solicitor
Division of Mineral Resources

Subject: Docket No. DMEA-654, Northwest Defense Minerals, Inc. (Assignee), Keenan Properties, Lawrence County, South Dakota, Contract No. Idm-E58

Mr. Knouse, by routing slip dated June 4, has asked us to prepare a reply to a letter from Ross J. Beatty, Jr., Black Hills Tin Company, to the Acting Director, dated June 2, 1959.

Mr. Beatty asks three questions:

1. why there is any lien on the subject property;

2. whether the Government can give the writer information relative to the exploratory work; and

3. the amount of the lien.

Inasmuch as only the first question requires the consideration of this office, we will suggest herewith the reply that you might make to Mr. Beatty to be incorporated with your reply to the other two questions:

Your letter of June 2 to Mr. Frank E. Johnson, Acting Director, Office of Minerals Exploration, requests further information regarding the Government's lien arising out of the subject contract, referred to in Mr. Johnson's letter to you of May 29.

The Government's lien, of course, extends to all real property described in the subject contract. Inasmuch as Mr. Johnson's letter of May 29 makes no

Only parcel covered by contract by [illegible]

reference to particular parcels of property, we do not understand why you question the inclusion of a particular parcel: the land covered by M.S. 393.

This parcel, at any rate, seems clearly to be included by Amendment No. 3 to the subject contract, dated October 28, 1952. This Amendment, like the contract, is signed "Peggy Keenan d/b/a/ Keenan Properties", and we have an Owner's Consent to Lien, dated October 14, 1952, executed by Black Hills Tin Company, by yourself as President, which grants to the Government a lien on the land. This lien does not appear to be contingent upon maintenance of the lease on the land by Peggy Keenan.

Subject: Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Northwest Defense Minerals, Inc. (Assignee)
Keenan Properties
Lawrence County, South Dakota
Contract No. Idm-E58

A review of the Final Engineering Report on the subject property shows only ore reserves discovered as a result of Phase I work. Since the work done under Phase II showed average values of $1.15 and $0.94/cu. yd. further down the creeks, on Beaver and Bear Creeks, respectively, do you consider additional ore reserves were added as a result of this work?

Re: Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Northwest Defense Minerals, Inc.
(Assignee)
Keenan Properties
Lawrence County, South Dakota
Contract No. Idm-E58

Dear Mr. Johnson:

This will acknowledge receipt of your letter of May 29th, which is somewhat disturbing to us, and we would therefore like some additional information.

According to our records, neither the Northwest Defense Minerals, Inc., Miss Peggy Keenan, nor any of her associated companies have a lease on our Placer Survey No. 393. The lease was dated August 26, 1954 providing the right to explore and mine on this property for one year from that date. Lessee was given an option to extend this lease for two additional periods of one year each, which options were to be exercised by lessee delivering to lessor written notice of such intention at least sixty days before the end of each prior lease year. This never was done, and we therefore have assumed that the lease was automatically cancelled.

From your letter of May 29th it would now appear that the Government has a lien against our property which will extend for a ten-year period beginning August 26, 1954, but since there is no lease on the property, it is not clear to us how the Government expects to recover.

It is also interesting to note the statement in your letter to Miss Keenan indicating that sufficient exploratory work has been done to enable you to calculate reserves. Since the Government's lien is against our property, would it not be proper for the Government to provide us with information relative to this exploratory work? The lessee was supposed to provide us with this information, but never has done so.

Mr. Frank E. Johnson

We would also appreciate being informed as to the amount of the lien.

This property was recently transferred from the Black Hills Tin Company to my brother, John T. Beatty, and myself, individually. What effect will this have on the situation?

Very truly yours,

Ross J. Beatty, Jr.

I have read the draft of the final Engineering Report on the subject project. As you know, the work was essentially completed prior to the transfer of the contract administration to this region, and there is no geologist on my staff familiar with the project.

I believe that the report adequately describes the results of the completed exploration and therefore suggest that the report be accepted and forwarded to Washington without participation by the Survey.

INTRODUCTION

Peggy Keenan, Spearfish, South Dakota, d/b/a Keenan Properties submitted an application dated April 16, 1951, to Defense Minerals Administration for a $570,599 production loan to operate tin-bearing placer deposits on Bear, Potato, and Beaver Creeks, Lawrence County, South Dakota. The application was denied following reports to DMA based on reconnaissance by the examiners. The application was revised and resubmitted to Defense Minerals Exploration Administration with request for financial assistance in an exploration project on Bear and Potato Creeks.

Contract Idm-E58, effective July 16, 1951, was awarded the applicant and provided for exploration work in two phases, the second phase contingent on results obtained from phase 1 work. The cost was estimated at $100,000 with Government participation at 90 percent or not to exceed $90,000.

Project work was started July 26, 1951, and was terminated effective November 1, 1957, by Termination Agreement dated August 15, 1958, without the completion of all work provided for by the contract. It is concluded that the project work completed resulted in the discovery of significant reserves of columbite-tantalite, tungsten, and tin minerals for which a Certification of Discovery or Development is recommended.

PROPERTY

Ownership

Northwest Defense Minerals, Inc. successor to Keenan Properties controls the land subordinated to the Government under Contract Idm-E58 both by ownership or lessee. The Government's interest in land leased by the operator is protected by signed Owners Consent To Lien and Subordination Agreements.

Location, Description and Accessibility

The land subordinated comprises 47 claims of approximately 916 acres situated in Secs. 4, 5, 6, 7, 8, 9, 16, 17, 18, 19, 20, 21, 28, 29 and 30, T. 5 N., R. 1 E., Black Hills meridian, Lawrence County, South Dakota (fig. 1). The claims are located along Potato, Bear and Beaver Creeks (fig. 2) at a mean altitude of 5400 feet above sea level. The creeks have locally incised an area of moderate relief to form narrow draws and gulches. The property is about 12 miles west of Lead, South Dakota and 10 miles southwest of Spearfish, South Dakota and readily accessible by improved graveled road from both towns.

Present Status

There is no activity at the property and there is no indication of possible activity in the future.

GENERAL GEOLOGY

The area includes the east half of a minor uplift on the northwestern flank of the Great Black Hills Dome. Precambrian schists and pegmatite exposed most prominently at the town of Tinton west of the project area are cut by Tertiary intrusive rocks and are encircled by outward-dipping Paleozoic sedimentary rocks. Smith and Page (USGS Bulletin 922) state that the tin and tantalum (of the Tinton mining district) are inseparably linked with the pegmatites in origin. The tin ores (of the pegmatites) are local concentrations of cassiterite formed during crystallization of the primary pegmatite. The columbite formed later and is concentrated in cracks of spodumene-quartz pegmatite and replacement of the rock as well as microcline and amblygonite.

Bear Creek, Beaver Creek and its tributary, Potato Creek, drain north from the Tinton area and derive their assemblages of strategic minerals found in the placer gravels from the weathering of exposed pegmatites. The placer gravels are

composed predominantly of porphyry boulders and pebbles.

PROJECT

Operator's Proposals

Peggy Keenan d/b/a Keenan Properties initially made an application dated April 16, 1951, to Defense Minerals Administration for a production loan of $570,599 to equip the Keenan Properties for a drag line placer operation. The operation would be active six or seven months per year and handle approximately 430,000 cubic yards of gravel annually. The anticipated yearly recovery was given as 240,000 lb. tin, 80,000 lb. columbite-tantalite, and 4000 units WO_3. Bureau of Mines - Geological Survey reports indicated, however, that it was doubtful if even a small percentage of the given amounts could be produced. Accordingly, the application was denied.

A revised application was submitted which requested financial assistance in a testing and sampling exploration project, the first part to cost $19,000.00. The revised application was subsequently approved for contract.

Approved Program with Modifications

Contract Idm-E58 was executed by the Government and the operator effective July 16, 1951. The estimated project cost was $100,000 with Government participation at 90 percent or not to exceed $90,000. The contract was set up on a 2 phase basis whth phase 2 contingent on the result of phase 1.

Amendment No. 3 was executed effective as of the date of the contract to define and locate the work to be performed under phase 2. Work specifications and contract provisions were further modified by 14 additional amendments.

WORK COMPLETED

Phase I

Excavation and Sampling

Work started August 13, 1951, with the excavation of Trench No. 1 at the lower end of Bear Creek (fig. 3, Area A). Phase I work was completed September 22, 1951. Although the contract originally provided for the excavation of 5 trenches, 3 on Bear Creek and 2 on Potato Creek, by agreement, 9 trenches, 5 on Bear Creek (fig. 3, Area A) and 4 on Potato Creek (fig. 3, Area B) were excavated, sampled and the samples concentrated. The trenches were excavated principally by bulldozer with a small dragline used on the deeper trenches.

The 5 trenches excavated on Bear Creek and the 4 excavated on Potato Creek totaled 1089 lineal feet, which averaged 8.5 feet in width and 4.6 feet in depth. Dimensions of the individual trenches are:

	Trench No.	Length, feet	Width, feet	Depth, feet	Drain length, feet
Bear Creek					
	1	127	9.0	9.2	193
	2	91	5.4	3.7	80
	3	126	8.9	5.0	
	4	139	8.3	2.9	
	5	146	8.4	3.4	
Potato Creek					
	6	110	8.5	4.4	
	7	81.5	8.3	3.8	
	8	103	9.9	5.1	
	9	165.5	10.4	4.3	
Total (t)	9	1089 (t)			273 (t)
Averages (a) in feet			8.5 (a)	4.6 (a)	

Channels 6 in. deep by 24 in. wide were cut in the wall of each trench at regularly spaced intervals to sample the trenches. The channel interval, however, was varied by the operator from trench to trench in attempt to determine the optimum spacing. A total of 60 channel samples were taken. Twenty three were

concentrated as single samples. The remaining 37 samples were concentrated then combined to provide representations of individual trenches. Details of sample combinations may be found in the operator's report of phase 1 work by W. W. Johnson.

Concentration and Results

The concentrates from each run comprised the jig, bed, jig hutch, and concentrate from the head and tail sluice boxes. The entire concentrate was dried, mixed, weighed, sampled and split with the splits divided between the Government and operator.

The concentrated samples were assayed for gold, tin, columbium, tantalum and tungsten as WO_3. Assay results indicated the WO_3, mainly as sheelite to be too low in value ($0.02 per cu. yd.) to be included in the phase calculation of reserves. The operator reported a total value per cubic yard of $1.06 from a composite sample and $1.20 per cubic yard from individual samples. The Rapid City Experiment Station, Bureau of Mines, reported a recoverable value of $1.17 per cubic yard. All values are based on 1951 metal prices.

Costs

The acceptable costs for phase 1 work was $19,000 as established by Audit Certificate, amended. The audit made no attempt to establish the total acceptable units and costs for the individual categories of work, therefore, they are not reflected in table I.

Phase 2

Churn Drilling, Test Pitting and Sampling

Phase 2, Stage 1 exploration started September 27, 1955, and was completed November 15, 1955. The acceptable work completed consisted of 18 churn drill holes (fig. 3, Areas C and D) with a total aggregate depth of 348.5 feet, and 3 test pits totaling 31.5 feet in depth. Ellingson Bros. did the churn drilling

under contract. A Bucyrus-Erie 22W drill powered by a Hercules Model OX85 gasoline engine mounted on a Chevrolet 1.5 ton truck was used for drilling. A 6-in. diameter ~~bit~~ casing ? was employed to follow inside and behind 6-5/8"-I. D. ~~Standpipe~~ Drive Shoe. Samples were placed in variable sized grease and oil drums which were tagged, sealed and stored on the property.

The depths to which the holes were drilled are as follows:

Bear Creek		Beaver Creek	
Hole No.	Depth, feet	Hole No.	Depth, feet
1	21	1	18
2	23	2	19
3	26.5	3	19
4	22	4	19
5	22	5	16
6	30	6	16
7	8	7	20
8	20	8	17
9	15	9	17
Total	187.5 feet		161

Three-sectioned telescoping caissons were used in excavating the test pits. The smallest section of caisson was placed first and was the bottommost in the pit. Sections were lowered by block and tackle suspended from a tripod. Gravel to be excavated was hand shoveled into sample containers at the shallower depths and hand-hoisted in buckets at the deeper depths. The 2 test pits on Bear Creek were sunk to 6.25 and 7.0 feet respectively and the pit on Beaver Creek was sunk to 18.25 feet.

Concentration and Results

The concentration test on a portion of gravels from the 16.25-18.25 foot interval of Test Pit No. 1, Beaver Creek was started November 15, 1955, by the operator and completed November 17, 1955. The results of the test indicated a total of 0.7952 lb. strategic minerals. The gold content averaged 0.0228 oz. per ton. Table II summarizes the weight and value of the mineral constituents in

the tested gravel. The values indicated were from bedrock gravels; therefore, were not considered significant. Figure 4 shows the flowsheet diagram of equipment used to process the material.

Concentration of the remaining gravels from the lower part of Test Pit No. 1, Beaver Creek (fig. 3, Area D) and gravels from the two test pits on Bear Creek (fig. 3, Area C) were run by the operator during the period October 19, 1957-November 2, 1957. Table III shows the details of the concentration.

The Government arranged for delivery of phase 2 samples to the Denver Federal Center, Denver, Colorado, July 18, 1958, so that they could be completely processed and the results made known. Processing was performed under contract and the results were distributed in report form to the Washington Office OME and others concerned by copies of the Executive Officer's letter to the operator dated November 24, 1958.

Briefly the calculated values based on the analytical results contained in the report are estimated as follows:

Cubic yards concentrated	Wt. conc.	Value per cubic yard in dollars (1959 prices)				
		Nb_2O_5 Ta_2O_5	WO_3	Sn	Au	Total
16.356	20.412	$0.020	$0.019	$0.058	$1.053	$1.15

The values also represent pounds contained in a cubic yard of gravel.

The results of the concentration tests performed under contract are summarized by table III. The flowsheet employed is shown by figure 5. Summarization of the calculated metal values of the samples concentrated are shown in table IV.

Costs

Phase 2 costs to date accepted by the Government amount to $13,584.81 established by pre-audit analysis. The items, units and costs of work are summarized by table I. A net amount of $180.42 has been withheld from reimbursement to the operator pending receipt of the operator's final accounting and final engineering and geologic reports. Item 6 of the Termination Agreement stipulates that the

Government will contribute only to the allowable costs, of winding up and settlement actions, including preparation of the required final report, which are incurred not later than January 1, 1959. Any changes in units of work or costs will be provided at a later date by means of audit report.

ORE RESERVES

The operator's report on phase 1 as prepared by W. W. Johnson, the operator's consultant, was in error in the yardage calculation. The error was corrected by the DMEA field team in Rapid City and incorporated in a report "Proposal for Exploration under Phase II" by J. A. Redden, geologist, U. S. Geological Survey, R. S. Hill and D. H. Mullen, mining engineers, U. S. Bureau of Mines. Based on the analytical results of phase 1 (corrected) the estimated reserves of placer gravel on Bear and Potato Creeks, also the total pounds of Nb_2O_5-Ta_2O_5, and tin and gold value and the pounds and value per cubic yard are as follows:

	Cubic yards	Total gold value dollars	Total Nb_2O_5 Ta_2O_5 content pounds	Total Tin content pounds
Bear Creek	214,594	75,920.42	111,277	27,024
Potato Creek	85,804	28,566.53	18,425	5,651
Totals	300,398	104,486.95	129,702	33,675

	Au dollars	Pounds and dollars Nb_2O_5 Ta_2O_5	Pounds and dollars Sn	Total value dollars
Average pounds and value*/ cu. yd.	.348	.432	.112	.892

Total value of placer gravels -- $267,955.02

*Based on 1959 prices

The amount of tungsten (WO_3) in the gravel was considered to be too low to be economically recoverable and was not included in the reserve estimate. An average tungsten (WO_3) content of less than .01 lb. for the trenches was reported by the operator's consultant, W. W. Johnson.

The results of phase 2 work were unfavorable inasmuch as the quantity and value of the strategic minerals, columbite-tantalite, tungsten WO_3, and tin were too small and low in grade to be significant or of economic importance. The average value of these minerals from the Bear Creek holes and test pits was approximately 10 cents per cubic yard and for Beaver Creek about the same. Gold values averaged $1.27 per cubic yard and $2.08 per cubic yard for Bear and Beaver Creeks respectively. These averages include one $12.66 value from hole 2 on Bear Creek and two high values in holes 2 and 3 on Beaver Creek. The gold value of the samples collected from Beaver Creek test pits was $1.37 per cubic yard and $0.95 for Bear Creek.

CONCLUSIONS AND RECOMMENDATIONS

All closing procedures have not been resolved. But as an expedient, conclusions and recommendations are made at this time.

The results obtained in phase 1 work indicate a significant discovery of columbite-tantalite and tin in the placer gravels of Bear and Potato Creeks. The results of work completed under phase 2 did not add significantly to the discovery indicated by phase 1 work, and consequently did not warrant Government participation in additional drilling or test pitting provided for by the contract. By mutual agreement, the project was terminated effective November 1, 1957, by Termination Agreement dated August 15, 1958 without the completion of all work provided for by the contract.

It is concluded that the placers of Bear, Potato, and Beaver Creeks within the areas shown by figure 3 have been adequately explored and further Government participation in the exploration of this land is not recommended. Recommendation is made that a Certification of Discovery or Development be issued inasmuch as work performed under the terms of the DMEA contract resulted in a significant discovery of columbite-tantalite, and tin in the placer gravels of Bear, Potato and Beaver Creeks.

MAY 29 1959

Miss Peggy Keenan, President
Northwest Defense Minerals, Inc.
No. 1 D
1322 Second Avenue
New York 21, New York

Re: Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Northwest Defense Minerals, Inc. (Assignee)
Keenan Properties
Lawrence County, South Dakota
Contract No. Idm-E58

Dear Miss Keenan:

Enclosed is a "Certification by the United States of America of a Discovery or Development Under an Exploration Project Contract." This certification covers all the land described in Article 2 of the subject contract.

By the terms of the Exploration Project Contract, as amended, and of the certification, all minerals mined or produced from July 16, 1951, to July 16, 1966, are subject to the Government's percentage royalty as set forth in the contract until the amount contributed by the Government is repaid.

Payments should be made to the Executive Officer, GME Field Team, Region III, 224 New Customhouse Building, Denver 2, Colorado. Checks should be payable to the Office of Minerals Exploration, which is the successor to the Defense Minerals Exploration Administration. The purchaser should be advised to deduct the royalties from the amount due on each shipment and forward the check directly to the Executive Officer. Any bonus payments or allowances received by you from production are considered to be a part of the purchase price to which the Government's royalty applies. Royalty payments to the Government should be accompanied by suitable evidence, such as copies of settlement sheets, showing quantity and grade of the products sold, the name of the purchaser, and the price and charges, certified to be correct by the purchaser.

You are requested to notify the Executive Officer of any changes in ownership or production rights that might have any effect on the Government's right to its percentage royalty. Your attention is especially called to Article 15(d) in Annex I of the contract

43683

relating to the preservation of the Government's right to a percentage royalty on production. Also, when production starts, please notify the Executive Officer. Thereafter, if production ceases for an extended period, he should be informed accordingly at six-month intervals.

Sincerely yours,

Frank E. Johnson (for)

Acting Director

Contract No. Ida-E58

Dear Miss Keenan:

Enclosed is a copy of a certification of discovery or development, with copy of covering letter of even date to the Operator, which has been issued pursuant to the terms of the above-cited contract.

This correspondence relates to the subject contract dated July 16, 1951, the assignment of which to Northwest Defense Minerals, Inc., was approved by the Government on December 13, 1954, without releasing you from any of the terms, provisions, and conditions of the contract. The Government's prior lien on the land and upon any production therefrom will continue in existence for the length of time mentioned in the enclosed copy of the letter to the Operator. You are obligated during that period to commit no act and to assert no claim in conflict with the Government's rights under the agreement signed by you, and to give advance notice of the Government's rights to any transferee or lessee of any part of your interest in the land or the production therefrom. In the event the Operator fails to pay any royalty due to the Government from production during that period, the Government may look to you for payment thereof.

Sincerely yours,

Frank E. Johnson (for)

Acting Director

Dear Mr. Fillmore:

Enclosed is a copy of a certification of discovery or development, with copy of covering letter to the Operator, which has been issued pursuant to the terms of the above-cited contract.

This correspondence relates to the Landlord's Subordination Agreement dated June 16, 1951, the Owner's Consent to Lien dated October 16, 1952, and two Owner's Consents to Lien dated July 26, 1954, all signed by you. The Government's prior lien on the land and upon any production therefrom will continue in existence for the length of time mentioned in the enclosed copy of the letter to the Operator. You are obligated during that period to commit no act and to assert no claim in conflict with the Government's rights under the agreement signed by you, and to give advance notice of the Government's rights to any transferee or lessee of any part of your interest in the land or the production therefrom.

Sincerely yours,

Frank E. Johnson (for)

Dear Mr. Fredell:

I am enclosing one copy of a certification of discovery or development relating to the subject exploration contract.

The final report of the Field Team and final accounting of funds expended on this project have not been completed. When these reports are received, we will supply additional information relating to this project for your records.

