Re: DMA-1644X
Robert P. Succetti
Blackhawk Mine, Lincoln County, Nevada
Exploration loan $21,129.40
Lead, silver, copper, iron

Memorandum

To: Reports and Records Unit
Administrative Management Div.

From: Chief, Lead-Zinc Branch

Subject: Recommendation for denial of application submitted by Robert P. Succetti for loan to explore the Blackhawk Mine, Lincoln County, Nevada.

The subject application has been reviewed by the Lead-Zinc Branch.

The applicant proposes to drill four diamond drill holes having a total footage of 2120 feet to explore two fissures of the Blackhawk mine. Estimated expenditures are as follows:

Construction of cook shack at $500 for material and $500 for labor.....	$ 1,000.00
Purchase of diamond drill with complete equipment.....	4,869.40
Labor at $45/day for 1 supervisor, 1 driller and 1 helper.....	15,260.00
Total estimated cost...	$ 21,129.40

The applicant's share of the cost would be the labor furnished by himself and his two partners.

It is estimated that the drilling, which is in limestone, could be done in about 110 days including moving and setting up the drill. This would mean an expenditure for labor of $4,950 rather than $15,260 as estimated by the applicant. To the amount of $4,950 can be added $500 for labor for construction of the cook shack, making a total of only $5,450 as the applicant's share of the total cost of the project.

It is questionable whether the applicants are qualified to operate a diamond drill. According to their application they have had experience as hoist men, blacksmith, carpenter, and all around

miners. No evidence is presented as to their abilities as diamond drillers.

Furthermore, the drilling probably could be done at less expense by contract. On the basis of other applications, $7.00 per foot appears reasonable. This would mean an expenditure of only $14,840 for the drilling, or a total estimated project cost, including construction of the cook shack, of $15,840.

For the above reasons, it is recommended that the application be denied and the attached letter sent to the applicant.

Returned herewith are:

3 Copies of Form MF-103 with one copy of answers to questions including assay sheets and sketch map.
1 Copy of "Review of Application for Exploration Assistance".
1 Copy of memorandum from Executive Officer of Field Team to Tom Lyon, dated August 2, 1951.
2 maps prepared by Charles M. Tschanz.
1 Copy of Form MF-200 with attached exhibits submitted by applicant.
1 Copy of "Statement of Expenses" submitted by applicant.
1 Copy of memorandum from Executive Officer of Field Team to T. P. Billings dated August 22, 1951.

Re: DMA-164X

Q, E C

Mr. Robert P. Succetti

Pioche, Nevada

Dear Mr. Succetti:

The Defense Minerals Administration has reviewed your application for a loan to explore the Blackhawk mine in the Indian Mining District, Lincoln County, Nevada.

Your revised proposal for exploring this property consists of drilling four diamond drill holes having a total footage of 2120 feet. To accomplish this you plan to purchase, with financial aid from the Government, a diamond drill with necessary accessories. The drill is to be operated apparently by you and your two partners and the labor which you contribute is to be your entire share of the total cost of the project, which you estimate as $21,129.40.

The drilling which you plan to do should not take more than about 110 days, including moving and setting up the drill. At the rate of $45 per day for wages for yourself and partners, your contribution to the project would be only $4,950 to which can be added $500 in labor for construction of the building you request, making a total of $5,450. This amount is much less than the 50% of the total cost of the project required by Government regulations. Furthermore, we cannot approve a diamond drilling program that is not conducted by experienced drillers, and your application does not indicate such experience on your part.

In addition, it is believed that this drilling could be done by contract at about $7.00 per foot. The cost of the project would then be $14,840 for the drilling to which would be added $1,000 for construction of the building making a total of $15,840.

Because your share of the total cost of the project is less than that required and also because the work you wish to do can be

accomplished for less money by contracting the drilling, I regret that we are unable to approve an expenditure of public funds for this project.

We wish to thank you for bringing this property to our attention.

Very truly yours,

BJ 9/12

August 22, 1951

Memorandum

To: T. P. Billings, Chief, Lead Zinc Branch, Defense Minerals Administration, Washington, D. C.

From: Executive Officer, DMA Field Team, Region III

Subject: Docket DMA-1644X - Lead-Copper - Black Hawk Deposit, Lincoln County, Nevada - Robert P. Succetti, Pioche, Nevada.

Reference is made to your subject letter dated August 20, requesting copies of our field report on the Robert P. Succetti, Blackhawk Deposit, Lincoln County, Nevada.

As the docket file has been returned to Washington, we have no record here of exactly what we were requested to do when it was referred to us. I gain, however, from correspondence in our files that we were requested to check the "Review of Application" for specific points that needed clarification, such as ownership, experience of the applicant, and the merit of the proposal.

