Re: DMEA-2378 (Uranium)
Salina Mining & Smelting Co.
Lynn Claims
Kane County, Utah
Contract Idm-E399

Mr. Richard M. Peak, Secretary
Salina Mining and Smelting Company
1890 N. Main
Walnut Creek, California

Dear Mr. Peak:

After the completion of the approved exploration work under the contract identified above, we asked to be informed about changes in the status of the property and production from it during the period of royalty obligation.

To assist you to furnish this information and to assure the accuracy of our records, please answer the questions on the back of this letter and return two copies to this office with copies of any pertinent documents.

The royalty period under the subject contract expires on September 10, 1962. In order to close the file we require the information requested in this form.

Sincerely yours,

W. R. Griswold, Chief
Division of Minerals

From: Stephen R. Wilson

Subject: Docket No. DMEA 2378 (Uranium), Contract Idm-E399, Salina Mining and Smelting Co., Kane County, Utah

Attached are the original and eight copies of Semiannual Report of Certified Project covering property encumbered under the subject contract. M. M. Gilkey inspected the property January 11, 1956, and prepared the report.

A small tonnage of ore was produced from the property during the period of DMEA project operation. No ore has been mined since the project was terminated in August 1953. Recent exploration on the property consists of approximately 250 feet of bulldozer rim stripping. There is no activity on the claims at present.

SEMIANNUAL REPORT OF CERTIFIED PROJECT

Reporting Period	July 1, 1955 to December 31, 1955
Docket and Contract Number	DMEA-2378, Contract Idm-E399
Operator	Salina Mining and Smelting Co., P. O. Box 82, Orderville, Utah
Commodity	Uranium
Mine Name	Lynn claims
County and State	Kane County, Utah
Date of Contract	September 10, 1952
Date of Certification	September 16, 1953
Expiration date of Royalty Payments	September 10, 1962
Date of Examination for this Report	January 11, 1956
Total Amount of Contract	$16,950.50
Total Expenditures under Contract	$15,781.50
Amount of Government Participation at 90%	$14,203.35
Royalty Payments this Period	None
Previous Royalty Payments	$105.37
Total Royalty Payments to Date	$105.37
% Loan Repayment Completed	0.74%
Amount of Royalty Due	None
Royalty Remarks	None

Original Estimate of Reserves (Includes production during project operations)	110 tons
Increase of Reserves by work performed subsequent to expiration or termination of contract (Includes production subsequent to project operations)	None
Revised Estimate of Reserves (Includes all production through December 31, 1955)	110 tons

Production this Period	None
Amount of Previous Production	110 tons
Total DMEA Production to Date	110 tons
% of Revised Reserves Mined	100%

Production Remarks:

No ore has been produced or developed since August 31, 1953, when the DMEA project was terminated. During the present reporting period, about 250 feet of bulldozer rim stripping was accomplished. The work was done on the Lynn No. 3 claim, about 800 to 1,000 feet south of the DMEA inclined adit. Apparently no ore was encountered.

No one was on the property on the date of inspection. It is reported that the stripping was done by a new lessee.

Estimated cost of the bulldozer stripping is $1,500.

REPORT OF INSPECTION OF CERTIFIED PROJECT

July 1, 1954 to June 30, 1955

RECEIVED
OCT 10 1955

Docket No.:	DMEA-2378, Contract Idm-E399
Commodity:	Uranium
Contractor:	Salina Mining and Smelting Co.
Mine:	Lynn claims
County and State:	Kane County, Utah
Date of Certification:	September 16, 1953
Date of examination for this report:	July 14, 1955
Total contract amount:	$16,950.50
Total expended:	$15,781.50
Government participation:	(90 percent) $14,203.35
Expiration date of royalty payments:	September 10, 1962
Production this period:	None
Royalties this period:	None
Royalties to date:	$105.37

This report covers the one-year period from July 1, 1954 to June 30, 1955. The mine was not inspected at the end of the second half of 1954 as the road to the property was closed during the winter months.

Uranium mineralization on the Lynn claim occurs in the contact zone between the Jurassic Summerville formation (sandstone) and a conglomerate member of the overlying Cretaceous Dakota sandstone. The rocks dip 5 to 10 degrees to the northeast. Principal concentrations have been found on the Lynn No. 3 and Lynn No. 1 claims. The ore bodies are lenticular, small, and low grade. Minerals present include autunite, carnotite and torbernite, found mainly in association with carbonaceous material, clay and iron oxide. Ore shipped to date has averaged approximately 0.12 percent U_3O_8.

