OFFICE OF MINERALS EXPLORATION
CONTRACT ADMINISTRATION AND AUDIT DIVISION

REPORT OF ROYALTY REVIEW

I have reviewed the files of the Washington office pertaining to Contract Idm-E442, Docket DMEA-2257 (zinc-lead-copper), dated November 12, 1952, with

Walker Corporation
Box 163
East Ely, Nevada

for the purpose of determining the amount of royalty payable to the U. S. Government on sales of minerals from property referred to as the Ward Mine located in White Pine County, Nevada, during the period January 1, 1959, through August 3, 1961.

In accordance with Article 5 of the June 17, 1955, Termination Agreement and Annex II of the contract, royalty is payable on all minerals produced from the land described in Article 2 of the contract for a period of 10 years from the date of the contract or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first. A Report of Review dated November 18, 1954, indicated accepted costs under the exploration contract amounting to $62,004.05 with the Government's contribution on a 50 percent basis being $31,002.05.

The status of the project, the scope of review, and the reasons therefor are statad on page 2.

This review established no sales subject to the Government's royalty subsequent to the period covered by a prior Report of Royalty Review which also found no sales subject to the Government's royalty through December 31, 1958. The royalty account as of December 31, 1958, was:

Total Royalty Payable	$ -0-
Total Royalty Paid	-0-
Balance of Royalty Due	$ -0-

As of August 3, 1961, the royalty account of this project was found to be:

Total Royalty Payable	$ -0-
Total Royalty Paid	-0-
Balance of Royalty Due	$ -0-

March 27, 1962

E. D. Talbert, OME Auditor

STATUS OF PROJECT, SCOPE OF REVIEW
AND REASONS THEREFOR

The contract, as amended by the Termination Agreement and Annex II attached to Amendment No. 4, provides that the Operator, as principal if the producer or as surety if not the producer, shall pay to the Government a royalty on all mineral production from the land under the contract. The Termination Agreement also specifically deletes the so-called "abandonment" provision of the contract.

The land under contract consists of 25 patented lode mining claims in Sec. 9, 10, 15, and 16, T. 14 N., R. 63 E., M.D.M., excluding a block of ground encompassing the North Good Luck Orebody above the sill of the 230 level of the Goodluck Shaft. At the time the contract was executed the Operator was in possession by virtue of a November 10, 1951, assignment by Woodville J. Walker of an August 15, 1951, lease and option granted by the Walter W. Mining Company. An Owner's Consent to Lien signed by the latter on August 6, 1954, grants to the Government a lien on the property and any production therefrom.

Work under the contract was discontinued on August 20, 1954. No ores were produced during the exploration work. Furthermore, examination of the property and inquiries have disclosed no production subsequent thereto through the period covered by this review.

The files indicate that the Walter W. Mining Company, the landowner, was dissolved as a corporation on December 2, 1959. On May 11, 1961, the trustees for the creditors and stockholders quit-claimed 8 of the claims under the exploration contract to Woodville J. Walker, Box 857, Redding, California, who was the Operator's vice president at the time the exploration project contract was executed. In a July 28, 1961, letter Mr. Walker stated that "Shasta Minerals & Chemical Company intends to acquire a 90% interest" in the claims quit-claimed to him. With an August 3, 1961, letter Mr. Walker provided a copy of the May 11, 1961, indenture which includes a provision for acceptance by the grantee of the DMEA lien.

Mr. Walker's July 28, 1961, letter stated that the other 17 claims were included in a total of 30 claims acquired by Fred Farnsworth and associate of Ely, Nevada. That letter and the August 3, 1961, letter further state that exploration work was in progress on the Caroline claim, which is not subordinated under the contract. An inquiry addressed to Mr. Farnsworth on July 31, 1961, did not result in a reply.

This review was made in lieu of an on-site audit of the Operator's accounts and records for the following reasons:

(1) The files indicate that no minerals have been produced from the property under this contract during the period covered by this review; and

(2) The administrative cost to the Government of an on-site royalty audit at this time would be excessive in relation to the amount of possible royalty which might be disclosed.

APR 23 1962

Memorandum

To: Acting Field Officer, Region II

From: E. D. Talbert, Acting Chief (Signed) E. D. Talbert
Contract Administration and Audit Division

Subject: DMEA-2257 (Zinc-Lead-Copper)
Walker Corporation
Ward Mine
White Pine County, Nevada
Contract Idm-8442

The original and one copy of a Report of Royalty Review covering the subject contract are enclosed. If you concur in the facts stated therein, please make the following distribution:

(a) Original to the Fiscal Section, Division of Administrative Services, Office of the Secretary, Department of the Interior, Washington 25, D. C.; and

(b) One copy for your files.

This Report of Royalty Review is made for record purposes only; therefore, no copy for the Operator is provided.

As evidence of your concurrence, a copy of your memorandum transmitting the original report to the Fiscal Section should be furnished this Division. If for any reason you do not concur, both copies of the report should be returned to this Division with your comments.

From: Acting Field Officer, OME, Region II

Subject: DMEA-2257 (Zinc, Lead, Copper)
Walker Corporation
Ward Mine
White Pine County, Nevada
Contract No. Idm-E 442

With reference to your memorandum of March 13, 1962, regarding ownership status of the mining claims pertinent to the subject contract, our files show no reply from Fred Farnsworth in answer to Mr. Gentry's letter of July 31, 1961.

The present operating status of the seventeen claims is not known. Mr. Walker's letter of July 28, 1961, states that Shasta Minerals & Chemical Co. intends to acquire 90 percent interest in the ten claims Walker owns.

Memorandum

To: Acting Field Officer, Region II

From: Acting Chief, Contract Administration & Audit Division (Signed) E. D. Talbert

Subject: DMFA-2257 (Zinc-Lead-Copper)
Walker Corporation
Ward Mine
White Pine County, Nevada
Contract Idm-E442

A review of the files of the Washington office pertaining to the subject contract indicates that the last inspection of the property was made on December 31, 1957. Advice will be appreciated as to whether the regional files disclose later examinations and, if so, the dates thereof and the findings.

The files also disclose that eight of the twenty-five claims under the contract were quit-claimed on May 11, 1961, to Woodville J. Walker, who was the operator's vice president at the time the subject contract was executed. The other seventeen claims apparently were acquired by Fred Farnsworth, to whom Mr. Gentry addressed a letter of inquiry on July 31, 1961. The files, however, contain no copy of a reply.

Your advice as to any confirmation of the ownership or information as to operations on the seventeen claims is solicited. Also, do your files contain any indication other than Mr. Walker's July 28, 1961, letter of the acquisition of a 90% interest in the eight claims by Shasta Minerals & Chemical Company?

Re: Docket No. DMEA 2257 (Zinc-lead-copper)
Walker Corporation
Ward Mine
White Pine County, Nevada
Contract No. IdmI 442

Dear Mr. Gentry:

Enclosed is a copy of the instrument conveying part of the mining claims in the Ward Mining District to W. J. Walker. On the second page you will note the sentence that says: "Grantee herein by accepting this deed accepts the lien on ore shipments from the property determined by Defense Minerals Exploration Administration Contract IdmI 442, also known as Docket No. DMEA 2257."

All ten of the acquired claims are included in the list of claims subordinated under the contract. They are the Defiance, Mountain Pride, Paymaster, Ruth, Ruth No. 2, Silver King, Ward & Henry, Welcome Stranger, Young America, and Pleiades. These ten claims cover all of the ground in which work was done under terms of the contract.

The portal of the Welcome Stranger adit is located in the bottom of Ward gulch at the south end of the claim. It is driven northerly along the west side of the Welcome Stranger dike. A replacement ore body is exposed in a limey bed about 200 feet from the portal. The ore minerals includes pyrite, sphalerite, galena and chalcopyrite in order of decreasing abundance. This limey bed is presently being explored by driving a drift along the strike in a westerly direction. The work is being done on the adjacent Carolina claim which is not owned by us.

This work is being done under the direction of Einar Erickson a geologist of East Ely, Nevada. I trust this information will be useful.

Very truly yours,

W. J. Walker

Re: Ward Mine
White Pine County, Nevada

Dear Mr. Gentry:

In your letter of November 30, 1960, you asked for certain information concerning the ownership of the Ward mine. Since that time, I have purchased 10 of the 40 patented claims formerly consolidated as the Ward mine. The other 30 claims have been acquired by Fred Farnsworth and associate of Ely, Nevada. An exploration program is currently in progress at the Volcano Stranger adit under the direction of Einar Erickson, geologist, Box 312, East Ely, Nevada.

In acquiring the ten claims, I also accepted any continuing obligations existing under terms of DMA-2257. // See Ext. 5 of Term Papers.

Shasta Minerals & Chemical Company intends to acquire a 90% interest in the 10 claims I now own. I will retain 10%. I believe that there are several very good exploration objectives in this district. We were financially limited in our prior effort and were in no position to re-evaluate the program.

I trust this letter will bring your Ward mine file to date.

Very truly yours,

Bud Walker

Re: Ward Mine
White Pine County, Nevada
Docket DMEA-2257
Contract Idm-E 442

Dear Glenn:

I have inquired from both the Colorado National Bank and the White Pine County assessor of the status of the Ward Mine. Mr. Bozett, vice-president of the bank, informs me that the Walter W. Mining Company owner of the property, has been dissolved and that no taxes have been made for the past two years. The White Pine County assessor shows the property as delinquent for the 1959-60 taxes. I do not know if these are all of the delinquent taxes or not.

I am writing Mr. Bozett to ask him whether it was the intention to abandon the mining claims upon dissolution of the company or whether the assets were deeded either to the bank or to some individual. My father recommended that the bank hold the mining claims and dispose of the rest of the Ward mine property. I believe that Walker Engineering Corporation might be interested in acquiring the claims, if this could be done at a very low cost, and if we obtained a deed from the bank we would, of course, honor the DMEA royalty.

Although our exploration program failed to find the hypothecated objectives, yet there are still several unexplored objectives in the property worthy of investigation someday in the future. I will continue to pursue this inquiry.

Very truly yours,

W. J. Walker

Re: Ward Mine
White Pine County, Nevada

Dear Glenn:

I have your letter of November 3, 1960, concerning the ownership of the Ward Mine, White Pine County, Nevada. I also have a letter from Willard F. Bozett, Vice-President of the Colorado National Bank, Denver 17, Colorado. In this letter, Mr. Bozett informs me that the Walter W. Mining Company was dissolved as of December 2, 1959, and a Certificate of Dissolution was issued by the Secretary of State of Nevada on December 16, 1959.

In your letter of November 3, 1960, you ask if ownership of the property has reverted to Walker Corporation and if Walker Corporation will be responsible for the property and its production in the future. We never owned the property and do not own it, consequently cannot assume responsibility for the future production. However, I am writing to Mr. Bozett today and am asking him what disposition was made of the property and who the present owners are. I will not know until I hear from him whether they (the Walter W. Mining Company) sold the properties to someone prior to dissolution of the company or whether they permitted the properties to become tax delinquent and thus sold for taxes.

I will follow up on this matter and inform you fully on the present status of the properties.

