Re: Docket No. DMEA-3165 (Uranium)
Alunite King Claims
Piute County, Utah

Dear Mr. Brown:

This refers to our previous correspondence, including your letter of February 12, 1954.

In your letter of February 12 you again request that the subject docket be kept active. I feel sure you must appreciate the fact that from an administrative standpoint the numerous uncertainties attending your proposed project makes such a request very difficult, if not impossible, to comply with.

In Mr. Ellis' letter of September 21, 1953, our inability to process your application was fully explained. In that letter it was also brought out that alunite was not on our list of eligible minerals for which we could approve Government exploration aid. At the same time it was explained just what information we would require should you desire to explore for uranium. Since that time we have granted you two extensions of time in which to supply us with the necessary information. The final extension terminated on March 7, 1954. Therefore, while I am very sympathetic with respect to your difficulties, especially in regard to your partner, nevertheless I regret that the docket must now be considered closed.

Should you at some future date desire to file an application for a uranium exploration project and will supply evidence of uranium mineralization on your property together with all the other information previously requested, we will be only too glad to consider a new application. However, such application would be considered on a 75/25 percent basis in accordance with our new regulations.

I trust you will see our position in being unable to process the present application.

Sincerely yours,

C. D. Mitterdorf

Administrator

Dear Mr Ellis;

Since our letters of Sept 21-53 and Nov 6-53 I have been unable to see Mr Perry personaly He was quite sick since his operation & he went to the desert to recuperate I expect to get in contact with him soon & I hope that our application can be kept active. I am leaving in a few days for Moab, Utah & I hope to get in contact with Mr Perry when I return. He has never given me his address in any correspondence I have had from him so I was unable to write him only to the P.O. Box 87 in Reseda as he moved from the place where he was living in Reseda Calif.

Sincerely Yours
O. A. Brown

P.S. Of course his physical condition is only known by me from the information given me by Ellis from him He is acting very strangely. O.A.B.

NOV 17 1953

Mr. [illegible] Brown
2619 Wilshire Boulevard
Los Angeles 5, California

Re: Docket No. [illegible] (Uranium)
Alunite Mine Claims
Piute County, Utah

Dear Mr. Brown:

Reference is acknowledged of your letter of November 12, 1953, regarding the subject docket.

We understand that you are still interested in securing Government aid in exploring for uranium but, due to an accident to Mr. Berry, you have been unable to proceed with the project.

As noted in our letter of October 21, this Agency does not have the authority to furnish financial aid to explore for alunite or to process it. If you can furnish positive evidence of uranium mineralization on your property through old workings, preliminary surface work, or drilling, it would increase your chances of securing financial aid for further exploration. You do not have to actually produce uranium in order to secure such aid, however, but should clearly understand that approval of your application would have to be justified by favorable geologic information. The project, if approved, would cover exploration work only, not mining.

Since your original application covered only the Alunite Mine Claims, the above docket number will be confined to this property. If you wish to explore for uranium on your autunite claims a separate application would be necessary.

Sincerely yours,

SIGNED

Dear Mr Ellis;

I am sorry that we have not been able to proceed with the application before this but I have not been able to do anything with the claims because Mr Perry had a very serious accident at the time we were about ready to go to Marysville Utah and do diamond drilling on the claims. He was in the Hospital & had an operation & is now recuperating. I want to go to the claims as soon as I can get him to go with me & decide how we are to proceed. Do we have to produce uranium before we can get a loan to mine it? or to process the Alunite? Mr Perry was going on what Prof. Kerr the Geologist of Columbia University, who has uranium claims at Marysvale. He said there was a great possibility that uranium existed in good quantity under all the large Autunite bodies near Marysvale, Utah. We want to diamond drill our 40 claims of Autunite we have located on Monroe Mountain also, but will need help, this near Marysvale also.

Sincerely Yours
O. A. Brown

Docket No. DMEA-3165
Metal or Mineral
Date Received 9-14-53
Estimated Cost
Participation (Government %)

INSTRUCTIONS

1. *Name of applicant.*—(*a*) State here your full legal name, in the form in which you will wish to contract, and your mailing address:

(*b*) If other than an individual, add to your name above whether a corporation, partnership, etc., and the name of the State in which incorporated or otherwise organized.

(*c*) If a corporation, add to above statement, titles, names and addresses of officers.

(*d*) If a partnership, add to the above statement the names and addresses of all partners.