SEMIANNUAL REPORT OF CERTIFIED PROJECT

January 1, 1954 to June 30, 1954

Docket No:	DMEA-2378, Contract Idm-E399
Commodity:	Uranium
Contractor:	Salina Mining and Smelting Co.
Mine:	Lynn claims
County and State:	Kane County, Utah
Date of Certification:	September 16, 1953
Date of examination for this report:	August 4, 1954
Total contract amount:	$16,950.50
Total expended:	$15,781.50
Government participation:	(90 percent) $14,203.35
Expiration date of royalty payments:	September 10, 1962
Production this period:	None
Royalties this period:	None
Royalties to date:	$105.37

An inspection of the Lynn claim was made August 4, 1954.

The mine has been inactive since August 31, 1953, when the DMEA project was terminated.

Uranium mineralization on the Lynn claim occurs in the contact zone between the Jurassic Summerville formation (sandstone) and a conglomerate member of the overlying Cretaceous Dakota sandstone. The rocks dip 5 to 10 degrees to the northeast. Principal concentrations have been found on the Lynn No. 3 and Lynn No. 1 claims. The ore bodies are lenticular, small, and low grade. Minerals present include autunite, carnotite and torbernite, found mainly in association with carbonaceous material, clay and iron oxide. Ore shipped to date has averaged approximately 0.12 percent U_3O_8.

Memorandum

To: T. A. Christensen

From: Executive Officer, DMEA Field Team, Region IV

Subject: DMEA Docket 2378, Contract Idm-E399 (Uranium), Salina Mining and Smelting Co., Kane County, Utah - Operator's Monthly Progress Report, for the period August 1953.

Enclosed are the original and four copies of Form MF-104 and MF-104A, Narrative Report, and Engineer's Report for the above period.

Work has been completed as authorized by the contract. No documentation is required for work performed under contracts prepared on Form MF-200A, therefore we recommend that payment be made for 90 percent of the amount reported by the Operator on Form MF-104, contingent on your verification of arithmetical accuracy within the report.

A sum of $500.00 is to be withheld from the amount due the Operator pending receipt of the Operator's final report and release of the final Report of Review by the Contract Administration and Audit Division.

September 10, 1953

Memorandum

To: W. H. King, Executive Officer, DMEA Field Team, Region IV

From: Chief, Minerals Development Branch, Mining Division, Region IV

Subject: Docket No. DMEA-2378 (Uranium), Contract Ida-8399, Salina Mining and Smelting Co., Kane County, Utah. MF-104 forms for August 1953

The attached MF-104 forms describe the work and list expenditures under the subject contract during August 1953. Inspection for the period was made by M. M. Gilkey September 1, 1953.

Work accomplished during the month consisted of an advance of 135 feet. All work was accomplished on the Lynn No. 1 claim. The inspecting engineer verified by measurement that work reported was completed.

Work during August 1953 did not disclose additional ore. The operator previously reported shipment totaling 128 tons to the Atomic Energy Commission purchasing depot at Maryvale, Utah.

The present MF-104 forms are the final forms to be submitted by the operator. A total of 50 feet of crosscutting remains under terms of the contract; however, the operator does not wish to continue work on the Lynn No. 1 claim because the mineralization is not encouraging. It is recommended that the project be considered terminated without the necessity of preparation of formal termination papers.

The operator has requested additional funds for work on the Lynn No. 3 claim. It is recommended that reimbursement to the operator on the present work be withheld until receipt of the operator's final report. It is probable that action on the requested amendment for additional funds will be completed before receipt of the operator's final report.

No royalty has been received on the above-mentioned shipments from the property.

The MF-104 forms were received from the operator September 3, 1953. A delay of three days in transmitting the forms to Denver resulted from the work load of the inspecting engineer.

S. R. Wilson Sept. 9, 1953

M. M. Gilkey

Docket No. DMEA-2378 (Uranium), Contract Idm-5399, Salina Mining and Smelting Co., Sanpete County, Utah. Progress report for August 1953

The DMEA contract work on the property of the Salina Mining and Smelting Co. near Ordarville, Utah, was inspected on September 1, 1953.