Very truly yours,

W. J. Walker

OFFICE OF MINERALS EXPLORATION
CONTRACT ADMINISTRATION AND AUDIT DIVISION

REPORT OF ROYALTY REVIEW

I have reviewed the files and records of the OME Field Team, Region II, pertaining to Contract No. Idm-E442, Docket No. DMEA-2257 (Zinc-Lead-Copper), dated November 12, 1952, including Amendment Nos. 1 to 4, inclusive, with

Walker Corporation
Box 163
East Ely, Nevada

for the purpose of determining the amount of royalties due the U. S. Government on sales of zinc, lead and copper ores from property known as the Ward Mine, located in White Pine County, Nevada, during the period November 12, 1952 to December 31, 1958.

A pseudo certification of discovery or development was incorporated under Item 5 of Termination Agreement dated June 17, 1955, and accordingly royalty is payable on all production from the land described in Article 2 and Appendix I of the contract, for a maximum period of 10 years as stipulated in Amendment No. 4 and Annex II of the contract. A Report of Review in lieu of final cost audit dated November 18, 1954, indicated acceptable costs under the exploration contract amounted to $62,004.05 with the Government's contribution on a 50 percent basis, being $31,002.03.

No royalties have been paid to date in connection with this contract.

This review was made in lieu of an on-site audit of the Operator's accounts and records for the following reasons:

(a) According to the Field Team's Semi-Annual Report of Certified Projects for the period July 1, 1958 to December 31, 1958, there was no production during the period covered by this review and all buildings, machinery and mine equipment removed from the site.

(b) The administrative cost to the Government of an on-site royalty audit at this time would be excessive in relation to the amount of possible royalty which might be disclosed.

REPORT OF REVIEW

I have reviewed the Monthly Reports of:

Walker Corporation,
a Nevada Corporation
Box 163
East Ely, Nevada

pertaining to Exploration Project Contract No. Idm-Elh2, Docket No. DMEA-2257, including Amendments No. 1, 2, 3 and 4, for the months of November 1952 to ~~September~~ AUGUST, 1954, inclusive, covering a project for the exploration of zinc, lead and copper, on property known as the Ward Mine, located in White Pine County, Nevada.

My review included an examination of the Monthly Reports (Forms MF-104) and supporting documents attached thereto, comparison of costs claimed with the contract and pertinent schedules, consultation with the Executive Officer in charge of the project, and a determination of the reasonableness and propriety of the costs.

This review was made in lieu of a final audit of the Operator's accounts and records for the following reasons:

(a) the administrative cost to the Government of an audit would be excessive in relation to the estimated amount of possible disallowances thereunder;

(b) the major portion ($60,704.05) of the costs incurred were under a contract provision for payment by the Government on the basis of agreed estimated costs of units of work actually performed, and the remaining costs ($1,300.00) were documented and did not exceed the amounts specified in the contract.

The review disclosed the following facts in regard to the amount paid or to be paid the contractor:

Total cost as billed by Contractor	$62,004.05
Exceptions	-0-
Total Accepted Cost	$62,004.05

The contract calls for a 50 percent participation of exploration expenses by the United States Government. Therefore, payment to the contractor by the Government in amount of Thirty One Thousand Two and 3/100 Dollars:

** $31,002.03 **

is considered valid and proper, provided that the Regional Executive Officer, the Administrator, or other competent official has accepted or will accept the project as having otherwise met the terms of the contract.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(*a*) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(*b*) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(*c*) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

NOTE.—Title 18, U. S. Code (Crimes), section 1001, makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.

REMARKS: * refer to attached sheet for detailed distribution of costs allowed in the Amendment No. 4.

(Instructions on reverse)

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Re: Docket No. DMEA 2257
zinc-lead-copper
Walker Corporation
Ward Mine, White Pine Cty,
Nevada
Contract No. Idm-E 442

Dear Mr. Miller:

All work covered by this report was done on PART II of the contract, the Defiance Tunnel Project, as approved in Amendment No. 4.

The Defiance Tunnel has been cleaned out, air and water lines installed, road repairs completed, mine plant installed and 1,465 feet of diamond drilling completed.

In view of the unfavorable results of drilling to date we do not propose to continue the program, but hope to complete sufficient additional surface mapping to be able to more clearly interpret the results of work to date. At that time we will prepare and submit to your office a complete set of maps and sections showing our interpreation of results.

When application was made for amendment No. 4, we felt that it would be necessary to use new pipe for PART II, but in view of termination of PART I we were able to salvage sufficient pipe for both air and water for PART II without additional investment. The costs indicated are for labor only in salvaging and re-laying these lines. By condensing the core as the holes were drilled we were able to avoid additional cost of handling and no charge is made for this service.

A total cost of $19,978.00 is allowed for drilling on PART II by Amendment No. 4. We have spent $11,921.25 to date and, pending confirmation and approval from your office, do not intend to spend any additional funds on this project. We have completed 1,465 feet of drilling instead of the 2,210 feet allowed, but feel that this is ample in view of the results obtained.

Very truly yours,

Woodville J. Walker

Woodville J. Walker, manager
Ward Mine - Walker Corporation

DISTRIBUTION OF ALLOWABLE UNIT COSTS
PROVIDED IN AMENDMENT NO. 4, DATED JULY 19, 1954

		August	Allowed in Contract: Feet	Cost
1/	Core Drilling: 1,465 feet at $7.25/ft:	$10,621.25	2210	$16,022.50
	Total for 1/	$10,621.25		$16,022.50
2/	Casing lost, @ $0.30 /ft. Cementing, @ $2.00/ft. Reaming & casing, @$1.50/ft. Standby time, @$2.00/hr. Assaying samples, @ $3.00 ea. } 16 hrs.	32.00		$ 1,300.00
	Total for 2/	$ 32.00		$ 1,300.00

3/ Distribution of scheduled actual costs, * indicates allowable maximum:

1.	Improve road to Lower Defiance Tunnel:	$ 128.00	$256.00
2.	Move compressor from Mountain Pride ~~Tunn~~ Tunnel to Lower Defiance Tunnel:	64.00	160.00
3.	Clean up Lower Defiance Tunnel:	168.00	224.00
4.	Install air and water lines in Lower Defiance Tunnel:	174.00	921.50
5.	Cut diamond drill station:	64.00	64.00
6.	Supervision for items 1, 2, 3, 4 and 5.	275.00	550.00*
7.	Transportation of personnel, supplies, and equipment for 1,2,3,4,5 and 6:	120.00	120.00*

Salvage: Mtn. Pride,		65.75
		$488.00

W J Walker

Paragraph 2 asks for an explanation of determining the item 7 allowed in the Amendment. In order to facilitate moving equipment, we rented an F-6 truck for $50.00 per month. In addition, we agreed to maintain it in reasonable repair during use. In order to avoid having to buy one or two new tires, we had the old ones re-capped at a cost of $61.42. Gas used in this truck from mine storage was not charged. The monthly charges to transportation during the month were as follows:

Gas & Oil: (transportation from Ely to Job):	$24.64	
Repairs: (On vehicle used to transport men):	7.78	
Rent of F-6 truck:	50.00	
Tire re-capping:	61.42	$143.83

Maximum allowable under Amendment No. 4: $120.00

To return again to paragraph 1 of your letter, item 8 has to be further explained. C. N. Scott, the foreman, was at the mine during the period of drilling and part of his responsibility was taking care of the core, including making new trays when required, logging core, splitting core when necessary, and condensing core. The core handling cost of $275.00 represents half of his monthly salary of $550.00 per month, which I think is a very reasonable charge on the core handling.

I, Woodville J. Walker, manager of Ward Mine - Walker Corporation, certify that the above costs are true and accurate to the best of my ability and that they represent the reasonable and fair distribution of costs charged against the items, as shown by the books of Ward Mine.

State of Utah
County of Salt Lake } ss.

Signed: Woodville J. Walker
Woodville J. Walker, mgr.

Before me appeared Woodville J. Walker, to me personally known, who swears that he signed the above certification.

Mr. C. Meier
Executive Officer
SMA Field Team, Region III
420 Custom House
555 Battery Street
San Francisco, California

Dear Mr. Meier:

This letter is in further reply to your letter of November 3.

Enclosed are original and four copies of Statement from EVAN EVANS, East Ely, Nevada, covering road repairs and part of the cost of moving the compressor at Ward Mine.

At the time of submitting the report we did not have these statements. There is some discrepancy between them and the report but not of sufficient size to warrant making any changes.

The enclosed statements cover items 1 and 2, in part. Please note that we have a labor charge of $16.25 to be added to item 2, covered in the payroll breakdown in the certified letter which accompanies this.

I hope that these letters will clear up any questions in the minds of your auditors regarding these items.

Very truly yours,

Woodville J. Walker

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(*a*) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(*b*) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(*c*) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

OPERATOR'S MONTHLY REPORT
APRIL, 1954

Mr. H. C. Miller
Executive Officer, DMEA Field Team
Region III
1012 Flood Building
870 Market Street
San Francisco, California

Walker Corporation
Docket No. DMEA 2257
Idm-E 442

Dear Mr. Miller:

No report was filed for the month of March, pending approval of Ammendment III, signed April 14, 1954.

Work done during April was diamond drilling. 928 feet of drilling consisting of holes 4, 5, 6 & 7 was completed during the month, as shown on the accompanying diagrammatic drill logs.

Hole No. 7 was drilled during the month but has not been included in the footage for the month, as there is some question as to whether or not it is properly part of the program.

Hole No. 6 was drilled to a depth of 137 feet at which depth the hole was in such bad shape that further drilling was impossible, so it was abandoned without reaching the objective. Work on this hole involved 95 feet of cementing, 132 feet of reaming and casing and 24 hours of lost time.

Geological results of drilling to date are inconclusive. I am preparing a report to your office illustrating the results and my interpretation of the results to date. This report should be on your desk by May 25.

Very truly yours,

W. J. Walker

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(*a*) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(*b*) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(*c*) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Walker Corporation
Box 163 - East Ely, Nevada
Docket No. DMEA 2257
Lead-Zinc-Copper
Idm-E 442

Mr. H. C. Miller
Executive Officer, DMEA Field Team
Region III
1012 Flood Building
870 Market Street
San Francisco, California

Dear Mr. Miller:

Work done during February, 1954, was entirely diamond drilling, on the program approved in the ammendment dated December 2, 1954.

The 1200 feet of drilling approved in the above ammendment was completed during the month of February, and we continued drilling on our own account hoping that our application for an additional ammendment to divert certain sums from the original contract to diamond drilling would be approved, and that this approval would be made retroactive to include this current drilling.

Hole No. 3 (identical with proposed hole No. 1 in the ammendment) was drilled 554 feet during the month, thus establishing the dike pattern in the footwall of the Ward Fault. Some scattered mineralization was encountered, but only two low grade intercepts were sampled and assayed. Results of samples and geological formations encountered are shown on the attached print of the hole.

Hole No. 4 (identical with Hole No. 2 on the ammendment maps) was started during the month, for our account.

Information gained by drilling has tended so far to confirm the belief that there has been considerable horizontal movement along the Ward Fault, and it is my personal belief that this movement is to the north on the hangingwall side of the fault (hangingwall block moves north relative to the footwall block) a possible distance of from 200 to 400 feet. Absolute amount and even positive direction is not yet certain because of inadequate drilling and other exposures. The present program should remedy this lack.

