Re: Docket No. [illegible]-603

Dear Mr. Stringfellow:

In reviewing your application for a loan we find that you have not submitted sufficient information to enable us to determine the merits of your request. In order to expedite the handling of this matter and to enable us to evaluate your request, it is requested that you fill in completely the attached loan application form and return it to this office within 60 days from the date of this letter.

In the event we do not hear from you regarding this matter within 60 days we will assume that you are not now interested in such a loan. Should we not receive the additional information requested herein we will record your application for a loan as withdrawn.

This action will not, however, preclude you from submitting at a later date a completed application for a loan or an application for any other type of assistance that may be available under the provisions of the Defense Production Act.

Sincerely yours,

Tom Lyon

Re: Docket No. DMA-603

Mr. N. D. Stringfellow
456 North Second East
Provo, Utah

Dear Mr. Stringfellow:

We have just received your letter of April 20, 1951 which contained additional information and a photograph of your property. We wish to thank you for both.

The Copper Branch of the Defense Minerals Administration has reviewed and studied your application and the additional information and have concluded that your property, the Blue Juniper Mine is in an exploratory stage.

For your information we are enclosing a copy of a press release of April 11, 1951 and a copy of MO-5 (Pertinent regulations). After studying these regulations, you desire to file an application for aid as an exploration project, we are enclosing five copies each of the Form MF-100 (General Technical Data) and Form MF-103 (Application for Aid for an Exploration Project).

We wish to thank you for your interest in the Copper Program.

Very truly yours,

J. B. Gowen, Acting Chief
Copper Branch, DMA

Docket No. DMA-603

Tom Lyon Chief
Copper Branch DMA

Dear Mr. Lyon:-

In answer to your letter of Feb. 13 1951 in which you asked me for additional information to help you with my application for a mine loan on the Blue Juniper Copper Mine.

This Blue Juniper Copper Mine belonging to my two sons and I is quite a primitive affair but I dare say from advice from good authority that it is one of the richest copper deposits in the country, I have watched and protedted it for quite a few years, I have spend in the neighborhood of $5000.00 in money on this property with very little on the ground to show for it today, a cloud burst tow years ago did a tremendous damage but my main claim known as the Pilot Claim is protected to the extent that with just a few days work the ore can be seen in place near the surface.

I showed you a sample of this ore a few years ago in your office in the Kearns Bldg. in Salt Lake City you appeared to be greatly impressed and gave me some good advice on it, it was to be careful with it and not let some one in with me that would beat me out of it.

Now for that information you need I will do my best to help you out with out going to the expense of employing professional help this we cannot do at this time because we have not the money.

I have had many engineers offer to help me with an examination, for a controlling portion of the outfit but your advice to me was, you don't need it just go to digging and mine carefully, dont' waste the ore and it will pay its way.

I am going to work on the Pilot Claim preparing it for inspection and also operation.

I am sending under seperate cover a small sample of ore and a picture of Pilot claim I am sure they will be of interest.

The property is located in Millard County, Utah, forty five miles west of Delta. It is on the west side of Swazie Peak. This peak being about the highest part of the House Range Mountains is situated in about the center of the range directly west of Antelope Spring and very near the spring, The property is in an unknown mining district and in an unsurveyed portion of the public comain.

The ore is worth about $140.00 a ton at the smelter at

Garfield Utah, they will smelt it free for the silica values in the ore. It will cost $50.00 a ton to mine and transport to smelter, later on in 60 days with improvement to the roads and an increase in width in the vein and an increase in value with depth I will be able to mine and deliver it a little cheaper I am quite sure.

I can produce ore and have it moving the very first day my equipment reaches the mine, the production will be small and limited at beginning possibly a ton a day but will gradually increase till at the time my proposed tunnel is completed and in operation there will be a fifty tons a day capacity moving out of there and it will be one of the finest mines in the country.