2. *General.*—Read DMEA Order 1, "Government Aid in Defense Exploration Projects," before completing this application. Submit this application and all accompanying papers in quadruplicate (four copies), with your name and address on each sheet of the application and on all accompanying papers. Where sufficient space is not provided on the form for all required information, state it on an accompanying paper, with a reference in each case to the instruction to which it refers by number. Comply with all applicable instructions; or, if not applicable, so state. File the application with Defense Minerals Exploration Administration, Department of the Interior, Washington 25, D. C., or with the nearest field executive officer thereof.

3. *Applicant's property rights.*—(*a*) State the legal description of the land upon which you wish to explore, including all land which you possess or control that may be benefited by the exploration, and excluding any land or interest in land which is not to be included in the exploration project contract

Name of the claims Alunite King Claims

(*b*) State any mine name by which the property is known.

(*c*) State your interest in the land, whether owner, lessee, purchaser under contract, or otherwise

(*d*) If you are not the owner, submit with this application a copy of the lease, contract, or other document under which you control the property.

(*e*) If you own the land, describe any liens or encumbrances on it

(*f*) If the land consists of unpatented claims, add to the description above, the book and page numbers for each recorded location notice.

4. *Physical description.*—(*a*) Describe in detail any mining or exploration operations which have been or now are being conducted upon the land, including existing mine workings and production facilities. State your interest, if any, in such operations. Also describe accessibility of mine workings for examination purposes.

(*b*) State past and current production, and ore reserves, if any, giving quantities and grades.

(*c*) Describe the geologic features of the property, including mineralization, type of deposit (vein, bedded, etc.), and your reasons for wishing to explore. Illustrate with maps or sketches. Send with your application (but not necessarily as a part of it) any geologic or engineering report, assay maps, or other technologic information you may have, indicating on each whether you require its return to you.

(*d*) State the facts with respect to the accessibility of the project: Access roads, distances to shipping, supply and residence points.

(*e*) State the availability of manpower, materials, supplies, equipment, water, and power.

16—66551-1

5. *The exploration project.*—(*a*) State the mineral or minerals for which you wish to explore .....

.....

(*b*) Describe fully the proposed work, including a map or sketch of the property showing a plan (and cross sections if needed) of any present mine workings, and the location of the proposed exploration work as related to such features as contacts, veins, ore-bearing beds, etc.

(*c*) The work will start within ..... days and be completed within ..... months from the date of an exploration project contract.

(*d*) State the operating experience and background of the applicant with relation to the ability to carry out such exploration project, and also that of the person or persons who will supervise the operations.

6. *Estimate of costs.*—Furnish a detailed estimate of the costs of the proposed work (you will have to use a separate sheet), under the following headings. Add the totals under all headings to give the estimated total cost of the project:

(*a*) *Independent contracts.*—(Note.—If the applicant does not intend to let any of the work to contractors, write "none" after this item. To the extent that the work is to be contracted, do not repeat the cost of the contract-work in subsequent items.) State the cost of any proposed independent contracts for the performance of all or any part of the work, expressed in terms of units of work (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved, etc.).

(*b*) *Labor, supervision, consultants.*—Include an itemized schedule of numbers, classes and rates of wages, salaries or fees for necessary labor, supervision and engineering and geological consultants.

(*c*) *Operating materials and supplies.*—Furnish an itemized list, including items of equipment costing less than $50 each, and power, water and fuel.

(*d*) *Operating equipment.*—Furnish an itemized list of any operating equipment to be rented, purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or suggested use-allowance based on present value, as the case may be.

(*e*) *Rehabilitation and repairs.*—Furnish a detailed list showing the cost of any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and which will be devoted to the exploration project.

(*f*) *New buildings, improvements, installations.*—Furnish a detailed list showing the cost of any necessary buildings, fixed improvements, or installations to be purchased, installed or constructed for the benefit of the exploration project.

(*g*) *Miscellaneous.*—Furnish a detailed list showing the cost of repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance, and payroll taxes.

(*h*) *Contingencies.*—Give an estimate of any necessary allowances for contingencies not included in the costs stated above.

NOTE.—No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes), or any other indirect costs, or work performed or costs incurred before the date of the contract, should be included in the estimate of costs.

7. (*a*) Are you prepared to furnish your share of the cost of the proposed project in accordance with the regulations on Government participation (Sec. 7, DMEA No. 1)?

(*b*) How do you propose to furnish your share of the costs?

☐ Money ☐ Use of equipment owned by you ☐ Other

Explain in detail on acompanying paper.