Respectfully submitted,

Woodville J. Walker

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

OPERATOR'S MONTHLY REPORT - JANUARY, 1954

Walker Corporation
Box 163 - East Ely, Nev
Docket No. DMEA 2257
Lead-Zinc-Copper
Idm-E 442

Mr. H. C. Miller
Executive Officer, DMEA Field Team
Region III
1012 Flood Building
870 Market Street
San Francisco, California

Dear Mr. Miller:

Work done during January, 1954, was entirely diamond drilling, on the program approved in the ammendment dated December 2, 1954.

Seven hundred seventy feet of drilling was completed, and both drill stations 2 and 3 were completed. The order in which the holes were drilled is different from that proposed in the ammendment. Two holes were completed, I have numbered them No. 1 and No.2 respectively, and they correspond to No. 3 and 5 respectively in the ammendment.

Results of drilling to date are uncertain but are encouraging. The depth to the dike contact was much greater than anticipated and I feel sure that this indicates a much greater horizontal component of movement along the fault than previously anticipated or indicated by available geological information. However, interpretation of present results permits of several possibilities and there is little point in attempting to reconstruct the amount and direction of movement until additional drilling has been done.

The first hole (No. 1, corresponding to No. 3 of the ammendment) cut four feet of good ore, assaying 9.7 oz silver, 9.0% lead and 8.0 % zinc at an inclined depth of 263-267 feet below the collar,(210 feet vertically below our level). The great depth of the contact and ore intercept cast considerable doubt on the advisability of sinking the proposed winze and drifting on this contact, and at this time it seems advisable to me to recommend an additional ammendment to divert funds from those allocated to sinking and other exploration on this part 1 of the program to additional diamond drill exploration. I will submit such an additional ammendment to your office in the near future.

23 1954

I attach sections of the drill holes completed and a copy of the map submitted with the last application for an ammendment for reference.

Respectfully submitted,

Woodville J. Walker

Region III
1012 Flood Building
870 Market Street
San Francisco, Calif.

Dear Mr. Miller:

No work was done during the months of November and December on DMEA projects at the Ward Mine. One hundred ninety-three feet of raising was completed on company account during this period.

The DMEA amendment to our contract to approve diamond drilling was received and signed during December and all preliminary preparations completed. Drilling was started January 1, 1954.

Very truly yours,

s/ Woodville J. Walker

Mr. H. C. Miller
Executive Officer, DMEA Field Team
Region III
1012 Flood Building
870 Market Street
San Francisco, Calif.

Dear Mr. Miller:

No work was done during the month of October on DMEA projects.

The company advanced the 312 drift on its account and opened up part of the northerly extension of the North Good Luck oxide orebody. As expected, this orebody is of too low grade to be mined in the oxide under prevailing market conditions. We plan to do further work in the expectation that higher grade portions may be selectively mined under present conditions.

Company work has thus far indicated that the North Good Luck orebody does have the projected rake to the north and the diamond drilling program requested in our amendment in October should determine the exact position and the grade of the sulphide extension of this orebody.

Very truly yours,

Woodville J. Walker

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

OPERATOR'S MONTHLY REPORT - SEPTEMBER, 1953

Walker Corporation
Box 163 - East Ely, Nevada
Docket No. DMEA 2257
Lead-Zinc-Copper
Idn-E 142

Mr. H. C. Miller
Executive Officer, DMEA Field Team
Region III
1012 Flood Building
870 Market Street
San Francisco, California

Dear Mr. Miller:

Work done during September was entirely on project 1-f, the cross-cuts approved in the Amendment dated June 19, 1953.

The east cross-cut (our 313 cross-cut) was driven the balance of the distance allowed in the amendment, a total of seven feet, and was then advanced a couple of rounds into the porphyry dike encountered at that distance. This last advance, of course, was entirely for our account, as it was in excess of the allowed footage. No work was done during the month on the west heading or on any other project in the contract.

The company extended our 312 drift twenty-five feet on our own account and have encountered a small body of very good ore, of silver-lead-copper type, similar to that being mined by lessees on the surface. We intend to mine and ship this ore, which will be subject to DMEA royalty.

The two cross-cuts allowed in our Amendment No. 1 have shown an error in our projected geology. In brief, our projection indicated that with a displacement of 250 feet on the Ward Fault (measured in the old workings), the sulphide extension of the North Good Luck Orebody should project above the plane of the level on which we have been conducting our exploration. However, in view of the fact that the course of the Paymaster Dike is more easterly than previously indicated, we now know that this orebody cannot be expected to project to this level. I have therefore prepared a second amendment for your consideration and enclose this amendment with this monthly report, covering a proposed diamond drilling campaign to explore for the sulphide orebody now believed to be below the plane of our present work.

We would greatly appreciate your consideration of this proposed amendment.

Respectfully submitted,

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

REMARKS:

NOTE.—Title 18, U. S. Code (Crimes), section 1001, makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.

(Instructions on reverse)

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Idm-E 442

Mr. H. C. Miller
Executive Officer, DMEA Field Team
Region III
1012 Flood Building
870 Market Street
San Francisco, California

Dear Mr. Miller:

Work done during the month of August, 1953, was entirely on project 1-f, the cross-cuts approved in the Ammendment dated June 19, 1953.

The hangingwall crosscut (easterly) was advanced a total distance of fifteen feet, making the total advance on this part of the project 143 feet and leaving seven feet yet to be driven with DMEA funds. The heading is still in the large solution cavern described last month, although some porphyry is being encountered in the cave earth through which the heading is being advanced.

The footwall crosscut (westerly) was advanced a total distance of 65 feet all in lime silicate rocks with increasing amounts of pyrite in the beddings and occassional spots and patches of galena and sphalerite. No commercial mineralization has yet been encountered. The silicate rocks show rhodocrosite and considerable chloritic alteration products.

Respectfully submitted,

Woodville J. Walker

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(*a*) *Form MF–104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(*b*) *Form MF–104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(*c*) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF–104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF–104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF–200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF–200; and delete word "Independent" if the contract reported is on Form MF–200 (A). Also, report work paid for on a unit basis under contract Form MF–200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF–104 when submitted for reimbursable expenses incurred under contract Form MF–200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF–200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF–104 is required to be documented. The four copies of Form MF–104 are not to be thus supported.

Form MF–104 submitted for reimbursement under fixed price contracts on Form MF–200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF–104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Idn-E 442

JULY, 1953

Mr. H. C. Miller
Executive Officer, DMEA Field Team
Region III
1012 Flood Building
870 Market Street
San Francisco, California

Dear Mr. Miller:

Work done during the month of July, 1953, was entirely on project 1-f, the cross-cuts approved in the Ammendment dated June 19, 1953.

The hangingwall crosscut was advanced a total distance of 45 feet, making the total advance of this part of the project 128 feet, and leaving 22 feet remaining to be driven. At a distance of 113 feet the hangingwall strand of the Ward Fault was cut. At a distance of 100 feet, a very large solution cavern was encountered and the drift is still in this cavern. From the size and appearance of this cavern, we believe it to have been formed by collapse into the oxide portion of the North Good Luck Orebody, which therefore is believed to lie beneath this cavern. Further work to confirm this possibility cannot be performed until the other wall of the cavern has been reached and the ground secured against further movement.

The footwall crosscut has been driven 105 feet, leaving 95 feet yet to be driven on this project. The entire distance has been in lime silicate rocks, with occassional stringers of galena and sphalerite, together with fluorite and splotches of rhodochrosite. No mineralization of interest was encountered in either heading.

Respectfully submitted,

Woodville J. Walker

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Lead - Zinc - Copper
Idm-E 442

JUNE, 1953

Mr. H. C. Miller
Executive Officer, DMEA Field Team
Region III
1012 Flood Building
870 Market Street
San Francisco, California

Dear Mr. Miller:

Work done during the month of June was divided between project 1 of Part 1 and the cross-cuts authorized under the amendment signed June 19, 1953, which I will hereafter refer to as project 1-f.

Project 1 was advanced a total distance of 82 feet during the month. The main strand of the Ward Fault was cut as shown on the attached progress map. The formations on the hangingwall (east) side of the fault were rather fresh limestones while those on the west or footwall side were entirely lime silicate rocks. No mineralization was encountered.

Project 1-f was advanced a total distance of 83 feet. Only the hangingwall cross-cut has been driven so far. This heading is entirely in rather fresh limestone with spots and pockets of limonite beginning to showup in the face. No mineralization has been encountered and the hangingwall strand of the Ward Fault has not been recognized.

Respectfully submitted,

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

IDM-E 442

MAY, 1953

Mr. H. C. Miller
Executive Officer, DMEA Field Team
Region III
1012 Flood Building
870 Market Street
San Francisco, California

Dear Mr. Miller:

All work done during the month of May with DMEA funds was done on project 1 of Part 1. Attached is a progress map showing advance made in May.

Project 1 was advanced a total of 124 feet during the month. The heading passed from the quartz-monzonite porphyry dike (Mountain Pride) into the limestone between the Mountain Pride and Paymaster Dikes. The limestone is quite fresh except in immediate proximity to the dikes where it is silicified. Iron staining is common and there is some scattered mineralization, although none of economic importance.

The main heading has been swung to the northwest and is now pointed directly at the projected position of the sulphide extension of the North Good Luck Orebody. Neither the hangingwall strand nor the main strand of the Ward Fault Zone have been disclosed in the work done during the month of May.

Respectfully submitted,

Woodville J. Walker

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(*a*) *Form MF–104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(*b*) *Form MF–104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(*c*) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF–104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF–104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF–200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF–200; and delete word "Independent" if the contract reported is on Form MF–200 (A). Also, report work paid for on a unit basis under contract Form MF–200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF–104 when submitted for reimbursable expenses incurred under contract Form MF–200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF–200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF–104 is required to be documented. The four copies of Form MF–104 are not to be thus supported.

Form MF–104 submitted for reimbursement under fixed price contracts on Form MF–200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF–104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

870 Market Street
San Francisco, California

Dear Mr. Miller:

All work done during the month of April on DMEA funds was on project 1 of Part 1. Attached is a progress map showing advance made in April.

Project 1 was advanced a total of 94 feet during the month, in altered quartz monzonite porphyry. Several stringers of lead-zinc-copper sulphides were encountered striking across the drift (average North 80° West, dip average 70° to the North), although none were of commercial importance. These stringers have not been assayed for silver yet and may prove to have substantial silver values. The porphyry contains spots and patches of sulphides and has been considerably altered by mineralizing solutions. The present heading is in oxidized altered porphyry, which may mean that the hanging-wall strand of the Ward Fault is being approached.

Respectfully submitted,

(*a*) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(*b*) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(*c*) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MARCH, 1953

Mr. H. C. Miller
Executive Officer, DMEA Field Team
Region III
1012 Flood Building
870 Market Street
San Francisco, California

Dear Mr. Miller:

All work done during the month of March on DMEA funds was on project 1 of Part 1. Attached is a progress map showing advance made in March.

Project 1 was advanced a total distance of 49 feet during the month. All of this advance was in fairly fresh quartz monzonite porphyry, although some streaks of mineralization were encountered and the porphyry was considerably altered near these streaks. No commercial mineralization was encountered.

The cross-cut being driven northeasterly toward the oxide portion of the North Good Luck orebody was advanced a total distance of 30 feet, about twenty-five feet of which was in a heavy iron gossan, doubtless part of the downward continuation of the North Good Luck Orebody itself. No assays of this material have yet been run. (This cross-cut is being driven on company account.)