Total advance reported by the operator for the month of August was 135 feet. The work reported, all of it on the Lynn No. 1 claim, consisted of extending the adit 60 feet to a total distance of 150 feet and crosscutting 50 feet northwesterly and 25 feet southeasterly from the face of the adit. This was verified by measurement on the date of inspection. The work conforms to the terms of the short-form contract. Total costs reported on the MF-104 and 104A forms are in agreement. Cost of the project for August was computed at the contract unit price of $23.38 a foot for the 135 feet of advance.

No ore has been exposed by DMEA contract work on the Lynn No. 1 claim. The operator reported that 128 tons of ore averaging 0.12 percent U_3O_8 was shipped in April and May 1953 from ore bodies exposed by DMEA work on the Lynn No. 3 claim.

The operator's narrative report and sketch adequately describe the work accomplished during August. It will be noted that in the narrative the operator "declines" to drive the final 50 feet of adit authorized by the contract. This 50-foot adit was to be driven approximately parallel to the 150-foot adit completed in August and, as indicated in Exhibit "A" of the contract, was to be located 100 feet northeast of the latter. The inspecting engineer agrees with the operator in concluding that driving the 50-foot adit would not be warranted in the light of geologic information gained from the above-described work already completed on the Lynn No. 1 claim. The 50-foot crosscut driven in a northwesterly direction in the conglomerate, from the face of the 150-foot adit, intersected the underlying sandstone at a distance of 45 feet from the adit. The conglomerate-sandstone contact zone, the ore horizon, is only weakly mineralized at the point of intersection.

The operator has requested additional Government aid in further exploratory work on the Lynn No. 3 claim.

It is recommended that reimbursement to the operator amounting to $2,840.67, or 90 percent of the $3,156.30 expended on the project during August, be delayed pending action on the request for additional funds or, in case the request is denied, until the operator submits a final report.

Signature John F. Shaw for W. H. Kerr Title Executive Officer Date OCT 14 1953

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Dear Sirs:

The work completed on Lynn claim #1 as follows: The drift running north 50 feet extended to a depth of 35 feet. Drifting to the right 25 feet and to the left 50 feet. This completes the proposed workings on this claim. We are declaring on the entry 50 feet on this claim as it does not warrant it. This will bring to a close this contract. Footage for Aug. 135 feet.

Memorandum

To: W. K. King, Executive Officer, DMEA Field Team, Region IV

From: Chief, Minerals Development Branch, Mining Division, Region IV

Subject: Docket No. DMEA 2378 (Uranium), Contract Ldm-K399, Saline Mining and Smelting Co., Kane County, Utah. MF-104 forms for July 1953

Attached are the necessary copies of MF-104 forms which describe the work and list expenditures under the subject contract during July 1953. The property was inspected by M. [illegible] Gilbey August 6, 1953.

Work during the reporting period consisted of 50 feet of advance in workings on the Lynn No. 1 claim. No ore was encountered as a result of this advance. The work is in conformance with the short-form contract, and recommendation is made that the operator be repaid in the manner shown in the inspecting engineer's report. The operator's MF-104 forms were received in this office August 14, 1953.

A delay of one day in transmitting the forms to Denver resulted from absence of S. R. Wilson from the Salt Lake office. A delay of two days was caused by the work load of the inspecting engineer.

Docket No. DMEA 2378 (Uranium), Contract Idm-E399, Salina Mining and Smelting Co., Kane County, Utah. Progress report for July 1953

The DMEA contract work on the property of the Salina Mining and Smelting Co. near Orderville, Utah, was inspected on August 6, 1953.

The operator reported 50 feet of advance for the month of July. This was verified on the date of inspection when "G" adit, on the Lynn No. 1 claim, measured 99 feet. The work conforms to the terms of the short-form contract and is adequately described in the operator's narrative report. Forms MF-104 and 104A are in agreement as to the cost of the project for July and total cost to date.

No ore has been exposed by DMEA contract work on the Lynn No. 1 claim. The operator reports that to date a total of 126 tons of ore averaging approximately 0.12 percent U_3O_8 has been shipped from ore bodies exposed by DMEA work on the Lynn No. 3 claim.