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief.

Re: Docket No. DMEA-3165 (Alunite and uranium)
Alunite King Claims, Piute County, Utah

Gentlemen:

Reference is made to your application dated September 11, 1953, and your covering letter of the same date addressed to Mr. C. O. Mittendorf, Administrator of this Agency.

It is noted that you have a large alunite deposit in the Marysvale area of Utah which you believe contains uranium-bearing ores and you are seeking Government aid in a proposed exploration project. Also in your letter it is noted that you desire to have a geologist from this Agency in Richfield, Utah, about October 1st in order that you might accompany him to the alunite deposit. At that time you expect to have a representative of the Atomic Energy Commission meet you at Richfield for the purpose of showing him your autunite claims some 10 miles from the alunite deposit.

Transmitted herewith is a copy of DMEA Order 1, with attached Amendments Nos. 1 and 2, and an information pamphlet, which set forth procedures and regulations for obtaining Government aid in financing the cost of exploration for certain strategic metals or minerals. You will note that the list of metals and minerals covered by this order, as amended on May 15, 1953, does not include alunite. Consequently, this Agency does not have the authority to furnish financial aid to explore for alunite.

If you desire to explore only for possible uranium-bearing ores on either the alunite property or the autunite claims, we will require a claim map or a sketch drawn to scale which shows the location of uranium mineralization. If there is no exposure on

R.C.G.
9-21-53

your property of uranium mineralization but the property has been partly drilled, it is possible that such holes were tested by radioactive equipment or the cores or drillings were analyzed for uranium. If positive results were obtained and you submitted the proper evidence, such proof would be acceptable and would assist us in determining whether or not your property could qualify as a possible uranium exploration project.

It is my understanding that the Bureau of Mines has drilled some of the alunite deposits in the Marysvale area and that information with respect to this drilling is available at the Bureau of Mines Station, 1600 East First South Street, Salt Lake City, Utah. Perhaps some drilling was done on your property.

We cannot authorize an examination of your property until Form MF-103 is satisfactorily filled out. If there is any physical indication of uranium on your property, we would require a definite proposal showing just where and how the work you propose is to be done and the estimated cost per foot, giving a complete breakdown of said costs. As you will note in the accompanying pamphlet, the work will be done either by you or may be subcontracted and, in the case of uranium, the Government would participate to the extent of 90 percent of the cost.

Until we receive a reply to this letter we will be unable to process your application, as we cannot determine from your letter and the MF-103 form whether your property could qualify as a uranium project and, if so, the work you propose to do.

Should you care to obtain aid in filling out your application, you may obtain assistance through the Bureau of Mines Station at the address shown above.

Sincerely yours,

4. *Physical description.*—(*a*) Describe in detail any mining or exploration operations which have been or now are being conducted upon the land, including existing mine workings and production facilities. State your interest, if any, in such operations. Also describe accessibility of mine workings for examination purposes.

(*b*) State past and current production, and ore reserves, if any, giving quantities and grades.

(*c*) Describe the geologic features of the property, including mineralization, type of deposit (vein, bedded, etc.), and your reasons for wishing to explore. Illustrate with maps or sketches. Send with your application (but not necessarily as a part of it) any geologic or engineering report, assay maps, or other technologic information you may have, indicating on each whether you require its return to you. Bedded Alunite

(*d*) State the facts with respect to the accessibility of the project: Access roads, distances to shipping, supply and residence points. 6 miles by road from Railroad of Marysvale Utah

(*e*) State the availability of manpower, materials, supplies, equipment, water, and power.

16—66551-1

Miners in Richfield and Marysvale , Water Durkee spring ½ mile
Coal Mines about or less than thirty miles from deposit

5. *The exploration project.*—(*a*) State the mineral or minerals for which you wish to explore .....
Alunite and Uranium

(*b*) Describe fully the proposed work, including a map or sketch of the property showing a plan (and cross sections if needed) of any present mine workings, and the location of the proposed exploration work as related to such features as contacts, veins, ore-bearing beds, etc.

(*c*) The work will start within 120 days and be completed within 6 months from the date of an exploration project contract.

(*d*) State the operating experience and background of the applicant with relation to the ability to carry out such exploration project, and also that of the person or persons who will supervise the operations.

