AIR MAIL

Memorandum

To: Fiscal Section, Division of Administrative Services
Office of the Secretary
Department of the Interior
Washington 25, D. C.

From: Hugh M. Connors, Acting Field Officer, OME, Region III

Subject: Docket No. DMEA-4568 (Molybdenum)
Contract No. Idm-E1094
Molybdenum Corp. of America
(Questa Mine)
Taos County, New Mexico

In conformance with OME Circular 1, enclosed are the original and two copies of Forms MF-104 and MF-104A with attached maps and other pertinent data, Operator's Narrative Report, and Engineer's Inspection Report covering work performed during the month of June 1960.

It is considered that the Operator has complied with the intent of the contract, and the work for which reimbursement is claimed is acceptable to the Government. All of the work was performed at Fixed Unit Cost under the short form of contract on Form MF--200A; therefore, documentation of the cost is not required.

Payment is recommended for $2,653.50, which is 50% of the amount reported on Form MF-104, contingent on your verification of applicable rates, and arithmetical accuracy within the report.

Continue to withhold the amount of $500 pending receipt of the Operator's final report, and an audit of the accounts and the resolution of matters pertaining to closing the contract.

Original signed by

Hugh M. Connors

August 8, 1960

Memorandum

To: Hugh M. Connors, Acting Field Officer, OME, Region III

From: T. N. Bemslo

Subject: Progress Report for June, 1960
Decimat No. 4568 (Molybdenum)
Contract No. IAm-E1094
Molybdenum Corp. of America
(Moly or Questa mine)
Taos County, New Mexico

I inspected the project of the subject contract with A. L. Greslin, Mgr., August 2, 1960, and found that work completed during the reporting period was as described below and as reported in the attached Operator's Report.

Diamond Drilling

A total of 1002 feet of diamond drilling was done in holes Nos. 43, 43a and 45. Hole 43, projected to a maximum depth of 500 feet, was bottomed at a depth of 136 when further advance was stopped by heavy ground. Its alternate hole, No. 43a, also encountered ground that could not be drilled and was bottomed at a depth of 66 feet. Abandonment of these holes before completion was approved by the Government, in writing.

Hole 45 was completed to its authorized maximum depth of 800 feet.

Analyses

A total of 99 samples of core from the diamond drill holes was assayed for MoS_2. The 99 samples comprised 13 from hole 43, 6 from hole 43a, and 80 from hole 45.

Core recovery from hole 43 and its nearby alternate hole 43a was poor. Consequently, assaying of the core from the initial 60 foot section of each hole is believed to have been warranted.

Other work

Work carried on at no expense to the Government was largely confined to the driving of No. 5 drift east, and its No. 2 crosscut north. The Operator will concentrate exploratory work in the area of the drift which has encountered zones of high grade material (plus .5% MoS_2) at the contacts of a porphyry plug with greenstone and granite. This area is the only one found to date that can reasonably be expected to contain significant reserves of presently minable ore. Favorable findings are expected to result in the construction of a concentrator.

The Operator has commenced work on his final report which should be completed and submitted to this office early in September.

ANALYSIS OF THE OPERATOR'S REPORT

Form MP-104

Diamond drilling - The $5010.00 is for the authorized advance of 1002 feet in holes Nos. 43, 43a, and 45.

Analyses - The $297.00 is for the authorized assay of 99 samples at $3.00 a sample.

RECOMMENDATION

All authorized work has been completed, therefore, continue to withhold $500.00 pending the resolution of matters pertaining to closing of the contract.

Form MP-104A

The form, containing total costs in agreement with those of form MP-104, appears to have been properly completed.

Narrative Report

The report with maps is acceptable.

Re: Docket No. DMEA 4568 (Molybdenum)
Contract No. IDM E 1094
Molybdenum Corporation of America
(Moly or Questa Mine)
Taos County, New Mexico

Dear Sir:

During the period June 1 through June 30, 1960 there were 26 working days and 4 Sundays. The mine was worked 26 days on a two shift basis.

Diamond drill holes 43 - 43a and 45 were completed. Drill Hole No. 43 was drilled to a depth of 136 feet where it had to be stopped due to caving in the hole making it impossible to drill any deeper.

43a was drilled to a depth of 66 feet and the same caving ground was encountered and couldn't get any deeper and therefore had to be stopped.

Drill Hole No. 45 was completed to a depth of 800 feet on June 25th.

Work was carried on in No. 3 Dft E and 3 Dft E No. 2 CxN, this month.

Yours very truly,

A. Schlueter

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

AIR MAIL

Memorandum

To: Fiscal Section, Division of Administrative Services
Office of the Secretary
Department of the Interior
Washington 25, D.C.

From: Hugh M. Connors, Acting Field Officer, OME, Region III

Subject: Docket No. [illegible]-4568 (Molybdenum)
Contract No. Idm-M1094
Molybdenum Corp. of America
(Questa Mine)
Taos County, New Mexico

In conformance with OME Circular 1, enclosed are the original and two copies of Forms MF-104 and MF-104A with attached maps and other pertinent data, Operator's Narrative Report, and Engineer's Inspection Report covering work performed during the month of May 1960.

It is considered that the Operator has complied with the intent of the contract, and the work for which reimbursement is claimed is acceptable to the Government. All of the work was performed at Fixed Unit Cost under the short form of contract on Form MF-[illegible]-200A; therefore, documentation of the cost is not required.

Payment is recommended for 50% of the amount reported on Form MF-104, contingent on your verification of applicable rates, and arithmetical accuracy within the report, except for the following deduction.

Withhold the amount of $500 pending termination of the contract on or before June 30, 1960, receipt of the Operator's final report, and an audit of the accounts and the resolution of matters pertaining to closing the contract.

Memorandum

To: Hugh M. Connors, Acting Field Officer
OME, Region III

From: T. M. Romslo

Subject: Progress Report for May 1960, Docket No. 4568 (Molybdenum)
Contract No. Idm-K1094
Molybdenum Corp. of America
(Moly or Questa mine)
Taos County, New Mexico

The project of subject contract was inspected by R. U. King, U.S.G.S. in the company of A. L. Greslin, Manager, June 15, 1960. Progress for the reporting period, according to Mr. King, was found to be as described below.

Drifting and Crosscutting

No. 2 Crosscut South was advanced from 46 feet to 233 feet beyond Survey Station No. 3291, an advance of 187 feet for the month. A total of 174 feet of the 187 feet is allowable advance, since 326 feet of the authorized 500 feet had previously been reported.

Timbering

Timbering was confined to No. 2 Crosscut South where 10 lineal feet of drift sets were installed in the section from 35 feet to 45 feet beyond Survey Station No. 3291.

Diamond Drilling

Diamond Drill holes Nos. 41 and 44 were each completed to a depth of 500 feet for a total advance of 1000 feet.

Analyses

A total of 135 samples, 100 from the drill holes and 35 from No. 2 Crosscut South, were assayed for Mo52.

Other Work

Remaining authorized work is confined to Diamond Drill holes Nos. 43 and 45, both of which were being drilled during the inspection.

ANALYSIS OF THE OPERATOR'S REPORT

Form MF-104

Drilling	The $5,000.00 is for the authorized advance of 1000 feet in Diamond Drill holes Nos. 41 and 44, at $5 a foot.
Crosscutting and Drifting	The $7,730.82 is for the 174 feet of authorized advance in No. 2 Crosscut South at $44.43 a foot.
Timber	The $27.00 is for the 10 feet of authorized timbering in No. 2 Crosscut South at $2.70 a foot.
Analyses	The $405.00 is for the authorized assay for No52 of 135 samples at $3 a sample.

RECOMMENDATION

Withhold $500.00, pending; (1) termination of the contract on or before June 30, 1960 as specified in Amendment No. 4, (2) receipt of the Operator's Final Report, and (3) an audit of the accounts and the resolution of matters pertaining to closing of the contract.

Form MF-104A

The form, containing total costs in agreement with those of form MF-104, appears to have been properly completed.

Narrative Report

The report with maps is acceptable.

Re: Docket No. DMEA 4568 (Molybdenum)
Contract No. IDM - E 1094
Molybdenum Corp. of America
(Moly or Questa Mine)
Taos County, New Mexico

Dear Sir:

During the period May 1 through May 31, 1960, there were 26 working days and 5 Sundays. The mine was worked 26 days on a two shift basis.

There were 189 feet of advance in the No. 2 crosscut south. 174 feet of this completed the 500 feet under D.M.E.A. There were 10 feet of timbering in this place. We are drilling hole No. 45 in No. 2 CxS.

Diamond drill holes No. 41 and 44 were completed during May to a depth of 500 feet each.

Work was carried on in the No. 3 drift east and drill hole No. 43.

Yours very truly,

A. L. Greslin

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

AIR MAIL

Memorandum

To: Fiscal Section, Division of Administrative Services
Office of the Secretary
Department of the Interior
Washington 25, D.C.

From: Hugh M. Connors, Acting Field Officer, OME, Region III

Subject: Docket No. MMRA-4568 (Molybdenum)
Contract No. Idm-K1094
Molybdenum Corp. of America
(Questa Mine)
Taos County, New Mexico

In conformance with OME Circular 1, enclosed are the original and two copies of Form MF-104 and MF-104A with attached maps and other pertinent data, Operator's Narrative Report, and Engineer's Inspection Report covering work performed during the month of April 1960.

It is considered that the Operator has complied with the intent of the contract, and the work for which reimbursement is claimed is acceptable to the Government. All of the work was performed at Fixed Unit Cost under the short form of contract on Form MF-2-100A; therefore, documentation of the cost is not required.