Respectfully submitted

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

IDM-E 442

FEBRUARY, 1953

Mr. H. C. Miller
Executive Officer, DMEA Field Team
Region III
1012 Flood Building
870 Market Street
San Francisco, California

Dear Mr. Miller:

All work done during the month of February on DMEA funds was on project 1 of Part 1. Attached is a progress map showing advance made in February.

Project 1 was advanced a total distance of 53½ feet during the month. All but the last ten feet was in mineralized quartz monzonite porphyry. The last ten feet was in fresh porphyry. The first 43½ feet was a continuation of the zone described last month. No commercial widths of mineralization were encountered.

A cross-cut was driven easterly toward the North Good Luck Oxide orebody. This work is being done on company account. At a distance of 48 feet from the main heading, a width of ten feet of massive pyrite was cut. On the east side of this pyrite mass was six feet of limestone, well metamorphosed to lime silicate minerals. This mass was terminated on the east by the hangingwall strand of the Ward Fault, which brings quartz-monzonite porphyry in contact with the limestones. The discovery of the limestones and pyritic mineralization on the west side of the hangingwall strand of the Ward Fault Zone is strong evidence that the faulted part of this orebody will extend above the Mountain Pride Tunnel Level, even in this first small fault block. Inasmuch as this cross-cut shows the hangingwall strand of the Ward fault to be much farther east than suspected, the main heading will be swung to the east during March so as to gradually approach the fault.

Respectfully submitted,

Woodville J. Walker

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(*a*) *Form MF–104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(*b*) *Form MF–104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(*c*) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF–104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF–104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF–200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF–200; and delete word "Independent" if the contract reported is on Form MF–200 (A). Also, report work paid for on a unit basis under contract Form MF–200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF–104 when submitted for reimbursable expenses incurred under contract Form MF–200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF–200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF–104 is required to be documented. The four copies of Form MF–104 are not to be thus supported.

Form MF–104 submitted for reimbursement under fixed price contracts on Form MF–200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF–104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

OPERATOR'S MONTHLY REPORT
Docket No. DMEA 2257
Zinc - Lead - Copper
IDM-E 442

JANUARY, 1953

Mr. H. C. Miller
Executive Officer, DMEA Field Team
Region III
1012 Flood Building
870 Market Street
San Francisco 2, California

Dear Mr. Miller:

All work during the month of January, 1953, was on project 1 of Part 1.

Attached is a progress map showing advance made in January.

Project 1 was advanced a total distance of one hundred seven and one half feet (107½) during the month. The first forty-five feet was in silicified quartz monzonite porphyry, the balance in altered quartz monzonite porphyry with numerous quartz-calcite stringers carrying chalcopyrite, sphalerite, galena, and pyrite. This constituted a very low grade mineralized zone as the mineralization occured in the porphyry adjacent to the stringers as well as in the stringers. We estimate that the total sulphide content may be about 2% combined lead-zinc-copper. We consider this mineralization interesting but not economic.

The crosscut for project 3 was continued on company account in order to provide room for sinking the proposed winze. The hangingwall strand of the Ward Fault was cut in this crosscut and some mineralization (drag sulphides in the footwall of the fault) cut and sampled. These samples were as follows:

	Ag	Pb	Cu	Zn	Width or Description
A -	0.8oz	0.8%	none	1.00%	44" cut
B -			none	1.3%	Dark Speciment, zinc ?
C -			none	0.9%	Stained pyrite, copper%

These sulphides are found against the east side of the Mountain Pride Dike and west of the hangingwall strand of the Ward Fault. They are part of the South Good Luck Ore Area and serve to confirm the presence of sulphides below the fault.

Respectfully submitted,

Woodville J Walker

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

OPERATION'S MONTHLY REPORT
Docket No. [illegible] 2257
Zinc - Lead - Copper
[illegible] 440

DECEMBER, 1952

Mr. H. C. Miller
Executive Officer, [illegible] Field Team
Region XIX
1019 Flood Building
870 Market Street
San Francisco 2, California

Dear Mr. Miller:

All work during the month of December, 1952, was on projects 1 and 3 of Part I.

Attached is a progress map showing advance made during December.

Project 1 of Part I was advanced a total distance of ninety-eight (98) feet during the month. The first twenty feet was driven in soft, highly iron stained and oxidized quartz monzonite porphyry. No timber was needed at the time of driving, but continual sloughing of the back and walls indicates that it may be necessary to timber this in order to keep advancing the heading. The last forty-eight feet of the heading have been driven in silicified fresh pyritized quartz monzonite porphyry, very firm and hard.

Project 3 of Part I was started and completed during the month of December. This project was to cross-cut northeast for thirty (30) feet from 2750 north to the upper strand of the Ford fault, shown on the [illegible] contract map as Project 1c. Owing to the soft and heavy nature of the ground encountered early in the month, the cross-cut was driven from co-ordinate 2857 North instead of 2750 North. This will have no effect on the exploration program.

Total footage driven during the month was ninety-eight (98) feet. A few small stringers of quartz, calcite, and scattered sulphides of lead, zinc, and iron were cut, none in excess of 1" in width and none of importance. No assays were taken during the month.

Respectfully submitted

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(*a*) *Form MF–104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(*b*) *Form MF–104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(*c*) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF–104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF–104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF–200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF–200; and delete word "Independent" if the contract reported is on Form MF–200 (A). Also, report work paid for on a unit basis under contract Form MF–200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF–104 when submitted for reimbursable expenses incurred under contract Form MF–200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF–200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF–104 is required to be documented. The four copies of Form MF–104 are not to be thus supported.

Form MF–104 submitted for reimbursement under fixed price contracts on Form MF–200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF–104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this report is correct and complete to the best of their knowledge and belief.

Date 12-4-52 Operator Walker Corporation,

Per Woodrow J. Walker Title General Manager.

REMARKS:

NOTE.—Title 18, U. S. Code (Crimes), section 1001, makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.

(Instructions on reverse)

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

OPERATOR'S MONTHLY REPORT
Docket No. DMEA 2257
Zinc - Lead - Copper
IDM-E 442

NOVEMBER, 1952

Mr. H. C. Miller
Executive Officer, DMEA Field Team
Region III
1012 Flood Building
870 Market Street
San Francisco 2, California

Dear Mr. Miller:

This DMEA Contract was executed on November 12, 1952.

This contract is divided into two parts, Part I and Part II. All work to date has been on project I of Part I.

The Mountain Pride Tunnel was advanced a total distance of seventy-five (75) feet. The entire distance was driven in a soft decomposed quartz monzonite porphyry requiring some timber support.

The attached map shows the present face and November advance relative to old workings. This map is the same scale and will overlay the map of the workings attached to the contract itself.

Respectfully submitted,

Woodville J. Walker

Re: EMEA-3257 (Zinc-Lead-Copper)
Walker Corporation
Ward Mine
White Pine County, Nevada
Contract Idm-2442

Gentlemen:

By the terms of the subject Exploration Project Contract, as amended, and the Termination Agreement dated June 17, 1955, all minerals mined or produced from November 12, 1952, to November 12, 1962, were subject to the Government's percentage royalty as set forth in said contract.

As the period during which production was subject to royalty has now expired, the Government according to its present records retains no claim or lien against the property subject to the contract or any future production therefrom. We, therefore, are closing our books and records on this contract.

Sincerely yours,

(signed) FRANK E. JOHNSON

TERMINATION AGREEMENT

It is agreed this 17th day of June, 1955, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, hereinafter called the "Government," and Walker Corporation, hereinafter called the "Operator," parties to that certain Exploration Project Contract Idm-E442, Docket No. DMEA-2257, dated November 12, 1952, as amended, hereinafter called the "Contract," that:

1. Effective December 31, 1954, the Contract and all obligations of the parties thereunder, except as otherwise herein expressly provided, shall be and are hereby terminated.

2. The Government shall contribute to allowable costs incurred prior to said effective date; and shall contribute to allowable costs incurred or to be incurred beginning with said effective date in performing winding-up and settlement actions provided for in the Contract, including (a) the preservation and disposal of property to the cost of which the Government has contributed, and (b) the making and rendering of reports and accounts.

3. The Operator shall promptly perform all winding-up and settlement actions provided for in the Contract, including (a) the disposal of any facilities, buildings, fixtures, equipment, or other items to the cost of which the Government has contributed; and (b) the rendering of the final report and final account.

4. In Article 10 of the Contract form that part of the second sentence beginning with the word "Provided" is deleted.

5. The Operator, as principal if the Operator is the producer, or as surety if the Operator is not the producer, shall pay to the Government the royalty on production provided for in the Contract, in the same manner and amount as if certification of discovery or development had been made, such certification being hereby waived.

6. The Operator hereby releases and agrees to save the Government harmless from all claims or demands under or arising out of said Contract, except as otherwise provided in this termination agreement.

IN WITNESS WHEREOF, these parties have executed this agreement as of the day and year first above written.

EXPLORATION PROJECT CONTRACT
WALKER CORPORATION
DOCKET NO. DMEA-2257

AMENDMENT NO. 4

It is agreed this 19th day of July, 1954, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, hereinafter called the "Government," and Walker Corporation, hereinafter called the "Operator," that Exploration Project Contract Idm-E442 (Docket No. DMEA-2257), dated November 12, 1952, as amended, hereinafter called the "Contract," is further amended, effective November 12, 1952, as follows:

1. In Exhibit "A" under "Description of the Work," delete everything under "Part II" and substitute the following:

(a) Improve the access road to the Lower Defiance tunnel.

(b) Move the compressor from the Mountain Pride tunnel to the Lower Defiance tunnel.

(c) Clean up the Lower Defiance tunnel.

(d) Install air and water lines in Lower Defiance tunnel.

(e) Cut a drill station, and drill not in excess of 2,210 feet of diamond drill holes, as shown on the map entitled "Part II, Proposed Drilling Program," attached hereto and made a part hereof.

The diamond drill holes shall be reamed and cased, or cemented, as necessary. Cores shall be boxed and stored.

The number of holes, and the location, length, direction, size, and inclination of each diamond-drill hole, are subject to approval of the Government.

2. In Exhibit "A" under "Agreed Unit Costs," delete Stage I and Stage II under Part II and substitute the following: 1/

2,210 feet of diamond drilling @ $7.25/ft.	$16,022.50	
Casing lost @ $0.30/ft. 2/ Cementing @ $2.00/ft. 2/ Reaming and casing @ $1.50/ft. 2/ Standby time @ $2.00/hr. 2/ Assaying samples @ $3.00/ea. 2/	1,300.00	$17,322.50

3. In Exhibit "A" under "Scheduled Actual Costs," delete all costs under Part II and substitute the following: 3/

(* Indicates allowable maximum)

1.	Improve road to Lower Defiance tunnel.	$256.00	
2.	Move compressor from Mountain Pride tunnel to Lower Defiance tunnel.	160.00	
3.	Clean up Lower Defiance tunnel.	224.00	
4.	Install air and water lines in Lower Defiance tunnel.	921.50	
5.	Cut diamond drill station.	64.00	
6.	Supervision for items 1, 2, 3, 4 and 5.	550.00*	
7.	Transportation of personnel, supplies, and equipment for items 1, 2, 3, 4, 5 and 6.	120.00*	
8.	Core handling.	360.00*	2,655.50*
	Total Cost of Part II		$19,978.00*

1/ The Government will contribute to these agreed unit costs as they accrue for units of work actually performed in lieu of those actual costs set forth in Article 6 (a) of the Contract form. The agreed unit cost includes all costs of the work for which the unit is fixed.