6. *Estimate of costs.*—Furnish a detailed estimate of the costs of the proposed work (you will have to use a separate sheet), under the following headings. Add the totals under all headings to give the estimated total cost of the project:

(*a*) *Independent contracts.*—(Note.—If the applicant does not intend to let any of the work to contractors, write "none" after this item. To the extent that the work is to be contracted, do not repeat the cost of the contract-work in subsequent items.) State the cost of any proposed independent contracts for the performance of all or any part of the work, expressed in terms of units of work (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved, etc.).

(*b*) *Labor, supervision, consultants.*—Include an itemized schedule of numbers, classes and rates of wages, salaries or fees for necessary labor, supervision and engineering and geological consultants.

(*c*) *Operating materials and supplies.*—Furnish an itemized list, including items of equipment costing less than $50 each, and power, water and fuel.

(*d*) *Operating equipment.*—Furnish an itemized list of any operating equipment to be rented, purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or suggested use-allowance based on present value, as the case may be.

(*e*) *Rehabilitation and repairs.*—Furnish a detailed list showing the cost of any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and which will be devoted to the exploration project.

(*f*) *New buildings, improvements, installations.*—Furnish a detailed list showing the cost of any necessary buildings, fixed improvements, or installations to be purchased, installed or constructed for the benefit of the exploration project.

(*g*) *Miscellaneous.*—Furnish a detailed list showing the cost of repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance, and payroll taxes.

(*h*) *Contingencies.*—Give an estimate of any necessary allowances for contingencies not included in the costs stated above.

NOTE.—No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes), or any other indirect costs, or work performed or costs incurred before the date of the contract, should be included in the estimate of costs.

7. (*a*) Are you prepared to furnish your share of the cost of the proposed project in accordance with the regulations on Government participation (Sec. 7, DMEA No. 1)?

(*b*) How do you propose to furnish your share of the costs?

☐ Money ☐ Use of equipment owned by you ☐ Other

Explain in detail on acompanying paper.

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief.

Subject: DMEA-3165
Re: Exploration Assistance

Dear Mr. Perry:

The receipt of your application dated September 11, 1953, for exploration assistance under the Defense Production Act of 1950, as amended, is hereby acknowledged.

Your application has been assigned Docket Number DMEA-3165 and referred to the Rare and Miscellaneous Metals Division.

Kindly refer to DMEA-3165 in any future correspondence relating to your application.

Sincerely yours,

ROBERT E. ADAMS

Alunite & uranium
DMEA-3165

Dear Mr Mittendorf:

Enclosed please find Our application for survey and diamond drilling on 24 unpatented mining claims of Alunite and Uranium situated approximately 6 miles north east of Marysvale, Piute County, Utah. We would like to have the Department of the Interior do The Diamond drilling if possible as the Alunite deposit is a solid mass of minerals and is the largest Alunite deposit in America, this should be mined in a big way and will produce a large amount of aluminum and potash including silica. There is also a strong & sure possibility that below the alunite uranium would be found as Dr Kerr of the University of Columbia, who has visited the property, has stated. He stated that He believes that there is a correlation in theoccurance of alunite and uranium in the Marysville area.

As We have claims of Autunite situated about 10 miles from the alunite deposit, We are arranging with MrS.R.Steinhouser Chief of the A.E.C. at Richfield, Utah., to meet His Geologist around Sept.23rd. Could it be possible to have Your Geologist in Richfield around Oct.1st., so we could meet them there and take them to the Alunite deposit. I had the pleasure of meeting You in Washington in -48 when I applied premiums for copper & zinc for the Atlas Mine of Arizona.

Very truly yours,

Pierre Perry

INSTRUCTIONS

1. *Name of applicant.*—(*a*) State here your full legal name, in the form in which you will wish to contract, and your mailing address: A Partnership
Otis Arthur Brown P.O Box 82 Whittier Cal.
Pierre Perry P.O Box 87 Reseda Cal.

(*b*) If other than an individual, add to your name above whether a corporation, partnership, etc., and the name of the State in which incorporated or otherwise organized.

(*c*) If a corporation, add to above statement, titles, names and addresses of officers.

(*d*) If a partnership, add to the above statement the names and addresses of all partners.

2. *General.*—Read DMEA Order 1, "Government Aid in Defense Exploration Projects," before completing this application. Submit this application and all accompanying papers in quadruplicate (four copies), with your name and address on each sheet of the application and on all accompanying papers. Where sufficient space is not provided on the form for all required information, state it on an accompanying paper, with a reference in each case to the instruction to which it refers by number. Comply with all applicable instructions; or, if not applicable, so state. File the application with Defense Minerals Exploration Administration, Department of the Interior, Washington 25, D. C., or with the nearest field executive officer thereof.