It is recommended that reimbursement be made to the operator for 50% of the amount reported in Form MF-104 subject to final audit of the operator's accounts.

Memorandum

To: Hugh M. Connors, Acting Field Officer
GMM, Region III

From: T. M. Romalo

Subject: Progress Report for April 1960, Docket No. 4568 (Molybdenum)
Contract No. Idm-H1094
Molybdenum Corp. of America
(Moly or Questa Mine)
Taos County, New Mexico

The exploratory project of the captioned contract was inspected by the writer in the company of A. L. Grenlin, Manager, May 18, 1960.

Progress for the reporting period was found as described below and as reported in the attached Operator's Report. All of the reported work was completed in accordance with the work specifications of the contract.

Drifting and Crosscutting

No. 2 Crosscut South was advanced from 139 feet to 346 feet beyond Survey Station No. 3285 and to a point 46 feet beyond Survey Station No. 3291, an advance of 207 feet for the month.

Timbering

A total of 202 lineal feet of No. 2 Crosscut South was timbered. At the end of the month timber has been installed to 35 feet beyond Survey Station No. 3291.

Diamond Drilling

Diamond Drill holes Nos. 40 and 42 were completed at depths of 732 feet and 500 feet, respectively. The advance totals 1232 feet.

Analyses

A total of 165 samples, 123 from Diamond Drill holes Nos. 40 and 42 and 42 from No. 2 Crosscut South, were assayed for MoS_2.

An average of about 0.5 percent MoS_2 was obtained for the approximately

200 feet section cut by No. 2 Crosscut South and for the 100 foot section between 210 feet and 310 feet in Diamond Drill hole No. 40. In general, the assays of samples from the remainder of hole 40 and all of hole 42 were less than 0.2 percent MoS_2.

Other Work

Non-contract work was largely confined to an extention of No. 3 Drift East.

ANALYSIS OF THE OPERATOR'S REPORT

Form MF-104

Drilling	The $6160.00 is for the authorized advance of 1232 feet in completed Diamond Drill holes 40 and 42 at $5.00 per foot.
Crosscutting and Drifting	The $9197.01 is for the authorized advance of 207 feet in No. 2 Crosscut South at $44.43 a foot.
Timber	The $545.40 is for the authorized advance of 202 feet in No. 2 Crosscut South at $2.70 a foot.
Analyses	The $495.00 is for the authorized assay for MoS_2 of 165 samples at $3.00 per sample.

Form MF-104A

The form, containing total costs in agreement with those of form MF-104, appears to have been properly completed.

Narrative Report

The narrative report with maps is acceptable.

Re: Docket No. DMEA 4568 (Molybdenum)
Contract No. IDM-E1094
Molybdenum Corporation of America
(Moly or Questa Mine)
Taos County, New Mexico

Dear Sir:

During the period April 1 through April 30, 1960 there were 25 working days, 4 Sundays and Good Friday. The mine was worked 25 days on a two shift basis, being down on Good Friday.

There were 207 feet of crosscutting in the No. 2 crosscut south with 202 feet of timbering.

Diamond drill hole No. 40 was completed to 732 feet where it had to be stopped due to adverse drilling conditions.

Diamond drill hole No. 42 was completed to 500 feet.

Work was carried on in the No. 3 drift east and diamond drill holes No. 41 and 44.

Yours very truly,

A. L. Gresham

O.M.E.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature Hugh M Lowrie Title Acting Field Officer Date 4-25-60

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

DATE	INITIALS	CODE

AIR MAIL

Memorandum

To: Fiscal Section, Division of Administrative Services
Office of the Secretary
Department of the Interior
Washington 25, D. C.

From: Acting Field Officer, OME, Region III

Subject: Docket No. DMEA-4568 (Molybdenum)
Contract No. Idm-E 1094
Molybdenum Corp. of America
(Questa Mine)
Taos County, New Mexico

In conformance with OME Circular 1, enclosed are the original and two copies of Forms MF-104 and MF-104A with attached maps and other pertinent data, Operator's Narrative Report, and Engineer's Inspection Report covering work performed during the month of March 1960.

It is considered that the operator has complied with the intent of the contract, and the work for which reimbursement is claimed is acceptable to the Government. All of the work was performed at Fixed Unit Cost under the short form of contract on Form MF-2-100A; therefore, documentation of the cost is not required.

It is recommended that reimbursement be made to the operator for 50% of the amount reported in Form MF-104 subject to final audit of the operator's accounts.

Original signed by

Hugh M. Conners

Memorandum

To: Hugh M. Connors, Acting Field Officer, OME, Region III

From: T. M. Romslo

Subject: Progress Report for March 1960, Docket No. DMEA-4568 (Molybdenum), Contract No. Idm-K1094, Molybdenum Corp. of America (Moly or Questa mine) Taos County, New Mexico.

The exploratory project of the subject contract was inspected by the writer April 14, 1960. At the mine office, A. L. Greslin, Manager, furnished information relative to progress and the working places were inspected with you and Mr. R. Carpenter, the Operator's Consulting Geologist.

Progress for the reporting period was found to be as described below, and as recorded in the attached Operator's Report. All of the reported work was completed in accordance with the contract's work specifications.

Drifting and Crosscutting

No. 3 Drift East - Total advance was 171 feet. However, since 398 feet of the authorized 500 feet of advance had been previously completed and approved, the approved advance for March is 102 feet. The 102 feet of advance was from 22 feet to 124 feet beyond Survey Station No. 3283.

No. 2 Crosscut South - Started March 17, advance for the month was 119 feet, from 20 feet to 139 feet beyond Survey Station No. 3285.

Timbering

No. 3 Drift East - None.

No. 2 Crosscut South - 113 feet, from 20 feet to 133 feet beyond Survey Station No. 3285.

Analyses

A total of 86 samples were assayed for MoS2. 42 of the samples were from Diamond Drill hole No. 38, 21 were obtained from No. 3 Drift East and the remaining 23 came from No. 2 Crosscut South.

Diamond Drilling

Diamond Drill hole No. 38 was completed at a depth of 422 feet. Drill holes Nos. 40 and 42 were progressing at depths of 649 feet and 475 feet, respectively, during the inspection.

Drilling Stations

Advance for drilling stations totalled 79 feet. Preparation of the site for drill holes Nos. 41 and 42 comprised 40 feet of drifting and 13 feet of raising. A 14-foot crosscut was driven for the drilling site of hole No. 40 and 12 feet of raising completed the station for holes Nos. 43 and 44. The approved advance for drilling stations is 51 feet, the footage remaining after prior approval of 199 feet of the allowable 250 feet.

Other Work

Non-contract work was largely confined to No. 3 Drift East. The allowable 500 feet of advance in this drift was completed during the reporting period. Present plans call for the drift to be extended an additional 500 feet.

ANALYSIS OF THE OPERATOR'S REPORT

Form MF-104

Drilling - The $2110.00 is for the authorized advance of 422 feet in Diamond Drill hole No. 38 at $5.00 per foot.

Drill Stations - The $2265.93 is for the authorized 51 feet of advance in stub drifts, crosscuts and raises at $44.43 per foot. All of the authorized 250 feet of advance for drilling stations have now been completed and approved.

Crosscutting and Drifting	-	The $9819.03 is for the authorized 221 feet of advance, 102 feet in No. 3 Drift East and 119 feet in No. 2 Crosscut South, at $44.43 per foot.
Timber	-	The $305.10 is for the authorized 113 feet of advance in No. 2 Crosscut South at $2.70 per foot.
Analyses	-	The $258.00 is for the authorized assay for MoS2 of 86 samples at $3.00 per sample.
Totals	-	The totals: $14,758.06, $351,053.85, and $365,811.91, appear to be correct.

Form MF-104A

The form, containing total costs in agreement with those of form MF-104, appears to have been properly completed.

Narrative Report

The narrative report with maps is acceptable.

Re: Docket No. DMEA 4568 (Molybdenum)
Contract No. IDM-E1094
Molybdenum Corporation of America
(Moly or Questa Mine)
Taos County, New Mexico

Dear Sir:

During the period March 1 through March 31, 1960 there were 27 working days and 4 sundays. The mine was worked 27 days on a two shift basis.

There were 171 feet of drifting in No. 3 Dft E. 102 feet of this completed the work approved by DMEA in this place. There was no timbering this month.

There were 119 feet of crosscuting in the No. 2 CxS with 113 Feet of timbering.

Diamond Drill hole No. 38 was completed to 422 feet when it had to be stopped due to adverse conditions encountered.

There were 79 feet of drill station work done during this month. Of this there were 40 feet of drifting and 13 feet of raising to make the place for drill holes 41 and 42. 14 feet of extension on the side of 4 Dft W to make room to drill hole No 40 and 12 feet of raising to make room to drill holes No 43 and 44.

We are only reporting 51 feet of this as it completes the contract for stage II drill station allowance.

Yours very truly,

A. L. Greslin

A. L. Greslin, Manager

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

AIRMAIL

March 15, 1960

Memorandum

TO: Fiscal Section, Division of Administrative Services, Office of the Secretary, Department of the Interior, Washington 25, D. C.

From: Executive Officer, OME Field Team, Region III

Subject: Docket No. DMEA-4568 (Molybdenum), Contract No. Idm-K1094, Molybdenum Corporation of America (Moly or Questa mine), Taos County, New Mexico

In conformance with OME Circular I, enclosed are the original and two (2) copies of Forms MF-104 and MF-104A with attached maps and other pertinent data, Operator's Narrative Report, and Engineers' Inspection Report covering work performed during the month of February 1960.