You have a copy of my letter of July 9 to Mr. Robert P. Succetti, Pioche, Nevada, subject: DMA Docket 1644X, Lead-Copper. You also have a copy of my letter to Mr. Succetti dated July 20, subject: DMA-1644X - Lead-Copper, Blackhawk Deposit, Lincoln County, Nevada.

As a result of those letters we received tracings of two maps of his property, showing the proposed work, a "Statement of Expenses" sheet, a sample copy of MF-200 filled out, and information needed to complete the contract exhibits A to E, inclusive.

As no examination of the property specifically was requested (if I remember correctly), none was made although back in June Mr. C. F. Park of the Geological Survey who was working in the Pioche area at the time was furnished the docket and requested to "give us (Field Team) enough information to act on the docket either from your (his) knowledge or by making the necessary examination". He also was asked to check over the "Review of Application".

AUG 28 1951

INSPECTOR GENERAL'S
WASHINGTON, D.C.
1951 AUG 27 PM 1 41

Apparently Mr. Park did not prepare a report on the deposit, but merely got the additional information that was requested. He also convinced Mr. Succetti that the best way to explore the deposit is to diamond drill it rather than sink a shaft. As a result Mr. Succetti submitted the supplemental information.

On the strength of what Mr. Park did to line up Mr. Succetti's program, we naturally assumed that he considered the deposit warranted diamond drilling and no examination report was needed.

Thus, we have no field report to send in reply to your letter. Should such a report be needed, we will make an examination upon request by you.

H. C. Miller

Dear Mr. Miller:

We have received the original application (Docket DMA-164x) and supporting data submitted by Robert P. Succetti for a loan to explore the Blackhawk deposit in Lincoln County, Nevada which you transmitted to this office August 2, 1951. Attached thereto were two maps by Charles M. Tschanz, but no field report was included. Would you please send this report to us as soon as possible.

Very truly yours,

Memorandum

To: Tom Lyon, Chairman, Coordinating Committee, Defense Minerals Administration, Washington 25, D. C.

From: Executive Officer, DMA Field Team, Region III

Subject: Docket DMA-1644-X Blackhawk Deposit
Lincoln County, Nevada
Robert P. Succetti, Pioche, Nevada
Lead-copper

Reference is to your subject "Review of Application for Exploration Assistance", dated June 20 and your letter to applicant, dated June 19, informing him that his application has been referred to me to obtain additional information on his property.

On July 9 I wrote the applicant for further information and sent him a sample copy of the contract Form MF-200. In reply I received tracings of two maps of his property with the proposed work indicated thereon, together with a "Statement of Expenses" (yellow sheet), and the sample copy of Form MF-200 filled out.

On July 20 I acknowledged the supplemental information received in reply to my July 9 request. At the same time I asked for still further information which was received in this office on July 30. This information, concerning exhibits for the contract, is on two notebook sheets attached to the docket.

I note that the contract, as prepared by Mr. Succetti, gives a total cost of $20,000 whereas, the total cost based upon total costs of Exhibits B, C and D is $21,129.40, erroneously given as $20,108.40 by Mr. Succetti. Note that a correction of $21 should be made in the cost of drill rod, itemized under Exhibit C.

AUG 7 1951

The estimated cost of $7 a foot for diamond drilling seems a bit high, especially when it is considered that the applicant will have his own machine and is not entitled to a profit on its operation.

Subject docket, with supplemental information, is being returned herewith.

H. C. Miller
Executive Officer
DMA Field Team, Region III

EXPLORATION PROJECT CONTRACT [1]

It is agreed this 16 day of July, 1951, between the United States of America, acting through the Department of the Interior, Defense Minerals Administration, hereinafter called the "Government," and [2]
Mr. Robert P. Succetti, Pioche, Nevada
Mr. Leroy Alexander, Pioche, Nevada Partnership
Mr. George L. Alexander, Pioche, Nevada

hereinafter called the "Operator," as follows:

1. *Authority for contract.* This agreement is entered into under the authority of the Defense Production Act of 1950, pursuant to Mineral Order 5, entitled "Regulations Governing Government Aid in Defense Exploration Projects."

2. *Operator's property rights.* The exploration project shall be conducted on that certain property situated in the State of Nevada, County of Lincoln described as follows: [3]
Blackhawk Mine, Indian Mining District located on the northeast tip of Timber Mountain 28 miles west of Sunnyside by road.

with respect to which the Operator represents and undertakes: [4]

(*a*) That he is the sole owner, in possession and entitled to possession, and that the property is subject only to the following claims, liens, or encumbrances as to each of which the subordination agreement of the holder is attached:
none

(*b*) ~~That he is a lessee, in possession and entitled to possession, and the subordination agreement of the lessor is attached.~~

3. *Exploration project.* The Operator, within 60 days from the date of this contract shall commence work on a project of exploration for [5] lead and copper; shall prosecute the work efficiently, expertly, in a workmanlike manner, in accordance with good mining standards, with suitable and adequate equipment, materials, and labor, all properly designed to bring the project to completion within a period of [6] 12 months from the date of this contract. The exploration project and the work to be performed are more fully described on Exhibit "A" attached hereto, which, with any maps or drawings thereto attached, is made a part of this contract.