It is recommended that the company be reimbursed by $1,052.10, or 90 percent of $1,169.00, the cost of 50 feet of adit at the short-form contract price of $23.38 a foot.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

July 17, 1953

Memorandum

To: W. H. King, Chief, Mining Division, Region IV

From: Chief, Minerals Development Branch, Mining Division, Region IV

Subject: DMEA-2378, Contract Idm-2399, Salina Mining and Smelting Co., Emma County, Utah. MF-104 forms for June 1953

Enclosed are the required copies of MF-104 forms listing expenditures under the subject contract during June 1953. The work was inspected by F. L. [illegible] July 13, 1953.

Contract work [illegible] Lynn No. 3 claim has been completed and the operator is [illegible] to resume work on the Lynn No. 1 claim. Ores subject to DMEA royalty are being mined from the Lynn No. 3 claim and shipped to the AEC depot at Marysvale, Utah.

Work reported for June conforms with terms of the short-form contract. It is recommended that the operator be reimbursed in the manner described in the inspecting engineer's report.

MF-104 forms were received from the operator July 15, 1953.

July 16, 1953

F. L. Wideman

DMEA-2378, Contract Idm-E399, Salina Mining and Smelting Co., Kane County, Utah. Progress report for June 1953

The exploratory work on the Lynn No. 3 claim was inspected and measured July 13, 1953. Mr. Ellett, mine manager, accompanied the engineer during the inspection.

The contract work specified to be done on the Lynn No. 3 claim was completed by July 1, 1953. This work consisted of driving an inclined adit 200 feet in length; two drifts southwesterly from the adit along the strike of the bedding, each 100 feet in length; and one drift 50 feet in length northeasterly from the adit.

The mine cars, rail, and compressor will be moved to the inclined adit on the Lynn No. 1 claim. The exploratory work on this claim was recessed in October 1952. It will be resumed in the near future.

The operator's narrative report states that the total completion of work is 450 feet. This refers to the work on the Lynn No. 3 claim and does not include work done on the Lynn No. 1 claim.

The mining the operator refers to in the narrative report has been done on either side of the drift at the portal plus 100 feet. No settlement sheets on ore shipped have been submitted to this office. The operator states that the ore averaged 0.12 percent U_3O_8. The mining has been done at company expense.

The drift driven southwesterly from the adit at plus 200 feet exposed a lens of ore at least 10 feet in strike length. The face is in ore at the present time and will not be advanced under the contract because the contract footage has been fulfilled. It is estimated that the conglomerate, which is exposed for 2 feet in the back of the drift, contains 0.15 percent U_3O_8. The total thickness of mineralized conglomerate at this location is not known. The sandstone and shale beneath the conglomerate is estimated to contain 0.10 percent U_3O_8. The occurrence was sampled at the time of inspection, but the results of analyses are not available at this time.

The exploratory work done during June 1953 conforms to the terms of the contract. The amount of work performed as reported on the MF-104 forms has been verified by measurement.

It is recommended that the operator be reimbursed by $2,251.49, or 90 percent of the cost of driving 107 feet of drift at $23.38 a foot.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Dear Sirs:

To date we have completed all contract work on Lynn No. 3 claim, as perscribed in contract. We have encountered several good showings of Uranium ore in both the north and the south drifts. Footage made in drifting for the month is ~~112~~ 107 feet. (June) Total completion of work 450 feet. We are encountering a considerable quanity of water at the 200 ft. level. We have shipped to date in excess of 125 tons of ore from this claim since the contract began.

We will begin operations on Lynn No. 1 claim the 11 of July.

Yours truly,

Byron Davies, Geoglist

Memorandum

To: W. H. King, Chief, Mining Division, Region IV

From: Chief, Minerals Development Branch, Mining Division, Region IV

Subject: DMEA-2378, Contract Idm-E399, Salina Mining and Smelting Co., Kane County, Utah. MF-104 forms for May 1953.

Transmitted herewith are MF-104 forms listing expenditures made under terms of the subject contract during May 1953. An inspection of the mine workings was made by F. L. Widsman June 1, 1953, and a progress report prepared.

During May 1953, an advance of 43 feet was made in drifting to the north and south from the inclined adit on the Lynn #3 claim. The north drift disclosed a lens of ore which appears to be higher in grade than any ore previously encountered. Small shipments are trucked to the AEC purchasing depot at Marysvale, Utah.

Work during the period is in conformance with contract terms, and recommendation is made that the operator be reimbursed in the manner described in the progress report.

The MF-104 forms were received in this office June 9, 1953.