It is considered that the Operator has complied with the intent of the contract, and the work for which reimbursement is claimed is acceptable to the Government. All of the work was performed at Fixed Unit Cost under the short form of contract on Form MF 2-100A; therefore, documentation of the cost is not required.

It is recommended that reimbursement be made to the Operator for fifty (50) percent of the amount reported on Form MF-104, subject to final audit of the Operator's accounts.

Memorandum

TO: J. W. Townsend, Executive Officer, OME Field Team, Region III

From: T. M. Romslo

Subject: Progress Report for February 1960, Docket No. DMRA-4568 (Molybdenum), Contract No. Idm-K1094, Molybdenum Corp. of America (Moly or Questa mine), Taos County, New Mexico

The exploratory project of the captioned contract was inspected by the writer March 2, 1960, in the company of L. Greslin, assistant mine surveyor. Maps of pertinent workings were reviewed and information relative to progress was obtained from A. L. Greslin, Manager.

Progress for the reporting period was found to be as described below, and as recorded in the attached Operator's Report. All of the work was completed in accordance with the contract's work specifications.

Drifting

No. 3 Drift East was advanced from Survey Station No. 3276 plus 36 feet, to Survey Station No. 3283 plus 22 feet, a total of 182 feet. The advance was in altered and fractured porphyry. The average MoS_2 content for 180 feet of the advance is 0.16 percent.

Timbering

A total of 185 lineal feet of timber was installed in No. 3 Drift East. The timbered section is from Survey Station No. 3278 plus 12 feet to Survey Station No. 3283 plus 1 feet.

Analyses

A total of 116 samples, 36 from No. 3 Drift East, and 80 from Diamond Drill Hole No. 37 were assayed for MoS_2.

Diamond Drilling

Diamond Drill Hole No. 37 was completed to a depth of 801 feet, which is 1 foot more than the authorized depth of 800 feet. The weighted average MoS_2 content of the sludges and core for the 800 feet is 0.22 percent with sludges and cores assaying ~~0.18~~ 0.18 and ~~0.26~~ 0.26 percent, respectively.

Other Work

Non-contract exploration was confined to additional advance in No. 1 Crosscut North. The advance was in transitional rock containing a relatively low molybdenum content.

ANALYSIS OF THE OPERATOR'S REPORT:

Form MF-104

Drilling- The $4,000.00 is for the authorized 800 feet of advance in Diamond Drill Hole No. 37 at $5.00 per foot.

Drifting- The $8,086.25 is for the authorized advance of 182 feet in No. 3 Drift East at $44.43 per foot. A total of 398 feet of the presently approved maximum of 500 feet of advance in this drift has now been completed.

Timber- The $499.50 is for the authorized 185 feet of timbering in No. 3 Drift East at $2.70 per foot.

Analyses: The $348.00 is for the authorized analysis for MoS_2 of 116 samples at $3.00 per sample.

Totals-- The totals: $12,933.76, $358,120.09 and $351,053.85, appear to be correct.

Form MF-104A

The form, containing total costs in agreement with those of form MF-104, appears to have been properly completed.

Narrative Report

The narrative report with maps is acceptable.

Re: Docket No. DMEA 4568 (Molybdenum)
Contract No. IDM-K1094
Molybdenum Corporation of America
(Moly or Questa Mine)
Taos County, New Mexico

Dear Sir:

During the period February 1 through February 29, 1960 there were 25 working days and 4 Sundays. The mine was worked 25 days on a two shift basis.

There were 182 feet of advance in No. 3Ft X with 185 feet of timbering. This was in porphyry and granite.

Diamond drill hole No. 37 was completed to 801 feet. Work was carried on in No. 1 CxM during this period.

Yours very truly,

G. L. Gresham

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(For Government use only)

CERTIFICATION BY GOVERNMENT REPRESENTATIVE:

I certify that to the best of my knowledge and belief the contractor submitting this voucher is operating a Defense Minerals Exploration Administration project under Contract No. Idm-E1094 in accordance with the terms of the contract.

Signature [illegible] Checked for Engineering Allowability Title Mining Engineer Date 2/15/60

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature [illegible] Title Executive Officer Date FEB 17 1960

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

O.M.E.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Memorandum

To: T. A. Christensen

From: Executive Officer, GSE Field Team, Region III

Subject: Docket No. DMEA 4568 (Molybdenum) Contract Idm-E1094
Molybdenum Corporation of America (Moly or Questa mine)
Taos County, New Mexico

Enclosed are the original and four copies of forms MF-104 and MF-104A, Operator's Narrative Report, and Engineer's Inspection Report covering work performed during the month of January 1960.

It is considered that the Operator has complied with the intent of the contract and the work for which reimbursement is claimed is acceptable to the Government except as hereinafter noted. All of the work was performed at "Fixed Unit Costs" under the short form of contract on Form MF-520A; therefore, documentation of the costs is not required.

It is recommended that reimbursement be made to the Operator for 50 percent of the amount reported on Form MF-104 subject to verification of applicable rates and arithmetical accuracy within the report, except for the disallowance of $68.00 overcharge for analyses.

<u>Reconciliation with total costs reported by the Operator on Form MF-104 for month of January 1960</u>

Total costs reported - - - - - - - - - - - - -	$7,477.58
Analyses charge disallowed- - - - - - -	68.00
Balance - - - - - - - - - - - - - - -	$7,415.58
Government participation at 50 percent - - -	3,707.79
Amount due the Operator - - - - - - - - -	3,707.79

Memorandum

To: J. W. Townsend, Executive Officer, OME Field Team, Region III

From: F. M. Rumble

Subject: Progress Report for January 1960, Docket No. DMA 4568 (Molybdenum) Contract No. Lim-8109, Molybdenum Corporation of America (Moly or Quartz mine) Taos County, New Mexico

Explorations at the Moly mine which are authorized by the captioned contract were inspected by me February 11, 1960, in the company of L. Cornelius, assistant mine surveyor.

Progress was found to be as described below and as recorded in the attached Operator's Report. All of the approved work was completed in accordance with the contract's work specifications.

Drifting

No. 3 Drift East was advanced from Survey Station No. 3875 plus 39 feet to Survey Station No. 3878 plus 36 feet, a total of 156 feet.

Timbering

A total of 145 lineal feet of No. 3 Drift East was timbered with drift-sets. The ground in the timbered section is highly altered and fractured.

Analyses

A total of 31 samples from No. 3 Drift East were assayed for MoS_2. The average MoS_2 content of the 31 samples, covering 155 feet of drift, is 0.34 percent.

Other Work

Diamond drilling was confined to authorized hole No. 37 which had reached a depth of 651 feet at the end of the period.

Other exploratory work was largely confined to the driving of the unauthorized No. 1 Crescent North. The degree of molybdenum mineralization in this drift is significantly lower than encountered by No. 3 Drift East.

ANALYSIS OF THE OPERATOR'S REPORT

Form MF-104

Drifting - The $6,931.68 is for the approved 156 feet of advance in No. 3 Drift East at $44.43 per foot.

Timber - The $391.70 is for the approved 143 feet of timbering in No. 3 Drift East at $2.70 per foot.

Analyses - The $155.00 represents an overcharge of $62.00 since the approved cost of the 31 samples at $3.00 each is $93.00. The total to date should be $8,196.00 instead of the reported $8,258.00.

Totals - The correct totals after deducting the $62.00 overcharge for analyses are $7,415.58, $330,704.51, and $338,120.09.

Form MF-104A

The form, containing total costs in agreement with those of Form MF-104, appears to have been properly completed with the following exceptions under Stage II:

1. The units to date for drifting should be 3,993 instead of the reported 3,983.

2. Analyses: The correct costs for this month and to date are $93.00 and $5,370.00, respectively.

3. The corrected total costs for this month and to date, are $7,415.58 and $338,120.09, respectively.

Narrative Report

The narrative report with maps is acceptable.

Re: Docket No. IMEA 4568 (Molybdenum)
Contract No. IDM-K1094
Molybdenum Corporation of America
(Moly or Questa Mine)
Taos County, New Mexico

Dear Sir:

During the period January 1 through January 31, 1960 there were 26 working days and 5 Sundays. The mine was worked 26 days on a two shift basis.

There were 156 feet of advance in the No. 3 Drt & with 145 feet of timbering.

We are still drilling in drill hole No. 37. It was down to a depth of 435 feet on January 31, 1960.

Work was carried on in the No. 1 Cxn during this period.

Yours very truly,

OME

Memorandum

TO: T. A. Christensen

From: Executive Officer, GSE Field Team, Region III

Subject: Docket No. DMEA 4958 (Molybdenum) Contract Mm-R1094
Molybdenum Corporation of America (Maly or Questa mine)
Taos County, New Mexico

Enclosed are the original and four copies of Forms MP-104 and MP-104A, Operator's Narrative Report, and Engineer's Inspection Report covering work performed during the month of December 1959.

It is considered that the Operator has complied with the intent of the contract and the work for which reimbursement is claimed is acceptable to the Government except as hereinafter noted. All of the work was performed at Fixed Unit Cost under the short form of contract on Form MP-2064; therefore, documentation of the costs is not required.