3. *Applicant's property rights.*—(*a*) State the legal description of the land upon which you wish to explore, including all land which you possess or control that may be benefited by the exploration, and excluding any land or interest in land which is not to be included in the exploration project contract 15 unpatented Claims Lode and 9 Claims Placer
6 Miles North East of Marysvale Utah Durkee district Piute County
Recorded in book G No 63569 to 63583 at Junction recording office Utah
Name of the claims Alunite King Claims

(*b*) State any mine name by which the property is known.

(*c*) State your interest in the land, whether owner, lessee, purchaser under contract, or otherwise
Locaters and owners

(*d*) If you are not the owner, submit with this application a copy of the lease, contract, or other document under which you control the property.

(*e*) If you own the land, describe any liens or encumbrances on it

(*f*) If the land consists of unpatented claims, add to the description above, the book and page numbers for each recorded location notice.

4. *Physical description.*—(*a*) Describe in detail any mining or exploration operations which have been or now are being conducted upon the land, including existing mine workings and production facilities. State your interest, if any, in such operations. Also describe accessibility of mine workings for examination purposes.

(*b*) State past and current production, and ore reserves, if any, giving quantities and grades.

(*c*) Describe the geologic features of the property, including mineralization, type of deposit (vein, bedded, etc.), and your reasons for wishing to explore. Illustrate with maps or sketches. Send with your application (but not necessarily as a part of it) any geologic or engineering report, assay maps, or other technologic information you may have, indicating on each whether you require its return to you. Bedded Alunite

(*d*) State the facts with respect to the accessibility of the project: Access roads, distances to shipping, supply and residence points. 6 miles by road from Railroad of Marysvale Utah

(*e*) State the availability of manpower, materials, supplies, equipment, water, and power.

16—66551-1

Miners in Richfield and Marysvale , Water Durkee spring ½ mile
Coal Mines about or less than thirty miles from deposit

5. *The exploration project.*—(*a*) State the mineral or minerals for which you wish to explore

Alunite and Kaolin

(*b*) Describe fully the proposed work, including a map or sketch of the property showing a plan (and cross sections if needed) of any present mine workings, and the location of the proposed exploration work as related to such features as contacts, veins, ore-bearing beds, etc.

(*c*) The work will start within 365 days and be completed within 36 months from the date of an exploration project contract.

(*d*) State the operating experience and background of the applicant with relation to the ability to carry out such exploration project, and also that of the person or persons who will supervise the operations.

6. *Estimate of costs.*—Furnish a detailed estimate of the costs of the proposed work (you will have to use a separate sheet), under the following headings. Add the totals under all headings to give the estimated total cost of the project:

(*a*) *Independent contracts.*—(Note.—If the applicant does not intend to let any of the work to contractors, write "none" after this item. To the extent that the work is to be contracted, do not repeat the cost of the contract-work in subsequent items.) State the cost of any proposed independent contracts for the performance of all or any part of the work, expressed in terms of units of work (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved, etc.).

(*b*) *Labor, supervision, consultants.*—Include an itemized schedule of numbers, classes and rates of wages, salaries or fees for necessary labor, supervision and engineering and geological consultants.

(*c*) *Operating materials and supplies.*—Furnish an itemized list, including items of equipment costing less than $50 each, and power, water and fuel.

(*d*) *Operating equipment.*—Furnish an itemized list of any operating equipment to be rented, purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or suggested use-allowance based on present value, as the case may be.

(*e*) *Rehabilitation and repairs.*—Furnish a detailed list showing the cost of any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and which will be devoted to the exploration project.

(*f*) *New buildings, improvements, installations.*—Furnish a detailed list showing the cost of any necessary buildings, fixed improvements, or installations to be purchased, installed or constructed for the benefit of the exploration project.

(*g*) *Miscellaneous.*—Furnish a detailed list showing the cost of repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance, and payroll taxes.

(*h*) *Contingencies.*—Give an estimate of any necessary allowances for contingencies not included in the costs stated above.

NOTE.—No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes), or any other indirect costs, or work performed or costs incurred before the date of the contract, should be included in the estimate of costs.

7. (*a*) Are you prepared to furnish your share of the cost of the proposed project in accordance with the regulations on Government participation (Sec. 7, DMEA No. 1)?

(*b*) How do you propose to furnish your share of the costs?

☐ Money ☐ Use of equipment owned by you ☐ Other

Explain in detail on acompanying paper.