June 9, 1953

F. L. Widemann

DMEA-2378, Contract Ida-2399, Salina Mining and Smelting Co., Kane County, Utah. Progress report for May 1953

An inspection was made of the mine workings on the property of the Salina Mining and Smelting Co. near Cedarville, Utah, June 1, 1953.

Work during May consisted of drifting northerly and southerly from the inclined adit at the portal plus 200 feet. The footage of 43 feet of advance for May was verified by measurement, as was the advance to date of 383 feet.

The drift to the north of the incline exposed a lens of ore that may be the best ore encountered to date.

The company continued to mine and ship ore from the stope in the drift at the portal plus 94 feet.

The work done in the drifts from the incline, as reported on the MF-104 forms, conforms with the contract. The amounts reported on the MF-104 and MF-104A forms correspond. The operator's narrative reports and maps are considered adequate.

It is recommended that the operator be reimbursed by $904.81, or 90 percent of the cost of driving 43 feet of drift at $23.38 a foot, which is the price specified in the subject short-form contract.

Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

D.M.M.A. 2378
Lynn 3

Dear Sirs:

This is to report our progress on Lynn 3 for the month of May.

At the 200 feet mark of the adit we have completed drifting of 19 feet North and 24 feet South. We have shipped some ore from the 200 feet mark and as yet we have not received the results from Marysvale.

We are encountering water at the 200 feet mark, and the ore seems to be getting better.

We have shipped some 22 tons or ore from the drift at the 100 feet marker and the results of that ore ran 0.14% U_3O_8.

Very truly yours,

Richard J. McBeth
Secretary

F. L. Widemen

DMEA-2376, Contract Ide-8399 (Uranium), Salina Mining and Smelting Co., Kane County, Utah

Reference is made to the letter from the Executive Officer, DMEA Field Team, Region IV, requesting a more detailed discussion of the ore body as described in the engineer's narrative report accompanying the MF-104 forms for May 1953.

The following description of the uranium-bearing material should be substituted for the statement "The drift to the north of the incline exposed a lens of ore that may be the best ore encountered to date":

The drift that is being driven north from the incline encountered uranium mineralization at 10 feet from the incline. The face of the drift was in the same material at the time the inspection was made. Thus a strike length of 10 feet was exposed, but the total strike length has not been determined. The operator has made a shipment of a few tons of the ore to the AEC stockpile at Maryevale, Utah. No results of analyses of the uranium content are available, but the radiometric count indicates that the uranium content of this lens is more than that of any mineralization encountered to date. The mineralization occurs erratically distributed in sandstone and conglomerate, and sometimes is associated with trash carbon and with blebs of shale, many of which, however, are not mineralized. The formations dip gently to the east. No attempt has been made to estimate the tonnage in the lens, because its strike length and grade are unknown.

From: Chief, Minerals Development Branch, Mining Division, Region IV

Subject: DMEA-2378, Contract Idm-E399, Salina Mining and Smelting Co., Kane County, Utah. MF-104 forms for April 1953.

The enclosed MF-104 forms list expenditures made in performance of contract work on the subject property during April 1953. An inspection of the work was made by F. L. Wideman May 13, 1953, and progress described in the attached narrative.

Work during the month consisted of driving a total of 92 feet on the Lynn No. 3 claim. This work is in conformance with the contract and recommendation is made that the operator be reimbursed for expenditures in the manner shown in the inspecting engineer's report.

MF-104 forms were received from the operator May 13, 1953.

May 20, 1953

F. L. Wideman

DMEA-2378, Contract Idm-E399, Salina Mining and Smelting Co., Kane County, Utah. Progress report for April 1953

An inspection was made of the mine workings on the property of the Salina Mining and Smelting Co. near Orderville, Utah, May 13, 1953.

No work has been done in the incline on the Lynn No. 1 claim since October 1952, and the face remains 40 feet from the portal. The inclined adit on the Lynn No. 3 claim has been advanced 200 feet from the portal and the drift at the portal plus 94 feet has been advanced 100 feet. The work of advancing these two headings is completed as far as the contract is concerned.

During the latter part of April, water was encountered in the inclined adit. Work on the drifts to be driven from the bottom of the incline was recessed until a pump can be installed. The pump arrived May 13 and the company plans to resume contract work immediately.