It is recommended that reimbursement be made to the Operator for 50 percent of the amount reported on Form MP-104 subject to verification of applicable rates and arithmetical accuracy within the report, except for the following disallowances of costs of work performed in that portion of the No. 3 Drift East lying westerly of the authorized starting point of Government participation at coordinate E 1300:

Disallowances

186 feet of Drifting at $44.45 a foot	$4,709.58
106 feet of Drift timbering at $2.70 a foot	286.20
25 sample analyses at $3.00 each	69.00
Total Disallowance	$5,064.78

Reconciliation with total costs reported by the Operator on Form MP-104 for month of December 1959

Total costs reported	$11,655.48
Total disallowance as above	5,064.78
Balance	$ 6,590.70
Government participation at 50 percent	3,295.35
Amount due the Operator	3,295.35

January 15, 1960

Memorandum

TO: J. W. Townsend, Executive Officer, OME Field Team, Region III

FROM: T. M. Rosale

Subject: Progress Report for December 1959, Docket No. DMEA 4968 (Molybdenum) Contract No. [illegible], Molybdenum Corporation of America (Moly or Questa mine) Taos County, New Mexico

Progress in explorations at the Moly mine that are authorized by the captioned contract was inspected by me January 14, 1960. I was accompanied by A. L. Grealis, Manager, and J. W. Hasler and R. U. King, Geologists, U.S.G.S.

Progress was found to be as described below and as recorded in the attached Operator's Report. However, Government participation in all of the work is not approved since a portion was completed prior to being authorized by the contract.

All of the approved work was completed in accordance with the contract's work specifications.

Drifting

No. 3 Drift East was advanced from Survey Station No. 3270 plus 25 feet to 60 feet beyond coordinate E1300 for a total of 166 feet. The Operator had been authorized to extend the drift on a bearing of approximately N 80° E not to exceed 500 feet beginning at coordinate E 1300. Government participation in the drifting is therefore confined to the 60 feet of advance from the designated starting point.

Timbering

The approved portion of the 153 feet of timbering done in No. 3 Drift East is confined to the 47-foot section beginning at coordinate E1300, the DMEA starting point.

Analyses

The reported total of 104 samples assayed for MoS2 comprise 71 samples from diamond drill hole No. 39 and 33 channel samples for No. 3 Drift East. Approved analyses comprise those of the 71 drill hole samples and 12 channel samples in the 60-foot section of authorized drift, a total of 83.

Diamond Drilling

Diamond drill hole No. 39 was completed to a depth of 711 feet.

Other Work

Non-contract work was largely confined to driving No. 1 Crosscut North.

ANALYSIS OF THE OPERATOR'S REPORT

Form MF-104

Drilling - The $3,555.00 is for the 711 feet of authorized advance in diamond drill hole No. 39 at $5.00 per foot.

Drifting - The $7,375.38 represents the cost of the reported 166 feet of advance in No. 3 Drift East at $44.43. As the authorized advance was 60 feet, the approved cost is $2,665.80. Participation in the cost of the remaining $4,709.58 for the unauthorized 106 feet of advance is recommended for denial.

Timbering - The $413.10 is for the reported 153 feet of timbering at $2.70 per foot. The approved cost is $126.90 for the authorized 47 feet of advance. The disapproved portion is $286.20 for the 106 feet of unauthorized advance.

Analyses - The $512.00 is for the analyses of the reported 104 samples at the specified cost of $5.00 per sample. Of the $512.00, a total of $443.00 for analyses of the authorized 81 samples is approved, and the remaining $69.00 for the 23 unauthorized samples is disapproved.

Totals - The monthly total of $11,655.48 appears to be correct before the recommended disapproval of $5,064.78. The $5,064.78, as shown above, comprises $4,709.58 for 106 feet of drifting, $286.20 for 106 feet of timbering, and $69.00 for the analyses of 23 samples.

Form MF-104A

The form, containing total costs in agreement with those of Form MF-104, appears to have been properly completed except that the units to date for analyses should be 1 less than the reported 1783. The Operator has been asked to correct this item in his next report.

Narrative Report

The narrative report with maps and graphic diamond drill hole logs is acceptable.

RE: Docket No DMRA 4568 (Molybdenum)
Contract No IDM-E 1094
Molybdenum Corporation of America
(Moly or Questa Mine)
Taos County, New Mexico

Dear Sir:

During the period of December 1 through December 31, 1959 there were 24 working, 4 Sundays, and three days off for holiday. We were off three days for Christmas holiday and also had to be off December 21st-22nd- and 23rd. We had trouble with the hoist motor and resistors so we couldn't work. The mine was worked 21 days on a two shift basis.

There were 166 feet of drifting in No 3 Drft E with 153 feet of timber in this place.

Diamond drill hole No 38 was completed to a depth of 711 feet. We are starting on drill hole No 37 now.

Work was carried on in No 1 CxM during this period.

Yours very truly,

A. L. Greslin, Manager

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Signature [illegible] Title Executive Officer Date JAN 18 1960

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Memorandum

TO: T. A. Christensen

From: Executive Officer, OME Field Team, Region III

Subject: Docket No. DMEA 4568 (Molybdenum) Contract Idm-E1094
Molybdenum Corporation of America (Moly or Questa mine)
Taos County, New Mexico

Enclosed are the original and four copies of Forms MF-104 and MF-104A, Operator's narrative report, and Engineer's inspection report for the month of November 1959.

It is considered that the Operator has complied with the intent of the contract, and the work for which reimbursement is claimed is acceptable to the Government. All of the work was performed at "Fixed Unit Costs" under the short form of contract on Form MF-200A; therefore, documentation of the costs is not required.

It is recommended that reimbursement be made to the Operator for 50 percent of the amount reported on Form MF-104, subject to your verification of applicable rates and arithmetical accuracy within the report.

December 16, 1959

Memorandum

TO: J. W. Townsend, Executive Officer, GME Field Team, Region III

From: T. N. Bonalo

Subject: Progress Report for November 1959, Docket No. DMEA 4568 (Molybdenum) Contract No. Idm-K1094, Molybdenum Corporation of America (Moly or Questa mine) Taos County, New Mexico

Progress in explorations at the Moly mine which is authorized by the captioned contract was checked by me December 3, 1959. Underground inspections were made with Irvin Sackett, mine engineer. Diamond drill core and maps were inspected in the mine office with A. L. Grealis, Manager.

Progress was found to be as described below and as recorded in the attached Operator's Report. The work was in accordance with the contract's specifications.

Drifting

No. 4 Drift West was advanced 51 feet to a point 1002 feet from No. 1 Crosscut North. Of the 51 feet, 49 feet was authorized since the drift was extended 2 feet beyond the allowable 1000 feet.

Timbering

A total of 72 feet of No. 4 Drift West was supported with timber sets. The 72 feet of timber was installed in the 49-foot section driven during November and in a 23-foot section driven during October.

Analyses

A total of 59 samples, 49 core and 10 drift, were assayed for MoS_2.

The assays showed that no extensive zones of significant mineralization were penetrated by either the drift or drill hole.

Diamond Drilling

Diamond drill hole No. 33 was completed to a depth of 586 feet.

Diamond Drill Stations

A total of 29 feet of raising was done in drill stations for holes Nos. 37, 38, 39 and 40.

Other Work

Non-contract work was largely confined to about 50 feet of additional advance in No. 1 Crosscut North and 219 feet of initial advance in No. 3 Drift East.

The Operator verbally reported that 108 tons of ore containing 2.3% MoS_2 from a highly mineralized zone encountered in No. 3 Drift East had been trucked to the company's mill and stored in the ore bins.

ANALYSIS OF THE OPERATOR'S REPORT

Form MF-104

Drilling - The $2,930.00 is for the authorized 586 feet of advance in diamond drill hole No. 33 at $5.00 per foot.

Drill Stations - The $1,288.47 is for the authorized advance of 29 feet in diamond drill stations for holes Nos. 37, 38, 39 and 40 at $44.43 per foot.

Drifting - The $2,177.07 is for the 49 feet of authorized advance in No. 4 Drift West at $44.43 per foot.

Timber - The $194.40 is for the authorized 72 feet of timber installed in No. 4 Drift West at $2.70 per foot.

Analyses - The $177.00 is for the authorized analyses of the 59 samples for MoS_2 at $5.00 per sample.

Totals - The totals, $6,766.94, $317,346.37 and $324,113.81, appear to be correct.

Form MF-104A

The form, containing total costs which are in agreement with those on Form MF-104, appears to have been properly completed.

Narrative Report

The narrative report with maps and graphic diamond drill hole logs is acceptable.

Re: Docket No. DMEA 4568 (Molybdenum)
Contract No. IBML E 1094
Molybdenum Corporation of America
(Moly or Questa Mine)
Taos County, New Mexico

Dear Sir:

During the period of November 1 through November 30, 1959 there were 24 working days, 5 Sundays and 1 Holiday (Thanksgiving Day). The Mine was Worked 24 days on a two shift basis.

There were 49 feet Of drifting in No. 4 Dft W to complete this drift to 1000 feet. There were 72 feet of timbering in this place.

Diamond drill hole No 33 was Completed to 586 feet where it had to be stopped.

We are drilling in drill hole No. 39. It was down 284 feet on November 30, 1959.

Work was carried on in No. 1,CxN and No. 3 Dft E during this period.

There were 29 feet of raising for drill stations, of this there were 19 feet for drill station for holes 38-39-40 and 10 feet for drill hole No. 37.

Yours very truly,

Manager

DEC 28 1959 DENVER

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(See other side)

(For Government use only)

CERTIFICATION BY GOVERNMENT REPRESENTATIVE:

I certify that to the best of my knowledge and belief the contractor submitting this voucher is operating a Defense Minerals Exploration Administration project under Contract No. Edm-E1094 in accordance with the terms of the contract.