4. *Performance of the work.* The work shall be performed by the Operator, under his sole direction and control: *Provided,* That with the consent of the Government and its written approval of the contract or contracts, all or any part of the work may be performed by the Operator through contract or contracts with independent contractors. The Government shall have the right to enter and observe and inspect the work at all reasonable times, and the Operator shall provide the Government with all available means for doing so. The Government may consult with and advise the Operator on all phases of the work.

5. *Fixtures and improvements.* The Operator shall devote the land and all existing improvements, facilities, buildings, installations, and appurtenances to the purposes of the exploration project without any allowance for the use, rental value, depreciation, depletion, or other cost of acquiring, owning, or holding possession thereof. Attached hereto, marked "Exhibit 'B'," is a detailed list of additional facilities, buildings, and fixtures, to be purchased, installed, or erected by the Operator, with the estimated cost of each, to which the Government will contribute its agreed pro-rata share of the cost. The difference between the cost of such additional facilities, buildings, or fixtures, and the salvage value thereof at the conclusion of the work, shall be charged as a cost of the project to which the Government has contributed its pro-rata share.

6. *Operating equipment.* Attached hereto, marked "Exhibit 'C'," is a detailed list of operating equipment divided into categories of items to be rented, purchased, or furnished by the Operator, with the allowable rental, purchase price, or rental value, as the case may be, annexed to each. As to equipment purchased for the project, the Government will contribute its agreed pro-rata share of the cost thereof, and the difference between the cost and the salvage value at the conclusion of the work shall be charged as a cost of the project to which the Government has contributed its pro-rata share.

[1] If sufficient space is not provided in any blank, use an extra sheet of paper and refer to it in the blank.
[2] State name, address, and nature of organization if any.
[3] Give legal description or enough to identify the property.

7. *Title to and disposition of property.* [illegible] facilities, buildings, fixtures, equipment, or other items costing more than $50 each, paid for or purchased with funds contributed jointly by the Operator and the Government, shall belong to the Operator and the Government jointly, in proportion to their respective contributions, and upon the termination of the contract, if they have any salvage value, shall be disposed of for their joint account unless the Government, in writing, waives its interest in any such items. The Government may require the dismantling, severance from land, and removal of any such items in order to realize its interest in the salvage value thereof, and the cost of any such removal and of the disposal of the items shall be for the joint account of the parties in proportion to their respective interests.

8. *Labor and supervision.* Attached hereto, marked "Exhibit 'D'," is an itemized schedule of labor, by numbers and classes (miners, muckers, millmen, etc.), and of supervisors, by numbers and positions, with the maximum wages or salaries that may be paid to each as an allowable cost of the project.

9. *Rehabilitation and repairs.* Attached hereto, marked "Exhibit 'E'," is a detailed schedule of existing facilities, buildings, installations, and fixtures, with a statement of the cost of any necessary rehabilitation or repairs to put into useful and operable condition, which cost shall be allowed as a cost of the project.

10. *Allowable costs of the project.* The allowable costs of the project in which the Government will participate are limited to the necessary, reasonable, direct costs of performing the exploration work, including the costs of materials, supplies, engineering, power, water, and utilities, including items of equipment costing less than $50 each; and the costs referred to in Articles 5, 6, 8, and 9, and the exhibits annexed to and referred to in the contract. Although the Government may pay part of the cost of new or additional facilities, structures, buildings, and equipment, only the depreciation on such items, computed as indicated in Articles 5 and 6, will be charged as a cost of the project. No items of general overhead, corporate management, interest, or any other indirect costs not expressly allowed by these regulations, or work performed or costs incurred before the date of this contract, shall be allowed as costs of the project in which the Government will participate.

11. *Participation by the Government.* At the end of the first full calendar month after the Operator has commenced work under the project, and at the end of each succeeding calendar month, the Operator shall submit to the Government a voucher for payment with a detailed statement of work done and allowable costs (as defined in Article 10 of this agreement) incurred, in a form and with supporting data acceptable to the Government. After approving the voucher, the Government shall pay to the Operator 50 percent of the sum of such costs incurred; *Provided,* That the aggregate total of all sums paid by the Government under this agreement shall not exceed $10,000, which is 50 percent of the agreed estimated total cost of this project, $20,000.