2/ The Government will contribute to the unit costs of this element of work until the aggregate total cost of these five elements of work identified by "2/" reaches $1,300. Thereafter, the operator shall perform all units of these five elements of work required in connection with the 2,210 feet of drilling at its own cost without contribution by the Government.

3/ All schedules are waived, except as to items 6, 7 and 8 in this paragraph 3.

4. Delete the "Summary" at the end of Exhibit "A" and substitute the following:

SUMMARY

Estimated total cost, Part I	$68,410.00*	
Estimated total cost, Part II	19,978.00*	
Estimated total cost of Project		$88,388.00*
Government Participation @ 50%		44,194.00*

5. In Article 8 of the Contract form delete the sums "$132,310.00" and "$66,155.00" and substitute the sums "$88,388.00" and "$44,194.00," respectively.

6. Annex I attached to Amendment No. 1 is cancelled and Annex II, attached hereto and made a part hereof, is substituted for Article 9 of the Contract form.

EXPLORATION PROJECT CONTRACT
WALKER CORPORATION
DOCKET NO. DMEA-2257

ANNEX II

The following provisions are in lieu of Article 9:

Repayment by Operator.--a. Certification.--If the Government considers that a discovery or development from which production may be made has resulted from the work, the Government, at any time not later than six months after the Operator has rendered the final report and final account, may so certify in writing to the Operator. Such certification shall describe broadly or indicate the nature of the discovery or development.

b. Royalty on production.--The Operator, as principal, if the Operator is the producer, or as surety, if the Operator is not the producer, shall pay to the Government a royalty on all minerals mined or produced from the land, as follows: (1) regardless of any certification of discovery or development, from the date of the contract until the lapse of the time within which the Government may make such certification, or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first; or (2) if the Government makes a certification of discovery or development, for a period of ten years from the date of the contract, or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first.

c. Basis for computation.--The Government's royalty shall be a percentage of the gross proceeds (including any bonuses, premiums, allowances, or other benefits) from the production sold, in the form sold (ore, concentrates, metal, or equivalent), at the point of delivery (the f.o.b. point); except, that charges of the buyer arising in the regular course of business, and shown as deductions on the buyer's settlement sheets, on account of the cost of treatment processes performed by the buyer, sampling and assaying to determine the value of the production sold, and freight paid by the buyer to a carrier (not the Operator), shall be allowed as deductions in arriving at the "gross proceeds" as that term is used herein. Any costs of treatment processes, sampling or assaying, or transportation, performed or paid by the

Operator or by anyone other than the buyer, are not deductible in arriving at the "gross proceeds" as that term is here used. The term "treatment processes," as here used, means those processes (such as milling, concentrating, smelting, refining, or equivalent) applied to the raw ore or other production after it is extracted from the ground, to put it into a commercially marketable form; excluding fabricating or manufacturing.

d. Unsold production.--If any production (ore, concentrates, metal, or equivalent), after the lapse of six months from the date the ore was extracted from the ground, remains neither sold nor used by the Operator in integrated manufacturing or fabricating operations (for instance, if it is stockpiled), the Government, at its option, as long as it so remains, may require the computation and payment of its royalty on the value of such production in the form (ore, concentrates, metal, or equivalent) it is in when the Government elects to require computation and payment. If any production is used by the Operator in integrated manufacturing or fabricating operations before the Government makes its election, the Government's royalty on such production shall be computed on the value thereof in the form in which and at the time when it is so used. "Value" as here used means what is or would be gross income from mining operations for percentage depletion purposes in Federal income tax determination, or the market value, whichever is greater.

e. Percentages of royalty.--The percentages of the Government's royalty shall be as follows:

> One and one-half ($1\frac{1}{2}$) percent of amounts ("gross proceeds" or "value") not in excess of eight dollars ($8.00) per ton of production in the form in which sold, held, or used, plus one-half ($\frac{1}{2}$) percent for each additional full fifty cents ($0.50) by which such amounts exceed eight dollars ($8.00) per ton, but not in excess of five (5) percent of such amounts.
>
> (For instance: the royalty on an amount of five dollars ($5.00) per ton, would be one and one-half ($1\frac{1}{2}$) percent; on an amount of ten dollars ($10.00) per ton, three and one-half ($3\frac{1}{2}$) percent.)

f. Lien for payment.--To secure the payment of its percentage royalty, there is hereby granted to the Government a lien upon the land or the Operator's interest in the land and upon any production of minerals therefrom, until the royalty claim is extinguished by lapse of time or is fully paid.

g. Notice to purchasers.--The Operator shall give notice of the Government's claim for royalty to any purchaser of the production, and shall authorize and direct such purchaser to pay the royalty directly to the Government and to furnish the Government with copies of the settlement sheets. If the records of any production and sales or other disposition of production, whether the production is by the Operator or by others, are not made available to the Government, the amount of the royalty may be estimated by the Administrator, Defense Minerals Exploration Administration, or his successor, and his estimate thereof shall be final and binding upon the Operator.

h. No obligation to produce.--Nothing in this contract is to be construed as imposing any obligation on the Operator or the Operator's successor in interest to engage in any mining or production operations.

i. Government not obligated to buy.--Nothing in this contract shall be construed as imposing any obligation on the Government to purchase any minerals mined or produced from the land.

MF-203
(Revised July 1, 1954)

OWNER'S CONSENT TO LIEN

WHEREAS, the undersigned, as owner, co-owner, lessor, or seller has an interest in certain property in the State of Nevada, County of White Pine, described ~~as~~ ~~follows:~~ in an agreement of lease and option dated August 15, 1951, and recorded in Book 157, Page 91, Official Records of White Pine County, Nevada.

which is the subject of ~~a~~ an exploration project contract, hereinafter called the "contract", between the United States of America, hereinafter called the "Government", and

2/ Walker Corporation

hereinafter called the "Operator"; and

WHEREAS, under the provisions of said contract the Government is entitled to a percentage royalty on production and to other rights and equities which do or may conflict with or be adverse to the rights of the undersigned:

NOW THEREFORE, the undersigned, in consideration of Amendment No. 4 to said contract and as an inducement to the Government to enter into same, undertakes and agrees as follows:

1. The Government's equity in and right to dismantle, sever, take possession of, and remove and dispose of facilities, buildings, fixtures, equipment, or other items as provided in the contract or any amendment thereof shall prevail over and be prior and superior to any conflicting or adverse rights of the undersigned, and the Government is authorized to enter upon the land for such purposes.

2. To secure the payment to the Government of the percentage royalty on production 3/ provided for under the terms of said exploration project contract or any amendment thereof there is hereby granted to the Government a lien upon the land above referred to and upon any production of minerals therefrom until said royalty is fully paid or ten years have elapsed from the date of the contract, whichever occurs first.

1/ Either (a) insert the legal description of the land, or (b) strike out the words "as follows" and insert "in a lease [or contract, deed, or other document] dated _____, and recorded in book _____ page _____ official records of said county." If (b) is used, the book and page of recordation cannot be dispensed with. If the space provided is insufficient, use an Annex, and refer to the Annex in the space.

2/ Insert the name of the Operator as it will appear in the exploration project contract.

3/ Mining or production from the land is not required, and in the absence of production there is no obligation to repay the Government.

(OVER)

3. The undersigned shall commit no act nor assert any claim that may contravene or conflict with the lien, claim, or rights of the Government under the provisions of said contract. This agreement shall be binding upon the heirs, executors, administrators, successors, and assigns of the undersigned.

AMENDMENT NO. 4

Docket No. DMEA-2257 Mineral Zinc-Lead-Copper

Exploration Project Contract No. Idm-E442

Date of Contract November 12, 1952

Date of Amendment July 19, 1954

Operator Walker Corporation

JUSTIFICATION

The results of exploration under the contract to some time in May 1954 were not encouraging. The Company therefore recessed the work to give it a chance to study the new evidence obtained and to complete additional mapping of the surface. Rather than continue to do underground exploration by drifts and crosscuts of the newly ascertained geological premises, the Company requested continuing the exploration by less expensive diamond drilling. The Field Team agreed that it was to the best interests of the Operator and the Government to change the work specified in the contract under Stage II to diamond drilling.

H. C. Miller, Executive Officer
DMEA Field Team, Region III

Government Copy

EXPLORATION PROJECT CONTRACT
WALKER CORPORATION
DOCKET NO. DMEA-2257

AMENDMENT NO. 3

It is agreed this 14th day of April, 1954, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, and Walker Corporation, that Exploration Project Contract Idm-E442 (Docket No. DMEA-2257), dated November 12, 1952, as amended, is further amended, effective November 12, 1952, as follows:

In Exhibit "A":

1. Under "Description of the Work," "Part I," as amended by Amendments Nos. 1 and 2, delete all 7 items of work and substitute the following 2 items:

(1) Extend the Mountain Pride tunnel not in excess of 653 feet and crosscut not in excess of an aggregate of 350 feet. The location, direction, dimensions, and extent of the tunnel and crosscuts are subject to the prior approval of the Government.

(2) Cut 2 drill stations, and drill not in excess of 4,146 feet of diamond-drill holes. The holes shall be reamed and cased, or cemented, as necessary, but not to exceed 1,800 feet of reaming and casing, and 600 feet of cementing shall be allowed under this amendment. Not in excess of 3,700 feet of lost casing, nor 60 hours of stand-by time, nor 120 assays of core and sludge samples shall be allowed under this amendment. Cores shall be boxed and stored. The number of holes, and the location, length, direction, size, and inclination of the diamond-drill holes are subject to prior approval of the Government.

2. Under "Agreed Unit Costs," "Part I," as amended by Amendments Nos. 1 and 2, delete all 7 items of cost and the total following these costs ("$68,410.00*") and substitute the following: 1/

1/ All costs set forth herein are agreed unit costs, in lieu of those actual costs set forth in Article 6 (a) of the contract form, and include all costs of the work except as otherwise scheduled in Exhibit "A."

Drifting 653 feet and crosscutting 350 feet @ $35.00/ft.	$35,105.00	
Cutting drill stations. 2/ 3/	525.00	
Diamond drilling 4,146 feet @ $6.35/ft. (rounded to)	26,330.00	
Casing lost, 3,700 feet @ $0.30/ft. 2/	1,110.00	
Cementing, 600 feet @ $2.00/ft. 2/	1,200.00	
Reaming and casing, 1,800 feet @ $1.50/ft. 2/	2,700.00	
Standby time, 60 hours @ $6.00/hr. 2/	360.00	
Core handling. 2/ 4/	720.00	
Assaying samples, 120 samples @ $3.00/ea. 2/	360.00	$68,410.00*

2/ The number of units of each element of cost incident to the drilling is the allowable maximum for that element to which the Government will contribute; and if more units of any element of cost are required for the completion of the 4,146 feet of drilling, the Operator shall perform any such excess at its own cost without contribution by the Government. The elements of cost included in this provision are identified by the designation "2/."

3/ The unit is the completed job.

4/ The unit is the core-handling work for 4,146 feet of diamond drilling. In the event that less than said footage of diamond drilling is performed, the Operator shall be paid the same percentage of this element of cost as the percentage of the 4,146 feet of diamond drilling completed.