Signature [illegible] Checked for Engineering Allowability Title Mining Engineer Date 12/4/59

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature [illegible] Title Executive Officer Date DEC 7 1959

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also; report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Memorandum

TO: T. A. Christensen

From: Executive Officer, OME Field Team, Region III

Subject: Docket No. DMEA 4368 (Molybdenum) Contract Idm-21094
Molybdenum Corporation of America (Moly or Questa mine)
Taos County, New Mexico

Enclosed are the original and four copies of Forms MF-104 and MF-104A, Operator's narrative report, and Engineer's inspection report for the month of October 1959.

It is considered that the Operator has complied with the intent of the contract, and the work for which reimbursement is claimed is acceptable to the Government. All of the work was performed at "Fixed Unit Costs" under the short form of contract on Form MF-200A; therefore, documentation of the costs is not required.

It is recommended that reimbursement be made to the Operator for 50 percent of the amount reported on Form MF-104, subject to your verification of applicable rates and arithmetical accuracy within the report.

Memorandum

TO: J. W. Townsend, Executive Officer, OME Field Team, Region III

From: T. N. Romalo

Subject: Progress Report for October, 1959, Docket No. DMEA 4568 (Molybdenum) Contract No. Idm-K1094, Molybdenum Corporation of America (Moly or Questa mine) Taos County, New Mexico

On December 3, 1959, I visited the Moly mine and checked progress for the reporting period in explorations authorized by the subject contract. Underground inspections were made with Irvin Sackett, mine engineer. Diamond drill core and maps were inspected at the mine office with A. L. Grealin, Manager.

The inspections revealed that progress for October 1959 was as shown below and as reported in the attached Operator's report. They also showed that each item of work was completed in accordance with the contract's specifications.

Drifting

Drifting was confined to 163 feet of advance in No. 4 Drift West. The face of the drift at the end of the period reportedly was 36 feet ahead of survey station No. 3265. Of the 1000 feet of allowable advance in this drift, 951 feet has now been completed.

Timbering

A total of 187 lineal feet of No. 4 Drift West was supported with timber sets. The 187 feet included 156 feet of October advance and 31 feet of advance for the previous month.

Analyses

A total of 142 samples were assayed for MoS_2. The 142 samples included 34 from No. 4 Drift West and 108 (54 of each core and sludge) from diamond drill hole No. 32.

No extensive zones of significant mineralization were indicated by the sampling.

Core Drilling

Diamond drill No. 32 was completed at a depth of 546 feet.

Other Work

Other contract work in progress was confined to diamond drill hole No. 33.

Non-contract work was largely confined to drifting at 4 locations. Assay maps of the drifts are included with the Operator's report.

ANALYSIS OF THE OPERATOR'S REPORT

Form MP-104

Drilling - The $8,730.00 is for the authorized 546 feet of advance in diamond drill hole No. 32 at the specified rate of $5.00 per foot.

Drifting - The $7,242.09 is for the authorized 163 feet of advance in No. 4 Drift West at $44.43 per foot.

Timber - The $504.00 is for the authorized 187 feet of advance in No. 4 Drift West at $2.70 a foot.

Analyses - The $486.00 is for the authorized analyses of the 34 samples from No. 4 Drift West and 108 samples from diamond drill hole No. 32 at $3.00 per sample.

Totals - The totals, $10,902.99, $506,443.88 and $517,346.87, appear to be correct.

Form MP-104A

The form appears to have been properly completed. The total costs are in agreement with those of Form MP-104.

Narrative Report

The narrative report with maps is acceptable.

RE: Docket No. IMKA 4568 (Molybdenum)
Contract No. IDM-E 1694
Molybdenum Corporation of America
(Moly or Questa Mine)
Taos County, New Mexico

Dear Sir:

During the period October 1 through October 31, 1959 there were 27 working days, 4 Sundays. The mine was worked 27 days on a two shift basis. There were 2 shifts lost in drifting in No. 4 Dft W and 1/2 shift lost on the drilling. We had to do some work on the shaft and were unable to hoist during this time.

Diamond drill hole No. 32 was completed on October 8th at 546 feet. We were unable to drill any deeper due to mud seams and caving in the hole.

We are drilling in hole No. 33. It was down to 400 feet on October 31st.

There were 163 feet of advance in No. 4 Dft W. This was in transition rock.

There were 187 feet of timbering in No. 4 drift west. This was in transition rock.

There were 187 feet of timbering in No. 4 drift west. 156 feet of this was in advance made this month and 31 feet was in work done previous to this month.

Work was carried on in No. 7 CxN, No. 2 Dft E, No. 1 CxN and No. 1 CxN No. 2 Dft E during this period.

Yours very truly,

A. S. Gresham

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Memorandum

TO: T. A. Christensen

From: Executive Officer, OME Field Team, Region III

Subject: Project No. DMSA 4568 (Molybdenum) Contract IDm-R1094
Molybdenum Corporation of America (Moly or Questa mine)
Taos County, New Mexico

Enclosed are the original and four copies of Forms MF-104 and MF-104A, Operator's narrative report, and Engineer's inspection report for the month of September 1959.

It is considered that the Operator has complied with the intent of the contract, and the work for which reimbursement is claimed is acceptable to the Government. All of the work was performed at "Fixed Unit Costs" under the short form of contract on Form MF-800A; therefore, documentation of the costs is not required.

It is recommended that reimbursement be made to the Operator for 50 percent of the amount reported on Form MF-104, subject to your verification of applicable rates and arithmetical accuracy within the report.

Re: Docket No. DMEA 4568 (Molybdenum)
Contract No. IDM-H1094
Molybdenum Corp. of America
(Moly or Questa Mine)
Taos County, New Mexico

Dear Sir:

During the period September 1 through September 31, 1959 there were 25 working days, 4 Sundays and one holiday (Labor Day). The mine was worked 25 days on a two shift basis.

Diamond drilling was done in hole No. 32. This hole was completed on October 8th to a depth of 546 feet where it had to be stopped due to mud seams etc.

Diamond drilling was carried on part of the month on the surface. We have stopped the surface drilling for awhile.

There were 237 feet of advance in No. 4 drift west during this period. This was in Porphyry for the first 145 feet then in transition rock.

There were 91 feet of timbering in No. 4 Drft W. 59 feet of this was in advance work done during September and 32 feet of this was done in work done in July 1959.

There were two drill stations prepared during this period. No. 32 and No. 33. There were 11 feet of raising in drill station No. 32 and 12 feet of raising in drill station No. 33.

Yours very truly,

A. K. McLaughlin

Memorandum

TO: J. W. Townsend, Executive Officer, OME Field Team, Region III

From: Z. N. Rumlo

Subject: Progress Report for September 1959, Docket No. DMEA 4568 (Molybdenum) Contract No. Ilm-R1094, Molybdenum Corporation of America (Moly or Questa mine) Taos County, New Mexico

An inspection of the project workings of the captioned contract which was made by the writer and Irvin Bachett, Mine Engineer, October 15, 1959, revealed that progress for the reporting period was as recorded in the attached Operator's report. The writer also obtained from A. L. Grenlin, Manager, information relative to; findings of the project work; other work accomplished, and a forthcoming request for approval of additional explorations.

The following authorized work was completed during September 1959 and has been charged for on Form MF-104.

Drill Stations

A total of 23 feet of raising, 11 feet for drill station No. 32 and 12 feet for drill station No. 33, was completed.

Drifting

No. 4 Drift West was driven an additional 237 feet to a point 295 feet ahead of survey station No. 3060. A total of 708 feet of the authorized 1000 feet of advance in this drift had been completed at the end of the reporting period.

Timbering

A total of 91 linear feet of No. 4 Drift West was supported with timber sets. A minimum cross-section of 5 feet by 7 feet in clear of timber was maintained.

Analyses

A total of 47 samples, taken from No. 4 Drift West in accordance with contract specifications, were analyzed for MoS_2.

The assays of the 47 samples which were taken along the north wall of the drift for a total of 235 feet averaged approximately 0.177 percent MoS_2.

Other Work

Other contract work in progress was confined to the diamond drilling of hole No. 32. Non-contract work was confined to the driving of No. 2 Drift East and some diamond drilling from the surface.

ANALYSIS OF THE OPERATOR'S REPORT

Form MP-104

Drill Stations - The $1081.89 is for the authorized 23 feet of raising in diamond drill stations Nos. 32 and 33 at the specified rate of $44.43 a foot.

Drifting - The $10,589.91 is for the authorized 237 feet of advance in No. 4 Drift West at $44.43 per foot.

Timbering - The $245.70 is for the authorized 91 feet of timbering in No. 4 Drift West at $2.70 per foot.

Analyses - The $141.00 is for the authorized analyses of the 47 samples from No. 4 Drift West at $3.00 per sample.

Totals - The totals, $11,958.50, $294,505.38 and $306,443.88, appear to be correct. The $3.00 error noted in previous reports has been picked up.

Form MP-104A

The form appears to have been properly completed. Errors in the costs and units of work of previous reports have been corrected.

Narrative Report

The narrative report with attached maps is acceptable.

T. W. Romalo

Signature J W Fernald Title Executive Officer Date SEP 18 1959

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

OME
DEPARTMENT OF THE INTERIOR
SEP 14 1959
DENVER, COLORADO

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

EXTRA COPY O. M. E. RECEIVED SEP 28 1959		
DATE	INITIALS	CODE

FINAL DISTRIBUTION MADE SEP 23 1959

Building 20 - Federal Center
Denver 25, Colorado

September 18, 1959

Memorandum

To: T. A. Christensen

From: Executive Officer, OME Field Team, Region III

Subject: Docket No. DMEA 4568 (Molybdenum) Contract Idm-K109A, Molybdenum Corporation of America (Moly or Questa Mine) Taos County, New Mexico

Enclosed are the original and four copies of Forms MF-104 and MF-104A, Operator's narrative report, and Engineer's inspection report for the month of August 1959.