12. *Accounts and audits.* The Operator shall keep suitable records and accounts of operations, which the Government may inspect and audit at any time. The Government may at any time require an audit of the Operator's records and accounts by a certified public accountant, the cost thereof to be treated as a cost of the project. The Operator shall keep and preserve said records and accounts for at least 3 years after the completion of the project or the termination of this contract.

13. *Progress reports.* The Operator shall provide the Government with monthly reports of progress in form and content satisfactory to the Government, and upon the completion of the project or termination of the contract shall provide the Government with a comprehensive geologic and engineering report, including an estimate of ore reserves, to the best of his ability. Four copies of all reports shall be furnished to the Government.

14. *Repayment by Operator.* If, upon the completion of the exploration project or termination of the contract, the Government considers that a discovery or development has resulted from the work from which commercial production of ore may be made, the Government, within 6 months thereafter shall so certify to the Operator, particularly describing and delimiting its estimate of the discovery or the development. Thereafter, if and as ore is produced as a result of such discovery or development, the Operator and his successor in interest shall be and become obligated to pay to the Government a percentage royalty on the net smelter returns or other net proceeds realized from such ore, concentrates, or metal produced within ten (10) years from the date of this contract, until the total amount contributed by the Government, without interest, is fully repaid or said 10 years have elapsed, whichever occurs first, as follows:

Of net smelter returns or other net proceeds not in excess of eight dollars ($8.00) per ton of ore: One and one-half (1½) percent.

Of net smelter returns or other net proceeds in excess of eight dollars ($8.00) per ton of ore: One and one-half (1½) percent, plus one-half (½) percent additional for each full fifty cents ($0.50) in excess of eight dollars ($8.00) per ton of ore, but not in excess of a maximum of five (5) percent.

This obligation to repay from net returns or proceeds shall be and remain a claim and lien upon the property which is the subject of the exploration project and upon any production resulting from such discovery or development, in favor of the Government, until fully paid, or until said 10-year period has elapsed; and this claim and lien and the Government's right to repayment shall survive any termination of the contract, whether by completion of the exploration project or otherwise. This article is not to be construed as imposing any obligation on the Operator or his successor in interest to produce ore from any such discovery or development.

15. *No assignment of contract.* Without the written consent of the Government, the Operator shall not assign or otherwise transfer or hypothecate this contract or any rights thereunder.

16. *Termination and completion.* The Government may, at any time, by written notice to the Operator, terminate this contract: (*a*) If the Operator fails to provide his share of the money necessary to prosecute operations pursuant to the terms of the contract; (*b*) if the Operator, in the opinion of the Government, fails to prosecute operations pursuant to the terms of the contract; or (*c*) if in the opinion of the Government, operations up to the time of the notice have not indicated the probability of making any worthwhile discovery and in the opinion of the Government further operations are not justified. Upon the completion of the project or any termination of the contract the Operator shall render to the Government a full and final accounting of his operations under the contract and his expenditures of money; shall dispose of any unused materials, supplies, and equipment for the joint account of the Operator and the Government in the proportion of their respective interests; and shall pay to the Government its pro-rata share of any money remaining.

Executed in triplicate the day and year first above written.

Mr. Robert P. Succetti
Pioche, Nevada

Subject: DMA Docket 1644X
Lead - Copper

Dear Mr. Succetti:

Mr. Charles F. Park, Jr., Geologist, U. S. Geological Survey, has reported to us that you have agreed that the best way to explore your lead-copper deposit near Pioche, Nevada, is by diamond drilling. He reports, also, that you would rather diamond drill than sink a shaft and if your loan is granted you would purchase your own diamond drill rig and do the work yourself.

We are willing to consider the new proposal, but before submitting our recommendations to Washington, we will want a detailed proposal from you, including a map or sketch showing the number, length and location of the proposed diamond drill holes. Probably the best way to indicate to you the kind of information that should be furnished is to refer you to Exhibits A to E, inclusive, which must be attached to the Exploration Project Contract before it is ready for signatures. We are, therefore, sending you a sample copy of form MF-200, which explains the kind of information needed to complete Exhibits A to E, inclusive. It would also help us if you filled out the entire contract form and returned it to us with the other information. We would then have the complete information needed for making out the contract forms. You understand, of course, that you will be required to put up one-half of the cost of the project, as for lead and copper the Government participates only to the extent of 50 percent.

Mr. E. H. Bailey of the U. S. Geological Survey in San Francisco told me that he is writing to Mr. Park, telling him that he is to help you prepare your map or sketch of the proposed work if you need such assistance.

We are always ready to help you, so do not fail to call on us if we can be of assistance.