This amendment shall not be construed to increase the estimated total cost of the project, the aggregate total amount which the Government may be required to contribute, nor the amount of any item designated as "allowable maximum."

Vice-president & manager

DEPARTMENT OF THE INTERIOR
Defense Minerals Administration
RECEIVED
MAY 21 1954

AMENDMENT NO. 3

Docket No. DMEA-2257 Mineral Lead-Zinc-Copper

Exploration Project Contract Idm-E442

Date of Contract November 12, 1952

Date of Amendment April 14, 1954

Operator Walker Corporation

JUSTIFICATION

Diamond drill holes 1 and 2 completed under Amendment No. 2 encountered the contact as projected but at a much greater depth below the tunnel level than anticipated. The increased length of drill holes will use up the available footage without enough holes to give needed information on the size and grade of the anticipated extension of the North Good Luck ore body below the main strand of the Ward fault.

This Amendment allows drilling deeper holes and the drilling of two holes in addition to those allowed under Amendment No. 2 and substitutes drilling for winzing, raising, and some drifting.

H. C. Miller, Executive Officer
DMEA Field Team, Region III

WALKER CORPORATION
EXPLORATION PROJECT CONTRACT
DOCKET NO. DMEA-2257

AMENDMENT NO. 2

It is agreed this 2nd day of December, 1953, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, and Walker Corporation, each acting in consideration of the agreement of the other to the terms hereinafter set forth, that Exploration Project Contract Idm-E-442, Docket No. DMEA-2257, dated November 12, 1952, as amended, be further modified and amended as follows:

In Exhibit "A":

1. Under "Description of the Work, Part I, Item 1, as amended by Amendment No. 1, dated June 10, 1953, change the words "950 feet" to "not in excess of 656 feet," and at the end of the paragraph, add the following: "Two drill stations shall be cut, and there shall be drilled not in excess of 8 diamond drill holes having a total length not in excess of 1200 feet. Not more than 600 feet of reaming and casing, nor 200 feet of cementing may be done and cores shall be boxed and stored, and not more than 40 assays of the core and sludge may be made. No more than 1200 feet of lost casing will be allowed nor more than 20 hours of stand-by time. The location, length, direction, and inclination of the diamond drill holes shall be subject to the prior approval of the Government.

2. Under "Agreed Unit Costs, Part I, the first item thereof, as amended, is changed to read as follows:

Cutting drill stations 1/	$ 525.00
Diamond Drilling 1200 feet @ $6.35/ft. 2/	7,620.00

1/ The unit shall be the completed job.

2/ This includes the cost of a compressor man, compressed air, supervision, transportation, and all other costs of drilling not mentioned specifically.

Casing Lost, 1200 feet @ $0.30/ft.	$ 360.00	
Cementing @ $2.00/ft.	400.00	
Reaming and casing 600 feet @ $1.50/ft.	900.00	
Stand-by time, 20 hours @ $6.00/hr.	120.00	
Core handling 3/	240.00	
Assaying samples 40 @ $3.00/ea.	120.00	
656 feet of drift and 350 feet of crosscut @ $35.00/ft.	35,215.00	
		$45,500.00

This amendment shall not be construed to increase the estimated total cost of the project, the aggregate total amount which the Government may be required to contribute, nor the amount of any item designated as allowable maximum.

Received

AMENDMENT NO. 2

Docket No. DMEA-2257 Mineral Lead-Zinc-Copper

Exploration Project Contract Idm-E442

Date of Contract November 12, 1952

Date of Amendment December 2, 1953

Operator Walker Corporation

JUSTIFICATION

On October 12, 1953, the Operator informed this office that to complete project 1-a (297 ft. of drifting and crosscutting at $35 per foot, total $10,395) would be a waste of time and money and requested permission to divert this money to a diamond drilling program which it is believed will give more information. The suggestion was studied on the ground by the Bureau of Mines and Geological Survey, and both recommended the requested change-over. This amendment, therefore, was drawn to establish by diamond drilling the dike pattern on the footwall side of the Ward fault; to prospect the contacts of the Mountain Pride and Silver King Dikes, and to further establish the Paymaster Dike.

WALKER CORPORATION
EXPLORATION PROJECT CONTRACT
DOCKET NO. DMEA-2257

AMENDMENT NO. 1

It is agreed this 10th day of June, 1953, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, and Walker Corporation, each acting in consideration of the agreement of the other to the terms hereinafter set forth, that Exploration Project Contract Idm-E-442, Docket No. DMEA-2257, dated November 12, 1952, be modified and amended as of November 12, 1952, as follows:

1. In Exhibit "A":

Under "Description of the Work," Part 1, Item 1, change the figure "1300" to "950", and add the following: and drive two crosscuts, both from this tunnel approximately at coordinate 3200 North, one 150 feet eastwardly, called the "hanging wall crosscut", and the other 200 feet westwardly, called the "footwall crosscut", the total drifting and crosscutting not to exceed 1300 feet.

Under "Agreed Unit Costs", Part 1, the first item thereof is changed to read as follows: "950 feet of drift and 350 feet of crosscut at $35.00* per foot - $45,500."

2. Annex I which modifies Article 9 of the contract form, is attached hereto and made a part hereof.

3. This Amendment shall not be construed to increase the estimated total cost of the project, the aggregate total amount which the Government may be required to contribute, nor the amount of any item designated as allowable maximum.

EXPLORATION PROJECT CONTRACT
DOCKET NO. DMEA-2257

ANNEX I

The following provisions are in lieu of all of paragraph (a) of Article 9 which precedes the colon:

If at any time the Government considers that a discovery or development from which production may be made has resulted from the exploration work, the Government, at any time not later than six months after the Operator has rendered the final report and final account required by the exploration project contract, may so certify in writing to the Operator. Such certification shall describe broadly or indicate the nature of the discovery or development. The Operator, or his successor in interest, shall pay to the Government a royalty on all minerals mined or produced from the land which is the subject of the exploration project contract, as follows: (1) Regardless of any certification of discovery or development, from the date of the contract until the lapse of the time within which the Government may make such certification of discovery or development, or until the total net amount contributed by the Government, without interest, is fully repaid, whichever occurs first, unless the Government waives its right to a royalty; or (2) if the Government makes a certification of discovery or development, for a period of ten years (or other period fixed by the contract) from the date of the contract, or until the total net amount contributed by the Government, without interest, is fully repaid, whichever occurs first. Said royalty shall be a percentage of the net smelter returns, the net concentrator returns, or other net amounts realized from the sale or other disposition of any such production, in whatever form disposed of, including ore, concentrates, or metal, as follows:

Exploration Project Contract Idm-E442

Date of Contract November 12, 1952

Date of Amendment June 10, 1953

Operator Walker Corporation - East Ely, Nevada

JUSTIFICATION

The projection of the hanging wall strand of the Ward Fault zone is shown on Figure 2 of the contract as passing some 75 feet west of the old workings on the 280 level. Subsequent work done showed this projection to be in error by approximately 100 feet and that the hanging wall strand of the Ward Fault zone passes through the old workings and lies some 100 feet east of its projected position. To prove the continuation of the North Goodluck Orebody to and through the plane of exploration, the company requested permission to drive a crosscut approximately 150 feet long eastwardly and another 200 feet westerly from the tunnel. The cost of the project was not increased as a result of this extra 350 feet of crosscutting as the company was allowed 1300 feet of drifting of which it completed approximately 400 feet before the date of the contract at no cost to the Government.

EXPLORATION PROJECT CONTRACT [1]

IT IS AGREED this 12th day of November, 1952, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, hereinafter called the "Government," and [2] Walker Corporation, a Nevada Corporation
~~Box 917~~ Box 163
~~Leadville, Colorado~~ East Ely, Nev. Nev.

hereinafter called the "Operator," as follows:

ARTICLE 1. *Authority for contract.*—This agreement is entered into under the authority of the Defense Production Act of 1950, as amended, pursuant to DMEA Order 1 entitled "Government Aid in Defense Exploration Projects."

ARTICLE 2. *Operator's property rights.*—With respect to that certain land situated in the State of Nevada, County of White Pine, described as follows: [3]
See Appendix 1, attached hereto and made a part hereof. See also, map entitled "Mining Property of the Walter W. Mining Company (Ward Mine)."

the Operator represents and undertakes: [4]

(*a*) ~~That the Operator is the owner, in possession and entitled to possession, and that the possession and title to the following claims, lines, or exploration areas as shown on a map of which the exploration agreement of the holder is attached:~~

(*b*) That the Operator is a lessee, in possession and entitled to possession, and the Owner's Consent to Lien is attached.

The Operator shall devote the land and all existing improvements, facilities, buildings, installations, and appurtenances to the purposes of the exploration project without any allowance for the use, rental value, depreciation, depletion, or other cost of acquiring, owning, or holding possession thereof.

ARTICLE 3. *Exploration project.*—The Operator, within thirty (30) days from the date of this contract shall commence work on a project of exploration for [5] Zinc, Lead, Copper

in or upon the described land; and shall bring the project to completion within a period of two (2) years from the date of this contract. The work to be performed is more fully described in Exhibit "A" attached hereto, which, with any maps or drawings thereto attached, are made a part of this contract. The Government will contribute to the cost of this work as hereafter provided.

ARTICLE 4. *Performance of the work.*—(*a*) *Operator's responsibility.* The work shall be performed efficiently, expertly, in a workmanlike manner, in accordance with good mining standards and State regulations for health and safety and for workmens' compensation and employers' liability insurance, with suitable and adequate equipment, materials, and labor, to bring the project to completion within the time fixed. To the extent specified in Exhibit "A," attached hereto, the work may be performed by independent contractor or contractors; and work not specified in Exhibit "A" for performance by independent contractor may nevertheless be so performed upon amendment of Exhibit "A," as agreed to by the parties, to state the work to be so performed and the estimated unit costs thereof, as provided hereafter.

(*b*) *Independent contracts.*—Any independent contract for the performance of work shall be on a unit-price basis (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved), or on some basis that will indicate the amount due for work performed at any stage of the work to be performed under such independent contract. The Government shall not be nor be considered to be a party to any such independent contract, and the Government's right to terminate the exploration project contract under any of its provisions shall not in any manner be affected by reason of any such independent contract. If the reference in Exhibit "A" to any such independent contract states that the Government's approval thereof is required, the Government may refuse to participate in the cost thereof unless and until it has given its written approval of the independent contract.

(*c*) *Government may inspect.*—The Government shall have the right to enter and observe and inspect the work at all reasonable times, and the Operator shall provide the Government with all available means for doing so. The Government may consult with and advise the Operator on all phases of the work.

ARTICLE 5. *Estimated costs of the project.*—A statement of the estimated cost of the project is set forth in Exhibit "A," attached hereto. Except insofar as any item of requirement or the estimated cost thereof set forth in Exhibit "A" is there or elsewhere designated as an "allowable maximum," such items of requirement and of related cost are estimates only, and may be exceeded to the extent that the Government may from time to time approve for the most economic and beneficial performance of the work within the limitation of the total aggregate estimate of costs. The Government's approval of any such excess over the estimate for an item of requirement or related cost will be signified by its approval and payment of any invoice or voucher for payment which expressly calls attention to such excess. Items expressly designated in Exhibit "A" or elsewhere as "allowable maximum," and the total aggregate estimated cost are limitations, and any excess therein will be for the sole account of the Operator in which the Government will not participate.