Sincerely yours,

Frank E. Johnson (for)

From: Chairman, Operating Committee

Subject: Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Northwest Defense Minerals, Inc., Assignee
Keenan Properties
Lawrence County, South Dakota
Contract No. Idm-E58

We approve your recommendation of May 7 to withhold the unpaid balance of funds due the Operator for its estimated share of the cost to prepare a final engineering and geological report. However, in view of your letter to the Operator of May 7, the matter should be held in abeyance until after June 10 and then take action as stated in your letter.

May 18, 1959

Memorandum

To: Acting Director, Office of Minerals Exploration

From: Acting Associate Solicitor,
Division of Mineral Resources

Subject: Docket No. DMEA-654X, Contract Idm-E58, Northwest Defense Minerals, Inc. (Rawlins Mining District), Lawrence County, South Dakota

The following facts appear from the file informally submitted to us by Mr. Knouse:

1. The exploration contract has been terminated by agreement dated August 15, 1958, which provides:

(a) that the Government will contribute to no further costs other than to those incidental to winding-up "including the making and rendering of a comprehensive final geologic and engineering report".

(b) that the Government's rights with respect to certification and reports are preserved.

2. The Operator fails and neglects to render the final report.

3. By letter dated May 7, the Executive Officer, OME Field Team, notified the operator that if the final report has not been received by June 10, 1959 ". . . the estimated cost of the final engineering and geologic report will be charged against the amount being withheld from reimbursement to you, and any remaining balance will be paid upon final settlement of the account".

4. By memorandum dated May 7, 1959, the Executive Officer advised the Chairman, Operating Committee of the above action, and showing a balance of $180.42 unpaid and owing to the operator on account of project costs. This sum, as we understand it, the Field Team proposes to withhold if the report is not forthcoming, and charge the amount to the operator in a final winding-up and settlement action.

5. The contract contains no express provision authorizing the Government to withhold money for the default of the operator.

6. A certificate of discovery or development is to be issued.

7. The purpose of OME is to close this old DMEA matter and to leave the project certified.

It is our opinion that the Government (OME) has the right to wind up the contract and close the file in the manner contemplated. Of course the Government might invoke the applicable legal procedures, such as specific performance, to require the operator to render the report, or might submit the matter to the Comptroller General for consideration. It seems probable that these procedures are not practicable in this case.

In any event, in view of the letter to the operator of June 10, we suggest that the matter be held in abeyance until that date and then action taken as stated in the letter. If the operator makes no objection, perhaps such action will serve to wind up the matter.

Memorandum

To: Chairman, Operating Committee, OME

From: Executive Officer, OME Field Team, Region III

Subject: Docket No. DMEA 654X (Tin, Columbium-Tantalum, Tungsten) Contract Idm-E58, Northwest Defense Minerals, Inc., (Rawlins Mining District) Lawrence County, South Dakota

In reference to the matter discussed in your memorandum of May 4, 1959, enclosed are two copies of our letter of May 7, 1959, whereby we allow the subject Operator until not later than June 10, 1959, to submit its final report.

Pre-audit analysis by the Contract Administration and Audit Division, OME, indicates that it will be necessary to disallow an additional amount of $130.51 of the reported project costs. This will leave a balance of $180.42 withheld, representing $200.47 of project costs.

We believe that the entire amount of $200.47 should be disallowed in lieu of the Operator's final report. If you are in agreement, and will so inform this office, we will be able to immediately initiate closing procedures if the report is not received by June 10, 1959.

Contract 14s-[illegible]
Northwest Defense Minerals, Inc.
(Rawlins Mining District)
Lawrence County, South Dakota

Dear Miss Keenan:

Reference is made to our letter of March 20, 1959, and to our previous correspondence, relative to your furnishing to the Government a final engineering and geologic report and final accounting report, as required under Articles 14 and 17 of the captioned contract.

We wish to cooperate fully with you in allowing ample time for submission of the reports, but if they have not been received by June 10, 1959, we will then consider that you do not intend to submit them. In this event, the estimated cost of the final engineering and geologic report will be charged against the amount being withheld from reimbursement to you, and any remaining balance will be paid upon final settlement of the account.

Very truly yours,

Memorandum

To: Acting Chairman, Operating Committee, OME

From: Acting Executive Officer, OME Field Team, Region III

Subject: Docket No. DMEA 654X (Tin-Columbium-Tantalum-Tungsten), Northwest Defense Minerals, Inc., (Keenan Properties) Lawrence County, South Dakota, Contract Idm-E58

In reference to your memorandum of April 24, 1959, please be advised that the OME field examiners intend to recommend certification of the subject project as a discovery or development. Although the total value of the recoverable metals is low ($1.15±)per yard and the yardage small (300,000 ± cubic yards) the Field Team will concur with this recommendation.

The rough draft of the final report by the OME field examiners has been completed. It is estimated that the report can be reviewed, and final typing completed within three weeks, at which time it will be forwarded to you. Supplemental data will be forwarded when the account is closed.

Memorandum

To: Executive Officer, GMK Field Team, Region III

From: Chairman, Operating Committee

Subject: Docket No. DMEA-654X (Tin, Columbium-Tantalum, Tungsten)
Northwest Defense Minerals, Inc., Assignee
Keenen Properties
Lawrence County, South Dakota
Contract No. Idm-458

This is with reference to your memorandum of April 23, 1959, regarding your inability to obtain the Operator's final report for the subject project. We suggest that you write and advise the Operator that unless the final report is received within 30 days the estimated cost of the final report will be charged against the amount being withheld from payment and any remaining balance will be paid with the final settlement. The letter should be sent by registered mail with a return receipt requested. Since the project is on a 90 percent Government participation basis we assume the balance due the Operator of $292.53, as is indicated in your memorandum of November 3, 1958, will be ample to cover the Operator's share of the estimated cost for this report.

Please forward your final report of the subject project when it is completed. It should not be held up until the Operator's report is received. Any change in the report because of the late arrival of the Operator's report may be covered with a supplement, or in the Field Team's summary of the final report.

From: Executive Officer, OME Field Team, ~~Region III~~

Subject: Docket No. DMEA 654X (Tin, Columbium-Tantalum, Tungsten) Contract Idm-E58, Northwest Defense Minerals, Inc., (Rawlins Mining District) Lawrence County, South Dakota

Reference is made to our letters of November 24, 1958, January 26, 1959, and March 20, 1959, whereby we have attempted to obtain from the Operator a final engineering and geologic report and final accounting report as provided for under Articles 14 and 17 of the contract.

Only four copies of the final engineering and geologic report are required under Article 14 of the contract, however the Operator was advised by our letter of November 24, 1958, that five copies are now required by the Government.

We have exhausted all reasonable efforts to obtain the required reports, without success, therefore we are referring the matter to your office for such action as may be required to either obtain the reports, or to otherwise protect the Government's interests.

Dear Miss Keenan:

Reference is made to our letters of November 24, 1958, January 26, 1959, and February 12, 1959, regarding the rendering of your final accounting and final engineering and geologic reports.

Final settlement of the account cannot be accomplished until the results of a final audit are released to this office by the Contract Administration and Audit Division, OME. The final audit cannot be scheduled until your final accounting and final engineering and geologic reports are received.

Because of an imminent reduction in personnel for administration of DMEA contracts it is imperative that all closing procedures be resolved without further delay. Therefore, in order that we can make plans for scheduling the account for audit, please advise as to the date on or before which we can expect to receive the final accounting and final engineering and geologic reports.

We again direct your attention to item 6 of the Termination Agreement, which specifies that the Government will contribute only to the allowable costs of winding up and settlement actions incurred <u>not later than</u> January 1, 1959.

Very truly yours,

(Rawlins Mining District)
Lawrence County, South Dakota

Dear Miss Keenan:

Your letter of February 2, 1959, requesting information, has been received in this office.

By letter of December 28, 1955, we requested from you essentially the same information pertaining to Phase I work as you are now requesting from this office. As the information was not furnished to us as requested, we are obviously unable to comply with your request at this time.

The report entitled, "Report, Keenan Properties", which was prepared for you by the Walter W. Johnson Company in 1952, and of which we presume you have a copy, should contain the basic information required for the Phase I portion of your final report.

In regard to the Phase II work, we believe that the available data listed in your letter, together with such working papers as Mr. Atwater will have, should be sufficient for preparation of the Phase II portion of your final report.

Enclosed are one copy each of voucher and accounting Forms MF-104, and MF-104A, which were prepared for information purposes, and which include all allowable Phase II units and costs to date, subject to audit, including the costs of transportation, processing and analysis of samples which was performed under the direction of the Government as provided in items 2, 3 and 4, of the Termination Agreement, dated August 15, 1958.

The Government has made payment directly to the vendors for the entire cost of transportation, processing and analysis of samples. The Operator's portion of these costs will be deducted from the amount previously withheld from reimbursement to your company, when final settlement of the account is processed.

Your final accounting report must include all of the units and costs contained on the enclosed forms, as well as any allowable costs of winding up and settlement actions incurred not later than January 1, 1959, as provided for under item 6 of the Termination Agreement.

Very truly yours,

Denver, 2, Colorado.

Dear Mr. Townsend:

With reference to your letter of Jan 26, 1959, and to items 5 & 6 of the Termination Agreement dated Aug 15, 1958, I am still in New York with only the following DMEA documents available:

Termination agreement and correspondence.
Phase II Nov 5th 1955 - Progress report
Phase II Report 3
Phase II Report 4
Inventory of Churn Drill hole concentrates sent to Denver.

If your office can furnish copies of Phase I and any missing reports necessary for the final engineering and geological report, Mr. R. M. Atwater, I will make the report while he is in New York. I will make an Operator's report.

No accounting sheets are available here, all reports and accounting

[illegible] large boxes [illegible]
[illegible] [illegible] at our the [illegible] of the
[illegible] Cabin Headquarters.

We are endeavoring to use all possible speed to consummate finance for our production, so that I may leave for Dakota where I am long overdue. I am anxious as your time is in concluding all matters in Items 5 and 6. The delay is devastating.

Please advise what copies you can furnish for Mr Atwater, he was not project engineer on Phase I and has no copies of that exploration.

Yours very truly,
Northwest Uranium Minerals Inc.

Dear Miss Keenan:

Item 5 of the Termination Agreement, dated August 15, 1958, provides that the Operator shall promptly perform all winding-up actions, including the rendering of the final engineering and geologic report and final accounting report.

We wish to direct your attention to Item 6 of the Termination agreement, which provides that the Government will contribute only to the allowable costs of winding-up actions which are incurred not later than January 1, 1959.

It is imperative that the account be closed at the earliest possible date, therefore your immediate attention in rendering five copies of a final engineering and geologic report and final accounting report is requested.

Please reply to this office by return mail giving a firm commitment as to the date on or before which we can expect to receive your final engineering and geologic report and final accounting report.

Very truly yours,

JAN 19 1959

Hon. Francis Case
United States Senate
Senate Office Building
Washington 25, D. C.

Dear Senator Case:

This will reply to your letter of January 13, 1959, addressed to Mr. C. O. Mittendorf, who is no longer with this office.

The "DMEA loan" referred to by Mr. Brickel is covered by an exploration contract, dated July 16, 1951, between the Government and Northwest Defense Minerals, Inc., Assignee. The total cost of the project was originally estimated as $100,000.00, of which the Government's participation at 90 percent would be $90,000.00. However, the amount actually contributed by the Government will be dependent upon actual costs insurred and allowable under the contract, and can vary considerably from the original estimate.

The project encountered many delays and was only recently terminated. Winding-up and settlement actions, including a final report by the operator, have yet to be completed.

We consider that we are not at liberty to disclose to the public the contents of a contract, including maps, property description, liens on the property, geological information, expenditures, etc., without written authorization from the operator. The release of this type of information by the Government would not only violate the confidence of the operator and the long-standing rules of the Bureau of Mines and Geological Survey relating to the disclosure of information on private mineral properties, but could be used to the disadvantage of the operator and the public by competitors, stock brokers, or others. Therefore, it is respectfully suggested that Mr. Brickel direct his inquiries to Miss Peggy Keenan, President, Northwest Defense Minerals, Inc., No. 1D, 1322 Second Avenue, New York, New York.

If the desired information is not readily available to the operator, and the latter has no objection to its disclosure, we shall be pleased to supply it upon receipt of written authorization from the operator.

PRS 6666

43683

Please let us know if we can be of further assistance in this matter.

Sincerely yours,

Frank E. Johnson (for)

Hon. Francis Case
United States Senate
Senate Office Building
Washington 25, D. C.

Dear Senator Case:

This will reply to your letter of January 13, 1959, addressed to Mr. C. O. Mittendorf, who is no longer with this office.

The "DMEA loan" referred to by Mr. Brickel is covered by an exploration contract between the Government and Northwest Defense Minerals, Inc., Assignee. We consider that we are not at liberty to disclose to the public the contents of a contract, including maps, property description, liens on the property, geological information, expenditures, etc., without written authorization from the operator. The release of this type of information by the Government would not only violate the confidence of the operator and the long-standing rules of the Bureau of Mines and Geological Survey relating to the disclosure of information on private mineral properties, but could be used to the disadvantage of the operator and the public by competitors, stock brokers, or others. Therefore, it is respectfully suggested that Mr. Brickel direct his inquiries to Miss Peggy Keenan, President, Northwest Defense Minerals, Inc., No. 1D, 1322 Second Avenue, New York, New York.

If the desired information is not readily available to the operator, and the latter has no objection to its disclosure, we shall be pleased to supply it upon receipt of written authorization from the operator.

Please let us know if we can be of further assistance in this matter.

Sincerely yours,

Acting Director

Dear Mr. Mittendorf:

A communication has been received from Mr. Howard M. Brickel, Box 1748, Rapid City, South Dakota, which reads in part as follows:

> "Sometime ago, we entered into a contract with a group, to do some placer mining. Later we learned there is a DMEA loan on all or parts of this ground, that to date is unpaid, and we would like to know some more facts on the status of the loan, and on the property it involves.
>
> "Could you help us obtain the descriptions of the properties, and the name of the people who must have signed a 'consent to lien,' any map, or maps of the property, and the present status of the DMEA loan. When it was made, the expenditures, etc., The loan was obtained under the following name:
>
> Keenan Placers,
> Northwest Defense Minerals, Inc.
>
> "The property is situated in the Tinton Mining District, Lawrence County, South Dakot, and a part in Crook County, Wyoming. Any expense connected with obtaining this information will be taken care of by us."

Any information that might be had with respect to the above will be sincerely appreciated.

With kind regards,

Sincerely yours,

Francis Case

Dear Miss Keenan:

In compliance with instructions in your letter of November [illegible], 1958, we are today forwarding two packages of concentrate splits to Mr. W. O. Fillmore, Spearfish, S. Dak.

Also in accordance to your instructions, enclosed is a copy of the report by the Denver Equipment Company pertaining to the processing of the drill hole samples.

We are desirous of closing this account at an early date, therefore; we will appreciate your prompt attention to the matter of rendering a final accounting and a final engineering and geologic report as provided for under article 14 of Contract Idm-358. Five copies of the final report shall be furnished to the government instead of the four copies mentioned under article 14.

Before the final audit of contract expenditures can be scheduled, it is necessary that your final report and final accounting be received by this office, and in turn, before final payment can be made to you, the final audit report by the Contract Administration And Audit Division must be released to this office.

Very truly yours,

J. W. Townsend

Attention: J. W. Townsend
Reference: Your order DER-59-61
Requisition DERA-3-50
Our order KW-51246

Gentlemen:

We are hereby submitting the following report of the concentration tests which were conducted on 36 churn drill samples and assays on 3 concentrate samples. The work to be done is detailed under your above order and requisition.

Sample Identification

We received on September 3, 1958 via Bekins Van and Transfer, 56 drums of sample with a gross weight of 9096 pounds. The samples were from the U. S. Bureau of Mines, Federal Center, Denver, Colorado. Sample receiving number 2002 was assigned this lot of samples for our identification purposes.

We received on September 8, 1958 via personel delivery by Mr. E. O. Binyon, 3 sacks of concentrates with gross weight of 3280 grams. Sample receiving number 2010 was assigned this lot of samples.

The shipment of drums consisted of 32 containers marked "Beaver Creek" and 25 marked "Bear Creek".

Object of Tests

The purpose of the testwork was to concentrate the 36 samples by gravity concentration procedures for the recovery of the heavy mineral fractions. The final concentrates produced in the tests and the three concentrate samples were to be thoroughly mixed, split and one half split again to provide the following samples.

1. 1/2 for the U. S. Government

ALL RECOMMENDATIONS AND OPINIONS EXPRESSED IN THIS REPORT ARE BASED ON METALLURGICAL RESULTS OBTAINED IN THE ORE TESTING LABORATORY OF THE DENVER EQUIPMENT COMPANY, AND APPLY ONLY TO THE TREATMENT OF MATERIAL CONFORMING TO THE SAMPLE SUBMITTED BY THE SUBJECT COMPANY

2. 1/4 for the operator
3. 1/4 for the assayer

The government samples were to be labeled with the words, "Government," "Area," "Hole Number," or "Pit Number," and "Sample Interval".

The operator's portion of the concentrates were to be labeled with the words "Operator," "Area," "Hole Number," or "Pit Number," and "Sample Interval".

All of the concentrate samples were to be analyzed for content of tin, columbium-tantalum, tungsten, and gold.

Sample Preparation

The preparation of the sample for testing consisted of recording the gross weight of each can or drum of sample, the depth of sample in the container, the container diameter and obtaining a small moisture sample by pipe sampling procedures. The container weight was recorded as soon as it was emptied during the tests. From the recorded data the net dry and wet weights, and sample volume could be calculated.

Sample Description

The samples to be concentrated are from 18 churn drill holes, drilled through placer deposits in the Beaver Creek and Bear Creek areas.

The material from the Beaver Creek area with intervals of 0-6 feet and 6-12 feet will be combined into a composite for concentration purposes. The material from 12 feet to the bottom of the hole will be concentrated as a separate sample. In the Bear Creek area sample material for separate concentration will be from 0-6 feet and 6-12 feet.

Flowsheet and Testing Procedure

The following is a brief resume of the procedure and equipment used in the testwork.

Preliminary Treatment

The preliminary treatment consisted of dumping a drum or can of sample into a suitable container and examining the material

for coarse rocks. If rock coarser than 1/2 inch was noted a preliminary screening was made for the removal of the oversize fraction. The drums or cans which contained the sample were washed clean of any sample and then weighed. The coarse rock if present was washed thoroughly before being discarded.

Pulping and Screening

A charge of approximately 150 pounds plus sufficient water to give a pulp density of 50 percent solids was charged into a 18" x 24" Denver Conditioner and agitated for 10-15 minutes. The pulp was then discharged over a 1' x 3' Denver Dillion Vibrating screen provided with a 14 mesh screen. The oversize was retained for concentration by jigging. The screen undersize was pumped by a 3/4" Denver Vertical Sand Pump to a second 18" x 24" conditioner which served as a surge tank to obtain a uniform feed for the table. The pulp from the second 18" x 24" conditioner was metered to a 3/4" Denver Vertical Sand Pump which discharged to a No. 13-B Denver Wilfley gravity concentrating table.

Gravity Concentration

The minus 14 mesh material was concentrated by a Denver Wilfley No. 13-B gravity concentrating table to yield a concentrate, middling and a tailing. The table middling plus the minus 14 mesh product from cleaning out the equipment was retabled to produce a concentrate and a tailing. This procedure insured that the maximum recovery of the heavy minerals would be obtained.

The plus 14 mesh material from each sample was concentrated by a 4" x 6" Denver Mineral Jig to yield a concentrate and a tailing.

Equipment Clean-Up

After a sample had been treated all of the machinery was thoroughly cleaned out to insure that no salting of samples would take place. The following are the precautions taken during the clean-up.

1. The conditioners were hinged at the base so that the units could be tipped for cleaning purposes.

2. The screen wire was removed from the vibrating screen and the entire unit washed down with high pressure water.

3. The 3/4 inch vertical sand pump was operated in a shallow pan to catch any spills which might occur at the pump. After each test the pump bowl was removed and thoroughly cleaned out.

4. The entire washings from the clean-up were screened at 14 mesh. The minus 14 mesh fraction was added to the table middling for retreatment. The plus 14 mesh fraction was added to the screen oversize fraction for concentration by the Denver Mineral Jig.

Concentrate Treatment

The total concentrates from each sample were weighed after drying, then reduced to 65-100 mesh by means of crushing rolls and a Denver Davis pulverizer. Fresh sand was run thru the pulverizer between samples for maximum cleaning of the equipment. The pulverized samples were mixed thoroughly by rolling and the sample cut to provide the required splits for the government, operator and assayer. The concentrates were placed in paper sacks or sample envelopes and labeled as directed.

Test Results

The results of the tests on the Beaver Creek and Bear Creek samples are given in tabulated form on pages D-1 and D-2. The tabulation shows the area, hole or pit number, sample interval, net weight of sample wet and dry before testing, sample volume, concentrate weight and assays.

The assays on the Bear Creek concentrate samples showed very small amounts of gold, tin, tungsten, columbium-and tantalum.

The Beaver Creek concentrates in some cases showed a higher gold content than the Bear Creek samples, but in general the concentrates were all fairly low-grade.