A stope was started on the 100-foot level while the exploration was recessed. The company mined approximately 30 tons of ore that is estimated to contain 0.15 percent U_3O_8. Mr. Ellett, manager, stated that a shipment of 12 tons of ore that contained 0.12 percent U_3O_8 and 0.23 percent V_2O_5 was made to the stockpile at Marysvale, Utah.

The Concho Petroleum Co., Dallas, Texas, has stopped drilling on the property. Seven holes, varying from 150 feet to 400 feet in depth, were drilled. It is reported that the Atomic Energy Commission will probe the holes in the near future, as much of the total distance drilled was not cored.

Form MF-104A

The measurements taken May 13, 1953, verified the advance of 92 feet for April and the total to date of 340 feet.

Form MF-104

The estimated cost of crosscutting and drifting, as stated in the short-form contract, is $23.38 a foot. The cost of 92 feet at $23.38 is $2,150.96, as reported on the MF-104 form.

May 19, 1953

The exploratory work done during April conforms with the contract and none of the reported footage was a result of mining.

It is recommended that the operator be reimbursed by $1,935.86, which is 90 percent of the cost of driving 92 feet of drift and crosscut at $23.38 a foot.

(For Government use only)

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

I.D.M.E. No. 399

Dear Sirs:

To report the progress made from April 1, 1953 to May 1, 1953, We have completed the following work on Lynn No 3 Sec. 21 as follows:

Completion of addit to a depth of 200 feet, also completion of drift at the 100 foot marker running a hundred feet southerly. Total of work completed on Lynn #3 being 300 feet, to date.

We have encountered a considerable amount of waterin the 200 foot adit. We are now installing a sump pumpto take care of this excess water, before beginning drifting on the hundred and the 50 ft drifts at the 200 ft. level.

We have encountered approx. 8 foot of shipping ore 30 feet in on the hundred foot drift. We are now sending tonage to Marysvale, to determine the correct-~~annalisis~~ analysis.

Yours truly,

A. H. ELLIOTT

From: Chief, Minerals Development Branch, Mining Division, Region IV

Subject: DMEA 2378, Contract Idm-E399, Salina Mining and Smelting Co., Kane County, Utah. MF-104 forms covering work during February and March 1953.

Attached are copies of MF-104 forms pertaining to expenditures under the subject contract for February and March 1953. The operator resumed work during the latter part of February after a winter recess. Expenditures for the two months are listed on the MF-104 forms.

F. L. Wideman inspected the contract work April 16, 1953. Copies of a progress report are attached. Work during the period consisted of drifting and crosscutting on the Lynn No. 3 claim. Work reported on the MF-104 forms is in conformance with terms of the short-form contract. Recommendation is made that the contractor be reimbursed by 90 percent of the total expenditures as listed in the progress report.

MF-104 forms were received from the operator April 13, 1953.

F. L. Wideman

DMEA 2378, Contract Idm-E399, Salina Mining and Smelting Co., Kane County, Utah. Progress report for February and March 1953.

An inspection was made of the mine workings of the Salina Mining and Smelting Co. near Orderville, Utah, April 16, 1953. No work has been done in the inclined adit on the Lynn No. 1 claim since last October, and the face remains 40 feet from the portal. The inclined adit on the Lynn #3 claim has been advanced 180 feet from the portal. A drift has been driven 73 feet in a southwesterly direction along the contact between the conglomerate and sandstone.

Form MF-104A

The measurements taken April 16 verified the advance of 146 feet reported for March and the total to date advance of 248 feet.

Form MF-104

Item 1 The estimated cost of crosscutting and drifting, as stated in the short-form contract, is $23.38 per foot. The cost of 146 feet at $23.38 is $3,413.48, as reported on the MF-104 forms.

The work conforms with the terms of the contract. The operator's description of the contract work is considered adequate. The statements concerning the grade and amount of ore cannot be verified until samples have been analyzed.

It is recommended that the operator be reimbursed by $3,072.13, or 90 percent of the cost of driving 146 feet of drift and crosscut at $23.38 per foot.

Concho Petroleum Co., 1305 Gulf States Bldg., Dallas, Texas, began core drilling on the property early in April. Reasor Drilling Co. of Dallas, Texas, has the contract for the drilling. One hole had been completed through the sandstone below the conglomerate and the second hole was 200 feet deep on the day of the inspection.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Re: Docket DMEA No. 2378 Contract No. IDm-2399

Gentlemen:

The Salina Mining & Smelting Company commenced operations pertaining to the Docket No. on February 15, 1953.