ARTICLE 6. *Allowable costs of the project.*—(*a*) The costs of the project in which the Government will participate are limited to the following:

(1) *Independent contracts.*—Payments to independent contractors under independent contracts listed in Exhibit "A." The estimated cost of any work to be performed under an independent contract is or shall be included in the estimate of costs in Exhibit "A" in terms of the estimated numbers of units of work to be performed, the estimated amount to be paid per unit, and the estimated total amount to be paid to the independent contractor, and such estimates shall be allowable maximums above which the Government will not contribute. Regardless of the provisions of any such independent contract, the Government will participate in the payments to the independent contractor only on account of work actually performed and that conforms with the provisions of the exploration project contract, and only to the extent that the Government deems the unit prices for the work under the independent contract to be reasonable and necessary. No such independent contract shall have the effect of increasing the estimated total cost of the exploration project contract nor the maximum amount which the Government will pay as provided in the exploration project contract.

(2) *Labor, supervision, consultants.*—Labor, supervision and technical services (including engineering and geological consultants), a schedule of which is included in the estimate of costs set forth in Exhibit "A." The requirements and related estimated costs for supervision and technical services are allowable maximums.

(3) *Operating materials and supplies.*—Necessary materials and supplies including items of equipment costing less than $50.00 each, and power, water, and fuel, a schedule of which is included in the estimate of costs in Exhibit "A."

(4) *Operating equipment.*—Any operating equipment to be rented or purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or the allowable depreciation, as the case may be, a schedule of which is included in Exhibit "A." Any items listed as owned and to be furnished by the Operator, and related ~~initial~~ allowable depreciation, are allowable maximums.

(5) *Rehabilitation and repairs.*—Any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and to be devoted to the purposes of the exploration contract, a schedule of which is included in the estimate of costs set forth in Exhibit "A." These items are allowable maximums.

(6) *New buildings, improvements, installations.*—Any necessary buildings, fixed improvements, or installations to be purchased, installed, or constructed for the purposes of the exploration work, with the estimated cost of each, a schedule of which is included in the estimate of costs in Exhibit "A." All of these items are allowable maximums.

(7) *Miscellaneous.*—Repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance and payroll taxes.

(8) *Contingencies.*—Such other necessary, reasonable direct costs of performing the exploration work, within the limit of the total aggregate estimate of costs, whether or not included in any schedule of costs in Exhibit "A," as may be approved by the Government in the course of the work, as indicated by its approval and payment of invoices and vouchers.

[1] If sufficient space is not provided in any blank, use an extra sheet of paper and refer to it in the blank.
[2] State name, address, and nature of organization if any.
[3] Give legal description or enough to identify the property, particularly excluding any land or interest therein to which the Government's lien is not to attach or the production from which is not to be subject to the Government's percentage royalty.
[4] Strike out the provision not applicable.
[5] Name of mineral or minerals.

(*b*) The Government's payment in all cases will be based on actual, necessary costs (including contract unit prices) incurred not in excess of any "allowable maximum," and not in excess of the fixed percentage of the total aggregate estimated cost. Costs will be considered to be incurred only as they are or become due and payable.

(*c*) No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes) or any other indirect costs, or work performed or costs incurred before the date of this contract, shall be allowed as costs of the project in which the Government will participate.

ARTICLE 7. *Reports, accounts, audits.*—(*a*) *Progress reports.* The Operators shall provide the Government with monthly reports of work performed and costs (including contract unit prices) incurred under the contract, in quintuplicate (five copies), upon forms provided by the Government. These progress reports shall be certified by the Operator, and shall constitute both the Operator's invoice of costs incurred on the period covered by the report and his voucher for repayment by the Government, unless the Government requires the use of a standard voucher form with invoice attached. Progress reports shall include surface and/or underground engineering-geological maps or sketches showing the progress of the exploration, with assay-reports on samples taken concurrently with the advance in mineralized ground.

(*b*) *Final report.*—Upon completion of the exploration work or termination of the contract the Operator shall provide the Government with an adequate geological and engineering report, in quintuplicate (five copies), including an estimate of ore reserves resulting from the exploration work.

(*c*) Compliance with requirements.—If, in the opinion of the Government, any of the Operator's reports are insufficient or incomplete, the Government may procure the making or completion of such reports and attachments as an expense of the exploration work; and the Government may withhold approval and payment of any vouchers depending upon insufficient or incomplete reports.

(*d*) *Accounts and audits.*—The Operator shall keep suitable records and accounts of operations, which the Government may inspect and audit at any time. The Government may at any time require an audit of the Operator's records and accounts by a certified public accountant, the cost thereof to be treated as a cost of the project. The Operator shall keep and preserve said records and accounts for at least 3 years after the completion of the project or the termination of this contract. Upon the completion of the project or termination of the contract the Operator shall render a final account as provided in Article 12.

ARTICLE 8. *Payments by the Government.*—(*a*) The Government will pay 50 percent of the allowable costs incurred, as they accrue, in an aggregate total amount not in excess of $66,155.00, which is 50 percent of $132,310.00, the agreed, estimated total cost of the project in which the Government will participate; *Provided,* that until the Operator's final report and final accounting have been rendered to the Government, and any final auditing required by the Government has been made, and a final settlement of the contract has been made, the Government may withhold from the last voucher or vouchers such sums as it sees fit not in excess of ten (10) percent of the maximum total which the Government might have been called upon to pay under the terms of the contract.

(*b*) The Government may make any payment or payments direct to independent contractors and to suppliers, for the account of the Operator, rather than to the Operator.

ARTICLE 9. *Repayment by Operator.*—(*a*) If, at any time, the Government considers that a discovery or a development from which production may be made has resulted from the exploration work, the Government, at any time not later than 6 months after the Operator has rendered the required final report and final account, may so certify in writing to the Operator. The certification shall describe broadly or indicate the nature of the discovery or development. In the event of such certification, any minerals mined or produced from the land described in Article 2 within 10 years from the date of this contract, including any mined or produced before the certification, shall be subject to a percentage royalty which the Operator or his successor in interest shall pay to the Government, upon the net smelter returns, the net concentrator returns, or other net amounts realized from the sale or other disposition of any such production, in whatever form disposed of, including ore, concentrates, or metal, until the total amount contributed by the Government, without interest, is fully repaid, or said 10 years have elapsed, whichever occurs first, as follows:

(1) One and one-half (1½) percent of any such net amounts not in excess of eight dollars ($8.00) per ton.

(2) One and one-half (1½) percent of any such net amounts, plus one-half (½) percent of such net amounts for each additional full fifty cents ($0.50) by which such net amounts exceed eight dollars ($8.00) per ton, but not in excess of five (5) percent of such net amounts.

(For instance: The percentage royalty on a net amount of five dollars ($5.00) per ton would be one and one-half (1½) percent; on a net amount of ten dollars ($10.00) per ton, three and one-half (3½) percent.)

(*b*) As here used, "net smelter returns," "net concentrator returns," and "other net amounts realized from the sale or other disposition," mean gross revenue from sales; or if not sold, the market value of the material after it is mined in the form in which and the place where it is held. In the case of integrated operations in which the material is not disposed of as such, these terms mean what is or would be gross income from mining operations for percentage depletion purposes in income-tax determination.

(*c*) To secure the payment of its percentage royalty, the Government shall have and is hereby granted a lien upon the land described in Article 2 and upon any production of minerals therefrom, until the royalty claim is extinguished by lapse of time or is fully paid.

(*d*) This article is not to be construed as imposing any obligation on the Operator or the Operator's successor in interest to engage in any mining or production operations.

ARTICLE 10. *Assignment, transfer, or loss of Operator's interest.*—Without the written consent of the Government, the Operator shall not assign or otherwise transfer or hypothecate this contract or any rights thereunder. The Operator shall not make any voluntary nor permit any involuntary transfer or conveyance of the Operator's rights in the land described in Article 2, without making suitable provision for the preservation of the Government's right to a percentage royalty on production and lien for the payment thereof; *Provided,* that mere failure by the Operator to maintain the Operator's rights in the land, without any consideration running to the Operator other than relief from the cost of maintaining such rights (as by surrender of a leasehold, failure to perform assessment work, or failure to exercise an option), coupled with complete abandonment by the Operator of all interest in or operations on the land for a period of 10 years from the date of this contract, shall not constitute such a transfer or conveyance. Should the Operator make or permit any transfer or conveyance in violation of this provision, the Operator shall be and remain liable for payment to the Government of the same amounts, at the same times, as would have been paid under the terms of the percentage royalty on production. If for any reason the net smelter returns, net concentrator returns, or other net amounts realized from the sale or other disposition of such production are not available as a means of measuring the amount of the Operator's liability, the amount thereof shall be estimated as well as may be, and in the event of dispute as to such estimates, the determination thereof by the Administrator of Defense Minerals Exploration Administration or by his successor shall be final and binding upon the Operator.

ARTICLE 11. *Title to and disposition of property.*—All facilities, buildings, fixtures, equipment, or other items costing more than $50.00 each, paid for or purchased with funds contributed jointly by the Operator and the Government, although title may be taken in the name of the Operator, shall belong to the Operator and the Government jointly, in proportion to their respective contributions, and upon the completion of the work or the termination of the contract shall be disposed of promptly by the Operator for the joint account of the Government and the Operator, either by return to the vendor, by sale to others, or purchase by the Operator at a price at least as high as could otherwise be obtained, as may appear to be for the best interest of the Government, unless the Government, in writing, waives its interest in any such item. If necessary to accomplish such disposition, the Operator shall dismantle, sever from the land, and remove any such item, the cost thereof to be for the joint account of the parties in proportion to their respective interests. If the Operator, within 90 days after the receipt of written notice from the Government, fails, neglects, or refuses to dispose of such property, the Government may itself enter upon the land, take possession of, and remove and dispose of any such property as above provided.

ARTICLE 12. *Termination and completion.*—The Government may, at any time, by written notice to the Operator, terminate this contract: (*a*) If the Operator fails to provide his share of the money necessary to prosecute operations pursuant to the terms of the contract; (*b*) if the Operator, in the opinion of the Government, fails to prosecute operations pursuant to the terms of the contract; or (*c*) if in the opinion of the Government, operations up to the time of the notice have not indicated the probability of making any worth while discovery and in the opinion of the Government further operations are not justified. Upon the completion of the project or any termination of the contract the Operator shall dispose of any remaining materials, supplies, facilities, buildings, fixtures, and equipment in which the Government has an interest, for the joint account of the Operator and the Government in the proportion of their respective interests; shall render to the Government a full and final accounting of his operations under the contract and his expenditures of money; and shall pay to the Government its pro rata share of any money remaining.

ARTICLE 13. *Changes and added provisions.* _____

EXPLORATION PROJECT CONTRACT
WALKER CORPORATION
DOCKET NO. DMEA-2257

EXHIBIT "A"

Description of the Work

The work consists of two parts. Part I shall be known as the Goodluck Orebody Project, and Part II as the Defiance Tunnel Exploration Project. The work on these two parts may be carried on simultaneously.