It is considered that the Operator has complied with the intent of the contract, and the work for which reimbursement is claimed is acceptable to the Government. All of the work was performed at "Fixed Unit Costs" under the short form of contract on Form MF-200A; therefore, documentation of the costs is not required.

It is recommended that reimbursement be made to the Operator for 50 percent of the amount reported on Form MF-104, subject to your verification of applicable rates and arithmetical accuracy within the report.

September 18, 1959

Memorandum

To: J. W. Townsend

From: T. M. Romslo

Subject: Progress Report for August 1959, Docket No. DMEA 4568 (Molybdenum) Contract No. Ida-K1094, Molybdenum Corporation of America (Moly or Questa Mine) Taos County, New Mexico

The writer found that progress for the reporting period in explorations authorized by the captioned contract were as reported in the attached Operator's report during an inspection of the pertinent underground workings with J. W. Hasler, Geologist, USGS, and Irvin Sackett, Mine Engineer, September 9, 1959. Mr. Hasler and I also discussed proposed additional explorations with A. L. Greslin, Manager, who, due to a recently sustained minor injury to his back, did not accompany us during the underground inspection.

The following authorized work was completed during August 1959 and charged for by the Operator on Form MF-104.

Drilling (Diamond)

The drilling totaled 727 feet of which 337 feet and 390 feet was in completed diamond drill holes Nos. 34 and 36, respectively. Each of the holes penetrated granite porphyry containing an average of about 0.20 percent MoS2 and were stopped in squeezing ground at or near the porphyry-greenstone contact. Core recoveries were about 31.5 percent in hole 34 and 57.6 percent in hole 36.

Drill Station

The drilling station for hole No. 34 was completed by driving and timbering a raise to a necessary height of 12 feet above an existing drift.

Drifting

No. 4 Drift West was driven an additional 206 feet to a point 58 feet beyond survey station No. 3260. The total authorized

advance in this drift through August 1959 is 551 feet. Written approval of the initial 500 feet was given 7/9/59. Verbal approval of 8/26/59 for an additional 100 feet of drifting will shortly be confirmed in writing.

Timbering

A total of 50 lineal feet of No. 4 Drift West was supported with timber sets. Cross-sections of the drift were nowhere less than the specified minimum of 5 feet by 7 feet in the clear of timber.

Analysis

A total of 114 samples taken in accordance with contract specifications were analyzed for their MnO_2 content. Of the 114 samples, 42 were from No. 4 Drift West, 33 were from diamond drill hole 34, and the remaining 39 were from diamond drill hole 36.

Non-Contract Work

Explorations, other than authorized by the contract, reportedly were largely confined to an extension of No. 7 crosscut North. The crosscut which is being driven in the unfavorable green rock has reached a point beyond the projected position of the contact of green rock and the favorable granite.

ANALYSIS OF THE OPERATOR'S REPORT

Form MF-104

Drilling - The $3,635.00 is for the 727 feet of authorized diamond drilling in holes Nos. 34 and 36 at the specified rate of $5.00 per foot.

Drill station - The $533.16 is for the authorized 12 feet of raising for the station of drill hole No. 34 at the specified rate of $44.43 per foot.

Drifting - The $9,152.58 is for the authorized 206 feet of advance in No. 4 Drift West at the specified rate of $44.43 per foot.

Timber - The $135.00 is for the authorized 50 feet of timbering in No. 4 Drift West at the specified rate of $2.70 per foot.

Analysis - The $342.00 is for the authorized analysis of the previously described 114 samples at the specified rate of $3.00 per sample.

Totals - The Monthly Total cost, $13,797.74, appears to be correct. The other totals appear to be correct before the disallowance of $3.00 for the analysis of one sample.

Form MF-104A

The form has been properly completed except for the following errors that occur in the To Date costs and Units of work performed under stage II.

Drift and Crosscut - Total units reported as 3,329 are correctly 3,328 after the 1-foot of advance disallowed.

Timbering - The reported- and correct-total units are 2,210 and 2,146, respectively.

Analyses - The reported total costs and units, $4,293.00 and 1,431, respectively, do not reflect the previously-mentioned disallowance of $3.00 for one sample.

Narrative Report

The Narrative Report with attached maps, sections, and logs of drill holes is acceptable.

NARRATIVE REPORT

AUGUST 1959

Mr. J. W. Townsend
Executive Officer, O.M.E.
Field Team, Region III
Building 20 - Federal Center
Denver 25, Colorado

Re: Docket No. DMEA 4568 (Molybdenum)
Contract No. IIM E1094
Molybdenum Corp. of America
(Moly or Questa Mine)
Taos County, New Mexico

Dear Sir:

During the period August 1 through August 31, 1959 there were 26 working days and 5 Sundays. The mine was worked 26 days on a two shift basis.

Diamond drill hole No. 34 and 36 were completed. No. 34 was completed to a depth of 337 feet where it had to be stopped due to the hole squeezing in when we hit the greenrock. No. 36 was completed to a depth of 390 feet and it had to be stopped when we hit the greenrock.

There were 206 feet of drifting in the No. 4 drift west during this period. This was in a granite porphyry.

There were 50 feet of timber in this drift.

Development work was carried on in the No. 7 crosscut north.

Yours very truly,

E. L. Gresham

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature [illegible] Title Executive Officer Date SEP 18 1959

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc.". The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Memorandum

To: T. A. Christensen

From: Executive Officer, OME Field Team, Region III

Subject: Docket No. DMEA 4568 (Molybdenum) Contract Idm-E1094, Molybdenum Corporation of America (Moly or Questa Mine) Taos County, New Mexico

Enclosed are the original and four copies of Forms MF-104 and MF-104A, Operator's narrative report, and Engineer's inspection report for the month of July 1959.

It is considered that the Operator has complied with the intent of the contract, and the work for which reimbursement is claimed is acceptable to the Government. All of the work was performed at "Fixed Unit Costs" under the short form of contract on Form MF-200A; therefore, documentation of the costs is not required.

It is recommended that reimbursement be made to the Operator for 50 percent of the amount reported on Form MF-104, subject to your verification of applicable rates and arithmetical accuracy within the report.

Memorandum

To: J. W. Townsend

From: T. M. Romalo

Subject: July 1959 Progress Report, Docket No. DMEA 4568 (Molybdenum) Contract I4m-E1094, Molybdenum Corporation of America (Moly or Questa Mine) Taos County, New Mexico.

The project of the captioned contract was inspected September 9, 1959 by the writer and J. W. Hasler, Geologist, U. S. G. S., in the company of Ervin Sachett, mine engineer. Findings of the inspection included the advances made in both contract and non-contract work and information regarding the advisibility of doing additional exploratory work that had been requested by the Operator. Separate memoranda relative to the approval of the requested explorations which were discussed with A. L. Greslin, Manager, will be prepared by Mr. Hasler.

Contract work completed during July 1959

The contract work completed during the reporting period was found to be as reported in the attached Operator's Report and as set down below.

No. 4 Drift West

This drift which was started from No. 1 cross cut North was advanced a total of 345 feet to a point 19 feet beyond survey station No. 3255. All of the advance was in a fractured granite porphyry containing minor amounts of molybdenite as discontinuous veinlets.

Sampling of the 345 feet of drift was done in accordance with the contract. The MoS_2 content of the 69 samples taken ranged from 0.07 percent to 2.89 percent and averaged about 0.20 percent.

An 85-foot long section of heavy ground in the drift was supported with timber sets. The cross section of the drift was nowhere less than the specified minimum of 5 feet by 7 feet.

D. D. Hole No. 31

This hole was completed to a depth of 502 feet. It was drilled and sampled as specified by the contract. Assays of the 50 samples of each the cores and sludges showed a MoS_2 content ranging from 0.05 percent to 0.34 percent and averaging about 0.15 percent.

Check Sampling

The assays of the 7 check samples taken by me during the previous inspection checked very closely with those reported by the Operator.

Two additional check samples were taken during this inspection. They were obtained from No. 4 Drift West.

Non-contract work

The non-contract work was largely confined to the driving of No. 7 cross cut North and No. 1 Drift East. The average MoS_2 content of the rock sections penetrated by these workings was relatively low, averaging about 0.14 percent.

ANALYSIS OF THE OPERATOR'S REPORT

Form MF-104

Drilling - The $2500.00 is for the authorized 500 feet of the 502 feet diamond drilling in hole No. 31 at the specified cost of 5.00 per foot.

Drift - The $15,328.35 is for the authorized 345 feet of advance in No. 4 Drift West at the specified cost of $44.43 per foot.

Timber - The $229.50 is for the authorized timbering of an 85 foot long section in No. 4 Drift West at the specified cost of $2.70 per foot.

Analysis - The $357.00 is for the authorized sampling and assaying of 119 samples, 50 core samples from drill hole No. 31 and 69 channel samples from No. 4 Drift West, at the specified cost of $3.00 per sample.

Totals - The Totals, $18,414.85, $262,295.79, and $280,710.64 appear to be correct before a previous disallowance of $3.00.

Form MF-104A

The form appears to have been properly completed.

Narrative Report

The narrative report with attached maps and sections is acceptable.

Re: Docket - DMEA 4568 (Molybdenum)
Contract No. IBM-11094
Molybdenum Corp. of America
(Moly or Questa Mine)
Taos County, New Mexico

Dear Sir:

During the period July 1 through July 31, 1959 there were 25 working days, 4 Sundays and two days off for Independence Day holiday. The mine was worked 25 days on a two shift basis.

Diamond drill hole No. 31 was completed to 502 feet. (We are reporting only 500 ft. on this report).