While this limited operation is carrying on I contemplate with the help furnished with this loan to drive a tunnel as stated in my application 120 feet long that will give me a depth 350 feet into the ore body or I can go to the foot of the hill, go in through a shale formation about 300 feet and gain at least 800 feet in depth, when it is at this point of developement it will be but short while till the loan will be paid off, it will be a jewel of a mine.

From my latest observations and examinations of just a few days ago there will be a small increase in road improvement that will put the road right to the mouth of the proposed tunnel.

For this road improvement a caterpillar bull-dozer will do it all in just two or three days, the formation here is of the very finest for road building purposes and maintenance will be at a very low figure and the county and grazing service will take care of that with their road patrol system.

I have no equipment except a 3/4 ton late model truck I am paying for.

I am willing to place this entire mine property an security for this loan the repayment method can be worked out satisfactory, a percentage basis of each and every shipment and sales until paid off.

Please accept this crude make up of so called information I should be ashamed of it but I guess I am not for after all as man to man I am quite sure it can be understood under the existing conditions.

I will be glad to do all that I can to help this thing along.

Yours Very Respectfully

/s/ Marvin D. Stringfellow

Dear Mr. Stringfellow:

This acknowledges receipt of your application for a loan of $25,000 to equip and operate your Blue Juniper copper mine, in Utah. The application has been assigned the above docket number, to which reference should be made in future communications, and has been assigned to the Copper Branch for consideration.

Before we judge the feasibility of this project we will need to know more about the property. Your attention is called to the final paragraph of the enclosed press release, dated December 5, 1950, in which some of the needed information is listed. In addition, it would be well to state the location of the mine, and furnish your estimate of the cost of operation, including transportation to smelter, and the estimated net return per ton, and the expected daily or monthly tonnage. A sketch showing the present extent of workings and the proposed tunnel would be desirable.

Very truly yours,

/s/ Tom Lyon

Dear Mr. Stringfellow:

This will acknowledge receipt of your letter dated December 30, 1950, regarding your mining property west of Delta, Utah in Millard County.

It is noted that you are anxious to secure a loan and start operating your property without delay; however, it is absolutely necessary for you to complete Form NSRB-146, five copies of which are enclosed, furnishing the information as nearly as you can, following the form that we forwarded you with our letter of November 6, 1950.

We will be glad to forward your application to Washington as soon as it is received.

Until we receive your application we will be unable to be of assistance to you.

Sincerely yours,

J. H. East, Jr.

REGION IV
JAN 8 1951
BUREAU OF MINES
DENVER, COLORADO

Mr. J. H. East, Jr.
Regional Director, Region IV
Bureau of Mines
224 New Customhouse
Denver 2, Colorado

Dear Sir:

I have received from your office a letter of November 6, 1950. It contained pertinent questions that, when answered, would furnish the information necessary to determine whether or not my mining property will qualify for a loan under the Defense Act of 1950.

I have had offers of sale, bond, and lease, etc., but I have decided to apply hastily to see if I can save it for my sons and myself to operate. It seems as though my main assistance in my mining business is my younger son, who is a geology student at the Brigham Young University. Being eighteen years of age he will soon be called by the draft. I will not be able to operate without him and I must prepare for his deferment without delay. If you can offer a suggestion I would appreciate it very much.

I will describe the property then I will follow through with the questions in the form letter. The property is located fifty miles west of Delta, Utah in Millard county. I have copper ore valued at $120 per ton from a vein twenty inches wide at grass roots. This sample was taken by myself and analized by the Union Assay Office of Salt Lake City for the American Smelting and Refining Company at $76.40 per ton with copper at fourteen cents per pound. I had this sample run for the purpose of securing financial aid from them. Their decision was that they would furnish necessary money after I had made one truck load shipment to them. They reported it as being very fine ore and would smelt it free of charge. The reason for me not accepting this aid was that the price of copper at that time was fourteen cents. I decided to wait for a higher price.

gite

I can produce ore from this property the very first day of operation, although there is development work to be done before the output can be enlarged.

This property has been considered being in very isolated country until two years ago when a first class dirt road came to within three miles of the mine.