PART I

1. Extend the Mountain Pride tunnel 1300 feet to cut the projected position of the faulted continuation of the North Goodluck orebody below the Ward fault, shown on the attached map (Fig. 2) as Project 1a.

2. Drive the Mountain Pride tunnel along the Paymaster vein for about 100 feet to test the width and grade of ore at this level, shown on the attached map (Fig. 2) as Project 1b.

3. Crosscut northeast for 30 feet from 2790 north to the upper strand of the Ward fault, shown on the attached map (Fig. 2) as Project 1c.

4. Sink a 4' x 6' winze 100 feet just under the fault to cut the projected position of the South Goodluck mineralized shoot in the sulfide zone, shown on attached map (Fig. 2) as Project 1c.

5. Raise (4' x 6') 20 feet through the fault to cut the same shoot in the oxide zone, in the area on attached map (Fig. 2) shown as Project 1c.

6. Sink a 4' x 6' incline winze 200 feet from 3200 N. and 3470 W. just under the upper strand of the Ward fault to cut the projected position of the North Goodluck orebody in the sulfide zone, shown on the attached map (Fig. 2) as Project 1d.

7. Raise (4' x 6') 20 feet through the fault to cut the North Goodluck orebody in oxide zone above the fault, in the area on the attached map (Fig. 2) shown as Project 1d.

PART II

This part consists of Stages 1 and 2. Stage 2 will depend on the findings of Stage 1 and shall be performed only with the prior approval of the Government.

Stage 1

1. Construct one 20' x 20' frame and metal compressor house.

2. Rehabilitate approximately 1130 feet of the lower Defiance tunnel.

3. Extend by crosscutting the lower Defiance tunnel to the east side of the dike and drift in both directions along the dike, not exceeding a combined total of 1000 feet of crosscutting and drifting. The extent of the drifts shall be subject to the approval of the Government. The work is shown on the attached map (Fig. 2) as Project 2a and Project 2b.

Stage 2

1. Further extend the crosscut of the lower Defiance tunnel through the dike and drift in both directions along the west side of the dike, not exceeding a combined total of 600 feet of crosscutting and drifting. The extent of the drifts from the crosscut shall be subject to the approval of the Government. The work is shown on attached map (Fig. 2) as Project 2c.

Estimated Costs of the Project
(*Indicates allowable maximum)

AGREED UNIT COSTS

PART I

1300 feet of drift @ $35.00* per foot	$45,500.00
100 feet of drift @ $35.00* per foot	3,500.00
30 feet of crosscut @ $35.00* per foot	1,050.00

100 feet of winze @ $54.00* per foot	$ 5,400.00	
20 feet of raise @ $54.00* per foot	1,080.00	
200 feet of winze @ $54.00* per foot	10,800.00	
20 feet of raise @ $54.00*	1,080.00	
Total Agreed Unit Cost		$68,410.00*

PART II

Stage 1

Crosscut and drift 1000 feet* @ $35.00 per foot*	35,000.00*

Stage 2

Crosscut and drift 600 feet* @ $35.00 per foot*	21,000.00*

The Government will contribute to the costs of all drifting, crosscutting, raising and winzing, as they accrue for units of work actually performed, on the basis of the agreed estimated unit costs per foot in lieu of actual costs.

These unit costs include all costs of the work except those costs specified in Article 6(a) of the contract form which are scheduled below, to which the Government will contribute on the basis of actual costs.

Scheduled Actual Costs

(2) Labor, Supervision, Consultants

PART II

Stage 1

Rehabilitate the lower Defiance tunnel for about 1130 feet	$ 5,900.00

This estimated cost includes all labor, supervision, supplies, materials, and all other costs necessary to complete this work in preparation for extending this tunnel.

(6) New Buildings, Improvements, Installations

PART II

Stage 1

Construction of one 20' x 20' frame and metal compressor house	$2,000.00*

This estimated cost includes all labor, supervision, supplies, materials, and all other costs necessary to complete the construction of this compressor house.

S U M M A R Y

Total Estimated Cost Part I		65 $68,410.00*
Total Estimated Cost Stage 1, Part II	$42,900.00*	
Total Estimated Cost Stage 2, Part II	21,000.00*	
Total Estimated Cost Stages 1 and 2, Part II		$63,900.00*
TOTAL ESTIMATED COSTS OF THE PROJECT		$132,310.00*
GOVERNMENT PARTICIPATION @ 50%		$ 66,155.00*

EXPLORATION PROJECT CONTRACT
WALKER CORPORATION
DOCKET NO. DMEA-2257

APPENDIX I

Patented Lode Mining Claims in Sections 9, 10, 15 and 16, Township 14 North, Range 63 East, M.D.M.

U. S. Survey Number	Name of Claim
3709	Ruth
3709	Side Line
63	Juno
3709	Plieades Extension
52	Plieades*
37	Paymaster*
38	Young America
62	Ward & Henry
42	Mountain Pride
3709	Iowa
57	Governor
3709	Silver King
3709	Denver
3709	Smuggler
3709	May Day
59	Jew Peter
3709	Extension

3709	Napoleon
3709	M.M. & S.

*Excluded from the Plieades and Paymaster claims is that block of ground lying above the sill of the 230 level of the Goodluck Shaft, as driven, being approximately (30) feet above the sill of the Mountain Pride Tunnel as it will be driven, and lying within the following tract, described by metes and bounds and shown with horizontal hatching on the attached map (Fig. 1).

Begin at a point on the northeasterly side line of Paymaster Lode, U. S. Sur. 37, from whence the northeast corner (Corner No. 6) of the said Paymaster Lode bears northwesterly along said side a distance of two hundred (200) feet.

Thence, the first course, due East two hundred (200) feet. Thence, the second course, South 50° East three hundred (300) feet. Thence, the third course, due South four hundred (400) feet. Thence, the fourth course, due West two hundred and fifty (250) feet. Thence, the fifth course, North 73° West six hundred and thirty (630) feet to the place of beginning.

MF-203

OWNER'S CONSENT TO LIEN

WHEREAS, the undersigned, as owner, co-owner, lessor, or seller has an interest in certain property in the State of Nevada, County of White Pine, described ~~as follows~~ 1/ in an agreement of lease and option dated August 15th, 1951, and recorded in Book 157, page 91 official records of White Pine County, Nevada

which is the subject of a proposed exploration project contract, hereinafter called the "contract", between the United States of America, hereinafter called the "Government", and

2/ Walker Corporation

hereinafter called the "Operator"; and

WHEREAS, under certain provisions of said contract which are set forth on the reverse side hereof, the Government is entitled to a percentage royalty on production and to certain other rights and equities which do or may conflict with or be adverse to the interest of the undersigned in said property;

NOW THEREFORE, the undersigned, in consideration of said contract and as an inducement to the Government to enter into same, undertakes and agrees as follows:

1. The Government's equity in and right to dismantle, sever, take possession of, and remove and dispose of facilities, buildings, fixtures, equipment, or other items as provided in the contract, or any amendment thereof, shall prevail over and be prior and superior to any conflicting or adverse rights of the undersigned, and the Government is authorized to enter upon the land for such purposes.

2. To secure the payment to the Government of the percentage royalty on production3/ provided for under the terms of said exploration project contract, or any amendment thereof which does not increase the maximum amount of the Government's claim here stated or alter the provisions for repayment, there is hereby granted to the Government a lien upon the land herein described and upon any production of minerals therefrom, until the royalty claim is fully paid in the amount of the Government's contribution, not in excess of 4/$ 66,155.00, or ten years have elapsed from the date of the contract.

3. The undersigned shall commit no act nor assert any claim that may contravene or conflict with the lien, claim, or rights of the Government under the provisions of said contract. This agreement shall be binding upon the heirs, executors, administrators, successors, and assigns of the undersigned.

Dated this 28th day of November, 1952.

Walter W. Mining Company [Seal]

By [signature] [Seal]
Vice President

[Seal]

1/ Either (a) insert the legal description of the land, or (b) strike out the words "as follows" and insert "in a lease [or contract, deed, or other document] dated _____, and recorded in book _____ page _____ official records of said county." If (b) is used, the book and page of recordation cannot be dispensed with. If the space provided is insufficient, use an Annex, and refer to the Annex in the space.

2/ Insert the name of the Operator as it will appear in the exploration project contract.

3/ Mining or production from the land is not required, and in the absence of production there is no obligation to repay the Government.

4/ Insert the maximum amount of the Government's contribution.

RELEVANT CONTRACT PROVISIONS

Repayment by Operator. (a) If, at any time, the Government considers that a discovery or a development from which production may be made has resulted from the exploration work, the Government, at any time not later than six months after the Operator has rendered the required final report and final account, may so certify in writing to the Operator. The certification shall describe broadly or indicate the nature of the discovery or development. In the event of such certification, any minerals mined or produced from the land described in Article 2 within 10 years from the date of this contract, including any mined or produced before the certification, shall be subject to a percentage royalty which the Operator or his successor in interest shall pay to the Government, upon the net smelter returns, the net concentrator returns, or other net amounts realized from the sale or other disposition of any such production, in whatever form disposed of, including ore, concentrates, or metal, until the total amount contributed by the Government, without interest, is fully repaid, or said 10 years have elapsed, whichever occurs first, as follows:

(1) One and one-half (1½) per cent of any such net amounts not in excess of eight dollars ($8.00) per ton.

(2) One and one-half (1½) per cent of any such net amounts, plus one-half (½) per cent such net amounts for each additional full fifty cents ($0.50) by which such net amounts exceed eight dollars ($8.00) per ton, but not in excess of five (5) per cent of such net amounts.

(For instance: the percentage royalty on a net amount of five dollars ($5.00) per ton, would be one and one-half (1½) per cent; on a net amount of ten dollars ($10.00) per ton, three and one-half (3½) per cent.)

(b) As here used, "net smelter returns", "net concentrator returns", and "other net amounts realized from the sale or other disposition", mean gross revenue from sales; or if not sold, the market value, the market value of the material after it is mined in the form in which and the place where it is held. In the case of integrated operations in which the material is not disposed of as such, these terms mean what is or would be gross income from mining operations for percentage depletion purposes in income tax determination.

(c) To secure the payment of its percentage royalty, the Government shall have and is hereby granted a lien upon the land described in Article 2 and upon any production of minerals therefrom, until the royalty claim is extinguished by lapse of time or is fully paid.

(d) This article is not to be construed as imposing any obligation on the Operator or the Operator's successor in interest to engage in any mining or production operations.

Title to and disposition of property. All facilities, buildings, fixtures, equipment, or other items costing more than $50.00 each, paid for or purchased with funds contributed jointly by the Operator and the Government, although title may be taken in the name of the Operator, shall belong to the Operator and the Government jointly, in proportion to their respective contributions, and upon the completion of the work or the termination of the contract shall be disposed of promptly by the Operator for the joint account of the Government and the Operator, either by return to the vendor, by sale to others, or purchase by the Operator at a price at least as high as could otherwise be obtained, as may appear to be for the best interest of the Government, unless the Government, in writing, waives its interest in any such item. If necessary to accomplish such disposition, the Operator shall dismantle, sever from the land, and remove any such item, the cost thereof to be for the joint account of the parties in proportion to their respective interests. If the Operator, within 90 days after the receipt of written notice from the Government, fails, neglects, or refuses to dispose of such property, the Government may itself enter upon the land, take possession of, and remove and dispose of any such property as above provided.