The samples of concentrates returned to the U. S. Government and Operator had the following weights. Each of the area samples were in separate boxes.

	Weight in Pounds	
	Govt.	Operator
Beaver Creek Area	33.0	16.6
Bear Creek Area	22.8	11.5

Contract I[illegible]-[illegible]58
Northwest Defense Minerals, Inc.
Rawlins Mining District
Lawrence County, South Dakota

Dear Miss Keenan:

The project churn drill samples have been processed and analyzed, and the three remaining test pit concentrates have been analyzed by the Denver Equipment Company, at a net cost of $5298.48.

The Operator's pro rata share of this cost is reimbursable to the Government, by Northwest Defense Minerals, Inc., and will be deducted from money withheld from Northwest Defense Minerals, Inc., when final settlement is made, provided sufficient funds remain in suspense to cover the Operator's portion of the cost.

Very truly yours,

Re: Docket No. DMEA 654X
(Tin-Columbium-Tantalum, Tungsten)
Contract No. Idm-858
Northwest Defense Minerals, Inc.
(Rawlins Mining District)
Lawrence County, South Dakota

Dear Miss Keenan:

The processing of the churn drill hole sample material has been completed by the Denver Equipment Company, and a report of the processing procedures giving results of analyses of the concentrates has been submitted.

So that we can forward you a one quarter split of the concentrates, and a copy of the report, please advise by return mail to whom and where they should be sent.

In conjunction with scheduling a final audit of contract expenditures, please advise the location of the accounting records maintained in conjunction with the previous work.

The audit of contract expenditures cannot be scheduled for performance until your final Engineering and Geologic Report, and final accounting have been received, and in turn, final payment to you cannot be made until the Report of Audit has been released to this office; therefore, prompt attention should be given the forwarding of your final Accounting Report, and the final Engineering and Geologic Report provided for under item 5 of the Termination Agreement, and under Article 14 of the contract form. Five copies of the final Engineering and Geologic Report are now required instead of the four copies stipulated under Article 14.

The Operator's portion of the costs of processing of the sample material and anlayses of concentrates, including incidental transportation costs, will be deducted from funds withheld from reimbursement to you in processing previous accounting reports to the extent that such funds withheld cover the costs involved.

In addition to advice as to the forwarding of the concentrate splits, and report of processing, and advice as to the location of your accounting records, please also advise the date on or before which you contemplate that the final accounting, and final Engineering and Geologic Report will be forwarded.

Very truly yours,

AIR MAIL

Memorandum

TO: Chairman, Operating Committee, OME

From: Executive Officer, OME Field Team, Region III

Subject: Docket No. DMEA 654X (Tin Columbium Tantalum, Tungsten) Contract Idm-E58, Northwest Defense Minerals, Inc. (Rawlins Mining District), Lawrence County, South Dakota

The Denver Equipment Company has completed the processing of the drill hole and test pit material from the subject project, and has rendered a report thereof as specified in their accepted bid.

The Operator cannot render its final report until the results of the processing and analyses of concentrates are made known to it; however, before forwarding a split of the concentrates, and a copy of the Denver Equipment Company Report to the Operator, clearance from your office is requested.

The status of funds withheld from reimbursement to the Operator is as follows:

Total amount withheld from reimbursement to the Operator todate. .$ 885.70

Processing Expenses Incurred

Cost of transporting samples from project site to Denver	$ 537.24	
Cost of transporting samples to Denver Equipment Company	42.50	
Cost of processing and analysis of samples	5352.00	
TOTAL	$5931.74	
Portion chargeable to Operator at 10 per cent		593.17
Excess withheld above incurred expenses.		$292.53

The $292.53 balance withheld, constitutes the only leverage we hold against the Operator to assure it rendering the required final report; however, if the Operator renders a final report, there will

undoubtedly be an additional charge to the project for costs incurred in preparing the report as provided for in the contract which will increase the amount of the final payment to the Operator.

When you have reviewed the matter, please teletype clearance for us to forward a split of the concentrates and a copy of the report to the Operator.

Mr Klm - ES's

Dear Sir:

With reference to letter from Mrs. C.C. Mittinday, Administrator GMSA Washington, D.C. dated May 13, 1958,

Mrs Mittinday advised that a transportation company handling the matter of moving the churn drill samples from Northwest Defense Minerals Inc had been delayed because of road conditions. Please be advised that reports from the area indicate road conditions favorable to this type transportation.

Could we therefore proceed as soon as possible and arrange reimbursement for 1957 expenditures.

The above address is our headquarters until further notice.

Yours very truly,
Northwest Defense Minerals Inc

Re: Docket No. DMEA 654X (Tin, Columbium-Tantalum, Tungsten)
Contract Ida-858
Northwest Defense Minerals, Inc.
(Rawlins Mining District)
Lawrence County, South Dakota

Dear Miss Keenan:

Form MF-104, Operator's Monthly Report and Voucher, for the period from October 4, through November 3, 1957, is being processed. No reimbursement is made at this time for the following reasons:

Disallowance, Labor

The labor reported for the period was expended in processing material from the project test pits. All acceptable test pit work to date has been reported previously at the maximum allowable cost of $25.00 per foot, which includes all allowable costs for processing the test pit material. Therefore, the reported cost for labor is disallowed.

Amount Withheld

Reimbursement to Northwest Defense Minerals, Inc., for the Government's share of the acceptable costs for the period is withheld pending resolution of the following matters:

1. Execution by the parties to the contract of a suitable agreement to extend the contract completion date to cover the work performed during the period, and to terminate the contract, without requiring performance of the balance of work provided for.

2. Transporting, processing and analyzing the churn drill samples and analyzing the balance of the test pit samples. This work is to be performed under the direction of the Government, and the Government reimbursed by Northwest Defense Minerals Inc., for the Operator's pro rata share of the cost of the work.

3. Rendering to the Government by Northwest Defense Minerals, Inc., of a final stockpiling and final engineering and geologic report as required under Article 14 of the contract form.

4. Release to this office of an Audit Certificate and Audit Report, or Report of Review of the reported project costs by the Contract Administration and Audit Division, DMEA.

The churn drill samples have been transported from the project site to the Defense Minerals Exploration Administration, Denver Federal Center, Denver, Colorado, by Buckingham Transportation, Inc., at a cost of $537.24.

The Operator's pro rata share of this cost, as well as other costs indicated under item 2, above, is reimbursable to the Government by Northwest Defense Minerals, Inc., and will be deducted from moneys withheld from reimbursement to Northwest Defense Minerals, Inc., when final settlement is made, provided sufficient funds remain in suspense to cover the Operator's portion of the costs.

Re: Docket DMEA 654, No. ~~Jan-E58~~

Mr. J. W. Townsend, Alternate Acting Executive Officer
D.M.E.A. Field Team, Region III, Department of Interior
224 New Customhouse,
Denver, Colorado

Dear Mr. Townsend:

Your letters of Aug. 4, 6, and 7 received, together with inventory of churn drill hole samples. With reference to AUg. 4 and the Termination Agreement:

1. Since my letter of July 24, it is indicated by our attorneys here that I may be detained here into October. This would influence the extension of the Termination Agreement date.

2. In Item 1 of your Aug. 4 letter, the fourth paragraph of your Aug. 6 letter indicates your analysis of your half of the test pit samples (Beaver) will be analyzed, the cost of 10% to be born by the operator. Since you are holding $100. in 1956 and $700. or $800. in 1957-58, any cost is covered and we agree. This eliminates Item 1 of the Aug. 4 letter?

3. Referring to item 2, Aug. 4, it is agreed.

4. Referring to items 3 and 4, documents relating to the project prior to March 1958, and records for audit are either in Rapid City or Spearfish, S. Dak. and I am the only person having access to them. We are doing our best to arrange for my return by October.

Referring to your letter of Aug. 6, the holes in the Bear Creek Area were drilled several feet into bedrock?? because in the particular area chosen by Mr. Atwater and Mr. Binyon, there is a decomposed bedrock? (which may be a false bedrock). After several examinations and much geological conjecture it appeared to be a landslide in an early period. Thus the drillers went too far. It is a good idea to process samples to 12 feet only. In studying your suggestions and the problem, remember that the Caisson test pit was only 7 feet deep. This slide rock was in the bottom of the pit and indicates deeper areas may turn out to be worthless rock.

The only way to check actual bedrock conditions in this peculiar work area would be to open the gravel by a caterpillar cut to actual bedrock as in the 1951 testing. Could you hold the remaining portion from the drill hole samples until we know some of the answers from beneficiation of the material and analysis? We can tell better then whether it would be worth transportation charges to return material to the property.

Referring to your letter of Aug. 7, we have no idea what happened to the "missing" cantainers. Perhaps the snows came and the truck did not return because of conditions. It was 20° below zero.

Please accept my sincere thanks for your patience and consideration.

Yours very truly,
NORTHWEST DEFENSE MINERALS, INC.

Enclosed are three copies of Invitation to Bid which has been circulated in an effort to obtain bids on the processing of the material from the churn drill holes and analysis of concentrates from test pits under the subject contract.

There is an error in the Invitation to Bid in the top of Page 2 of the "Specifications". The pit in the Bear Creek Area to the depth of 0-7 feet should be listed as pit No. 2. The error will be corrected by circulating a rider to the Invitation to Bid.

INVITATION FOR BIDS

DATE ISSUED: August 15, 1958 | INVITATION NO. DER-59-5

Sealed bids in quintuplicate, subject to (1) the Terms and Conditions of the Invitation for Bids, (2) the accompanying Schedule, (3) General Provisions (Standard Form 32, October 1957 edition), which are incorporated herein by reference, and (4) such other contract provisions and specifications as are attached or incorporated by reference in the Schedule, will be received at the above office until 2:00 o'clock p.m., MST Time, August 27, 1958 (*date*) and at that time publicly opened, for furnishing the supplies or services described in the accompanying Schedule, for delivery f. o. b. DMEA, Executive Officer, 224 New Customhouse, Denver 2, Colorado

General information and instructions to bidders are contained in the terms and conditions on the reverse hereof.

SCHEDULE

ITEM NO.	SUPPLIES OR SERVICES	QUANTITY (*No. of units*)	UNIT	UNIT PRICE	AMOUNT
1	Concentration of 36 samples				
2	Analysis of 36 concentrate samples				
3	Analysis of 3 concentrate samples				
	For details see "Continuation Sheet" and "Specifications" attached. Attached special terms and conditions of the invitation for bids are hereby made part of the contract.				

BID

DATE OF BID

In compliance with the above, the undersigned offers and agrees, if this Bid be accepted within _____ calendar days (*60 calendar days unless a different period be inserted by the bidder*) from the date of opening, to furnish any or all of the items upon which prices are quoted, at the price set opposite each item, delivered at the designated point(s) within the time specified in the Schedule. Discounts will be allowed for prompt payment as follows:

_____ percent, 10 calendar days; _____ percent, 20 calendar days; _____ percent, 30 calendar days.

BIDDER REPRESENTS: (*Check appropriate boxes*)

(1) That he ☐ is, ☐ is not, a small business concern. (*See definition on reverse hereof.*) If bidder is a small business concern and is not the manufacturer of the supplies bid upon, he also represents that all supplies to be furnished hereunder ☐ will, ☐ will not, be manufactured or produced by a small business concern in the United States, its Territories, its possessions, or the Commonwealth of Puerto Rico.

(2) That he is a ☐ regular dealer in, ☐ manufacturer of, the supplies bid upon.

(3) (*a*) That he ☐ has, ☐ has not, employed or retained any company or person (other than a full-time bona fide employee working solely for the bidder) to solicit or secure this contract, and (b) that he ☐ has, ☐ has not, paid or agreed to pay any company or person (other than a full-time bona fide employee working solely for the bidder) any fee, commission, percentage or brokerage fee, contingent upon or resulting from the award of this contract; and agrees to furnish information relating to (*a*) and (*b*) above as requested by the Contracting Officer.
(*For interpretation of the representation, including the term "bona fide employee," see Code of Federal Regulations, Title 44, Part 150.*)

(4) He operates as an ☐ individual, ☐ partnership, ☐ corporation, incorporated in the State of _____

TERMS AND CONDITIONS OF THE INVITATION FOR BIDS

1. PREPARATION OF BIDS.—(*a*) Bidders are expected to examine the drawings, specifications, Schedule, and all instructions. Failure to do so will be at the bidder's risk.

(*b*) Each bidder shall furnish the information required by the bid form. The bidder shall print or type his name on the Schedule and each Continuation Sheet thereof on which he makes an entry. Erasures or other changes must be initialed by the person signing the bid. Bids signed by an agent must be accompanied by evidence of his authority.

(*c*) Unit price for each unit bid on shall be shown and such price shall include packing unless otherwise specified. A total shall be entered in the Amount column of the Schedule for each item bid on. In case of error in extension of price, the unit price will govern.

(*d*) Alternate bids will not be considered unless authorized by the Invitation.

(*e*) When not otherwise specified, bidder must definitely state time of proposed delivery.

(*f*) Time, if stated as a number of days, will include Sundays and holidays.

2. SUBMISSION OF BIDS.—(*a*) Bids and modifications thereof shall be enclosed in sealed envelopes addressed to the issuing office, with the name and address of the bidder, the date and hour of opening, and the invitation number on the face of the envelope. Telegraphic bids will not be considered unless authorized by the Invitation; however, bids may be modified by telegraphic notice provided such notice is received prior to the time set for the opening of the bids.

(*b*) Samples of items, when required, must be submitted within the time specified, and unless otherwise specified by the Government, at no expense to the Government. If not destroyed by testing, samples will be returned at bidder's request and expense, unless otherwise specified by the Invitation.

(*c*) In the event no bid is to be submitted, do not return the Invitation unless otherwise specified. However, a letter or post card should be sent to the issuing office advising whether future Invitations for the type of supplies or services covered by this Invitation are desired.

3. WITHDRAWAL OF BIDS.—Bids may be withdrawn by written or telegraphic notice (see 4 below).

4. LATE BIDS.—Bids and modifications or withdrawals thereof received after the time set for opening will not be considered, unless they are received before the award is made, and it is determined by the Government that failure to arrive on time was due solely to delay in the mails for which the bidder was not responsible.

5. GOVERNMENT-FURNISHED PROPERTY.—No material, labor, or facilities will be furnished by the Government unless otherwise provided for in the Invitation.

6. LABOR INFORMATION.—Attention is invited to the possibility that wage determinations may have been made under the Walsh-Healey Public Contracts Act providing minimum wages for employees engaged in the manufacture for sale to the Government of the supplies covered by this Invitation for Bids. Information in this connection, as well as general information as to the requirements of the Act concerning overtime payment, child labor, safety and health provisions, etc., may be obtained from the Wage and Hour and Public Contracts Divisions, Department of Labor, Washington 25, D. C. Requests for information should state the Invitation number, the issuing agency and the supplies covered.

7. DISCOUNTS.—(*a*) Prompt-payment discounts will be included in the evaluation of bids, provided the period of the offered discount is sufficient to permit payment within such period in the regular course of business under the delivery, inspection, and payment provisions of the Invitation and Bid.

(*b*) In connection with any discount offered, time will be computed from date of delivery of the supplies to carrier when delivery and acceptance are at point of origin, or from date of delivery at destination or port of embarkation when delivery and acceptance are at either of those points, or from date correct invoice or voucher is received in the office specified by the Government if the latter date is later than the date of delivery. Payment is deemed to be made, for the purpose of earning the discount, on the date of mailing of the Government check.

8. AWARD OF CONTRACT.—(*a*) The contract will be awarded to that responsible bidder whose bid, conforming to the Invitation for Bids, will be most advantageous to the Government, price and other factors considered.

(*b*) The Government reserves the right to reject any or all bids and to waive informalities and minor irregularities in bids received.

(*c*) The Government may accept any item or group of items of any bid, unless the bidder qualifies his bid by specific limitations. UNLESS OTHERWISE PROVIDED IN THE SCHEDULE, BIDS MAY BE SUBMITTED FOR ANY QUANTITIES LESS THAN THOSE SPECIFIED; AND THE GOVERNMENT RESERVES THE RIGHT TO MAKE AN AWARD ON ANY ITEM FOR A QUANTITY LESS THAN THE QUANTITY BID UPON AT THE UNIT PRICES OFFERED UNLESS THE BIDDER SPECIFIES OTHERWISE IN HIS BID.

(*d*) A written award mailed (or otherwise furnished) to the successful bidder within the time for acceptance specified in the bid shall be deemed to result in a binding contract without further action by either party.

9. SELLER'S INVOICES.—Invoices shall be prepared and submitted in quadruplicate unless otherwise specified. Invoices shall contain the following information: Contract and order number (if any), item numbers, description of supplies or services, sizes, quantities, unit prices, and extended totals. Bill of lading number and weight of shipment will be shown for shipments made on Government bills of lading.

10. DEFINITION OF SMALL BUSINESS.—Generally, a small business concern for the purpose of Government procurement is a concern that (1) is not dominant in its field of operation and, with its affiliates, employs fewer than 500 employees, or (2) is certified as a small business concern by Small Business Administration. (*See Code of Federal Regulations, Title 13, Part 103, as amended, which contains the detailed definition and related procedures.*)

* U. S. GOVERNMENT PRINTING OFFICE : 1957 O—448020

CONTINUATION SHEET

Bids will be considered under the following schedule. NO BID will be considered for only part of the schedule.

Item No.	Supplies or Services	Unit	Unit Price
1	Concentration of 36 samples of churn drill hole material	Job	_____
2	(a) Analyze 1/4 split of concentrate from each of above 36 samples for content of tin, columbium-tantalum, tungsten, and gold. (b) Prepare report of the processing, including results of the analyses	Job	_____
3	(a) Analyze 3 samples of previously concentrated material from test pits for content of tin, columbium-tantalum, tungsten, and gold. (b) Prepare report giving results of the analyses	Job	_____
		TOTAL	_____

Specifications pertaining to the foregoing items 1, 2, and 3 are attached hereto and made a part of this Invitation to Bid.

COPY
DMEA
RECEIVED
DATE

SPECIFICATIONS

Item 1. - The sample material to be concentrated is from 18 churn drill holes, drilled through placer deposits in the Beaver Creek and Bear Creek Areas. The material, aggregating approximately 2-1/2 cubic yards, is in metal containers and each container is labeled with the Area, drill hole number, and sample interval. Many of the metal containers are not full and some contain considerable water. It will be necessary that the net volume of each sample be determined in advance of processing, as assay results are to be computed on the basis of cubic yard of material. See Exhibit "A", Schedule of Churn Drill Hole Samples, attached hereto, for listing of samples to be concentrated; and see Exhibit "B", Flow Sheet for Concentrating Churn Drill Hole Sample Material, attached hereto, for method of concentrating the samples.

Referring to Exhibit "A", Beaver Creek Area, the material from sample intervals 0-6 feet and 6-12 feet will be combined into a composite sample for concentration purpose. The material from the sample interval from 12 feet to bottom of hole will be concentrated as a separate sample. In the Bear Creek Area, sample material for separate concentration will be for the intervals of 0-6 feet and 6-12 feet.

Item 2. - The concentrates from each of the 36 samples, concentrated under Item 1, will be split into two equal portions; one portion of which is to be placed in a suitable container and reserved for subsequent use by the Government, each container to be properly labeled with the words, "Government," and the "Area," "Hole Number," and "Sample Interval" given. The other half of each concentrate split will be resplit two ways; one half will be placed in a suitable covered container labeled with the words, "Operator," and the "Area," "Hole Number," and "Sample Interval" given. The remaining one-fourth of the concentrates is to be used for analysis to obtain content of tin, columbium-tantalum, tungsten, and gold.

The report of the concentration and analyses must be submitted in triplicate and shall contain, in tabular form, the following information for each sample: Area, hole number, sample interval, volume of sample before concentration, and assay value of contained tin, columbium-tantalum, tungsten, and gold.

Item 3. - The samples of concentrates to be analyzed are a one-half split of that derived from the beneficiation of placer gravel obtained from test pits. The samples are in canvas bags and are

labeled as follows, with applicable yardage of the original sample from which the concentrates were derived:

Area	Pit Number	Sample Interval	Cubic Yards
Beaver Creek	1	0 - 16-1/4 Ft.	12.975
Bear Creek	1	0 - 6-1/4 Ft.	3.390
Bear Creek	1	0 - 7 Ft.	4.309.

The report of the results of analyses must be submitted in triplicate and shall contain in tabular form the following information for each sample: Area, pit number, and assay value of contained tin, columbium-tantalum, tungsten, and gold.

General -

1. The project as heretofore outlined shall be identified as Docket No. DMEA 654, Contract No. Idm-E58. The report of analysis results shall be addressed to the Executive Officer, DMEA Field Team, Region III, Defense Minerals Exploration Administration, 224 New Customhouse, Denver 2, Colorado.

2. The work outlined under items 1, 2, and 3 above shall be completed so that the required report, in triplicate, will be forwarded, together with the "Government's" and "Operator's" splits of concentrates, so as to reach the above destination within ninety (90) calendar days from the date the confirming purchase order and the sample material were received by the successful bidder.