There were 345 feet of drifting done in the No. 4 Drift West during this period. This was in a Granite Porphyry.

Diamond drill hole No. 36 was started during this period.

Development work was carried on in No. 7 Cut and drilling on the surface.

Yours very truly,

OME

July 30, 1959

Memorandum

TO: J. W. Townsend, Executive Officer, OME Field Team, Region III

From: T. M. Rumsle

Subject: Progress Report for June 1959--Docket No. DMRA 4568 (Molybdenum) Contract Mm-R1094, Molybdenum Corporation of America (Moly or Questa Mine) Taos County, New Mexico

Operations under the subject contract were inspected by me July 16 and 17, 1959, in company with the Operator's manager, A. L. Grenlin. Work completed during the captioned period was found to include the drilling of D. D. hole No. 30 and the construction of a station for D. D. hole No. 36. Work in progress was confined to the drilling of D. D. hole No. 31.

Detailed information relative to the contract work follows:

D. D. Hole No. 30

This hole reportedly was at a depth of 461 feet at the end of May 1959, and was bottomed June 25, 1959, at 800 feet. The size of the hole was BX to 90 feet and AX from 90 feet to its bottom. Assays of each the core and sludge for 10 foot intervals show the MoS_2 content ranges from 0.10 percent to 1.65 percent and averages about 0.85 percent. Drilling below 50 feet was in accordance with the general provisions of Exhibit "A" to the contract, as amended by Amendment No. 2. Visible MoS_2 mineralization had been estimated to be in excess of 0.2 percent to the bottom of the hole where deeper drilling with the available equipment was found impracticable.

D. D. Hole No. 31

This hole was collared June 27, 1959, and had reached a depth of 354 feet on July 15, 1959. Cost of this drilling will be charged against the project after completion of the hole.

An inspection of the core from hole 31 indicated that the extent of molybdenum mineralization is similar to that of hole 30.

Check Sampling

Seven check samples were obtained by me for analysis. Five of the samples were pulps from drill hole core, three from hole No. 30 and two from hole No. 31. The other two were chip samples from the drift from No. 1 crosscut. Advance in this approved drift will be reported in the Operator's report for July 1959.

Non-Contract Work

The non-contract work is largely confined to the driving of No. 7 crosscut north. The MoS_2 content of the crosscut reportedly appears to be a little lower than that encountered in other portions of the mine.

ANALYSIS OF THE OPERATOR'S REPORT

Form MF-104

Drilling - The $4,000.00 is for the approved 800 feet of diamond drilling at the authorized cost of $5.00 per foot.

Drill Station - The $1,199.61 is for the approved 27 feet of drifting and raising at the authorized cost of $44.43 per foot.

Analysis - The $240.00 is for the analyses of the 80 samples from hole No. 30 at the authorized cost of $3.00 per sample.

Totals - The Totals, $5,439.61, $256,896.18 and $262,295.79 appear to be correct.

Form MF-104A

The form appears to have been properly completed.

Narrative Report

The narrative report with attached core log and map of D. D. hole No. 30 is considered adequate.

During the period June 1 through June 30, 1959 there were 26 working days and 4 Sundays. The mine was worked 26 days on a two shift basis.

Diamond drill hole No. 30 was completed to 860 feet. It was still in Granite with MoS2 mineralization at the time the hole was stopped. They were unable to go any deeper with their equipment so the hole was stopped at 800 feet.

18 feet of drifting and 9 feet of raising were done at coordinate 1850 North and 1025 East for a drill station next to No. 1 CxN.

No. 31 drill hole was started underground.

Development work was carried on in No. 1 CxN, No. 1 CxN No. 4 Dft W and No. 7 CxN.

Yours very truly,

G. L. Gresham

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Pursuant to authority vested in me, I certify that this account is correct and proper for payment in the amount of:
$ 2719.80
Signature [signature] (Authorized Certifying Officer)
Date 8/3/59 Vou. No. GME 60-5
(See other side)

(For Government use only)

CERTIFICATION BY GOVERNMENT REPRESENTATIVE:

I certify that to the best of my knowledge and belief the contractor submitting this voucher is operating a Defense Minerals Exploration Administration project under Contract No. Idm-E1094 in accordance with the terms of the contract.

Signature T. Mamolo Title Mining Engineer Date 7-30-59

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE: Checked for Engineering Adequacy

Signature J. W. Forrand Title Executive Officer Date JUL 31 1959

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

June 19, 1959

Memorandum

To: T. A. Christensen

From: Executive Officer, OME Field Team, Region III

Subject: Docket No. DMEA 4568 (Molybdenum) Contract Idm-E1094, Molybdenum Corporation of America (Moly or Questa mine) Taos County, New Mexico - Operator's Monthly Progress Report for the month of May 1959

Enclosed are the original and four copies each of Forms MF-104 and MF-104A, Operator's Narrative Report, and Engineer's Report for the above period.

We consider that the Operator has complied with the intent of the contract, and the work for which payment is recommended is acceptable to the Government. All of the work was performed at "Fixed Unit Costs" under the short form contract on Form MF-200A; therefore, documentation of the costs is not required. We recommend that payment be made to the Operator for 50 percent of the amount reported on Form MF-104, subject to your verification of applicable rates and arithmetical accuracy within the report.

To: Executive Officer, OME Field Team, Region III

From: E. M. Hardman

Subject: DMEA Market 4968 (Molybdenum), Contract Ida-3 1094, Molybdenum Corporation of America (Questa mine), Taos County, New Mexico

Progress of work under the subject contract for the month of May 1959 was inspected on June 3, 1959. The operator's claim for 18 feet of raising (drill stations 30 and 31), 80.4 feet of core drilling (drill hole No. 29), and 81 analyses was verified.

Denver 2, Colorado

Dear Sir:

During the period May 1 thru May 31, 1959, there were 26 working days and 5 Sundays. The mine was worked 26 days on two shifts.

Diamond drill hole No. 29 was completed to 804 feet. It was still in Granite with some mineralization when we stopped the hole.

Development work was carried on in No. 7 Crk, No. 1 Crk and drilling on the surface.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Memorandum

TO: T. A. Christensen

From: Executive Officer, OME Field Team, Region III

Subject: Docket No. MMRA 4568 (Molybdenum) Contract No. Idm-E1094, Molybdenum Corporation of America, (Ably or Questa mine) Taos County, New Mexico - Operator's Monthly Progress Report for the month of April, 1959

Enclosed are the original and four copies each of Forms MF-104 and MF-104A, Operator's Narrative Report, and Engineer's Report for the above period.

We consider that the Operator has complied with the intent of the contract, and the work for which payment is recommended is acceptable to the Government. All of the work was performed at "Fixed Unit Costs" under the short form contract on Form MF-200A; therefore, documentation of the costs is not required. We recommend that payment be made to the Operator for 50 percent of the amount reported on Form MF-104, subject to your verification of applicable rates and arithmetical accuracy within the report.

May 21, 1959

Memorandum

To: Executive Officer, OME Field Team, Reg. III

From: Carl Belser

Subject: Docket No. 4568 (Molybdenum) Contract Idm-E1094,
Molybdenum Corp. of America (Moly or Questa mine)
Taos County, N. M. -- Progress report for April 1959

Operations under the subject contract were inspected April 6, 1959 in company with the operator's manager, A. L. Greslin.

The operator claims payment for 300 feet of core drilling and 30 analyses.

Contract Measurements

Hole No. 22 had been deepened from 500 feet to 800 feet and the core was contained in 10 large cardboard boxes and 14 small cardboard boxes. Hole No. 29, not completed, was down 481 feet, with 426 feet - 428 feet almost solid molybdenite. The assay map shows 30 samples. Core recovery was 37.47 percent.

The following Stage II drilling (Hole 22) is allowable for April 1959.

300 feet core drilling at $5.00/ft.	$1,500.00
30 chemical analyses at $3.00/ea.	90.00
	$1,590.00

Payment of 50 percent of the above amount or $795.00 is recommended.

Field Team III
224 New Customhouse
Denver 2, Colorado

Dear Sir:

During the period April 1 through April 30, 1959 there were 26 working days and 5 Sundays. The mine was worked 26 days on two shifts.

Diamond drill hole No. 22 was extended from 500 feet to 800 feet. We were still in granite at that depth but had to stop the hole as that was as far as they could drill with the equipment they have underground.

Drill hole No. 29 was started and drilled to 372 feet during the month.

Development work was carried on in No. 7 CxN, No. 1 CxN and drilling on the surface.

A. L. Greslin

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Memorandum

To: T. A. Christensen

From: Executive Officer, OME Field Team, Region III

Subject: Docket No. BMEA 4568 (Molybdenum) Contract No. Ida K1004, Molybdenum Corporation of America, (Moly or Questa mine) Taos County, New Mexico - Operator's Monthly Progress Report for the month of March, 1959

Enclosed are the original and four copies each of Forms MF-104 and MF-104A, Operator's Narrative Report, and Engineer's Report for the above period.

We consider that the Operator has complied with the intent of the contract, and the work for which payment is recommended is acceptable to the Government. All of the work was performed at "Fixed Unit Costs" under the short form contract on Form MF-200A, therefore documentation of the costs is not required. We recommend that payment be made to the Operator for 50 percent of the amount reported on Form MF-104, subject to your verification of applicable rates and arithmetical accuracy within the report.

Remarks:

Memorandum

To: Executive Officer, OME

From: Carl Belser

Subject: Docket No. DMEA 4568 (Molybdenum) Contract I6m-R1094, Molybdenum Corp. of America (Moly or Questa mine) Taos County, N. M. -- Progress report for March 1959

Operations under the subject contract were inspected April 6, 1959 in company with A. L. Greslin, manager.