The name of the mine is the Juniper Mine and the operating company name is the Stringfellow Mining Company, 456 North Second East, Provo, Utah. There are no other known previous operators and also no other known name of the property. This mine has never produced and marketed any ore.

The loan, if granted, will be used for the following purposes with an estimate for each:

Development of roads----$400
Two Trucks----$5000
Compressor and attachments----$500
Living quarters----$500
Miscellaneous (equipment, food, fuel, etc.)---$1000
Salaries and wages----$10,000

There is $17,500 needed to start this mine and put it to where it can produce to the extent of paying its way. Although I have no major equipment, I have an almost complete set of hand tools such as hammers (all weights), picks, shovels, and steel of all size for pot shooting in road or trail building.

The ore will not need to be milled it will go in bags right to the smelter about 150 miles away (38 miles good dirt road, 12 miles hard surface road, and 100 miles by railroad). In about 90 to 100 days of production and developments we can reasonably expect 20 to 25 tons of ore to be mined per day.

I am quite certain that within six months with copper at 24½ cents per pound that this mine will be paying its loan off and will also be doing much toward helping the metal situation of our nation. I am very happy and proud to be able to present this property for inspection to the Bureau of Mines and I am very confident of its merit.

I hope to hear from you soon.

Yours truly,

M. D. Stringfellow

Dear Mr. Stringfellow:

Your letter of October 31, 1950 to the U. S. Bureau of Mines, Salt Lake City, Utah, requesting information on mining loans, has been submitted to me for reply.

The program for mining loans under the Defense Act of 1950 is still in the process of being developed in Washington. This involves considerable planning and agreements between various agencies concerned with the Act. In the meantime, we have prepared an informal form letter, copy enclosed, which gives you a list of the pertinent information we believe will be required in order to determine whether or not your property might qualify for a loan. Such information as you may be able to assemble along the lines indicated should be sent to Mr. J. H. East, Jr., Regional Director, Region IV, Bureau of Mines, 224 New Customhouse, Denver 2, Colorado. More specific information concerning these loans will be sent to you as soon as it is received from Washington.

Sincerely yours,

W. H. King

TO BE FILLED IN BY DELEGATE AGENCY

(DATE RECEIVED)

COMM.
AGRIC.
INT.
D.T.A.

FILE NO.

INSTRUCTIONS

Application should be filed with the Department of Commerce, Department of Agriculture, Department of Interior, or the Defense Transport Administration, whichever has the primary interest in the facilities, products, or processes involved. However, for convenience of the applicant, he may file with any government agency with which he has contract or other pertinent relationships and such agency will arrange for the transmittal of the application to the appropriate office.

Submit four (4) signed copies of the application. Name and address of applicant should be stamped or typed for identification of each sheet of the application and all accompanying papers. When a question is inapplicable, this should be so stated on the form. Additional sheets may be attached in answering any questions or in providing other supporting information.

1. PURPOSE OF LOAN

Give a brief general statement of the purpose of the loan requested, including in the table below estimated amounts for such major purposes as land acquisition, building construction, purchase of plant, purchase of equipment, working capital, repayment of debt, etc. Statement should make clear whether funds will be used for expansion of capacity, development of technological processes, or production of essential materials.

General Statement

The loan will be used for the production for essential materials, the mining of copper and other essential metals that will be with the copper ore.

NATURE OF EXPENDITURE	AMOUNT
Equipment	$8,000
Housing and shop buildings	2,000
Operating expenses	15,000
Total amount applied for	$25,000

3 Sept 8 6 0 1/15/51 8

2. PROPOSED METHOD FOR REPAYMENT OF LOAN

State sources of funds, and proposed schedule of repayment

I wish to repay loan by a fixed per cent of proceeds from sales of ore delivered to the smelter.

3. NATURE OF BUSINESS AND DESCRIPTION OF PROJECT

Describe fully the business activity for which the funds are intended. In so doing, identify the materials and services to be produced, describe the facilities and processes involved, and explain in detail any research activity and the nature of the results expected. Attach blueprints and specifications, if available, and furnish other technical details to the extent that they are not covered elsewhere in the application.