3. The material under items 1 and 3 is available for prebid inspection at the Denver Federal Center, and inspection can be arranged through John F. Shaw, Bureau of Mines, Building 20, Denver Federal Center, during the hours of 8:30 a.m. to 4:00 p.m. Monday through Friday.

4.* Bidder will designate location of its laboratory to which the material will be delivered by the Government. Costs of transporting the material from the Denver Federal Center to the bidder's laboratory will be considered in making the award.

*The material will be delivered to the successful bidder as soon as possible after award has been made.

Standard Form 32, Oct. 1957 Edition
Prescribed by General Services
Administration Regulation I-II-209.00

GENERAL PROVISIONS

(Supply Contract)

1. DEFINITIONS

As used throughout this contract, the following terms shall have the meanings set forth below:

(*a*) The term "Secretary" means the Secretary, the Under Secretary, or any Assistant Secretary of the Department, and the head or any assistant head of the Federal agency; and the term "his duly authorized representative" means any person or persons or board (other than the Contracting Officer) authorized to act for the Secretary.

(*b*) The term "Contracting Officer" means the person executing this contract on behalf of the Government, and any other officer or civilian employee who is a properly designated Contracting Officer; and the term includes, except as otherwise provided in this contract, the authorized representative of a Contracting Officer acting within the limits of his authority.

(*c*) Except as otherwise provided in this contract, the term "subcontracts" includes purchase orders under this contract.

2. CHANGES

The Contracting Officer may at any time, by a written order, and without notice to the sureties, make changes, within the general scope of this contract, in any one or more of the following: (i) Drawings, designs, or specifications, where the supplies to be furnished are to be specially manufactured for the Government in accordance therewith; (ii) method of shipment or packing; and (iii) place of delivery. If any such change causes an increase or decrease in the cost of, or the time required for, the performance of any part of the work under this contract, whether changed or not changed by any such order, an equitable adjustment shall be made in the contract price or delivery schedule, or both, and the contract shall be modified in writing accordingly. Any claim by the Contractor for adjustment under this clause must be asserted within 30 days from the date of receipt by the Contractor of the notification of change: *Provided, however,* That the Contracting Officer, if he decides that the facts justify such action, may receive and act upon any such claim asserted at any time prior to final payment under this contract. Where the cost of property made obsolete or excess as a result of a change is included in the Contractor's claim for adjustment, the Contracting Officer shall have the right to prescribe the manner of disposition of such property. Failure to agree to any adjustment shall be a dispute concerning a question of fact within the meaning of the clause of this contract entitled "Disputes." However, nothing in this clause shall excuse the Contractor from proceeding with the contract as changed.

3. EXTRAS

Except as otherwise provided in this contract, no payment for extras shall be made unless such extras and the price therefor have been authorized in writing by the Contracting Officer.

4. VARIATION IN QUANTITY

No variation in the quantity of any item called for by this contract will be accepted unless such variation has been caused by conditions of loading, shipping, or packing, or allowances in manufacturing processes, and then only to the extent, if any, specified elsewhere in this contract.

5. INSPECTION

(*a*) All supplies (which term throughout this clause includes without limitation raw materials, components, intermediate assemblies, and end products) shall be subject to inspection and test by the Government, to the extent practicable at all times and places including the period of manufacture, and in any event prior to acceptance.

(*b*) In case any supplies or lots of supplies are defective in material or workmanship or otherwise not in conformity with the requirements of this contract, the Government shall have the right either to reject them (with or without instructions as to their disposition) or to require their correction. Supplies or lots of supplies which have been rejected or required to be corrected shall be removed or, if permitted or required by the Contracting Officer, corrected in place by and at the expense of the Contractor promptly after notice, and shall not thereafter be tendered for acceptance unless the former rejection or requirement of correction is disclosed. If the Contractor fails promptly to remove such supplies or lots of supplies which are required to be removed, or promptly to replace or correct such supplies or lots of supplies, the Government either (i) may by contract or otherwise replace or correct such supplies and charge to the Contractor the cost occasioned the Government thereby, or (ii) may terminate this contract for default as provided in the clause of this contract entitled "Default." Unless the Contractor corrects or replaces such supplies within the delivery schedule, the Contracting Officer may require the delivery of such supplies at a reduction in price which is equitable under the circumstances. Failure to agree to such reduction of price shall be a dispute concerning a question of fact within the meaning of the clause of this contract entitled "Disputes."

(*c*) If any inspection or test is made by the Government on the premises of the Contractor or a subcontractor, the Contractor without additional charge shall provide all reasonable facilities and assistance for the safety and convenience of the Government inspectors in the performance of their duties. If Government inspection or test is made at a point other than the premises of the Contractor or a subcontractor, it shall be at the expense of the Government except as otherwise provided in this contract: *Provided,* That in case of rejection the Government shall not be liable for any reduction in value of samples used in connection with such inspection or test. All inspections and tests by the Government shall be performed in such a manner as not to unduly delay the work. The Government reserves the right to charge to the Contractor any additional cost of Government inspection and test when supplies are not ready at the time such inspection and test is requested by the Contractor or when reinspection or retest is necessitated by prior rejection. Acceptance or rejection of the supplies shall be made as promptly as practicable after delivery, except as otherwise provided in this contract; but failure to inspect and accept or reject supplies shall neither relieve the Contractor from responsibility for such supplies as are not in accordance with the contract requirements nor impose liability on the Government therefor.

(*d*) The inspection and test by the Government of any supplies or lots thereof does not relieve the Contractor from any responsibility regarding defects or other failures to meet the contract requirements which may be discovered prior to acceptance. Except as otherwise provided in this

contract, acceptance shall be conclusive except as regards latent defects, fraud, or such gross mistakes as amount to fraud.

(*e*) The Contractor shall provide and maintain an inspection system acceptable to the Government covering the supplies hereunder. Records of all inspection work by the Contractor shall be kept complete and available to the Government during the performance of this contract and for such longer period as may be specified elsewhere in this contract.

6. Responsibility for Supplies

Except as otherwise provided in this contract, (i) the Contractor shall be responsible for the supplies covered by this contract until they are delivered at the designated delivery point, regardless of the point of inspection; (ii) after delivery to the Government at the designated point and prior to acceptance by the Government or rejection and giving notice thereof by the Government, the Government shall be responsible for the loss or destruction of or damage to the supplies only if such loss, destruction, or damage results from the negligence of officers, agents, or employees of the Government acting within the scope of their employment; and (iii) the Contractor shall bear all risks as to rejected supplies after notice of rejection, except that the Government shall be responsible for the loss, or destruction of, or damage to the supplies only if such loss, destruction or damage results from the gross negligence of officers, agents, or employees of the Government acting within the scope of their employment.

7. Payments

The Contractor shall be paid, upon the submission of proper invoices or vouchers, the prices stipulated herein for supplies delivered and accepted or services rendered and accepted, less deductions, if any, as herein provided. Unless otherwise specified, payment will be made on partial deliveries accepted by the Government when the amount due on such deliveries so warrants; or, when requested by the Contractor, payment for accepted partial deliveries shall be made whenever such payment would equal or exceed either $1,000 or 50 percent of the total amount of this contract.

8. Assignment of Claims

(*a*) Pursuant to the provisions of the Assignment of Claims Act of 1940, as amended (31 U. S. Code 203, 41 U. S. Code 15), if this contract provides for payments aggregating $1,000 or more, claims for monies due or to become due the Contractor from the Government under this contract may be assigned to a bank, trust company, or other financing institution, including any Federal lending agency, and may thereafter be further assigned and reassigned to any such institution. Any such assignment or reassignment shall cover all amounts payable under this contract and not already paid, and shall not be made to more than one party, except that any such assignment or reassignment may be made to one party as agent or trustee for two or more parties participating in such financing. Notwithstanding any provisions of this contract, payments to an assignee of any monies due or to become due under this contract shall not, to the extent provided in said Act, as amended, be subject to reduction or set-off. (*The preceding sentence applies only if this contract is with the Department of Defense, the General Services Administration, the Atomic Energy Commission, or any other department or agency of the United States designated by the President pursuant to clause 4 of the proviso of section 1 of the Assignment of Claims Act of 1940, as amended by the Act of May 15, 1951, 65 Stat. 41.*)

(*b*) In no event shall copies of this contract or of any plans, specifications, or other similar documents relating to work under this contract, if marked "Top Secret," "Secret," or "Confidential," be furnished to any assignee of any claim arising under this contract or to any other person not entitled to receive the same: *Provided*, That a copy of any part or all of this contract so marked may be furnished, or any information contained therein may be disclosed, to such assignee upon the prior written authorization of the Contracting Officer.

9. Additional Bond Security

If any surety upon any bond furnished in connection with this contract becomes unacceptable to the Government, or if any such surety fails to furnish reports as to his financial condition from time to time as requested by the Government, the Contractor shall promptly furnish such additional security as may be required from time to time to protect the interests of the Government and of persons supplying labor or materials in the prosecution of the work contemplated by this contract.

10. Examination of Records

(The following clause is applicable if the amount of this contract exceeds $1,000 and was entered into by means of negotiation, but is not applicable if this contract was entered into by means of formal advertising.)

(*a*) The Contractor agrees that the Comptroller General of the United States or any of his duly authorized representatives shall, until the expiration of three years after final payment under this contract, have access to and the right to examine any directly pertinent books, documents, papers, and records of the Contractor involving transactions related to this contract.

(*b*) The Contractor further agrees to include in all his subcontracts hereunder a provision to the effect that the subcontractor agrees that the Comptroller General of the United States or any of his duly authorized representatives shall, until the expiration of three years after final payment under the subcontract, have access to and the right to examine any directly pertinent books, documents, papers, and records of such subcontractor, involving transactions related to the subcontract. The term "subcontract" as used in this clause excludes (i) purchase orders not exceeding $1,000 and (ii) subcontracts or purchase orders for public utility services at rates established for uniform applicability to the general public.

11. Default

(*a*) The Government may, subject to the provisions of paragraph (*c*) below, by written notice of default to the Contractor, terminate the whole or any part of this contract in any one of the following circumstances:

(i) if the Contractor fails to make delivery of the supplies or to perform the services within the time specified herein or any extension thereof; or

(ii) if the Contractor fails to perform any of the other provisions of this contract, or so fails to make progress as to endanger performance of this contract in accordance with its terms, and in either of these two circumstances does not cure such failure within a period of 10 days (or such longer period as the Contracting Officer may authorize in writing) after receipt of notice from the Contracting Officer specifying such failure.

(*b*) In the event the Government terminates this contract in whole or in part as provided in paragraph (*a*) of this clause, the Government may procure, upon such terms and in such manner as the Contracting Officer may deem

appropriate, supplies or services similar to those so terminated, and the Contractor shall be liable to the Government for any excess costs for such similar supplies or services: *Provided*, That the Contractor shall continue the performance of this contract to the extent not terminated under the provisions of this clause.

(*c*) Except with respect to defaults of subcontractors, the Contractor shall not be liable for any excess costs if the failure to perform the contract arises out of causes beyond the control and without the fault or negligence of the Contractor. Such causes may include, but are not restricted to, acts of God or of the public enemy, acts of the Government in either its sovereign or contractual capacity, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, and unusually severe weather; but in every case the failure to perform must be beyond the control and without the fault or negligence of the Contractor. If the failure to perform is caused by the default of a subcontractor, and if such default arises out of causes beyond the control of both the Contractor and subcontractor, and without the fault or negligence of either of them, the Contractor shall not be liable for any excess costs for failure to perform, unless the supplies or services to be furnished by the subcontractor were obtainable from other sources in sufficient time to permit the Contractor to meet the required delivery schedule.

(*d*) If this contract is terminated as provided in paragraph (*a*) of this clause, the Government, in addition to any other rights provided in this clause, may require the Contractor to transfer title and deliver to the Government, in the manner and to the extent directed by the Contracting Officer, (i) any completed supplies, and (ii) such partially completed supplies and materials, parts, tools, dies, jigs, fixtures, plans, drawings, information, and contract rights (hereinafter called "manufacturing materials") as the Contractor has specifically produced or specifically acquired for the performance of such part of this contract as has been terminated; and the Contractor shall, upon direction of the Contracting Officer, protect and preserve property in possession of the Contractor in which the Government has an interest. Payment for completed supplies delivered to and accepted by the Government shall be at the contract price. Payment for manufacturing materials delivered to and accepted by the Government and for the protection and preservation of property shall be in an amount agreed upon by the Contractor and Contracting Officer; failure to agree to such amount shall be a dispute concerning a question of fact within the meaning of the clause of this contract entitled "Disputes."

(*e*) If, after notice of termination of this contract under the provisions of paragraph (*a*) of this clause, it is determined that the failure to perform this contract is due to causes beyond the control and without the fault or negligence of the Contractor or subcontractor pursuant to the provisions of paragraph (*c*) of this clause, such notice of default shall be deemed to have been issued pursuant to the clause of this contract entitled "Termination for Convenience of the Government," and the rights and obligations of the parties hereto shall in such event be governed by such clause. (*Except as otherwise provided in this contract, this paragraph (e) applies only if this contract contains such clause.*)

(*f*) The rights and remedies of the Government provided in this clause shall not be exclusive and are in addition to any other rights and remedies provided by law or under this contract.

12. Disputes

(*a*) Except as otherwise provided in this contract, any dispute concerning a question of fact arising under this contract which is not disposed of by agreement shall be decided by the Contracting Officer, who shall reduce his decision to writing and mail or otherwise furnish a copy thereof to the Contractor. The decision of the Contracting Officer shall be final and conclusive unless, within 30 days from the date of receipt of such copy, the Contractor mails or otherwise furnishes to the Contracting Officer a written appeal addressed to the Secretary. The decision of the Secretary or his duly authorized representative for the determination of such appeals shall be final and conclusive unless determined by a court of competent jurisdiction to have been fraudulent, or capricious, or arbitrary, or so grossly erroneous as necessarily to imply bad faith, or not supported by substantial evidence. In connection with any appeal proceeding under this clause, the Contractor shall be afforded an opportunity to be heard and to offer evidence in support of its appeal. Pending final decision of a dispute hereunder, the Contractor shall proceed diligently with the performance of the contract and in accordance with the Contracting Officer's decision.

(*b*) This "Disputes" clause does not preclude consideration of law questions in connection with decisions provided for in paragraph (*a*) above: *Provided*, That nothing in this contract shall be construed as making final the decision of any administrative official, representative, or board on a question of law.

13. Notice and Assistance Regarding Patent Infringement

The provisions of this clause shall be applicable only if the amount of this contract exceeds $5,000.

(*a*) The Contractor shall report to the Contracting Officer, promptly and in reasonable written detail, each notice or claim of patent infringement based on the performance of this contract of which the Contractor has knowledge.

(*b*) In the event of litigation against the Government on account of any claim of patent infringement arising out of the performance of this contract or out of the use of any supplies furnished or work or service performed hereunder, the Contractor shall furnish to the Government, upon request, all evidence and information in possession of the Contractor pertaining to such litigation. Such evidence and information shall be furnished at the expense of the Government except in those cases in which the Contractor has agreed to indemnify the Government against the claim being asserted.

14. Buy American Act

(*a*) In acquiring end products, the Buy American Act (41 U. S. Code 10 a–d) provides that the Government give preference to domestic source end products. For the purpose of this clause:

(i) "components" means those articles, materials, and supplies, which are directly incorporated in the end products;

(ii) "end products" means those articles, materials, and supplies, which are to be acquired under this contract for public use; and

(iii) a "domestic source end product" means (A) an unmanufactured end product which has been mined or

produced in the United States and (B) an end product manufactured in the United States if the cost of the components thereof which are mined, produced, or manufactured in the United States exceeds 50 percent of the cost of all its components. For the purposes of this (*a*) (iii) (B), components of foreign origin of the same type or kind as the products referred to in (*b*) (ii) or (iii) of this clause shall be treated as components mined, produced, or manufactured in the United States.

(*b*) The Contractor agrees that there will be delivered under this contract only domestic source end products, except end products:

(i) which are for use outside the United States;

(ii) which the Government determines are not mined, produced, or manufactured in the United States in sufficient and reasonably available commercial quantities and of a satisfactory quality;

(iii) as to which the Secretary determines the domestic preference to be inconsistent with the public interest; or

(iv) as to which the Secretary determines the cost to the Government to be unreasonable.

(The foregoing requirements are administered in accordance with Executive Order No. 10582, dated December 17, 1954.)

15. Convict Labor

In connection with the performance of work under this contract, the Contractor agrees not to employ any person undergoing sentence of imprisonment at hard labor.

16. Eight-Hour Law of 1912—Overtime Compensation

This contract, to the extent that it is of a character specified in the Eight-Hour Law of 1912, as amended (40 U. S. Code 324–326) and is not covered by the Walsh-Healey Public Contracts Act (41 U. S. Code 35–45), is subject to the following provisions and exceptions of said Eight-Hour Law of 1912, as amended, and to all other provisions and exceptions of said Law:

No laborer or mechanic doing any part of the work contemplated by this contract, in the employ of the Contractor or any subcontractor contracting for any part of said work contemplated, shall be required or permitted to work more than eight hours in any one calendar day upon such work, except upon the condition that compensation is paid to such laborer or mechanic in accordance with the provisions of this clause. The wages of every laborer and mechanic employed by the Contractor or any subcontractor engaged in the performance of this contract shall be computed on a basic day rate of eight hours per day; and work in excess of eight hours per day is permitted only upon the condition that every such laborer and mechanic shall be compensated for all hours worked in excess of eight hours per day at not less than one and one-half times the basic rate of pay. For each violation of the requirements of this clause a penalty of five dollars shall be imposed for each laborer or mechanic for every calendar day in which such employee is required or permitted to labor more than eight hours upon said work without receiving compensation computed in accordance with this clause, and all penalties thus imposed shall be withheld for the use and benefit of the Government.

17. Walsh-Healey Public Contracts Act

If this contract is for the manufacture or furnishing of materials, supplies, articles, or equipment in an amount which exceeds or may exceed $10,000 and is otherwise subject to the Walsh-Healey Public Contracts Act, as amended (41 U. S. Code 35–45), there are hereby incorporated by reference all representations and stipulations required by said Act and regulations issued thereunder by the Secretary of Labor, such representations and stipulations being subject to all applicable rulings and interpretations of the Secretary of Labor which are now or may hereafter be in effect.

18. Nondiscrimination in Employment

(*a*) In connection with the performance of work under this contract, the Contractor agrees not to discriminate against any employee or applicant for employment because of race, religion, color, or national origin. The aforesaid provision shall include, but not be limited to, the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Contractor agrees to post hereafter in conspicuous places, available for employees and applicants for employment, notices to be provided by the Contracting Officer setting forth the provisions of the nondiscrimination clause.

(*b*) The Contractor further agrees to insert the foregoing provision in all subcontracts hereunder, except subcontracts for standard commercial supplies or raw materials.

19. Officials Not To Benefit

No member of or delegate to Congress, or resident commissioner, shall be admitted to any share or part of this contract, or to any benefit that may arise therefrom; but this provision shall not be construed to extend to this contract if made with a corporation for its general benefit.

20. Covenant Against Contingent Fees

The Contractor warrants that no person or selling agency has been employed or retained to solicit or secure this contract upon an agreement or understanding for a commission, percentage, brokerage, or contingent fee, excepting bona fide employees or bona fide established commercial or selling agencies maintained by the Contractor for the purpose of securing business. For breach or violation of this warranty the Government shall have the right to annul this contract without liability or in its discretion to deduct from the contract price or consideration, or otherwise recover, the full amount of such commission, percentage, brokerage, or contingent fee.

21. Utilization of Small Business Concerns

(*a*) It is the policy of the Government as declared by the Congress that a fair proportion of the purchases and contracts for supplies and services for the Government be placed with small business concerns.

(*b*) The Contractor agrees to accomplish the maximum amount of subcontracting to small business concerns that the Contractor finds to be consistent with the efficient performance of this contract.

☆ U. S. GOVERNMENT PRINTING OFFICE : 1957 O - 442852

DEPARTMENT OF THE INTERIOR
BUREAU OF MINES

SPECIAL TERMS AND CONDITIONS OF THE INVITATION FOR BIDS

Article 11. Standard Form 32, General Provisions (Supply Contract) prescribed by the General Services Administration, October 1957 edition, is incorporated herein by reference and made a part hereof and receipt of the form is hereby acknowledged. (A copy of Standard Form 32 is obtainable upon request.)

Article 12. Patents. The Contractor shall hold and save the Government, its officers, agents, servants, and employees, harmless from liability of any nature or kind, including costs and expenses, for or on account of any patented or unpatented invention, article, process, appliance or apparatus manufactured or used by the Contractor in performance of this contract, including its subsequent use or disposal by or for the Government. Any patented invention, the use of which by this contract is required or permitted in the alternative to be used and which the United States has the right to use royalty free, shall be available to the Contractor without the payment of the royalty.

Article 13. Delivery. Time of delivery is important, and complete delivery at the specified destination is desired within the number of calendar days after date of receipt by the contractor of notice of award of contract as indicated on the face of Standard Form 33.

Bidders are required to state, in the space provided on the face of Standard Form 33, a definite period of time within which shipment will be made, and the time so stated, if in excess of the time desired, may be considered in making award of contract. If the bidder fails to insert the number of days in which shipment will be made, the bid will be considered upon the basis that shipment will be made within the desired period, and the bidder agrees to accept award on that basis.