Sincerely yours,

H. C. Miller
Executive Officer, DMA Field Team
Region III

Re: Docket DMA-1644X

Mr. Robert P. Succetti

Pioche, Nevada

Dear Mr. Succetti:

Your application (Docket DMA-1644X) for a Government loan under the provisions of the Defense Production Act of 1950 has been reviewed by the Lead-Zinc Branch of the Defense Minerals Administration. Before final decision can be taken on your request, it will be necessary to obtain additional information on your property. Your application, therefore, has been referred to Mr. H. C. Miller, Executive Officer of the Field Team, 1415 U. S. Appraiser's Building, San Francisco 11, California, for further information and advice.

Very truly yours,

Tom Lyon, Director
Supply Division

Date of filing MF-100

DMA Docket Number, if available

INSTRUCTIONS

Read Mineral Order 5, Regulations Governing Government Aid in Defense Projects, before completing this application. Submit four signed copies of the application to Defense Minerals Administration, Department of the Interior, Washington 25, D. C., or to the nearest field executive officer thereof, with your name and address on each sheet of the application and all accompanying papers. If any question is inapplicable, or if you cannot answer it, so state on the form. Where the space provided for answer is insufficient, answer on a separate sheet, annex it to the application form, and refer to it in space for answer. If the application is approved, you will be presented with an exploration project contract on Form MF-200, for your signature.

THE APPLICANT

*1. Is applicant an individual, partnership, or corporation? Partnership
*2. If a partnership, state names and addresses of partners. LeRoy Alexander George Alexander
*3. If a corporation, state names and addresses of officers, directors, and five largest stockholders.
*4. Describe the mining and general business experience of (a) the applicant, and (b) the person or persons who will manage the project.
*5. Are you the owner or the lessee of the property? Yes
6. If owner, state what claims, liens, or encumbrances, if any, are against the property. None
7. If lessee, attach a copy of the lease and state if it is in good standing.

NOTE.—It will be necessary to procure and attach to the exploration project contract agreements of claimants, lienors, encumbrances and lessors subordinating their interests in the property to the interest of the Government under the contract.

8. Furnish current financial statement, showing assets and liabilities, and a profit and loss statement.
9. How much money is applicant prepared to invest in proposed project? Is it sufficient to pay your part of the cost of the project as detailed in question 23 of this application form, in accordance with the regulations on Government participation (Section 9 of Mineral Order 5)?

*If you have already answered these questions on MF-100, you are not required to answer the questions for this application.

16—64067-1

THE PROPERTY

10. (*a*) Give a description of the real property that will be in any way involved in the exploration project, including any existing mine or operating property.

(*b*) Give the legal description of the exact parcel, plot, or area upon which the exploration is to be conducted.

NOTE.—If both areas are the same, so state. The only obligation to repay the Government is from the net earnings from any commercial discovery made in the area specified in (*b*) above in which the exploration is to be conducted, and the expenditure of funds which may be charged as costs of the project must be limited to that area or to work necessary to perform the exploration in that area.

*11. State the present and former names of the property, if any.

*12. State, in detail, the location of the property with reference to towns, railroads, roads, shipping points, including distances and directions and kinds and conditions of roads.

*13. State source and quantity of water available for operations and its sufficiency at all seasons.
State amount of power to be used, rate per hour or other cost, and source.

*14. Describe any existing useable facilities, equipment, buildings, or structure now on the property that will be devoted to the exploration work.

15. State in detail how the ore could be shipped and how and where milled.

*16. History:

(*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for any past suspensions of operations.

(*b*) State briefly the known history and production of adjoining and neighboring properties.

(*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.

*17. Production:

(*a*) If mine is in production, furnish the following information:

	Tons per day	*Grade or analysis*	*Cost per ton*	*Net value per ton*
(1) Mining				
(2) Milling				
(3) Shipped or sold				

*18. Ore or mineral reserves: (If property is or has been operating.)

(*a*) Describe the ore or mineral deposits briefly.

(*b*) Submit available maps and assay data.

(*c*) Give estimated tonnage and grade of each class of ore reserves.

19. State any conditions or circumstances regarding the property not sufficiently brought out by the foregoing questions.

THE EXPLORATION

20. For what mineral or minerals and for what types of deposits and ores will the exploration be conducted?

21. Describe briefly, but concisely, the proposed work and the estimated time required to complete it.

NOTE.—The Government will not participate in a project that will require more than 2 years to complete.

22. Furnish statement of the geological basis of the project with particular emphasis on factors leading the operator to expect the finding of commercial ore bodies. This statement should be accompanied by supporting maps such as geological maps, maps of the proposed openings and assay maps, sample lists, and other pertinent data.