I have a copper mine that was a few years ago located in an isolated section of the west Utah desert. This mine has a high grade copper deposit. Assays report that the ore contains 22% copper on a vein twenty inches wide at the surface. The vein gradually increases in width with depth. The ore is of such fine quality that the smelting people say that the can smelt it free of charge. This loan will be used for the purpose of mining and transporting this ore to the smelter until such a time when this mine can pay its own way. Road improvement is necessary for about three miles. This work can be accomplished in approximately two days by a bulldozer. I anticipate driving a tunnel about 120 feet which will go directly into the ore body at a depth of about 350 feet from collar of shaft. A sample of the ore from the vein was valued at $76.40 per ton with copper at 14 cents per pound by the Union Assay Ofice of Salt Lake City.

4. Relationship to National Defense. Explain carefully how the expenditure of the funds will contribute to national defense. As a part of such explanation, the following questions should be answered to the extent possible:

(a) What evidence exists as to current shortages of the materials or services to be produced?

The recent limitation of copper to military and defense purposes.

(b) What evidence exists as to future shortages of the materials or services to be produced?

The full scale defense mobilization declared by the President.

(c) Are such shortages, if any, regional or national in scope?

The existing shortages of copper is national in scope.

(d) In what respects will the use of the funds aid directly in expediting the carrying out of government defense contracts? (A listing of defense contracts, if any, held by applicant is required in item 8 below.)

This loan of funds will be used directly in the mining of copper and other metals that will be used directly in government defense contracts.

4. Relationship to National Defense - Continued

(e) In what respects will the use of the funds aid indirectly in expediting the carrying out of government defense contracts or related operations?

These funds will aid indirectly by developing other ore deposits that are near and will consequently increase the volume of this mine greatly. Minerals such as manganese, mica, cinnabar, and nickle, which are in the vicinity of this property, would open up a new mining district.

(f) Are there available alternative methods or facilities to accomplish the same purpose as that for which these funds are intended? (For instance, unused capacity, possibility of multiple shift operations, idle facilities, readily convertible equipment, sub-contracting?) If answer is yes, explain why alternatives are not used.

There are no alternative methods of facilities of accomplishing the same purpose that this metal will furnish.

5. Maximum Designed Production

List separately materials or services identified in item 3 (a)	Unit of measure (b)	Maximum designed production with existing facilities (c)	Average percentage of maximum designed production used in quarter preceding filing of application (d)	Maximum designed production including use of funds applied for (e)
copper	pounds	no production	no production	12,500 lbs. per day

6. Employment

(a) Number currently employed at location(s) where funds are to be used. (Use pay period ending nearest 15th of month preceding filing of application.)

none

(b) Maximum feasible employment with existing facilities.

(1) Single shift operation.

none

(2) Multiple shift operation (specify how many shifts).

(c) Estimated additional employees required by the use of the funds applied for.

An estimate of twelve men will need to be employed.

7. Timing

(a) On what date(s) are the requested funds needed?

Funds are needed right now but I can handle the proposition if the funds are available by March 1, 1951.

(b) On what expected date(s) will applicant begin to use such funds and obtain output from the use of such funds? Wherever possible, give planned schedule of output.

I can be sacking and moving ore off the property within ten days after I receive the funds. The ore will be on the market a few days following.

8. Output from the use of funds applied for will be for the following purposes:
a. For the following principal prime defense contracts (if any) with the United States Government:

Date of contract (a)	Contracting Government Agency (b)	Program symbol (2 digits) or other contract identification (c)	Materials or services (d)	Delivery date(s) (e)	Amount *(Dollars)* (f)

b. For the following subcontracts (if any) with U.S. Government prime defense contractors:

Date of contract (a)	Materials or services (b)	Supplied to *(Give name and address of firm)* (c)	Delivery date(s) (d)	(e) Government agency receiving end product or services (f) Program symbol (2 digits) or other contract identification	Amount *(Dollars)* (g)
				(e) (f)	
				(e) (f)	
				(e) (f)	

c. For the following classes or types of customers not covered by contracts listed above (list materials or services to be provided and, wherever possible, also indicate final product use):

9. **Feasibility**

(a) Estimate anticipated requirements for manpower, equipment, raw materials, energy, fuel, transportation facilities, water supply, housing, community facilities, and other factors of production, for (1) preparation of the facilities and (2) actual operation thereof. (The estimates may be limited to those factors of substantial significance to the preparation and operation of the facilities for which the funds are intended.)