Article 14. Comparison of bids. Whenever applicable, equalizing elements or factors not specifically mentioned or provided for herein, such as the cost of transportation, of installation, of inspection (including salaries, travel, and subsistence expenses), or of any other element or factor in addition to that of price which would affect the final cost to the Government, may be taken into consideration in making award of contract.

Article 15. Protests. If the contractor considers any work demanded of him to be outside of the requirements of the contract, or considers any record or ruling of the contracting officer or of the inspectors to be unfair, he shall immediately upon such work being demanded or such record or ruling being made, ask, in writing, for written instructions or decision, and upon receipt of such written instructions or decision, he shall proceed without delay to perform

the work or to conform to the record or ruling, and within thirty (30) calendar days after date of receipt of the written instructions or decision (unless the contracting officer shall grant a further period of time prior to commencement of the work affected) he shall file a written protest with the contracting officer, stating clearly and in detail the basis of his protest. Except for such protests as are made of record in the manner herein specified and within the time limit stated, the records, rulings, instructions, or decisions of the contracting officer shall be final and conclusive. Instructions and/or decisions of the contracting officer contained in letters transmitting drawings to the contractor shall be considered as written instructions or decisions subject to protest as herein provided.

Article 16. Bidder's qualifications. All prospective bidders are hereby notified that, before any bid submitted in response to this invitation is considered for award, the Government may require the bidder to submit a statement of facts in detail as to the previous experience of the bidder in performing similar or comparable work and of the business and technical organization and financial resources and plant of the bidder available and to be used in performing the contemplated work. The Government expressly reserves the right to reject any bid on which the facts as to business and technical organization, plant, financial, and other resources, or business experience, compared with the work bid upon, justify such rejection.

In the case of highly specialized or complicated equipment where prior satisfactory performance over a period of time under actual operating conditions is essential to establish the reliability of the equipment and where failure to operate properly could result in loss of life or serious property damage, the contracting officer may require the bidder to furnish evidence of satisfactory performance of comparable equipment over a sufficient period of time to insure the reliability of the equipment being offered.

Article 17. Late bids. (a) Metered mail.--No bid or modification thereof transmitted in a metered envelope received after the time set for opening will be considered, unless the envelope is stamped in the Post Office where mailed to show the date and hour of mailing and it is determined by the Government that nonarrival on time was due solely to delay in the mails for which the bidder was not responsible. If a metering device is used in stamping the envelope containing the bid, the bidder is responsible for assuring that the hour and date of posting are indicated on the envelope by Post Office cancellation. The time as shown by the Post Office cancellation will be considered as the hour and date of posting.

Article 18. Default. The following is added to Paragraph (c) of Clause No. 11 entitled "Default" of Standard Form 32, October 1957 Edition:

> "Whether the failure to perform arises out of default of either the prime contractor or his subcontractor the contractor shall, as a condition precedent to being relieved from excess costs for failure

to perform because of excusable delays, notify the contracting officer in writing of the cause of any such delay, within 30 days from the beginning thereof, or within such further period as the contracting officer shall, prior to the date of final settlement of the contract, grant for the giving of such notice. As soon as practicable after receipt of the contractor's notice of delay, the contracting officer shall ascertain the facts and extent of the delay, and extend the time for making delivery when in his judgment the findings of fact justify such an extension, and his findings of fact thereon shall be final and conclusive on the parties hereto, subject only to appeal, within 30 days, by the contractor to the Secretary or his duly authorized representative, under the Disputes Clause of this contract."

Article 19. Extras. The contractor shall, when ordered in writing by the contracting officer, perform extra work and furnish extra material, not required by the invitation or included in the schedule, but forming an inseparable part of the work contracted for. Extra work and material will ordinarily be paid for at the lump-sum or unit price stated in the order. Whenever, in the judgment of the contracting officer, it is impracticable, because of the nature of the work or for any other reason to otherwise fix the price in the order, the extra work and material shall be paid for at the actual necessary cost as determined by the contracting officer, plus an allowance, not to exceed 15 per cent of such actual necessary cost of the extra work and materials, for superintendence, general expense, and profit. The actual necessary cost will include all reasonable expenditures for material, labor (including compensation insurance and social security taxes), and supplies furnished by the contractor, and a reasonable allowance for the use of his plant and equipment, where required, but will in no case include any allowance for office expenses, general superintendence, or other general expenses.

Article 20. Federal, State, and local taxes. (a) As used throughout this paragraph, the term "tax inclusive date" means the date of negotiated contracts and the date set for the opening of bids for contracts entered into through formal advertising. As to additional supplies or services procured by modification to this contract, the term "tax inclusive date" means the date of such modification.

(b) Except as may be otherwise provided in this contract, the contract price includes all Federal, State, and local taxes and duties in effect and applicable to this contract on the tax inclusive date, except taxes (other than Federal transportation taxes) from which the Government, the contractor, or the transactions or property covered by this contract are then exempt. Unless specifically excluded, duties are included in the contract price, and, if freight is included in the contract price, Federal transportation taxes are likewise included.

(c) (1) If the contractor is required to pay or bear the burden (i) of any tax or duty, which either was not to be included in the contract price pursuant to the requirements of paragraph (b), or was specifically excluded from the contract price by a provision of this contract; or (ii) of an increase in rate of any tax or duty, whether or not such tax or duty was excluded from the contract price; or of any interest or penalty thereon, the contract price shall be correspondingly increased: Provided, That the contractor warrants in writing that no amount for such tax, duty or rate increase was included in the contract price as a contingency reserve or otherwise: And provided further, That liability for such tax, duty, rate increase, interest, or penalty was not incurred through the fault or negligence of the contractor or its failure to follow instructions of the contracting officer.

(2) If the contractor is not required to pay or bear the burden, or obtains a refund or drawback, in whole or in part, of any tax, duty, interest, or penalty which (i) was to be included in the contract price pursuant to the requirements of subparagraph (b), (ii) was included in the contract price, or (iii) was the basis of an increase in the contract price, the contract price shall be correspondingly decreased or the amount of such relief, refund, or drawback shall be paid to the Government, as directed by the contracting officer. The contract price also shall be correspondingly decreased if the contractor, through its fault or negligence or its failure to follow instructions of the contracting officer, is required to pay or bear the burden, or does not obtain a refund or drawback of any such tax, duty, interest, or penalty. Interest paid or credited to the contractor incident to a refund of taxes shall inure to the benefit of the Government to the extent that such interest was earned after the contractor was paid or reimbursed by the Government for such taxes.

(3) Invoices or vouchers covering any adjustment of the contract price pursuant to this subparagraph (c) shall set forth the amount thereof as a separate item and shall identify the particular tax involved.

(4) Nothing in this subparagraph (c) shall be applicable to social security taxes; net income taxes; excess profit taxes; capital stock taxes; Federal transportation taxes, except changes in the rate thereof, including repeal, pertaining to shipments from the contractor to the Government; unemployment compensation taxes; or any State and local taxes, except those levied on or measured by the contract or sales price of the services or completed supplies furnished under this contract, including gross income taxes, gross receipts taxes, sales and use taxes, excise taxes, or franchise or occupation taxes measured by sales or receipt from sales.

(5) No adjustment of less than $100 shall be made in the contract price pursuant to this subparagraph.

(d) Unless there does not exist any reasonable basis to sustain an exemption, the Government agrees upon request of the contractor, without

Re: Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Contract No. Idm-E58
Keenan Properties
Lawrence County, South Dakota

Dear Miss Keenan:

Enclosed are the original and four copies of a proposed Termination Agreement, signed by the Administrator for the Government. This document is sent to replace the Termination Agreement forwarded to you July 21, 1958, by our Denver, Colorado, office.

You will note that the agreement allows (1) until January 1, 1959, to complete the winding-up action; (2) provides for the transportation of the excavated material recovered from the churn drill holes (drill cuttings) to a qualified independent laboratory; (3) an alternate method of processing the material; the assaying of two independent concentrate samples from each drill hole for tin, columbium-tantalum, tungsten, and gold; and (4) also provides for the assaying of one representative concentrate sample from each test pit, furnished by you, for tin, columbium-tantalum, tungsten, and gold.

If the proposed Termination Agreement is satisfactory, all copies are to be signed by an official of the Northwest Defense Minerals, Inc., authorized to sign such an instrument, the signer's title inserted, the corporate seal affixed, and the original and all copies, except the copy marked "Operator's copy," promptly returned to this office. Also, the original and all copies of the Termination Agreement sent to you July 21, 1958, are to be returned to this office.

Memorandum

To: Chairman, Operating Committee, DMEA

From: Alternate Acting Executive Officer, DMEA Field Team, Region III

Subject: Docket No. DMEA 654 (Tin, Columbium-Tantalum, Tungsten), Contract No. Idm-E58, Northwest Defense Minerals, Inc. (Rawlins Mining District), Lawrence County, South Dakota

Enclosed are the original and two copies of a memorandum, dated August 8, 1958, from E. O. Binyon, Mining Engineer, Bureau of Mines, pertaining to matters, comments on which were requested by Mr. F. L. Knouse from this office by telephone on August 6.

As brought out by Mr. Binyon, the contract permitted approximately 180 feet of drilling in each of the Beaver Creek and Bear Creek Areas, which was not exceeded to any great extent. There were 187-1/2 feet of drilling paid for in the Bear Creek Area and 161 feet paid for in the Beaver Creek Area, aggregating 348.5 feet, as against the approximate maximum of 360 feet as permitted in the contract.

Since there was no specific cut-off established in the contract for the depth of drilling, and since the gravel-bed rock contact could not be readily detected, it is the contention of this office that the work was performed and reimbursement made within the provisions of the contract.

Memorandum

To: Alternate Acting Executive Officer, DMEA Field Team, Reg. III

From: E. O. Binyon

Subject: Docket DMEA 654 (Tin, Columbium, Tantalum, Tungsten) Contract Idm-E58, Northwest Defense Minerals, Inc., (Rawlins Mining District) Lawrence County, South Dakota

This is in reply to your memorandum of August 6, 1958 concerning the request by Mr. F. L. Knouse of the Washington Office DMEA for clarification of the following.

(a) Was the drilling supervised by the supervising engineer

(b) Were the holes drilled deeper than the holes provided for in the contract

(c) Justification for payment of the overdrilling

(a) The drilling was supervised by R. M. Atwater, Jr., the operator's engineer

(b) No. The contract stipulates (Exhibit A Amendment No. 3) that --- "There shall be drilled not to exceed nine (9) holes of an approximate average depth of 20 feet each (or an approximate aggregate total of 180 of hole" ---) This stipulation is for the churn drilling on both Bear and Beaver Creeks. A total of 187.5 feet were drilled in the nine holes on Bear Creek and 161 feet were drilled in the nine holes on Beaver Creek

(c) In the memorandum to you dated July 28, 1958 it was stated that "This overdrilling was in part due to the softness of the bedrock, the inexperience of the driller and operator and the fact that the churned gravel samples were difficult to distinguish from the churned bedrock." Therefore, there is no proof that the holes were actually overdrilled, just an opinion. Based on the stipulation in the contract for the depth of each hole and the total aggregate depth of the 9 holes there was no overdrilling and payment for the drilling was made in conformance with the terms of the contract.

Memorandum

To: Chairman, Operating Committee, DMEA

From: Alternate Acting Executive Officer, DMEA Field Team, Reg. III

Subject: Docket No. DMEA 654 (Tin, Columbium-Tantalum, Tungsten)
Contract No. Idm-E58, Northwest Defense Minerals, Inc.
(Rawlins Mining District) Lawrence County, South Dakota

see Term. agt.

In conformance with the request from Mr. F. L. Knouse by telephone today, enclosed are eight copies of a revised flow sheet, which it is understood is to be used in conjunction with the termination agreement being prepared in your office, to terminate the subject contract.

Upon discussion of the matter of processing the material with metallurgists in conjunction with the originally proposed flow sheet, it was their advice that it was impractical, if not impossible, to obtain satisfactory results by the use of spiral classifiers in the circuit because of the small volume of feed. Therefore, they recommend that provisions be made to substitute a table in place of the spirals; thus, the reason for the revised flow sheet which contains an appropriate notation as to the alternate.

Because of anticipated interval of time required to complete processing of the material, results of which must be forwarded to the Operator to enable it to complete its final report, it is recommended that the termination date be extended to January 1, 1959.

In reference to analyses of the concentrates, it is our understanding that analysis will be made for combined columbium-tantalum; therefore, bid specifications are being prepared accordingly.

Encls.

August 8, 1958

Memorandum

To: The File

From: F. L. Knouse, Acting Director
Division of Rare and Miscellaneous Metals

Subject: Telephone call from J. W. Townsend, Denver, Colorado
Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Contract No. Idm-E58
Northwest Defense Minerals, Inc.
Keenan Properties
Lawrence County, South Dakota

Townsend: I have just seen the fellows at the Colorado School of Mines about processing the drill hole material. They said that to process such small samples with the spirals, as is shown in the Flow Sheet I sent you, would be practically impossible and the costs would be prohibitive. They suggest an alternate of using tables which would simplify and speed up the processing.

Knouse: As discussed with you, we planned to incorporate the flow diagram in the Termination Agreement and the agreement draft is now with the Legal Division for preparation of the agreement. Could you make an insertion on the flow diagram showing that the tables may be used as an alternate method of processing and send us eight copies of the revised flow diagram for attachment to the Termination Agreement? Please do not change the title on the diagram.

Townsend: Yes, we will do that at once. Another question occurred. We are informed that it will require from 60 to 90 days to process the material and analyze the samples, and our recommended period for the Operator to render the final report, etc., is November 1, 1958. Since the Operator will require the analytical data to prepare the final report, this date should be moved up to January 1, 1959.

Knouse: I will change the date as you recommend.

AEC Form 7
(12-53)

8/5/58 Memo. 800
225

August 8, 1958

Memorandum

To: The File

From: K. L. Knowse, Acting Director
Division of Raw and Miscellaneous Metals

Subject: Telephone call from J. W. Townsend, Denver, Colorado
Docket No. DMSA-654
(Tin, columbium-tantalum, tungsten)
Contract No. Idm-858
Northwest Defense Minerals, Inc.
Keenan Properties
Lawrence County, South Dakota

Townsend: I have just seen the fellows at the Colorado School of Mines about processing the drill hole material. They said that to process such small samples with the spirals, as is shown in the Flow Sheet I sent you, would be practically impossible and the costs would be prohibitive. They suggest an alternate of using tables which would simplify and speed up the processing.

Knowse: As discussed with you, we planned to incorporate the Flow diagram in the Termination Agreement and the agreement draft is now with the Legal Division for preparation of the agreement. Could you make an insertion on the flow diagram showing that the tables may be used as an alternate method of processing and send us eight copies of the revised flow diagram for attachment to the Termination Agreement? Please do not change the title on the diagram.

Townsend: Yes, we will do that at once. Another question occurred. We are informed that it will require from 60 to 90 days to process the material and analyze the samples, and our recommended period for the Operator to render the final report, etc., is November 1, 1958. Since the Operator will require the analytical data to prepare the final report, this date should be moved up to January 1, 1959.

Knowse: I will change the date as you recommend.

Townsend: Good. Another question: To analyze each sample separately for columbium and tantalum would also increase the cost substantially. Under regular laboratory procedure the analysis is made for both elements combined and this procedure would reduce the cost substantially. For the purpose of this project, I recommend the combined analysis.

Knouse: I agree with you. Also you will note in the contract, which is also in the Termination Agreement, the columbium-tantalum is a hypenated word. Therefore, one analysis for both elements should be satisfactory.

Townsend: Fine. Then we will go ahead on that basis.

Re: Docket No. DMEA 654 (Tin, Columbium-Tantalum, Tungsten), Contract No. Idm-458, Northwest Defense Minerals, Inc. (Rawlins Mining District) Lawrence County, South Dakota

Dear Miss Keenan:

As a matter of record, there is enclosed a schedule of drill hole samples which were received from the referenced project by Buckingham Transportation, Inc., Rapid City, South Dakota, and transported to the Denver Federal Center.

The material is in eighty-eight metal containers, as follows:

Containers	
Size	Number
55 gal. drums	50
40 gal. drums	1
15 gal. drums	30
50 lb. grease cans	1
35 lb. grease cans	5
25 lb. grease cans	1
Total	88

In reviewing the enclosed schedule of drill hole samples, you will please note that the samples for three drilling intervals are listed as "Missing" as they were not received. The missing samples are from the Bear Creek Area, Hole No. 6, intervals 6 feet to 12 feet and 24 feet to 30 feet, and Hole No. 9, interval 12 feet to 15 feet. We will appreciate any information you have regarding the missing samples.

Memorandum

To: Associate Solicitor
Division of Mineral Resources

From: F. L. Knouse, Acting Director
Division of Rare and Miscellaneous Metals

Subject: Termination Agreement
Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Contract No. Idm-E58
Northwest Defense Minerals, Inc.
Keenan Properties
Lawrence County, South Dakota

In accordance with our discussion on August 6, kindly prepare a Termination Agreement for the subject contract in accordance with the attached draft. This Termination Agreement will replace the one forwarded to the Operator by Region III on July 21, 1958.

Duplicate copies of the Flow Plan attached to the Field Team's memorandum of July 30 are being photostated and will be forwarded* to you for attachment to the agreement as soon as received in this Division.

TERMINATION AGREEMENT

It is agreed this _____ day of _____, 1958, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, hereinafter called the "Government," and Northwest Defense Minerals, Inc., hereinafter called the "Operator," parties to that certain Exploration Project Contract Ion-358, Docket No. DMEA-654, dated July 16, 1961, as amended, hereinafter called the "Contract," that:

1. Effective November 1, 1957, the Contract and all obligations of the parties thereunder, except as otherwise herein expressly provided, shall be and are hereby terminated.

2. The Operator shall turn over to the Government the excavated materials from all churn drill holes (drill cuttings) for transporting to a qualified independent laboratory, and for processing and analyses of samples, ~~including the analyses of concentrate samples recovered from each test pit that were furnished by the Operator.~~

3. In lieu of concentrating the metals and minerals from the material recovered from the churn drill holes by the method referred to in Paragraph 2 of Amendment No. 12, as is set forth in the Flow Sheet referred to and attached to Amendment No. 12, the metals and minerals may be concentrated as is set forth in the attached flow sheet entitled "Acceptable

Alternate Flow Plan Northwest Defense Minerals, Inc., Lawrence County, South Dakota."

The material recovered from each churn drill hole shall be prepared into two individual concentrate samples as follows:

(a) All material recovered from the collar of the drill hole to the bottom of the sampling interval above bedrock; and

(b) All the material recovered from the bottom of the sampling interval (item (2) including bedrock) to the bottom of the next sampling interval. A representative split of each concentrate sample shall be assayed for tin, columbium-tantalum, tungsten, and gold, and a representative split of each concentrate sample shall be furnished the Operator.

4. One representative concentrate sample furnished by the Operator that was recovered from each test pit shall be assayed for tin, columbium-tantalum, tungsten, and gold.

5. The Government shall contribute to the allowable costs incurred prior to said effective date, and shall contribute to the allowable costs incurred beginning with said effective date and ending not later than November 1, 1958, in performing winding-up and settlement actions, including the making and rendering of a comprehensive final geologic and engineering report. The cost for this work may be obtained from any funds allotted to the project which have not been expended.

6. The Operator shall promptly perform all winding-up and settlement actions provided for in the Contract, including the rendering of the final report and final account, and shall contribute its pro rata share of the costs incurred by the Government in connection with paragraph numbered 2 of this Termination Agreement. The Operator, upon payment of its pro rata share of the costs incurred by the Government, shall be furnished with a copy of the laboratory report.

7. All rights of the Government respecting certification of discovery or development, percentage royalty and liens to secure payment thereof, reports (including preservation of Operator's record), accounts, audits, and the right to recover any overpayment, are hereby preserved.

8. The Operator hereby releases and agrees to save the Government harmless from all claims or demands under or arising out of said Contract, except as otherwise provided in this Termination Agreement.

IN WITNESS WHEREOF, these parties have executed this agreement as of the day and year first above written.

Memorandum

To: The File

From: F. L. Knouse, Acting Director
Division of Rare and Miscellaneous Metals

Subject: Telephone call from J. W. Townsend, Denver, Colo.

Docket No. DMEA-654
Contract No. Idm-E58
Northwest Defense Minerals, Inc.

Townsend: I am calling about DMEA-654, Northwest Defense Minerals, Inc., that we discussed yesterday.

I talked with the fellows at the Colorado School of Mines about processing the material from the drill holes. They recommend that head and tail samples should also be assayed for each of the samples and I would like to know if you think this will be necessary. This would increase the cost substantially as it would about triple the number of analyses that would be necessary for the program we discussed yesterday.

Knouse: Under the circumstances, I do not believe we could justify the additional expense. However, for protection in case the Operator should doubt that a good recovery of the mineral values were made, I suggest that your bid should state that a split of the heads and tails from each sample should be furnished to the Government. Then, if the Operator complains, these samples would be available.

Townsend: I feel that this would serve the purpose and would provide the necessary information to protect the Government's interest.