THE REQUIREMENTS AND COSTS

23. Tabulate in the form of an itemized statement with a sum for each item the estimated requirements and costs of the project so that the total will give the estimated cost of the project in which the Government will participate, as follows:

(*a*) Labor, by numbers and classes (miners, muckers, millmen, etc.), with wages of each.

(*b*) Supervisors, by numbers and positions, with salaries of each.

(*c*) Cost of necessary repairs to existing facilities, structures, and buildings.

(*d*) Cost of necessary installation or construction of additional facilities, structures, and buildings.

(*e*) Cost of items of equipment, not now owned by the applicant which must be purchased for operations at a cost of $50 or more each.

(*f*) Cost of rental for equipment which the operator proposes to rent.

(*g*) Rental value of items of equipment which the operator now owns and which will be devoted to the work.

(*h*) Cost of materials and supplies, including items of equipment costing less than $50 each.

(*i*) Cost of power, water, utilities, and any other items not provided for above.

24. Furnish a time schedule of the project, stated in terms of months after project is approved, showing progress expected to be accomplished and the money expected to be spent.

CERTIFICATION

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this form and accompanying papers is correct and complete to the best of their knowledge and belief.

Defense Minerals Administration

Review of Application for Exploration Assistance

Docket No. 164X

Commodity Lead-copper

Total Amount ?

Govt. Participation $10,000

1. Name and Address of Applicant Robert P. Succetti, Pioche, Nevada

2. Location of Property Timber Mountain, Lincoln County, Nevada

3. Mineral or metal Lead-Copper Is it listed in Section 9 of MO-5? Yes

If not, application will be rejected.

4. Geologic probability of discovery—based on data in application (question #16, 17, 18, 20 and 22)*

Mines or Survey reports, etc., do you rate chances:

a) Good

b) Poor X (probably)

c) None

d) Don't know—needs field examination X

e) Is there an alternative and favorable project?
(If so, attach an explanation)

5. Is the applicant's right to the property clearly stated? No
(question 5, 6, 7)* See answer to question No. 5

6. If applicant is a lessee, is a copy of the lease attached? No

Does the lease have sufficient time to run to cover a future

productive period?

*question numbers are those of MF-103

7. Are subordination agreements necessary? _____

a) MF-201? _____

b) MF-202 _____

8. From the data presented, does the proposed project appear feasible from the point of view of:

a) Available manpower _____

b) Equipment and supplies _____
(Question 14 plus general knowledge of availability)*

c) Accessibility (question 12)* _____

d) Water (question 13)* _____

e) Power (question 13)* _____

Is a field check needed on any of these points? _____

9. Does the experience of the applicant appear to be adequate to assure that he can properly conduct the proposed project? (question 4)* No

_____

Is a field check needed on this point? Yes

10. Exhibit A. (questions 21 and 22)*

a) Is the project adequately described? No

If not, are there sufficient data given so that you can describe the project? No If so, attach a draft.

b) Is there an adequate map or sketch of the proposed work? No

_____

c) Is the proposed work "exploration" under the definition of Section 8, MO-5? Yes

If not, what part of it is? _____

_____

_____

_____

Is this part a worthwhile exploration project?_____

d) Are the cost estimates detailed? No

Can they be summarized, as on page 2 of Procedural Instruction 5-A, from the available data? No If so, attach a draft.

e) Are the cost estimates reasonable?_____

f) Should more information be requested from applicant?_____

g) Is a field examination necessary to complete Exhibit A?_____

11. Exhibit B (question 23-d)*

a) Is it applicable?_____

b) If so, are sufficient data furnished?_____ If so, attach a draft.

c) Is a field check needed?_____

12. Exhibit C (question 23-e, f and g)*

a) Is it applicable?_____

b) Sufficient data?_____ If so, attach a draft.

c) Are rents and charges reasonable?_____

d) Is a field check needed?_____ _____

13. Exhibit D (question 23-a, b)*

a) Are there sufficient data?_____

b) Is the schedule adequate for the work proposed?_____

c) Is the schedule excessive for the work proposed?_____

d) Are the proposed wages and salaries reasonable?_____

e) Is a field check needed?_____

14. Exhibit E (question 23-c)*

a) Is it applicable? _____

b) Sufficient data? _____

c) Reasonable? _____

d) Field check needed? _____

15. In your judgment, can the proposed work be done in the proposed time? Yes

(All exploration must be completed within two years)

16. If field examination is not needed, attach your recommendation.

17. If field examination is needed, do you have any special instructions for the field team not indicated by your answers to the foregoing question? This proposal is given a low priority. There is not sufficient geologic detail to substantiate a favorable recommendation. The possibilities of ore from a geologic viewpoint should be determined by the field team, possibly from information already available in their office.