The manpower anticipated are four miners, four laborers, two truck drivers, one geologist, chemist, consultant; one mechanic, one cook, one superintendant. The estimated equipment needed are two trucks, one aircompressor with attachments for mining, and an assortment of small tools.

(b) Discuss and evaluate the availability of each of the above factors in the area(s) where the funds will be used.

The water supply comes from a spring about seven miles from the mine, The living quarters will be made at this spring until a spring can be developed and piped that is located about two miles from the mine. Water needed at the mine will be hauled until the latter spring can be developed. The ore will be transported by truck fifty miles to the railroad and then by railroad one hundred miles to the smelter.

10. The following applications for necessity certificates for tax amortization (Under Section 124A of the Internal Revenue Code) for facilities at the location(s) covered by this application have been filed since January 1, 1950.

Date of application (a)	Government file number (b)	(Estimated) Total of facilities in dollars on each application (c)	(d) If final action has been taken, give date of	
			Issuance	Denial

11. **Recent Efforts to Obtain Credit**

(a) Banks—List names and addresses of all Banks of Deposit of Applicant within the last 5 years: *(Mark with an asterisk (*) bank or banks in which deposits are now kept)*

I have never endeavored to obtain a loan to operate this mine because the banks I have done business with did not have a department to handle mine loans. The officers of these banks were not mining men and consequently did not make mining loans.

11. **Recent Efforts to Obtain Credit** - Continued

(b) State efforts to obtain credit, within 60 days preceding date of application, from banks, the Reconstruction Finance Corporation, or other sources, results, and reasons if refused. (NOTE.- Section 302 of the Defense Production Act of 1950 states that a loan may be extended "only to the extent that it is not otherwise available on reasonable terms." Accordingly, Applicant should show that it has applied to each bank named in (a) above, or explain the reason for not doing so. The fact that a loan of the particular maturity and terms applied for is refused by a bank or banks is not sufficient to comply with the statute, if credit on reasonable terms is available. State whether a bank will participate in the loan, and if so, state name of bank and amount of participation. Full particulars must be given.) List the names and addresses of banks and other lending institutions to which applications for credit have been made, and in each case state date of application, amount of credit available, if any, maximum term for which credit is available, what consideration, if any, was given to possible guarantee of loan under Federal Reserve Regulation V, and reason for refusal or reason loan was not obtained. Indicate whether or not application was definitely refused for further credit on any basis.

I have made a study of the business of financing this mine in this particular district and I came to the conclusion some years ago that it was the national government funds that would be used because of the undeveloped resources and because it is an unknown mining district and also an unsurveyed portion of public domain.

12. What other forms of government financial assistance, if any, have been received or requested by the applicant in connection with the purposes of the loan herein applied for? If applicant plans to request such assistance in the future, give details.

No other forms of government financial assistance has been received or requested for development of this mine and none will be applied for in the future if a loan can not be obtained under the present set-up. I will close the book on prospecting for the government.

13. **HISTORY, MANAGEMENT, LEASED AGREEMENTS, INSURANCE, ETC.**

These subjects should be fully covered in statements attached hereto. Outline past management experience or other basis for showing competence of the Applicant to perform in accordance with expressed purpose of the application. If plant was purchased, state price, form and terms of payment, date of purchase, from whom and under what circumstances purchase was made. If it is proposed to construct or acquire new facilities (including equipment), state estimated cost and basis of such estimate, form and terms of payment, and from whom purchases of facilities will be made. State whether Applicant, or the business or plant, has been in receivership, bankruptcy, Chapter X, XI or XII, in hands of creditors, committee, or whether Applicant has effected a compromise with creditors, and if so, discuss fully. Indicate whether business is conducted in leased premises and whether any facilities are leased from others and describe terms of any lease agreements. List type and amount of insurance carried on plant property. Describe briefly any pending or threatened litigation affecting Applicant. All the active working , producing days of my life has been spent in the managerial or supervising capacity.