Knouse: If you would like for me to carry the ball further and advise you definitely on this question, I will teletype you a definite answer.

Townsend: No, I believe you have furnished the answer.

Memorandum

To: Chairman, Operating Committee, DMEA

From: Alternate Acting Executive Officer, DMEA Field Team, Region III

Subject: Docket No. DMEA 654 (Tin, Columbium-Tantalum, Tungsten), Contract No. Idm-E58, Northwest Defense Minerals, Inc. (Rawlins Mining District), Lawrence County, South Dakota

Confirming my understanding of matter discussed with Mr. F. L. Knouse by telephone today, it is understood that we will prepare invitation to bid for processing and analysis of material from the holes drilled under the subject contract and analysis of our split of concentrates from material recovered from test pits which was beneficiated by the Operator.

The beneficiation interval in the Beaver Creek Area is to be from 0 to 12 feet and from 12 feet to the bottom of each hole, thus providing two separate samples for beneficiation and analysis for content of tin, columbium-tantalum, tungsten, and gold for each of the nine holes.

In the Bear Creek Area, the beneficiation interval will be from 0 to 6 feet and from 6 feet to 12 feet, thus also providing two samples for each of the nine drill holes, which are to be beneficiated separately and resulting concentrates analyzed for content of tin, columbium-tantalum, tungsten, and gold.

In addition, the Government split of concentrates forwarded by the Operator, resulting from the beneficiation of test pit materials, will also be analyzed for content of tin, columbium-tantalum, tungsten, and gold. However, until Mr. Binyon returns from a field trip, we are unable to supply the information requested by Mr. Knouse as to the possible split of concentrate samples from the test pit material. That information will be forwarded by teletype as soon as obtained.

Also, information on three specific questions posed by Mr. Knouse will be forwarded as soon as obtained.

Re: Docket No. DMEA 654 (Tin, Columbium-Tantalum, Tungsten), Contract No. Idm-E58, Northwest Defense Minerals, Inc. (Rawlins Mining District) Lawrence County, South Dakota

Dear Miss Keenan:

In preparation of the bid invitation for the beneficiation of the material from the churn drill holes and analysis of concentrates therefrom, it has come to our attention that the holes in the Bear Creek Area were drilled several feet into the bed rock for some not presently apparent reason.

Subsequent test pits sunk in the area indicated the bed rock to be from 6-1/4 feet to 7 feet in depth. Therefore, in processing the material from the holes in the Bear Creek Area, only the material from the sample intervals of 0 to 6 feet and 6 feet to 12 feet will be concentrated. The material from each interval will be concentrated separately and analyzed for content of tin, columbium-tantalum, tungsten, and gold.

Should you have use for the remaining portion of the Bear Creek drill hole samples, they will be returned to the project, provided you agree to payment of 10 percent of the transportation costs.

Since you have failed to have the concentrates from the test pit material analyzed as provided for in the contract, we will proceed to have the Government's portion of the concentrates forwarded by you analyzed and the results thereof will be charged to the project. It is to be understood that the Operator must bear its proportionate share of the expense of the analysis of test pit concentrates as provided for in the contract.

Docket No. DMEA-654 (Tin, columbium-tantalum, tungsten)
Contract No. Idm-E58
Northwest Defense Minerals, Inc.
Keenan Properties
Lawrence County, South Dakota

Knouse: I have this controversial case here of Northwest Defense Minerals, DMEA-654, I want to talk to you about.

We have studied over your letter, dated July 30, with attachments, and there are some points we would like to discuss. Please get someone on the line who can take dictation because I have a number of questions to ask you.

Townsend: Just a second. All right, now.

Knouse: If the drill hole cuttings and test pit material were saved at intervals so that one concentrate could be produced for the interval from the surface to a few feet above bedrock and another concentrate for the next interval, including the bedrock and the additional bedrock penetrated by the drill hole and/or test pit, would it furnish the necessary information provided the concentrate was then analyzed for tin, columbium-tantalum, tungsten, and gold?

Townsend: On Beaver Creek the drilling is so that the samples could be processed as you described.

On Bear Creek we could cut off the top sample at 6 feet where the bedrock is 6 feet or a little deeper, and the second sample interval would include and penetrate into the bedrock section. That only applies to the Bear Creek area. That is the area we are greatly concerned about because they drilled so far into bedrock.

Memorandum

To: The File

From: R. L. Knowse, Acting Director
Division of Rare and Miscellaneous Metals

Subject: Telephone call to J. W. Townsend, Region III
Docket No. DMEA-654 (Tin, columbium-tantalum, tungsten)
Contract No. Idm-458
Northwest Defense Minerals, Inc.
Keenan Properties
Lawrence County, South Dakota

Knowse: I have this controversial case here of Northwest Defense Minerals, DMEA-654. I want to talk to you about.

We have studied over your letter, dated July 30, with attachments, and there are some points we would like to discuss. Please get someone on the line who can take dictation because I have a number of questions to ask you.

Townsend: Just a second. All right, now.

Knowse: If the drill hole cuttings and test pit material were saved at intervals so that one concentrate could be produced for the interval from the surface to a few feet above bedrock and another concentrate for the next interval, including the bedrock and the additional bedrock penetrated by the drill hole and/or test pit, would it furnish the necessary information provided the concentrate was then analyzed for tin, columbium-tantalum, tungsten, and gold?

Townsend: On Beaver Creek the drilling is so that the samples could be processed as you described.

On Deer Creek we could cut off the top sample at 6 feet where the bedrock is 6 feet or a little deeper, and the second sample interval would include and penetrate into the bedrock section. There only applies to the Deer Creek area. That is the area we are greatly concerned about because they drilled so far into bedrock.

Knouse: What is the next sample interval in the Bear Creek holes?

Townsend: The next sample interval is 6 to 12 feet.

Knouse: Then you wouldn't process the material to the bottom of the hole?

Townsend: No, it would not give us a good picture of the values as the material below bedrock would dilute the values. I am sure all the fellows here would feel we would get better information from the drill hole samples if they are processed as you suggested.

Knouse: This would mean two samples would be analyzed for each drill hole and/or test pit, and the contract provides for only one analyses excluding gold. If, after you check these data on material from the drill holes and the sample splits recovered from the test pit, you find this procedure could be followed and the Field Team approves this procedure, or an alternate method is recommended, let us know so that it can be incorporated in the Termination Agreement.

Townsend: Were you intending that we have the test pit samples split and samples analyzed on the same basis?

Knouse: Yes, if you can make the split.

Townsend: No; the test pits are just one composite concentrate, with fractions from the jig, so the samples could not be separated on the same basis. Only one sample from each test pit should be analyzed. The Beaver Creek area (9 holes) - those holes were drilled O.K. They vary from 19 to 19.3, 19.4, 16.6, 16.7 foot depth to bedrock and the sample intervals are 0 to 6 feet, 6 to 12 feet, 12 feet for the balance of the holes.

Knouse: Then two samples could be processed and analyzed from each of the holes as we discussed?

Townsend: Yes.

Knouse: So then, the two top sample intervals could be combined and processed and the bottom sample interval processed into one sample?

Townsend: Yes. I will give you the nine hole sample intervals for Beaver Creek:

Hole No.

1	0' to 6'	6' to 12'	12' to 18'
2	0' to 6'	6' to 12'	12' to 19'
3	0' to 6'	6' to 12'	12' to 18'
4	0' to 6'	6' to 12'	12' to 19'
5	0' to 6'	6' to 12'	12' to 16'
6	0' to 6'	6' to 12'	12' to 16'
7	0' to 6'	6' to 12'	12' to 18'
8	0' to 6'	6' to 12'	12' to 17'
9	0' to 6'	6' to 12'	12' to 17'

On the Beaver Creek area I was assured by Mr. Binyon that those holes are in good shape, but on the Bear Creek area they went completely haywire. I can give you these samples so you can see what the picture is:

Hole No.

1	0' to 6'	6' to 12'	12' to 18'	18' to 21'
				21' to 22½'
2	0' to 6'	6' to 12'	12' to 18'	18' to 23'
3	0' to 6'	6' to 12'	12' to 18'	18' to 24'
				24' to 26½'
4	0' to 6'	6' to 12'	12' to 18'	18' to 22'
5	0' to 6'	6' to 12'	12' to 18'	18' to 22'
6	0' to 6'	6' to 12'	12' to 18'	18' to 24'
				24' to 30'
7	0' to 6'	6' to 12'	12' to 18'	18' to 24'
				24' to 30'
				30' to 34'

On hole 7, they later determined that bedrock was at 8 feet.

8	0' to 6'	6' to 12'	12' to 18'	18' to 20'
9	0' to 6'	6' to 12'	12' to 15'	

Bedrock was at top of second sampling interval. First interval 0-6 and possible 6-12 will be the only ones worth anything at all.

Knouse: You feel that the two samples, if processed and analyzed for those intervals would give us the picture we desire?

Townsend: Yes. Beaver Creek, according to Binyon, the test pits were at bedrock at 6-1/4 and 7 feet.

Knouse: This processing procedure would eliminate processing the excess material recovered from over-drilling into the bedrock on Bear Creek; therefore, the Operator should be advised accordingly.

Townsend: Yes, they are separated into different containers.

Knouse: Also, you should advise the Operator that the excess material will be returned to the property provided it will pay its pro rata share of the transportation cost.

Townsend: All right.

Knouse: One sample was analyzed from the bedrock cleanup from the test pit on Beaver Creek; therefore, this work should not be duplicated.

Townsend: That's right. However, I don't remember offhand whether or not the concentrate was split, but believe it represents about a foot in the one pit on Beaver Creek.

Knouse: Also, since the Operator did not have the concentrates analyzed from the ~~other~~ sample splits recovered from the test pits, excluding the one mentioned, these concentrates should be analyzed, and you should advise the Operator what is being done.

Townsend: Would that be incorporated into the Termination Agreement? Would it be necessary to ask her agreement on it?

Knouse: The Termination Agreement will provide that the cost for the necessary analytical work, transportation of samples, and the processing will be provided for out of remaining funds in the contract. In other words, the necessary funds for transporting, processing, and analyzing the samples from the drill holes and the analysis of the remaining samples from the test pits will be provided for.

Townsend: What will be the apportionment of those funds? We don't know where to charge the cost for this work.

Knouse: That will be taken care of in the Termination Agreement.

Townsend: We can charge them anywhere we want them?

Knouse: The Termination Agreement will ~~take care of that problem~~ indicate how charges can be made.

Knouse:
(contd.) If the recovered material from the drill holes and concentrate splits (processed and forwarded by the Operator from the test pits) can be processed and analyzed as I have described, you should obtain and forward bids covering this work. Also teletype us the amount of the lowest bid as early as possible.

Townsend: I have been waiting for information from you before I prepared the bids.

Knouse: I understand your delay.

Townsend: Do you want me to forward copies of the bids?

Knouse: Yes, and teletype the amount of the lowest bid as as soon as possible.

Townsend: For approval?

Knouse: Yes, but we would like to ~~know~~ have prior advice concerning the amount of the lowest bid, and we would like copies of the bids.

The bids to do this work should be more realistic than the estimated cost to transport the drill hole material from the property to Denver.

Townsend: We had no knowledge of the weight, and the samples were all in cans that increased the cost.

Knouse: The "Flow Plan: submitted with your letter for processing the recovered drill hole material can be incorporated in the Termination Agreement, modified to provide for gold assaying.

Townsend: That's fine, then I'll use that as an exhibit in the bid invitations.

Knouse: Binyon's memo of July 28 states that considerable over-drilling into the bedrock was done on Bear Creek. We will need a memorandum to clarify the records that answers the following questions:

1. Was the drilling supervised by the Operator's supervising engineer?

2. Were the holes drilled deeper than was provided for in the contract, and does the Field Team recommend payment for this over-drilling?

Townsend: No one from our end ~~of it~~ could determine that. There was no way to determine that on the once-a-month visits to the property.

The over-drilling has already been paid for, all of it. Binyon is out on a field trip and the first opportunity I have to discuss it with him, I will send you a memo on it.

There was only 8 feet allowed for Hole No. 7 because they could determine the cutoff (bedrock) a little more accurately. (Bear Creek area)

Knouse: You feel that the program described to you will be to the best interest of the Government in obtaining the results ~~of this program?~~ for this project.

Townsend: Yes.

Knouse: Thank you very much.

F. L. Knouse

Re: Docket No. DMEA 654X (Tin, Columbium-Tantalum, Tungsten), Contract No. [illegible],
Northwest Defense Minerals, Inc.
(Rawlins Mining District)
Lawrence County, South Dakota

Dear Miss Sheehan:

Reference is made to your letter of July 24, 1958, regarding the proposed TERMINATION AGREEMENT and reimbursement for work performed to date.

In the matter of the Termination Agreement, we will further advise you in a few days regarding an extension of the termination date.

Concerning reimbursement to you on work performed to date, when the Termination Agreement has been signed and returned to this office, we will then be in a position to process your accounting report covering the period from October 4, 1957 through November 3, 1957. A tentative review of the report indicates that a part of the expenses claimed are not allowable under the provisions of the contract. Reimbursement on the balance of about $700.00 will not be made until the following have been accomplished:

1. Receipt in this office of the results of analyses of the concentrates from processing the test pit material.

2. Until the churn drill sample material has been processed and the concentrates analyzed, in order to determine the extent of the Operator's portion of the costs of processing and analyses.

3. Until the Operator has submitted its final report in conformance with Article 14 of the contract form; five copies of the report now being required instead of the four noted in Article 14.

4. Until the Operator's accounts have been audited by a DOSA auditor and a Report of Audit released to this office. The audit cannot be scheduled until all matters under items 1, 2, and 3 above have been resolved.

Further in regard to reimbursement on costs of work performed, it is the policy of this office that a minimum of $500.00 of reimbursement to the Operator is deferred pending receipt of the Operator's final report. In this particular case, it is necessary that sufficient additional funds be withheld from reimbursement to you on work completed to offset the Operator's portion of transportation, processing, and analysis costs of the shore drill sample material. Any amounts above what we consider is necessary for these purposes, which become due and payable to you, you can be assured that reimbursement will be made.

We trust that this will answer your inquiries of July 24. If not, we will attempt further clarification.

Very truly yours,

Memorandum

To: Chairman, Operating Committee, DMEA

From: DMEA Field Team, Region III

Subject: Docket No. DMEA 654X (Tin, Columbium-Tantalum, Tungsten), Contract No. Idm-E58, Northwest Defense Minerals, Inc. (Rawlins Mining District), Lawrence County, South Dakota

Enclosed are the following, pertaining to the subject contract:

(a) The original and one copy of the Operator's letter of July 24, 1958.

(b) Two copies of a tabulation showing status of project funds as originally apportioned.

(c) Two copies of a memorandum, dated July 16, 1958, from E. O. Binyon, Mining Engineer, Bureau of Mines, which is in reference to processing the drill hole samples.

(d) Two copies of a memorandum, dated July 28, 1958, from E. O. Binyon, Mining Engineer, Bureau of Mines, also relative to processing the samples.

(e) Two copies of a flow sheet which we propose to submit for bids for processing of the churn drill sample material.

In reference to the Operator's letter, under item (a) above, the matters are discussed below in the order itemized in the Operator's letter:

1. The Operator's accounting report, covering the work performed in 1957, cannot be processed until the TERMINATION AGREEMENT is executed, as noted in the last paragraph on the first page of our memorandum to you, dated May 23, 1958. Furthermore, we are

still of the opinion that the entire amount of Government participation in those costs should be withheld to cover the Operator's portion of the sample processing cost and to provide some leverage to force the Operator to render its final report. For other prior correspondence in the matter, you are referred to the memoranda from this office, dated March 17 and May 21, 1958.

2. Regarding the termination date, the Operator is apparently referring to item 3 of the Termination Agreement relative to Government contribution to the cost of winding up operations. It is assumed that the analytical work is to be considered as a part of the winding up operations. The Operator is definitely at fault for not having completed the analytical work on the test pit concentrates. However, as the Operator was not made aware of the provisions of the Termination Agreement until after July 24, 1958, we recommend that the time fixed during which the Government will contribute to the allowable costs of winding up operations be extended from August 1, 1958 to November 1, 1958.

3. The analytical work is a separate item in the contract, for which reimbursement cannot be made until the work has been accomplished and an appropriate accounting report is received from the Operator. Also, the test pit sample concentrates must be analyzed and the results furnished to us before we would be willing to reinstate the previously suspended costs of 6-1/4 feet of test pit sinking. why?

4. No action or reply necessary.

Referring to the tabulation under item (b), it cost $537.24 to have the churn drill hole samples transported to Denver Federal Center for temporary storage while bids are being obtained for processing of the material. It may cost as much as an additional $100.00 to have the material moved to the site of the successful bidder.

As you will note in the tabulation, there may be sufficient funds remaining under "Analysis" to pay for such in conjunction with processing the material. However, there definitely are not sufficient

funds under "Contingencies," plus the small amount under "Drilling" of the eighteen holes, to cover processing costs. It appears that the "Estimate of Costs" in the contract will have to be amended or adjustments made to provide additional funds specifically to cover the processing costs.

The bids referred to in Mr. Binyon's memorandum of July 16, under item (c), were verbal estimates; therefore are not considered as firm commitments. Regular bid invitations are in process of preparation and will be circulated upon receipt of advice from you after you review this letter.

Referring to the memoranda from Mr. Binyon, under items (c) and (d), he is of the opinion - in which we agree - that processing of the material from the drill holes in the Bear Creek Area will not give conclusive results on which to base ore reserves value or tonnage computation, because of the erratic nature of the samples. Also, the practical approach would be to process and analyze the sample material on short sample intervals, which would permit a determination as to the most valuable portion of the gravel. However, such is not provided for in the contract.

You may consider that we have obligated the Government to process all of the drill sample material from both areas, since we have taken it from the Operator. However, if possible, it is recommended that we forego further work or expense in conjunction with the drill hole samples, especially those from the Bear Creek Area. In addition, since the Operator is delinquent in performing the analytical work on the test pit sample concentrates, it is recommended that the Government have the analysis made from its split of the test pit concentrates and that the Operator be charged for its portion of the costs by deducting from future reimbursement.

Why work & not before

advise operator

In reference to the flow sheet, under item (e), the process deviates slightly from contract provisions. If we are to continue with the processing of the material from at least the Beaver Creek Area, do you consider it necessary to amend the contract provisions contained in Exhibit "A" to Amendment No. 3, which was subsequently amended by Amendments Nos. 8 and 12?

You will note in Mr. Binyon's memorandum of July 28 that he recommends that the contract be amended to permit analysis for gold, in which this office concurs, as it is believed to simplify procedures and provide more accurate results.

?

As the matters relative to the Termination Agreement require action by your office, we are referring the Operator's letter to you

for consideration and reply, in entirety, direct to the Operator, as we believe a reply from your office will have greater effect.

When you have reviewed the matter, we will appreciate your comments and/or advice as to how we should proceed.

CERTIFIED AIRMAIL

Mr. J. W. Townsend,
Alternate Acting Executive Officer,
DMEA Field Team, Region III,
U.S. Department of the Interior,
224 New Customhouse,
Denver, Colorado.

Dear Mr. Townsend:

Your letter dated July 21, 1958 just received with enclosed four copies of Termination Agreement dated April 2, 1958.

Northwest Defense Minerals, Inc. is ready to sign the Termination Agreement. Because of the delay in transporting the churn drill hole samples by Buckingham, due to snow and bad roads, causing the lapse of time between April 2 and the effective date of August 1, 1958 (which date is now at hand), we wish to call your attention to the impossibility of performing paragraphs 3 and 4 of the Termination Agreement by August 1, 1958. Although we are ready to sign the Termination Agreement, our corporation first wishes to be advised on the following points:

1. After signing the agreement and transmitting it, when and how much of the 1957 agreed reimbursable funds is the Denver DMEA going to release to Northwest Defense Minerals, Inc. ?

2. What is the DMEA going to arrange as a Termination date in view of all the facts and loss of time between April 2, 1958 and August 1, 1958 ?

3. The corporation has waited for months for the 1957 reimbursable expenditures. The assays as per agreement and report 4 on the caisson gravels have not been made as yet. This expenditure is a reimbursable item. What do you advise about this ?

4. The operator, Peggy Keenan, is in New York to receive funds for operating capital. As the only person having access to the records,it is necessary to be in South Dakota to arrange wind-up work. We expect to be in Spearfish about September 15, 1958. We spoke to Mr. Knouse, DMEA, Washington, D.C., and he advised this letter to be sent at once.

Please arrange extension and advise on reimbursement of 1957 expenditures.

Yours very truly,

NORTHWEST DEFENSE MINERALS, INC.

Peggy Keenan.

Memorandum

To: Acting Alternate Executive Officer, DMEA Field Team, Region III

From: E. G. Binyon

Subject: Docket DMEA 654 (Tin, Columbite, Tantalite, Tungsten) Contract Idm-B58 Northwest Defense Minerals, Inc. (Rawlins District) Lawrence County, S. Dak.