INSTRUCTIONS

Read Mineral Order 5, Regulations Governing Government Aid in Defense Projects, before completing this application. Submit four signed copies of the application to Defense Minerals Administration, Department of the Interior, Washington 25, D. C., or to the nearest field executive officer thereof, with your name and address on each sheet of the application and all accompanying papers. If any question is inapplicable, or if you cannot answer it, so state on the form. Where the space provided for answer is insufficient, answer on a separate sheet, annex it to the application form, and refer to it in space for answer. If the application is approved, you will be presented with an exploration project contract on Form MF-200, for your signature.

THE APPLICANT

*1. Is applicant an individual, partnership, or corporation? Partnership
*2. If a partnership, state names and addresses of partners. LeRoy Alexander George Alexander.
*3. If a corporation, state names and addresses of officers, directors, and five largest stockholders.
*4. Describe the mining and general business experience of (*a*) the applicant, and (*b*) the person or persons who will manage the project.
*5. Are you the owner or the lessee of the property? Yes
6. If owner, state what claims, liens, or encumbrances, if any, are against the property. None
7. If lessee, attach a copy of the lease and state if it is in good standing.

NOTE.—It will be necessary to procure and attach to the exploration project contract agreements of claimants, lienors, encumbrances and lessors subordinating their interests in the property to the interest of the Government under the contract.

8. Furnish current financial statement, showing assets and liabilities, and a profit and loss statement.
9. How much money is applicant prepared to invest in proposed project? Is it sufficient to pay your part of the cost of the project as detailed in question 23 of this application form, in accordance with the regulations on Government participation (Section 9 of Mineral Order 5)?

*If you have already answered these questions on MF-100, you are not required to answer the questions for this application.

16—64067-1

THE PROPERTY

10. (*a*) Give a description of the real property that will be in any way involved in the exploration project, including any existing mine or operating property.
    (*b*) Give the legal description of the exact parcel, plot, or area upon which the exploration is to be conducted.

    NOTE.—If both areas are the same, so state. The only obligation to repay the Government is from the net earnings from any commercial discovery made in the area specified in (*b*) above in which the exploration is to be conducted, and the expenditure of funds which may be charged as costs of the project must be limited to that area or to work necessary to perform the exploration in that area.

*11. State the present and former names of the property, if any.

*12. State, in detail, the location of the property with reference to towns, railroads, roads, shipping points, including distances and directions and kinds and conditions of roads.

*13. State source and quantity of water available for operations and its sufficiency at all seasons.
State amount of power to be used, rate per hour or other cost, and source.

*14. Describe any existing useable facilities, equipment, buildings, or structure now on the property that will be devoted to the exploration work.

15. State in detail how the ore could be shipped and how and where milled.

*16. History:
    (*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for any past suspensions of operations.
    (*b*) State briefly the known history and production of adjoining and neighboring properties.
    (*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.

*17. Production:
    (*a*) If mine is in production, furnish the following information:

	Tons per day	*Grade or analysis*	*Cost per ton*	*Net value per ton*
(1) Mining				
(2) Milling				
(3) Shipped or sold				

*18. Ore or mineral reserves: (If property is or has been operating.)
    (*a*) Describe the ore or mineral deposits briefly.
    (*b*) Submit available maps and assay data.
    (*c*) Give estimated tonnage and grade of each class of ore reserves.

19. State any conditions or circumstances regarding the property not sufficiently brought out by the foregoing questions.

THE EXPLORATION

20. For what mineral or minerals and for what types of deposits and ores will the exploration be conducted?

21. Describe briefly, but concisely, the proposed work and the estimated time required to complete it.

    NOTE.—The Government will not participate in a project that will require more than 2 years to complete.

22. Furnish statement of the geological basis of the project with particular emphasis on factors leading the operator to expect the finding of commercial ore bodies. This statement should be accompanied by supporting maps such as geological maps, maps of the proposed openings and assay maps, sample lists, and other pertinent data.

THE REQUIREMENTS AND COSTS

23. Tabulate in the form of an itemized statement with a sum for each item the estimated requirements and costs of the project so that the total will give the estimated cost of the project in which the Government will participate, as follows:
    (*a*) Labor, by numbers and classes (miners, muckers, millmen, etc.), with wages of each.
    (*b*) Supervisors, by numbers and positions, with salaries of each.
    (*c*) Cost of necessary repairs to existing facilities, structures, and buildings.
    (*d*) Cost of necessary installation or construction of additional facilities, structures, and buildings.
    (*e*) Cost of items of equipment, not now owned by the applicant which must be purchased for operations at a cost of $50 or more each.
    (*f*) Cost of rental for equipment which the operator proposes to rent.
    (*g*) Rental value of items of equipment which the operator now owns and which will be devoted to the work.
    (*h*) Cost of materials and supplies, including items of equipment costing less than $50 each.
    (*i*) Cost of power, water, utilities, and any other items not provided for above.