The following work has been completed up to March 31, 1953 as follows:

Lynn # 3 Claim adit has been driven to a depth of 150 feet. There has been a crosscut driven at approximately 94 feet depth of 58 feet. At the 72 foot depth mark we have uncovered a roll of ore about 10 feet in length and 3 feet in width. Ore is running up as high as 0.70% U3O8. We made our first shipment since resuming work to Marysvale, Utah on the 26th of February. The ore is becoming more prevalent through the crosscut and also as we drift deeper. Enclosed is a map showing the extent of the workings so far.

Very truly yours
Salina Mining & Smelting Co.

From: Chief, Minerals Development Branch, Mining Division, Region IV

Subject: DMEA-2378, Contract Idm-E399, Salina Mining and Smelting Co., Kane County, Utah

Attached are 7 copies of a memorandum covering examination of the subject property by F. L. Wideman.

The November 1952 MF-104 forms were transmitted to your office January 13, 1953, but because of adverse weather, we were unable to verify the progress reported on the MF-104 forms, and the work was recessed. The project work was resumed February 23, 1953. F. L. Wideman inspected the property February 26, 1953. The advance of 27 feet, as reported on the MF-104 forms for November 1952, was verified. It is therefore recommended that the operator be reimbursed for the Government's share of the November 1952 expenditures. Payment on the forms has been withheld pending verification, as noted in your memorandum of January 19, 1953.

March 2, 1953

F. L. Wideman

DMEA 2378, Contract Idm-E399, Salina Mining and Smelting Co., Kane County, Utah. MF-104 forms for November 1952

The mine workings of the Salina Mining and Smelting Co., Kane County, Utah, were inspected February 26, 1953. Mr. Ellett, manager, accompanied the engineer during the inspection.

The Lynn No. 3 inclined adit measured 77 feet from the portal to face. Therefore, the advance of 27 feet during November for a total advance of 62 feet was verified. The company will not submit MF-104 forms for February 1953 because of the small amount of work done since operations were resumed late in February.

A roll in the formation was encountered at 67 feet from the portal. Radioactivity of the rock is higher here than elsewhere in the adit.

The company shipped a truckload of ore to the stockpile on February 26, 1953. They plan to continue shipping at the rate of 10 to 15 tons a day as long as ore is present in the adit.

It is reported that an oil company has leased the property controlled by the Salina Mining and Smelting Co. They plan to begin core drilling the property in April to study the possibility of leaching the uranium in place.

January 13, 1953

Memorandum

To: W. H. King, Chief, Mining Division, Region IV

From: Chief, Minerals Development Branch, Mining Division, Region IV

Subject: DMEA-2378, Contract Idm-8399, Salina Mining and Smelting Co., Kane County, Utah. MF-104 forms for November 1952

The required copies of MF-104 forms covering work under the subject contract for November 1952 are enclosed. F. L. Widsman attempted to inspect the property December 8, 1952, but because of heavy snow, he was unable to reach the area. The operator notified this office that the contract work would be recessed from November 28 to December 5. However, operations were not resumed because of snow, after November 28, 1952, and a request was later made for recessing the contract until spring.

A previous inspection of the property on November 6, 1952, disclosed that an advance of 6 feet had been made in the adit on Lynn No. 3 claim during the period November 1 to 6. It is conceivable that a total advance of 27 feet, as reported, could have been made between November 1 to 28.

The MF-104 forms have been approved by signature and initials in this office. However, it appears advisable to withhold payment until verification of the reported advance can be made when the area is accessible.

The MF-104 forms have been dated December 2, 1952, by the operator, but were not received in this office until January 12, 1953.

S. R. Wilson

January 13, 1953

F. L. Wideman

DMEA-2378, Contract Idm-E399, Salina Mining and Smelting Co., Kane County, Utah. Progress report for November 1952

In November 1952, the operator advised this office that contract work would be recessed from Thanksgiving to December 5. On December 8, an attempt was made to inspect the mine workings, but a snowfall prevented me from driving to the camp. However, I traveled the isolated road toward the mine for approximately 9 miles, where it could be determined that no one was at the mine.

Measurements taken November 6 show that the adit on the Lynn No. 3 claim advanced 6 feet from November 1 to November 6. On this basis, it would be possible for an advance of 27 feet to have been made by Thanksgiving.