The churn drill hole samples from the holes drilled by the operator on Bear and Beaver Creeks were received by the Bureau of Mines July 7, 1958. In checking the samples it was noted that three samples, two from Hole 6, Bear Creek, (intervals 6 to 12 and 24 to 30 feet) and one from hole 9, Bear Creek (interval 12 to 15 feet) were missing. Also two of the samples, one from Hole 1, Bear Creek, (interval 18 to 22½ feet) and one from hole 3, Bear Creek, (interval 18 to 26½ feet) are apparently labeled incorrectly and should be 21 to 22½ feet for the sample from hole 1 and 24 to 26½ feet for the sample from hole 3.

In the opinion of the writer there is some doubt as to whether the samples from the holes on Bear Creek should be concentrated, inasmuch as it is believed that all nine holes were drilled into the bed rock from a minimum of 8 feet to over 20 feet in some of the holes. This over drilling was in part due to the softness of bed rock, the inexperience of the driller and operator, and the fact that the churned gravel samples were difficult to distinguish from the churned bed rock.

After the holes had been drilled, a test pit located approximately 25 feet north of the row of holes was sunk to a depth of 6.25 feet where it encountered bed rock. The operator's engineer, however, claimed that the pit had encountered a reef or ridge or a large boulder and not true bed rock. In order to determine the true depth, another pit located a few feet south of the row of holes between holes No. 1 and No. 4 was sunk to a depth of 7 feet where bed rock was again encountered. Based on the depth of the test pits, it is apparent that the samples from the intervals below 7 feet in the holes are worthless and as the samples were taken in 6 foot intervals, the next lower or 6 to 12 foot interval would include 5 to 6 feet of valueless bed rock. The only samples of any value are from the 0 to 6 feet interval in the holes and to combine all samples and use the combined sample for concentration would give entirely erroneous results.

It is therefore recommended that the samples from the churn drill holes on Bear Creek not be concentrated. However, should it be decided to process these samples, then it is suggested that only the samples from the 0-6 feet interval in the 9 holes be used. The samples from the holes on Beaver Creek were correctly taken and if concentrated, the results could be used in calculating value and yardage.

It is further recommended that the alternate acceptable Flow Plan shown on the accompanying drawing be used for concentrating the samples, if it is decided that the work is warranted.

It is noted that the contract specifies that "The contained tin, tantalum, columbium, tungsten, gold and other metals shall be concentrated by panning and the free gold values separated and estimated as value per cubic yard." It is suggested that the contract be amended to delete this clause and to permit assaying for the gold as well as tin, etc. instead of estimating its value. The added cost at $1.50 per sample would be negligible and the results would be reliable.

In considering the cost of the processing, (at least $2,000.00 not including the cost of transportation to the processer) and the value of the results for computing yardage and value of the placers, it is believed that the processing is not warranted and that it would be advisable to terminate the contract.

Memorandum

To: Alternate Acting Executive Officer, DMEA Field Team, Region III

From: R. O. Binyon

Subject: Docket DMEA 654 (Tin, Columbite-Tantalite-Tungsten) Contract Idm-858
Northwest Defense Minerals, Inc. (Rawlins Mining District)
Lawrence County, South Dakota -- Concentration Tests of Churn
Drill samples from Bear and Beaver Creeks

Up to date the operator has completed concentration tests on the gravel excavated from the pits on Bear and Beaver and only the samples from the 9 churn drill holes on Bear Creek and 9 on Beaver Creek remain to be concentrated.

Under Amendment No. 3, Exhibit "A" (Amendment) Phase II the work set up was designed to test the gravel on 70 fists Placer on Bear Creek and Placer 392, Upper Beaver Creek and W. O. Fillmore extension contiguous to Placer 392. As stipulated the first row of holes and one test pit to check the holes were to be drilled and dug as an initial test of these areas. If the results warranted, additional drilling and test pitting was to be done at intervals of 1500 to 2000 down each creek.

The samples of gravel from the pits on both creeks have already been concentrated by the operator and these samples are, in my opinion, more representative of the gravel than the samples from the churn drill holes. This is particularly the case for the samples from the holes on Bear Creek, most of which penetrated bed rock for a considerable distance and therefore make the samples worthless. Since the gold values recovered by the concentration tests were too low to be economic (32.9 cents per cu. yd. (gold value only) from bed rock in the Beaver pit, the highest value, and 3.59 cents per cu. yd. (gold value only) from the lower part of the Bear Creek pit, the lowest.) it is believed that concentration of the churn drill hole samples which are practically worthless for evaluating the advisability of further work should not be done and expenditure of $2,000 to $2,500 for concentrating these samples does not appear to be warranted.

However should it be considered advisable to have the samples concentrated the following data on cost and flow sheet is presented.

Bids for processing the gravel were obtained from three firms:

	Processing	Analytical	Total
Humphrey's Gold Corp.	$1500	$500	$2000
A. T. Sweet	2450	550	3000
Colorado School of Mines Research Foundation	3000	2200	5200

Since Humphrey's Gold Corporation submitted the lowest of the three they were contacted by telephone May 16, 1958 and requested to submit a flow sheet for the proposed test work. A copy of their reply and the proposed flow sheet are attached.

In the flow sheet submitted by Humphrey two changes have been made from the flow sheet authorized by the amended contract. These are

1. 2 screens, 4 and 14 mesh, are substituted for the trommel and classifier.
2. 2 spiral units, 1-5 turn and 1-3 turn, are used instead of the 1 unit in the operator's flow sheet.

The flow sheet proposed by Humphrey, while not conforming to the contract, will, in my opinion, work as well if not better than that approved under the amended contract. It is recommended that, if it is necessary, the contract be amended or an approval be granted to use this flow sheet for concentration of the samples.

Dear Miss Keenan:

Receipt is acknowledged of your certified air mail letter of July 24, 1958, pertaining to the proposed TERMINATION AGREEMENT, which was forwarded for your signature.

Since the questions posed are in large part in conjunction with the Termination Agreement, which was prepared in Washington, we are assembling information for them and will refer your letter to the Washington Office for a direct reply to all questions posed, on which you should hear at an early date.

Very truly yours,

Excerpt from Mr. Mittendorf's diary, 7/29/58:

Broadgate first called this afternoon for information about Northwest Defense Minerals, Inc. (NDMI-65), which is our old friend Peggy Keenan. He said the secretary of the company does not know what is going on. He knows SEC is breathing down the neck of Peggy Keenan.

In her financing scheme, which did not have to be approved by SEC because it was under $300,000, she said in her prospectus that the funds from the first sale of stock would be used to pay off her creditors who had been issued preferred stock. After this was accomplished, additional funds would be used for the development of the property. She has sold stock and spent funds on the property, but no creditor has received a cent.

Bill wanted to know if the project had been certified. I told him it had not and that we are awaiting the results of the samples, which still have to be processed.

He was interested in knowing if any work under Stage 3 had been completed. I told him none had.

Memorandum

To: The File

From: F. L. Knouse, Acting Director
Div. of Rare & Miscellaneous Metals

Subject: Telephone Call - Peggy Keenan (N.Y.)
Docket No. DMEA-654

Keenan: I have just received the Termination Agreement from your Denver, Colorado office, dated April 2, 1958, for execution. I am ready to execute this document but notice under Item 3 of the agreement that I have only until August 1, 1958 to complete the winding-up action including the final geological and engineering report. Also, I notice that the agreement does not state when the money will be paid for the work we did during 1957 as well as the amount that will be released.

Knouse: I can understand that since you just received the agreement that you will not be able to complete the final report and other requirements of the agreement by August 1. Since the Denver office is handling the administration of this contract you should write them and explain that you are willing to comply with all the terms of the agreement except for the winding-up action provided the time to complete this action is extended; and give them a definite date you can complete this work. Also, ask them when they will release the funds for the work that was completed, and the amount of funds that will be released. You understand some funds will be withheld until the final report and other winding-up actions are completed.

Keenan: Yes, I understand funds will be withheld but the Denver office have already withheld $100 for winding-up action for work done during 1955, and I would like to know definitely what amount will be released if I sign the Termination Agreement and before the other winding-up action is completed.

Knouse: The Denver office will be able to answer all these questions when you write to them.

Keenan: I will write to them at once. Thank you.

F. L. Knouse

Gentlemen:

Our letter to you of June 16, 1958 requested that you check into the matter of accessibility of the Hanson Property in conjunction with our authorization for you to transport drill hole sample material from there to the Denver Federal Center.

Since considerable time has elapsed and we have neither received the material in question nor advice from you in the matter, please advise by return mail as to whether or not you are still interested in transporting the material to Denver as previously arranged for; if so, when the material can be expected.

Very truly yours,

Re: Docket No. DMEA 654X (Tin, Columbium, Tantalum, Tungsten)
Contract Ida-858
Northwest Defense Minerals, Inc.
(Rawlins Mining District)
Lawrence County, South Dakota

Dear Miss Keenan:

The churn drill samples have now been transported from the project site to the DMEA office at Denver, therefore consistent with instructions from the Washington office we are enclosing the Government's, Audit, Finance Office, and Field Team copies of a Proposed TERMINATION AGREEMENT, which has been prepared to terminate the contract, effective November 1, 1957.

If the proposed Termination Agreement is satisfactory, all copies are to be signed by an official of Northwest Defense Minerals, Inc., authorized to sign such an instrument, the signer's title inserted, the corporate seal affixed, and all copies promptly returned to this office; upon receipt of which the "Operator's Copy" will be forwarded to you.

Very truly yours,

Dear Miss Hansen:

Your letter of July 5, 1958 to Mr. E. O. Minyen was forwarded to this office for appropriate action.

Upon receipt of your letter of June 9, 1958, Buckingham Transportation, Inc., Rapid City, South Dakota, was again contacted regarding transportation of the drill hole sample material to Denver. However, to date the material has not been received and we are again contacting them regarding the matter.

DMEA
DEPARTMENT OF THE INTERIOR
JUL 10 1958
REGION III
DENVER, COLORADO

Dear Mr. Bunyon:

On June 9, 1958, we wrote to the Administrator DMEA, Denver, Colorado, and referred to Mr. C. O. Mittendorf's letter of May 13, 1958. No answer has been received.

With reference to the Buckingham transportation delivering the churn drill hole samples to a destination designated by DMEA:

It is reported to us that the roads to the Northwest Defense Minerals, Inc. property have been open for two months and we have hoped the matter could be disposed of.

Since the reimbursement of the 1957 expenditures seem to be delayed by the status of the removed churn drill samples is it not possible for you to expedite the matter with current good weather prevailing?

We would appreciate the reimbursement at the earliest date. Please advise Belmont Plaza.

Yours very truly,
Northwest Defense Minerals, Inc.
Leo Keenan.

Gentlemen:

In reference to matter discussed in your letter of May 7, 1958, we today received a letter from Miss Peggy Hansen advising that road conditions in the area are now favorable for the transportation of the sample material to the Denver Federal Center, Denver, Colorado, as previously arranged with you.

We will appreciate it if you will check into the matter and advise us as to when we may expect to receive the material.

Re: Docket No. DMEA 654, No. Adm-E58

Dear Sir:

With reference to a letter from Mr. C.O. Mittendorf, Administrator DMEA Washington, DC, dated May 13, 1958,

Mr. Mittendorf advised that a transportation company handling the matter of moving the churn drill samples from Northwest Defense Minerals Inc. had been delayed because of road conditions. Please be advised that reports from the area indicate road conditions favorable to this type transportation.

Could we therefore proceed as soon as possible and arrange reimbursement for 1957 expenditures.

The above address is our headquarters until further notice.

Very truly yours,
Northwest Defense Minerals Inc.
Mary Keenan Pres.

Memorandum

To: Chairman, Operating Committee, DMEA

From: Acting Executive Officer, DMEA Field Team, Region III

Subject: Docket No. DMEA 654X, (Tin-Columbium-Tantalum-Tungsten) Contract Idm-E58, Northwest Defense Minerals, Inc., (Keenan Properties), Lawrence County, South Dakota

Enclosed are two copies of a letter dated May 14, 1958, from the subject Operator to Mr. James M. Riley, Mining Engineer, U.S. Bureau of Mines, Rapid City, South Dakota, requesting receipt for the five copies of a progress report and 18 test pit sample splits, which were delivered by the Operator to the Rapid City Office of the Bureau of Mines. Also enclosed are two copies of a relative memorandum dated May 19, 1958, from Mr. Riley to this office.

Five copies of the progress report were delivered to this office November 25, 1957, and the test pit sample splits have been received at the Denver Experiment Station. One copy of the progress report was forwarded to your office with our memorandum of March 17, 1958.

The Operator states that the processing of Form MF-104, Operator's Monthly Report and Voucher, for October 4, 1957, through November 3, 1957, is contingent upon delivery by the Operator to DMEA of a receipt for the progress report and the test pit sample splits. Apparently the Operator has been misinformed by its Washington representative.

In accordance with instructions contained in your letter of April 3, 1958, to this office, the Termination Agreement will not be presented to the Operator for execution until the churn drill samples are delivered from the project site to Denver. The Termination Agreement contains provisions which will make it possible to process the voucher for the period from October 4, 1957, through November 3, 1957; therefore, the Termination Agreement must be executed before the Voucher can be processed.

No action necessary.
See our letter of May 27 to Hartman. It is applicable to this memo as well as to preceding correspondence.
MC.

The Operator has indicated that the test pit concentrate samples will not be analyzed until reimbursement is received for the Government's share of the costs for the period October 4-November 3, 1957. For reasons previously outlined, we intend to withhold the entire amount due the Operator. This resolves into a confusing situation.

We request that your office inform the Operator that receipts are not required for the progress report and test pit sample splits, and also outline to the Operator the matters which are prerequisite to processing the voucher. A copy of your letter should be sent to Mr. Riley at Rapid City, South Dakota.

Mr. J. M. Riley, Engineer
U. S. Bureau of Mines
Rapid City, S. Dak.

Dear Mr. Riley:

We are advised by our vice president, Mr. James E. Bacon, Washington, D. C. that the DMEA, Washington and Denver offices demand a receipt from our Corporation, signed by the Rapid City Bureau of Mines Engineer, that in November (I do not have the date here) 1957, the Bureau of Mines agency received the various concentrates gold samples and 5 copies of the report from me for the Denver office. I remember both Mrs. Slater and you spoke to me about the material delivered and we looked at some samples, but I do believe no receipt was given. The Denver DMEA refuses to reimburse our expenditures without our delivering this receipt. Would you please verify the record and advise at your earliest convenience, enclosing a receipt of what the boxes contained? I will be here 2 weeks longer.

I do hope you delivered 10 lbs. of BeO concentrate 10/23/56 to Mr. M. J. Donachie, formerly President of Beryllium Corp. He is very enthusiastic over our future in Keystone. He wants to do some work with upgrading the concentrates and wishes to meet you when we all return to South Dakota.

Please answer this letter.

Yours very truly,

NORTHWEST DEFENSE MINERALS, Inc.

Memorandum

To: W. H. King, Executive Officer, DMEA, Region III

From: Acting Superintendent, Rapid City Experiment Station

Subject: DMEA Docket No. 654-X, Contract E-58, Northwest Defense Minerals, Inc., Lawrence County, S. Dak.

We have received a letter from Miss Peggy Keenan, copy of which is enclosed, concerning a progress report and sample splits which she left at this office in November, 1957.

Our records show that we sent the five copies of the report to E. N. Harshman on November 21, and that the 18 sample splits were delivered to Mr. J. F. Shaw at the Denver Federal Center by Mr. Clarence M. Harrer. Our letter of transmittal indicates they were going by parcel post but Mr. Harrer stopped in the office on the way to Denver and they were sent by him instead.

Please advise us concerning the receipt Miss Keenan requests.

Re: Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Contract No. Idm-E58
Northwest Defense Minerals, Inc.
Keenan Properties
Lawrence County, South Dakota

Dear Mr. Harshman:

The Operator's letter of May 14, enclosed with your memorandum of May 21, was meant for you. As you know, the Administrator's letter of May 13 requested the Operator to keep you informed regarding its address. Enclosed are two copies of the Operator's reply, dated May 16, 1958.

The Administrator's letters of April 3 and May 13 have explained the present status of the project to the Operator. Any attempt to explain the matters mentioned in the Operator's letter of May 14 would be repetitious and serve only to further confuse the situation.

It is suggested that no action be taken until the churn drill samples have been received. The Termination Agreement should then be forwarded to the Operator. After receipt of the executed Termination Agreement and after the churn drill samples have been processed and analyzed and all costs determined, the Operator should be notified as to the amount originally due it, the amount of its share of the cost of transporting and processing the samples, and the amount withheld pending closing procedures.

Memorandum

To: Chairman, Operating Committee, DMEA

From: Acting Executive Officer, DMEA Field Team, Region III

Subject: Docket No. DMEA 654X (Tin-Columbium-Tantalum-Tungsten) Contract Idm-E58, Northwest Defense Minerals, Inc., (Keenan Properties), Lawrence County, South Dakota

Enclosed is a letter dated May 14, 1958, from the subject Operator to the Administrator, DMEA, which was apparently mailed to this office by mistake. We note that the Operator is expecting reimbursement for the Government's share of the acceptable costs for the period from October 4, 1957, through November 3, 1957.

As indicated in our memorandum to you dated March 17, 1958, we anticipate that an amount of $885.70, will be due the Operator when Form MF-104 for the period from October 4, 1957, through November 3, 1957, is processed. Unless otherwise instructed, we intend to withhold a minimum of $500.00 pending closing procedures, in addition to an amount sufficient to cover the Operator's pro-rata share of the cost of transporting, processing and analyzing the churn drill samples. Under the circumstances, we believe that the entire amount due the Operator must be withheld if the Government's interests are to be adequately protected.

If you are in agreement with the above, we request that the Operator be so notified in writing. Otherwise, please advise this office as to the amount which we shall withhold from reimbursement to the Operator when the voucher is processed.

The chrun drill samples have not as yet been transported from the project site to Denver.

Re: Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Contract No. Idm-E58
Keenan Properties
Lawrence County, South Dakota

Dear Miss Keenan:

I am now in a position to answer your letter of January 24 concerning an agreement that will permit the payment for the contract work completed during 1957.

An agreement has been prepared and routed through the Denver Office, and it will reach you in due course. This agreement, when signed by you, will allow payment for the work completed prior to November 1, 1957, as is described in the contract, except for the amount the Government normally withholds until a final audit of the account is made.

You will note in Amendment No. 3, under "Estimated Cost of the Project, (1) Independent Contract," that the cost of $5.50/ft. for churn drilling and $25.00/ft. for test pitting includes washing the drill cuttings and excavated material, concentrating the contained tin, tantalum, columbium, tungsten, gold, and other minerals or metals, and separating the free gold from the concentration. These costs per unit are the maximum amounts to which the Government will contribute for this work.

Sincerely yours,

(for)

Administrator

Dear Mr. King:

We are enclosing the original and five copies (with two extra copies) of a Termination Agreement for the above contract, signed by the Administrator. The agreement consists of two pages.

This agreement should not be presented to the Operator for signature until the Government receives the recovered material from the drill holes now stored at the property. Also, no additional payment should be made to the Operator before the agreement is signed. After the agreement is signed, please make the usual distribution of the document.

The processing of the recovered material from the drill holes should follow the procedure described in Amendment No. 12 and prior related amendments, if applicable.

Expenses for transporting and processing this material are chargeable costs to Item (8) Contingencies, and for analytical work to Item (7) Miscellaneous, in Amendment No. 3. The Termination Agreement allows payment for the work described in the contract which was completed by the Operator before November 1, 1957.

In our letter of even date to the Operator, it was informed this agreement would be routed through your office.

TERMINATION AGREEMENT

It is agreed this ___ day of _____, 1958, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, hereinafter called the "Government," and Northwest Defense Minerals, Inc., hereinafter called the "Operator," parties to that certain Exploration Project Contract Idm-E58, Docket No. DMEA-654, dated July 16, 1951, as amended, hereinafter called the "Contract," that:

1. Effective November 1, 1957, the Contract and all obligations of the parties thereunder, except as otherwise herein expressly provided, shall be and are hereby terminated.

2. The Government shall contribute to the allowable costs incurred prior to said effective date, and shall contribute to the allowable costs incurred or to be incurred beginning with said effective date and ending not later than August 1, 1958, in performing winding-up and settlement actions provided for in the Contract, including (a) the delivery to a laboratory of excavated materials, and the processing and analyses of samples, and (b) the making and rendering of a comprehensive final geologic and engineering report.

3. The Operator shall promptly perform all winding-up and settlement actions provided for in the Contract, including the rendering of the final report and final account.

4. All rights of the Government respecting certification of discovery or development, percentage royalty and liens to secure payment thereof, reports (including preservation of Operator's records), accounts, audits, and the right to recover any overpayment, are hereby preserved.

5. The Operator hereby releases and agrees to save the Government harmless from all claims or demands under or arising out of said Contract, except as otherwise provided in this Termination Agreement.

Butrin
Sawyer
Appl. Sol. Off

IN WITNESS WHEREOF, these parties have executed this agreement as of the day and year first above written.

Memorandum

To: Chairman, Operating Committee, DMEA

From: Executive Officer, DMEA Field Team, Region III

Subject: Docket No. DMEA 654X (Tin-Columbium-Tantalum-Tungsten) Contract Idm-E58, Northwest Defense Minerals, Inc., (Rawlins Mining District), Lawrence County, South Dakota

Reference is made to your letter of March 6, 1958, regarding processing costs for the material from the project churn drill holes.