The operator claims payment for 1075 feet of core drilling and 108 chemical analyses.

Contract Measurements

The core from hole 26 was in 11 small cardboard boxes and 5 large boxes. The end of the core in the last box was tagged 396 feet. The core from hole 27 was 679 feet long and was contained in 4 large cardboard boxes and 26 small boxes. The 108 chemical analyses are shown on the maps and core logs. Both holes were drilled correctly as to direction and size. Core recovery was 55.8 percent.

Approved:

1075 feet of core drilling at $5.00/ft.	$5,375.00
108 chemical analyses at $3.00/each	324.00
	$5,699.00

Payment of 50 percent of the above amount or $2,849.50 is recommended.

Stage II chemical analyses is 1,006 instead of 1,007. One sample deducted by DMEA in January has not yet been deducted from the forms.

NARRATIVE REPORT

March 1959

Questa, New Mexico
April 13, 1959

Mr. J. W. Townsend
Executive Officer, O.M.E.
Field Team III
224 New Customhouse
Denver 2, Colorado

Dear Sir:

During the period March 1 through March 31, 1959 there were 26 working days and 5 Sundays. The mine was worked 26 days.

Diamond drill hole No. 27 was completed to 679 feet, where we had to stop the hole. They stuck the rods there.

Diamond drill hole No. 26 was completed to 396 feet and we had to stop there. The ground was squeezing so that we were unable to get back to the bottom of the hole.

Development work was carried on in No. 7 CxN and No. 1 CxN.

(For Government use only) Carl Belzer

RECEIVED APR 22 1959 AUDITS BUREAU OF MINES REGION III DENVER, COLO.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

I certify that the above bill is correct and just and that payment therefor has not been received.

Date 4/14/59 *Payee Molybdenum Corp. of America

Per [signature] Title Manager

*When a voucher is signed or receipted in the name of a company or corporation, the name of the person writing the company or corporate name, as well as the capacity in which he signs, must appear. For example: "John Doe Company, per John Smith, Secretary," or "Treasurer," as the case may be.

NOTE.—Title 18, U. S. Code (Crimes), section 1001, makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.

(Instructions on reverse)

Pursuant to authority vested in me, I certify that this account is correct and proper for payment in the amount of: 2849.50

$2849.50

Signature [signature] (Authorized Certifying Officer)

Date 4/23/59 Vou. No. DME 59-103

(See other side)

(For Government use only)

CERTIFICATION BY GOVERNMENT REPRESENTATIVE:

I certify that to the best of my knowledge and belief the contractor submitting this voucher is operating a Defense Minerals Exploration Administration project under Contract No. Fdm-E1094 in accordance with the terms of the contract.

Signature Carl Belin ($2,849.50) Title Mining Engineer Date 4/20/59

Checked as to Engineering Allowability

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature [illegible] Title Executive Officer Date APR 22 1959

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Memorandum

To: T.A. Christensen

From: Executive Officer, OME Field Team, Region III

Subject: Docket No. DMEA 4568 (Molybdenum) Contract Idm-K1094, Molybdenum Corporation of America, (Moly or Questa mine) Taos County, New Mexico - Operator's Monthly Progress Report for the month of February, 1959

Enclosed are the original and four copies each of Forms MF-104 and MF-104A, Operator's Narrative Report, and Engineer's Report for the above period.

We consider that the Operator has complied with the intent of the contract, and the work for which payment is recommended is acceptable to the Government. All of the work was performed at "Fixed Unit Costs" under the short form contract on Form MF-200A, therefore documentation of the costs is not required. We recommend that payment be made to the Operator for 50 percent of the amount reported on Form MF-104, subject to your verification of applicable rates and arithmetical accuracy within the report.

Remarks:

Date of Report----------March 16, 1959
Date Received in Field Office----------March 19, 1959
Date Received in Region Office----------March 20, 1959

Memorandum

To: Executive Officer, OME Field Team, Region III

From: Carl Belser

Subject: Docket No. DMEA 4563 (Molybdenum) Contract Idm-E1094,
Molybdenum Corporation of America (Moly or Questa mine)
Taos County, New Mexico — Progress report for February 1959

Operations on the subject contract were inspected March 3, 1959, in company with the mine foreman, Robert Creal.

The operator claims payment for 12 feet of raising at Station 27. When inspected, this station measured 12 feet by 8 feet by 8 feet. Drill hole No. 27 was not completed during February and is not claimed.

The following allowable Stage II work was done in February 1959:

12 feet of raising at Station for Drill Hole 27 at $44.43 per ft. $533.16

Payment of 50 percent of the above amount, or $266.58 is recommended.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

REGION III
DENVER, COLORADO

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Dear Sir:

During the period February 1 through February 28, 1959 there were 24 working days and 4 Sundays. The mine was worked 24 days.

Diamond drilling was carried on underground and on the surface.

Drill hole No. 27 was down to 562 feet on February 28th. It was drilled to 679 feet. The drillers stuck the rods there and we had to stop the hole. The hole was still in a Porphyry granite with MoS_2 values over 0.25%

12 feet of raising were done at coordinate 850 East in drift west to make room to drill hole No. 29.

Development work was carried on in No. 1 CxN and No. 7 CxN.

DMEA-4568

Gentlemen:

Upon examination of the above Payee's Reference a difference was found which made it necessary to suspend your account accordingly:

Amount Claimed $ 3,005.44

Difference $ 3.00

Amount Approved $ 3,002.44

The reason for the difference was due to:

Disallowance, Analyses

The Operator has reported the cost for 50 sample analyses; however, review of the sample data indicates that only 49 intervals were sampled in hole No. 82. The reported cost for one sample analysis is disallowed, as follows:

Disallowed reported cost for one sample analysis at $3.00 ——— $3.00

Any reclaim for deductions made above must be supported by the ORIGINAL of this form.

Very sincerely yours,

N. E. Stokes
Audit Section

R-III-B & F Form No. 4

Memorandum

To: T. A. Christensen

From: Executive Officer, OME Field Team, Region III

Subject: Docket No. DMEA 4568 (Molybdenum) Contract Idm-E1094, Molybdenum Corporation of America, (Moly or Questa mine) Taos County, New Mexico - Operator's Monthly Progress report for the month of January, 1959

Enclosed are the original and four copies each of Forms MF-104 and MF-104A, Operator's Narrative Report, and Engineer's Report for the above period.

Hole No. 22 was completed to a depth of 500 feet as originally planned; however, the hole encountered mineralization in excess of 1 percent M_oS_2 from 470 to 500 feet; therefore, Government approval to reinter and deepen the hole is pending.

Except as otherwise indicated below, we consider that the operator has complied with the intent of the contract, and the work for which payment is recommended is acceptable to the Government. All of the work was performed at "Fixed Unit Costs" under the short form contract on Form MF-200A, therefore documentation of the costs is not required. We recommend that payment be made to the Operator on the following basis, contingent on your verification of applicable rates and arithmetical accuracy within the report.

Disallowance, Analyses

The Operator has reported the cost for 50 sample analyses; however, review of the sample data indicates that only 49 intervals were sampled in hole No. 22. The reported cost for one sample analysis is to be disallowed, as follows:

Disallow reported cost for one sample analysis at $3.00---- $3.00

Reconciliation with Amount Reported by the Operator on Form MF-104 for the month of January, 1959

Amount reported on Form MF-104 for January, 1959------	$3005.44
Amount to be disallowed----------	3.00
Acceptable cost for January, 1959----------	$3002.44
Government participation at 50 percent----------	$1501.22

Remarks:

Date of Report---------- February 14, 1959
Date Received in Field Office---------- February 17, 1959
Date Received in Region Office---------- March 9, 1959

Memorandum

To: Executive Officer, OME

From: Carl Belser

Subject: Docket No. DMEA 4563 (Molybdenum) Contract Idm-E1094,
Molybdenum Corp. of America (Moly or Questa mine)
Taos County, N. M. -- Progress report for January 1959

Operations under the subject contract were inspected on March 3, 1959 in company with the mine foreman, Robert Creel.

The operator claims payment in January 1959 for 3 feet of drill station, 500 feet of core drilling and 50 chemical analyses.

Contract Measurements

Only 49 samples could be counted on the maps and assay sheets. Diamond drill hole No. 22 was checked and was S. 60° W., dip -70°. The hole was drilled BX to 290 feet and was AX from there to 500 feet. The core was contained in 15 cardboard boxes. The drill station measured 7.9' x 10.4' x 7' or 575 cubic feet as against the 280 cu. ft. 7' x 8' x 5' claimed.

Advance by the company on No. 1 CxX totaled 633 feet and on No. 7 CxX 612 feet. No. 27 hole was being drilled vertical and was down 607 feet. Withheld - 1 chemical analysis at 3.00.

Approved:

3 foot drill station at $44.43 per foot	$355.44
500 feet of core drilling at $5.00 per feet	2500.00
49 chemical analyses at $3.00 each	147.00
	$3,002.44

Payment of 50 percent of the above amount or $1,501.22 is recommended.

Dear Sir:

During the period January 1 through January 31, 1959, there were 27 working days, 4 Sundays,. The mine worked 27 days. The diamond drill crew worked 21 days.

Diamond drill hole No. 22 was completed to 500 feet. It was started on January 8th and completed on January 31st.

8 feet of raising were done in No. 4 CxS coordinate 700 S. to make room to drill holes 26 and 27.

Development work was carried on in No. 1 CxN and No. 7 CxN.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.