The MF-104 forms have been approved. It is suggested that payment be withheld until the advance can be verified when operations are resumed in the spring.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(*a*) *Form MF–104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(*b*) *Form MF–104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(*c*) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF–104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF–104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF–200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF–200; and delete word "Independent" if the contract reported is on Form MF–200 (A). Also, report work paid for on a unit basis under contract Form MF–200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF–104 when submitted for reimbursable expenses incurred under contract Form MF–200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF–200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF–104 is required to be documented. The four copies of Form MF–104 are not to be thus supported.

Form MF–104 submitted for reimbursement under fixed price contracts on Form MF–200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF–104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Gentlemen:

This is to advise you that the progress made during the month of November, 1952 is as follows:

We have extended Lynn 3 adit to the depth of 62 feet. Twenty-seven feet of this was made this month.

We have approximately 5 feet of shipping ore at this time. We are encountering a considerable amount of water at this depth. This adit is 5 x 6 feet.

We are advising you that due to weather conditions at this time, we will be unable to continue operations until about March 15, 1953.

Respectfully yours,

SALINA MINING & SMELTING CORP.

Memorandum

To: T. A. Christensen

From: Executive Officer, Field Team, Region IV

Subject: DMEA Docket 2378, Contract Idm-K399, (Uranium) Salina Mining and Smelting Co., Kane County, Utah - Operator's Monthly Progress Report for the period of October, 1952.

Enclosed are the original and four copies of Form MF-104, Narrative Report, and Engineer's Report for the above period.

Work has been completed as authorized by the contract. No documentation is required for work performed under contracts prepared on Form MF-800A, therefore we recommend that payment be made for 90 percent of the amount reported by the Operator on Form MF-104, contingent on your verification of arithmetical accuracy within the report.

To: W. H. King, Acting Chief, Mining Division, Region IV

From: Chief, Utah-Wyoming Branch, Mining Division

Subject: DMEA-2378, Idm-2399, Salina Mining and Smelting Co., Kane County, Utah. MF-104 forms for October 1952

Required copies of MF-104 forms pertaining to October 1952 expenditures under the subject contract are enclosed. Copies of a progress report prepared by F. L. Wideman are included. The property was inspected by Wideman November 6, 1952.

The short-form contract permits a cost of $23.38 per foot of crosscutting. Advance during the month was 75 feet for a total expenditure of $1,753.50. It is recommended that the operator be repaid $1,578.15, which is 90 percent of the total expenditure.

The October MF-104 forms were originally received November 12, 1952, but returned to the operator for correction. The corrected forms were received November 25, 1952.

DMA-2378, Contract Idm-E399, Salina Mining and Smelting Corp., Kane County, Utah. Progress report for October 1952

The mine workings of the Salina Mining and Smelting Corp., Orderville, Utah, were inspected November 6, 1952. At that date, the inclined adit on the Lynn #1 claim measured 40 feet from portal to face and the inclined adit on the Lynn #3 claim measured 41 feet from portal to face. Exploration on the Lynn #1 claim has been recessed for the winter because of difficulty of access. Low-grade uranium mineralization is exposed the entire length of the Lynn #3 adit. Two or three tons of ore have been sorted and stockpiled for shipment.

Form MF-104A

The total footage of crosscutting of 75 feet reported for October is correct. The work conforms to the contract.

Form MF-104

Item 1 The estimated cost of crosscutting, as stated in the short-form contract, is $23.38. The cost of 75 feet of crosscutting at $23.38 is $1,753.50, as shown on the MF-104 forms. The total cost to date corresponds with the cost for October, that month being the first month during which contract work was done.

It is recommended that the operator be reimbursed by $1,578.15, which is 90 percent of the cost reported for October.

Contract Idm E999.

Gentlemen:

The following work for the Alina Mining and Smelting Corporation completed to December 1, 1952 is as follows:

Lynn Claim #1, setting of posts, drilling 40'. This adit is approximately 6x7', 20' in length. We are still encountering same formations as shown on surface; however, due to a verse weather conditions for this winter, we will discontinue operation on this claim.

Lynn #3, adit has been driven to a depth of 36'. Tunnel is approximately 6'x7'. We are encountering quite a large quantity of low grade antimony and Cinnabar throughout this entire workings. We will extend this report as possible until the snow stops our operations.

Very truly yours,

A. H. Elliott

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.