Through oversight we neglected to take into consideration in our memorandum of February 3, 1958, that a considerable volume of sample material had been processed subsequent to the original estimates obtained for the processing and analytical work. Verbal estimates recently obtained for the processing and analysis of 18 composite churn drill samples, comprising approximately three (3) cubic yards of material are tabulated below:

Firm or Organization	Processing	Analytical	Total
Humphrey's Gold Corp.	$1500.00	$ 500.00	$2000.00
A. T. Sweet	2450.00	550.00	3000.00
Colorado School of Mines Research Foundation	3000.00	2200.00*	5200.00

*The Research Foundation estimate includes separate analysis of the heads, tails, and concentrates from each hole for tin, columbium, tantalum, tungsten and gold.

No firm bid can be submitted until the samples have been received in Denver and made available for inspection; however, if we are able to obtain a firm bid comparable to the lowest estimate received the total cost will be approximately as follows:

Processing costs	$1500.00
Transportation of samples to Denver	150.00
Analysis	500.00
Total estimated cost	$2150.00

In reference to the last paragraph of your letter we fail to find in the contract a specific estimate for the processing of the drill hole material as the processing is included as a part of the drilling at $5.50 per foot. If the unit cost for churn drilling is not to be exceeded, only $174.25 is available for processing the samples.

As requested in your letter we are enclosing one copy of the Operator's report for the period, October 4, 1957, through November 3, 1957. The signed copy of Form MF-104 has been retained in this office, and a photocopy has been substituted for your information.

> All of the reported labor was expended in processing the test pit samples, for which no additional costs are allowable, therefore, the labor costs will be disallowed.
>
> The previously disallowed cost for $6\frac{1}{4}$ feet of test pit work at $25.00 per foot, will be reinstated contingent on receipt of the analytical results for all samples.
>
> It is anticipated that when the voucher is processed an amount of $885.70 will be due the Operator. This includes the amount of $100.00, which was withheld from the voucher for the period, November 23, 1955, through April 15, 1956.

As suggested in your letter of November 21, 1957, it is the present intention of this office to withhold a minimum of $500.00 from reimbursement to the Operator pending closing procedures, and in addition, to withhold an amount sufficient to cover the Operator's pro rata share of the estimated cost of processing and analyzing the churn drill samples. It is, therefore, not likely that any appreciable amount will be available for reimbursement to the Operator until the account is closed.

In order to assist you in answering the Operator's letter of January 24, 1958, we have the following comments to offer:

1. We were unable to furnish the Operator with definite information concerning processing of the current voucher, except that the completion period must be extended prior to any reimbursement, and that when the voucher is processed a

considerable amount will be withheld pending completion of all processing and analytical work, and pending closing procedures.

2. All requests from the Operator concerning preparation of voucher and accounting Forms MF-104 and MF-104A, were answered promptly. Copies of all relative correspondence were forwarded to your office.

We will appreciate receipt of instructions and specifications for the processing of the material and analytical work to be performed on the churn drill samples, so that we will be in a position to advertise for firm bids immediately upon delivery of the samples to Denver.

Memorandum

To: Executive Officer, DMEA Field Team, Region III

From: E. O. Binyon

Subject: Docket DMEA 654X (Tin, Columbium, Tantalum, Tungsten)
Contract Idm-158, Northwest Defense Minerals, Inc.
(Rawlins Mining District) Lawrence County, South Dakota
Progress report for October 4 - November 3, 1957

According to the operator's report, 15.106 cubic yards of gravel from the Beaver Creek test pit and 7.699 cubic yards from the test pits No. 1 and No. 2 on Bear Creek were washed and concentrated during the subject period. The yardage from No. 1 and No. 2 test pits (Bear Creek) mounted to 3.39 and 4.309 cubic yards respectively.

In checking the MF-104 and MF-104A forms and documentation of expenditures, it is noted that for the $30.71 charged for gas and oil, there are no service station slips and only $9.21 is supported by photostats of cancelled checks and a statement by the engineer that the total amount has expended. It is believed that the expenditure is properly documented and it is recommended that the amount be allowed. The operator has charged $279.17 for labor under the Contingency item and has documented this charge only by a listing of the men, hours worked and pay rates per hour with the total wages. This documentation is certified by the engineer. The labor was used for processing; moving samples from lines to the processing equipment, handling of the samples through the flow sheet for the processing tests and handling of waste and concentrates. There was no need for labor for any other purpose. Under the terms of the Contract, the total prices per foot of $5.50 for churn drilling and $25.00 per foot for test pitting included washing excavated material, concentrating contained tin, tantalum, columbium tungsten, gold and other minerals or metals and separating the face gold from the concentrates. Therefore, the claim for labor although under Contingencies is not allowed and the amount is deducted from the total amount claimed.

As the results of the test are incomplete as of this date, only the amount of gold having been reported, it is suggested that payment for 6-1/4 feet of test pitting (Bear Creek) continue to be withheld.

The Government's share at 90 percent participation of the amount claimed less the charge for labor ($995.92-279.17) or $716.75 amounts to $645.08. It is recommended that the full amount $645.08 be withheld pending receipt of the results of the processing test and a final report by the operator.

The Contract expired October 1, 1956.

REGION III
DENVER, COLORADO

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

PROGRESS REPORT #4

DEFENSE MINERALS EXPLORATION ADMINISTRATION

CONTRACT #654X PROJECT Idm E-58

Placer Gravel Concentration

Commencing October 14, 1957 and lasting through November 8, 1957 work was carried on under the supervision of the undersigned. 22,805 cubic yards of placer gravel, which had been excavated from test pits on Beaver and Bear Creeks in October and November 1955 was washed and concentrated. This gravel had been stored under cover in bins at the Northwest Defense Minerals Inc., plant in South Dakota. Each bin was measured. The gravel contents of the bins was as follows.

(a) Balance of Beaver Bedrock Gravel remaining in bin from November 1955 test.	2.131	cu. yd.
(b) Bin marked Beaver #3	7.115	" "
(c) Bin marked Beaver #2	3.220	" "
(d) Bin marked Beaver #1	2.540	" "
	15.106	" "
(e) Bin marked Bear #2	4.309	" "
(f) Bin marked Bear #1	3.390	" "
	7.699	" "

Mill Process Used to Recover Concentrates

As previously outlined in progress report #1 the undersigned planned to reduce the gravel samples to concentrate form suitable for assaying.

The equipment used in producing the concentrates consisted of the following. Denver Mechanical Gold Pan, with washing section consisting of punched steel plate, 3/8" round holes; 1½" sand pump;

Humphrey Spiral; Denver 4" x 8" Mineral Jig. The Denver Gold Pan was fitted with a 14 mesh shaker screen, which was used as a classifier to supply the minus 14 mesh sand to the Humphrey spiral.

All of the placer gravel stored in the bins was hand shoveled into the Denver Concentrator. A water pump, an integral unit on the Denver Concentrator supplied wash water under pressure. After washing, all plus 3/8" material was hand shoveled to waste. All minus 3/8" sands were concentrated in the Denver machine. The original 1/8" screen supplied with the Denver Concentrator was removed and was not used. This allowed all of the minus 3/8" sands to fall directly onto tray #1. Tray #1 was fitted with a copper tray. No mercury was used on the tray. From tray #1 the minus 3/8" sands passed to tray #2 and then to tray #3. Trays #2 and #3 were bottomed with rough rubber blankets. From tray #3 the minus 3/8" sands were passed over the 14 mesh shaker screen mounted on the discharge lip of the Denver Concentrator. The plus 14 mesh sand, after concentration overflowed to waste. All minus 14 mesh sand was pumped to a full size Humphrey Spiral. The concentrate splitters on the spiral were adjusted to cut a wide band out of the concentrate stream. The rougher spiral concentrates were subsequently re-run over the spiral to reduce the volume of concentrate.

Six runs were made on the stored placer gravel. Each bin was treated as a separate sample. The purpose, to determine the mineral content of the various horizons sampled during the excavation phase of the project. The concentrating machinery was thoroughly cleaned up after each run. The concentrates recovered from each run was placed in wash tubs and was transported to Spearfish, South Dakota.

Each run of rougher Denver Gold Pan concentrates produced weighed approximately 100 pounds. At Spearfish, where city water and electricity was available it was possible to finish the concentrating under more favorable conditions than at the Northwest Defense Minerals Inc., mill. At Spearfish the samples were hand fed to a 4" x 6" Denver Mineral Jig. Each run produced a quantity of hutch concentrate as well as a jig bed concentrate. After each run the jig bed was panned, the steel shot bedding being removed with a magnet. The heavy minerals meraining after panning were labeled jig bed concentrates.

Each jig concentrate sample was bottle and pan amalgamated to recover the free gold values.

The following table gives the weights of the concentrates produced.

Sample	Measured yds placer gravel	Concentrates Produced				
		Jig hutch grams	Jig bed grams	Spiral pounds	Gold mg.	gold value Cu. yd.
Beaver Bedrock	2.131	1991	214	138.75	700.84	$32 9/10
Beaver #3	7.215	752.5	390.8	130	1991.40	17 8/10
Beaver #2	3.220	321.2	260.2	73.5	883	17 4/10
Beaver #1	2.540	508	138	25	344	13 5/10
Bear #2	4.309	1258.5	693	208	154.6	3 59/100
Bear #1	3.39	335.0	313.5	127	174	5 14/100

Observations

Periodic pan tests were made of the tailings to check the recovery of concentrates. No visible black sand was observed in the tailings.

The feed to the Denver Concentrator was approximately ½ cubic yard per hour. This is well below the rated capacity of the machine which is rated at 1 1/2 to 2 yards of bank run gravel per hour. It was deemed

advisable to maintain the feed at a low level to insure adequate washing and concentrating action. The Beaver and Bear gravels contain a high percentage of fine sands as compared with other Black Hills placer gravels tested by the undersigned.

Of interest is the fact that approximately 75% of the gold recovered had been previously amalgamated with mercury. Considerable tramp metal consisting of tacks, nails, small pieces of wire, bolts, nuts, lead shot, bullets, and miscellaneous bits of metal was recovered during the concentrating tests.

This indicates that prior work has been done in the area. It is assumed that the large quantity of heavy black sand contained in the Beaver and Bear creek gravels is responsible for the high gold loss by the early day hand shovel and sluice box operators. No attempt to recover the minerals contained in the heavy sands was made by the early pioneers. Their interest was only for the placer gold contained in the stream gravels.

Beaver Creek Test Pit

15.108 cu. yd. of gravel was concentrated during the October 1957 test. 3920.24 mg. of free gold was recovered by amalgamating the concentrates. Estimating the value at $1.00 per gram, the value would be $3.92 or 26¢ per cubic yard.

Bear Creek Test Pit

7.699 cu. yd. of gravel was concentrated during the October 1957 test. 328.6 mg. of free gold was recovered. Assuming the same value per mg, the total value would be 32 86/100 ¢ or 4 27/100¢ per cubic yard.

Samples

After amalgamation all jig samples were dried and weighed, rolled on apaper sheet and were split into equal parts. One half of each sample will be retained for assay by Northwest Defense Minerals Inc; the other half to be sent to the D. M. A. agency. All concentrate samples were placed in polyethylene clear plastic bags. Identification tags were placed inside of each bag. All bags were also tagged externally. The free gold samples were also equally split as near as possible and placed in individual glass vials. Each vial was tagged for identification.

The Humphreys spiral samples saved for assay and submitted to Northwest Defense Minerals Inc. and D. M. A. weigh 500 grams each. Approximately 700 pounds of spiral concentrates were produced from all six test runs. Representative splits were made from each run and should represent the values contained therein.

Re: Docket No. DMEA-654
(Tin, columbium-tantalum, tungsten)
Contract No. Idm-158
Northwest Defense Minerals, Inc.
Keenan Properties
Lawrence County, South Dakota

Dear Mr. King:

In your memorandum, dated February 3, you estimate the Operator's portion of cost to transport and process the material from the drill holes will be about $1,000.00. Since the contract is on a 90 percent Government participation basis, your estimated total cost to transport and process this material would be about $10,000.00. Is that correct?

The Field Team's memorandum, dated February 11, 1957, indicated there are about 3 cubic yards of material recovered from the drill holes. Also, three cost estimates are quoted: $2,500.00; $3,000.00 to $4,000.00; and $8,500.00, respectively, to process about 30 cubic yards of material recovered from the test pits and drill holes.

Since the Operator claims it has already processed about 90 percent of all material (i.e., all the test pit material), it is not clear why your cost estimate to transport and process 10 percent of the material exceeds the estimated cost to process all the material. With the processing cost, we understand there would be an additional expense for transporting the material to the laboratory.

As your estimate exceeds the amount allowed for this work in the contract, please send us a detailed cost estimate. Also, please forward one of the Operator's MF 104's for the work completed during 1957 with comments on the Operator's letter, dated January 24, so that we can answer the letter.

Sincerely yours,

George C. Selfridge
Chairman, Operating Committee (JLB)

Memorandum

To: Chairman, Operating Committee, DMEA

From: Executive Officer, DMEA Field Team, Region III

Subject: Docket No. DMEA 654X (Tin, Columbium-Tantalum, Tungsten), Contract No. Idm-E58, Northwest Defense Minerals, Inc. (Keenan Properties), Lawrence County, South Dakota

Enclosed are two copies of a letter, dated January 29, 1958, from Buckingham Transportation, Inc., and two copies of our reply of February 3, 1958, pertaining to transporting of the material excavated from the 18 drill holes which were sunk under the subject contract.

Further reference is made to your letter, dated November 21, 1957, to E. N. Harshman regarding an extension of the completion date. Since, in all probability, it will be late in the spring before the material can be transported to Denver and some time thereafter before processing of it can be completed, it appears that it will be necessary to extend the completion date to at least October 1, 1958.

On a recent contact with this office by telephone, Miss Keenan indicated that analysis of the concentrates from processing the material excavated from test pits would not be possible until reimbursement was received for the Government's portion of the costs of processing the material. Since a major portion of the cost of processing material is to be included within the maximum unit cost per foot of test pitting, there would be little or nothing coming to the operator even if all other matters had been resolved. We estimate that the Operator's portion of the costs of transporting and processing of the material from the drill holes will be in the neighborhood of $1,000.00.

Dear Mr. Peterson:

Thank you for your letter of January 29, 1958, advising of the conditions in the project area which prevent you from transporting the material as previously arranged.

We will greatly appreciate it if you will advise this office when the material is accessible, so that we can either confirm the previous instructions relative to transporting the material or issue new instructions should there be any change in plans regarding it.

Very truly yours,

Re: Docket No. DMA 654X
Contract No. IDM-E58
Northwest Defense Minerals, Inc.

Dear Mr. King:

Reference is made to your letter of January 23 in response to our letter of January 21 regarding ore samples at Tinton, South Dakota.

Our Company thought that we might be able to get this material out for you by using smaller trucks; however, we find that it is not possible. Yesterday we sent up a smaller unit in an attempt to get this material out for you, but our driver was unable to do any good. It just looks like a case of leaving it until this Spring when the snow has thawed and the area has cleared up.

We are indeed sorry that we were not able to get this out, as we are as desirous of moving this shipment as your Company.

Yours very truly,

James L. Peterson

OFFICE OF THE PRESIDENT

January 24, 1958

Mr. C. O. Mittendorf, Administrator
DMEA, Rare & Miscellaneous Metals
Department of Interior
Washington, D. C.

Dear Mr. Mittendorf:

ON January 23, 1958 I was in Denver, Colorado and spoke to Mr. W. H. King, DMEA, regarding reimbursement of expenditures documented in Phase II, report 4, MF104, MF104A. He advised that he was doubtful about reimbursement.

He was vague about date of contract expiration and said "they" were to send in an amendment, and no amendment from Washington D.C. had been received.

Our Corporation met the 1957 date of processing the materials from the 1955 caisson excavations before the November deadline; we notified the Rapid City Bureau of Mines of the delivery of recovered concentrates and separated gold. It was necessary for the engineer to then write report four, and five copies were delivered to the Rapid City Bureau of Mines.

Several requests were sent in to the Denver DMEA for the proper figures to carry forward from the 1955-56 MF104, because amounts up to $750. expenditure had been disallowed.

After weeks passed we received the allowed figures broken down in a copy of MF104 from the Denver DMEA and used these figures to carry forward. The total amount expended with vouchers in 1957, Oct. 4 through Nov. 3 was $995.92. If an amendment is necessary in order to authorize reimbursement may we please have it? After we receive reimbursement of report 4 expenditures we will then authorize assays of material recovered as per directives.

Our Company has acquired a 150 ton a day mill at Keystone, S. Dak. with flotation process equipment and will process feldspars containing beryl,- concentrating beryl to a 10% beryllium oxide after the Petroleum Sulphanate process by the Bureau of Mines. We control approximately one million tons of ore bearing a reported beryl content, acceptable to the process requirements.

Yours very truly,

NORTHWEST DEFENSE MINERALS, INC.

Re: Docket No. DMA 654X
Contract No. Idm-258
Northwest Defense Minerals, Inc.

Gentlemen:

Reference is made to your letter of January 21, 1958 in reply to our letter of January 17 concerning the transporting of material from the Northwest Defense Minerals, Inc. property at Tinton, South Dakota to the Denver Federal Center, Denver, Colorado.

As an expedient in obtaining the material in question, you are authorized to make the necessary trips with a small transportation unit from the place of storage of the material to where it can be loaded on a larger unit for transportation to Denver, it being understood that the use of the smaller unit will increase the cost somewhat over the normal freight rate from Tinton to Denver, Colorado.

Very truly yours,

Re: Docket No. DMA 654X
Contract IDM-E58
Northwest Defense Materials, Inc.

Dear Mr. King:

We are in receipt of your letter dated January 17 regarding the above shipment which is at Tinton, South Dakota. Our Company is very anxious to get this shipment out for you; however, the conditions have not improved since our last contact with you. As things look now it would be impossible to get a unit to the site for loading which could take the entire shipment at once, and possible would not be able to get in until this Spring.

There is one other solution to getting the shipment out, however, and this would be to run several trips with a smaller unit. In this case we would have more expense which would have to be charged against the transportation. It would probably involve an extra $100 over the regular freight rate from Tinton to Denver, Colorado.

Would you advise by return mail what your pleasure would be regarding the shipment as outlined above.

Yours very truly,

James L. Peterson

Re: Docket No. DMA 654X
Contract Idm-E58
Northwest Defense Minerals, Inc.

Gentlemen:

On or about November 25, 1957, Mr. E. O. Binyon, of this office, made arrangements with you for the transportation of certain barreled samples from the Northwest Defense Minerals, Inc., property, to the Defense Minerals Exploration Administration, Building 20, Denver Federal Center, Denver, Colorado, for which you issued a Uniform Straight Bill of Lading, dated November 25, 1957.

We were given to understand that an attempt was made at the time of Mr. Binyon's visit to load the material, which is to be transported; however, because of snow conditions at the project, the loading could not be accomplished at that time, and promises were given that the material would be loaded and transported to the Denver Federal Center as soon as possible.

Since considerable time has elapsed and the material has not been received we will appreciate advice as to the status of the matter and the approximate date the material can be expected.

Re: Docket No. DMEA 654X
(Tin, Columbium-Tantalum, Tungsten)
Contract No. Idm-258
Northwest Defense Minerals, Inc.
(Rawlins Mining District)
Lawrence County, South Dakota

Dear Miss Keenan:

Reference is made to your letter of December 30, 1957, whereby you forwarded five copies of Forms MF-104 and MF-104A for the period October 4 through November 3, 1957, and included nine cancelled checks as documentation of charges for which you requested receipts.

The cancelled checks submitted do not in themselves contain sufficient information to be acceptable as documentation of charges for Gas and Oil, Meals and Quarters, and Labor. Therefore, the nine cancelled checks are returned herewith.

Charges for "Gas and Oil" must be documented by station delivery slips showing quantities involved, and the whole must be supported by a statement from the Project Supervisor as to the purpose for which the supplies were used to benefit the project work.

Charges for "Meals and Quarters" must be documented by an itemized listing, supported by a certification from the Project Supervisor that the charges were a necessary cost in performing the project work.

Charges for "Labor" must be documented by a transcript of the payroll, showing the days worked and the hourly or daily rate of pay. Also, the transcript of payroll must be certified by the Project Supervisor as being correct and constituting charges for work on the project.

When the required documentation is received, the Report and Voucher will be placed in line for processing.

Very truly yours,

Original signed by
W. H. KING

Dear Mr. Kawecki:

Mr. W. H. King of our Denver, Colorado, office forwarded your letter, dated December 26, 1957, for reply.

It is noted that you desire the data acquired by this Agency in the study made of the deposits on the subject property. Reports made by Government engineers on DMEA projects are confidential. However, if you will obtain formal authorization from Miss Peggy Keenan to show you the reports submitted by the above-referenced company, such reports could be shown to you in this office, but we are unable to send them to you.

Since these reports were submitted by the Northwest Defense Minerals, Inc., it is suggested that you request Miss Keenan to furnish the required copies of the reports.

Sincerely yours,

C. O. Mittendorf