Continuation of No. 13; History, Management, etc.

I feel I am well qualified to be manager of the operations of this mine. I have served in supervisory capacities in several kinds of business. I am familiar with the vicinity and I know how to manage living and working conditions in a desert location of this kind.

I have two sons that will work with me in the development and operation of this mine. The younger son is a geology student at the Brigham Young University. The elder one is skilled in business management. I also have a skilled foreman who has had much experience in mining operations.

The mine is known as the Blue Juniper Mine and will be operated by the Stringfellow Mining Company, 456 North Second East, Provo, Utah. The mine is located twenty miles off U. S. Highway 6. Seventeen of the twenty miles is very good dirt road with a gradual even grade. This road passes at a point within three miles of the mine. Road improvement is necessary from this point to the mine.

14. **NAMES AND ADDRESSES OF OFFICERS, DIRECTORS, OR PARTNERS, AND IN ADDITION THERETO, THE FIVE LARGEST STOCKHOLDERS IF A CORPORATION.** not a corporation

NAME AND ADDRESS (a)	Official title (If officer is also director indicate by "D") (b)	Total of annual salary, commissions, bonuses, etc., received from Applicant and affiliates during last fiscal year (c)	Estimated net worth outside of Applicant (d)	Number of shares held in applicant		Life insurance carried for benefit of Applicant	
				Common (e)	Preferred (f)	Amount (g)	Net cash surrender value after loans (h)
	Total		x x x x x			x x x	x x x

15. **CAPITAL STOCK ISSUES**

For Corporate Applicants

Item	Authorized (a)	Outstanding (b)	Par value (c)	Number of shares outstanding (d)	Dividend rate last paid (e)
Common stock	$	$	$		
Preferred stock	$	$	$		

16. **PURCHASE AND SALES RELATIONS WITH OTHERS**

Does Applicant buy from, sell to, or use the services of, any concern or partnership in which an officer, director, large stockholder, or partner of the Applicant has a substantial interest? If not, so state. If so, give names of such officers, directors, stockholders, and partners, and names of such concerns or partnerships.

No

Does any officer, director, large stockholder, or partner of Applicant receive any commission, bonus, or other payment in cash or services from any concern or partnership with which Applicant has business dealings? If not, so state. If so, give names of such officers, directors, stockholders, or partners and amounts of such commissions, bonuses, or payments.

No

17. **COMPENSATION SCHEDULE**

INSTRUCTIONS: The schedule shall show the amount of compensation being paid to all employees of Applicant receiving compensation at a rate in excess of $10,000 per annum, including employees paid on a part-time basis where the rate of compensation exceeds $10,000 per annum computed on a full-time basis. If Applicant is a corporation, the schedule should show the compensation, regardless of amount, being paid to all officers, directors, and such stockholders as have an interest in Applicant's business of 10 percent or more. If Applicant is a partnership, the schedule should show the compensation being paid to, or being withdrawn by, all partners for their personal use. If Applicant is an individual, the schedule should show the amount being withdrawn by Applicant for his personal use. In each case the listed person's connection with the business should be indicated (i.e., whether an officer, director, stockholder, partner, owner, etc.). The calendar basis for the compensation should likewise be shown. Attorneys or firms of attorneys on a regular retainer or salary basis should be included. The schedule should include a separate notation indicating the source and amount of any compensation being paid by a company or firm directly or indirectly controlling, affiliated with, or controlled by, Applicant. If the space provided herein is insufficient, the schedule should be continued on the reverse side or appropriate continuation sheets should be attached.