24. Furnish a time schedule of the project, stated in terms of months after project is approved, showing progress expected to be accomplished and the money expected to be spent.

CERTIFICATION

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this form and accompanying papers is correct and complete to the best of their knowledge and belief.

1.)

Govirment Assistance:

I Robert P Succetti. & Roy Alexander George Alexander would like to get Defense minerals prospectors finance Allotment of $10,000,

We want to put our share of Expenses in the form of our labor and what machinery and equipment We now Own

We have had a life time experience of mining as miner shoot man Black smith carpenter all around miner

I Robert P Succetti hereby certify in this form of papers is correct to the best of my knowledge

Robert P Succetti

The Property

10.) Description of property is in Lime stone which is layed in Bedding planes the ore is made In the beds + in fissure at difrent points.

11.) Former Name was Lucky Tom.

12.) Property located Timber Mountian Indian mining district Lincoln Co Nevada situated forty five miles West of Pioche Nev Lincoln Co Rail road point Pioche Nev Smelters are in Salt Lake + Murray Utah which the ore would be smelted Conditions of road to property good.

13) No water on property water has to be hauled 17 mile water all times of year we own a spring of our on way to mine 25 mile water at all times proven to be used will be operated with gasoline equipment.

LON GILLESPIE
DEPUTY

14) Small tente house one good
mine horse power gasoline hoist
that will do work sinking we
have 2 good rock drills air & water
hoses pipe rails steel bits and
all necessary tools required to
operate a mine.

15) The ore will be trucked to Pioche Nev
shipped by rail road to smelters in
Salt Lake Utah High grade can be
Trucked direct to smelters about 300 miles

History. Black Hawk No1. No2. No3.

16.) Owned by another party in early days
said party shipped a few small pockets
of high grade ore from surface pockets
Was hauled by team and wagon
Owner died & property was left open for
Relocation I Robert P Lucette. Le Roy Alexander
Located property July 1th 1929 later
took George Alexander as third partner.
Have a tunnel on No 2 fissure one hundred
forty five ft but did not get much ore
Small pocket thirty ft from portal of tunnel.
Winze sunk at this point cuting the
feds fissure showing values.
We did last work on No 1 fissure sunk
small shaft 5 X 7 fifty ft. On surface
at this point took twelve tons high grade
ore out just small pocket Neighboring
Properties Bristol Silver large producer for
seventy years 25 miles North East
Tungston Comet 25 miles south East
Done work each year Claims Not Patented.

LON GILLESPIE
DEPUTY

18) Property last worked last year.

19.) This property has not ben put on paying Basis for the lack of finance to develop

20.) Lead Silver Copper iron

21) Proposed work sinking shaft now fifty ft deep 5 X 7 which is on No 1 fissure dipping 70 degrees to No 2 fissure never leaving fissure cutting all beddings when one comes in prospect it some sinks at least 200 ft are more of money Time required to Complete proposed Work would take one year with small amount of men & equipment.

LON GILLESPIE
DEPUTY

Requirements and Cost

23) Labor 7 two miners one top man
One hoist & compressor man
At the rate per man $10.00 four men
$40.00 per day

(C) will have to build cook shack cost
$500.00 dollars

(E) cost of air compressor unit to run it
must be operated by gasoline diesel
can not give exact cost

17) No cost for rent of equipment owned by us.

24) Time Schedule.
24 days per four men at $10.00
Total per day $40.00
Total per month $960.00
Twelve months to complete
Total cost Labor $11,520.

Docket No DMA 1644X

Exhibit B.

1. 16 X 16 New limber building
For cooking cost of material $500
Labor to build 1 carpenter $14.00 per day
2 helpers $11.00 each 3 men $36.00 per day
14 days for 3 men at 36.00 per day
Total $500
Material 500
$1000

EXHIBIT D

ESTIMATED cost of drilling A $7.00 PER foot
OR Total cost would be $15,260.00
$15.00 PER DAY FOR SUPERVISOR
16.00 " " " DRILLER
14.00 " " " HELPER
Total of $45.00 PER DAY

Statment of Expenses:

Will have to rent a complete drill
And we do not own anything of
that kind will have to be purchased
through the Loan. Project would
consist of three men I as Supervisor
$15.00 per day one Driller at $16.00 per day
one helper at $14.00 which is a total $45.00
at $3.50 per foot charged to Loan
at $3.50 per foot charged to Labor
Would be $7.00 per foot which is $14,840
for 2120 feet of hole Loan $7,420
This footage may be cut some
as soon as I find out the cost of
equipment

Sincerely yours
Robert P. Succetti