17. **COMPENSATION SCHEDULE** - Continued

The term "compensation", as used herein and such schedule, shall include all salaries, fees, bonuses, commissions, retainers, regular drawing accounts, and other payments, direct or indirect, in money or otherwise, for personal services.

Name (a)	Position (b)	Compensation paid during previous fiscal year (c)	Present compensation (d)
M. D. Stringfellow	Superintendent	none	none

18. **COLLATERAL**

(a) The applicant offers the following described collateral as security for repayment of the loan applied for.

Description (a)	Date acquired (b)	Cost (c)	Book Value (Net) (d)	Appraised* value (e)
Property now held:				
I offer my mine as security for repayment of the loan applied for and also any other property that I deem necessary to acquire in order to protect and operate this mine.				
To be acquired:				

* This column need be filled in only if a recent appraisal has been made. If so, identify appraiser below.

Name (a)	Title (b)	Date (c)

(b) Describe existing liens, if any, on property listed above.

There are no liens on the property.

18. Preferred stock (issued) (if Applicant is incorporated)				
19. Surplus (if Applicant is incorporated)				
20. Capital and surplus account (if Applicant is partnership or individual)				
TOTAL LIABILITIES				

NOTE— If years included in the above table are not adequately representative of applicant's financial experience, condition statements may be submitted for additional years.

EXHIBIT D

AGREEMENT AS TO COMPENSATION FOR SERVICES RENDERED OR TO BE RENDERED TO APPLICANT IN CONNECTION WITH APPLICATION AND/OR LOAN

To induce the United States Government and its agencies to make a loan under Sec. 302 of the Defense Production Act of 1950 to _____ (hereinafter called "Applicant") and in consideration of the making of a loan to Applicant, the undersigned, having been retained by Applicant for the purpose of rendering professional or other services in connection with its application for a loan or loans, hereby represents, warrants, and agrees that the undersigned has not been paid, has not made any agreement with the Applicant to be paid, and has not procured any person to pay or agree to pay, and will not, directly or indirectly, charge or receive any bonus, fee, or commission in any form in connection with the said application for, or the obtaining of, the loan applied for by the Applicant, or any compensation in any form for services rendered or to be rendered in connection therewith except for the services and in the amounts stated below:

Name	Description of services	Amount paid	Amount to be paid
No compensation to be paid in connection with this application		$	$

To induce the making of the loan and the employment of the undersigned by Applicant, the undersigned hereby further warrants, covenants and agrees, upon the consideration herein specified, and in consideration of the employment of the undersigned by Applicant, as above recited, that if the amount of compensation stated above for any such services shall not be deemed reasonable by any agency of the United States Government, the undersigned will reduce the charge for such services to such amount as shall be deemed reasonable by such agency, and will not, directly or indirectly, charge or collect from the Applicant or any other person, any sum in excess of the amount so deemed reasonable; and that if the undersigned has heretofore collected, from the Applicant or any other person, as compensation for any such services, any amount deemed by such agency to be unreasonable, the undersigned will refund to Applicant or such other person such sums as are in excess of the amount deemed reasonable. The undersigned further warrants, covenants and agrees that if the amount of the compensation for any such services is not determinable at the date of application, or is not stated above, it will not collect or charge any sum as compensation for such services without the prior written approval of the Government agency with which this application is officially filed as to the nature of the services for which such compensation is to be paid and the amount of such compensation.

NOTE—Corporations must execute foregoing certificate in corporate name, by duly authorized officer, and seal must be affixed and duly attested; partnerships must execute in firm name, together with signature of a general partner. If no compensation is paid or to be paid for services rendered in connection with application or loan, this should be so stated and the Applicant should sign this Exhibit.

CERTIFICATION

The Applicant hereby certifies that the statements made in the foregoing application, and all exhibits and documents submitted in connection therewith, are true and correct statements to the best of Applicant's information and belief and are submitted as a basis for credit. The Applicant agrees to reimburse any agency of the United States Government upon demand for any expenses incurred in connection with or arising out of this application or any loan made pursuant hereto.
