Mr. E. E. Wahsman, Agent
Newcastle, Wyoming

Re: Docket DMEA 2883

Dear Mr. Wahsman:

This has reference to your application for DMEA aid on your uranium property located as follows: SE¼ Sec. 32, SW¼ Sec. 33, T. 24 N., R. 95 W. All Sec. 5 and W½ Sec. 4, T. 23 N., R. 95 W. 1. Sweetwater County, Wyoming.

We are advised by the Bureau of Land Management that all of these described lands were withdrawn by Executive Order of July 13, 1910, for coal classification. By Executive Order of January 17, 1911, the lands were restored from the withdrawal and classified as coal lands, at so much per acre.

Lands that are included in a coal land withdrawal or classification are not subject to location under the United States mining laws. Therefore, your locations in September 1952 would be null and void and of no effect.

You might be interested in checking the case of Arthur K. Lee, et al., 51 L.D. 119 (April 21, 1925); the case of Ralph T. Richards, 52 L.D. 336 (March 19, 1928); also the decision rendered in mineral entry Cheyenne 065580, A. 23938 September 27, 1944, unreported.

We will hold your application for a reasonable time to give you every opportunity to obtain clear and valid title to these claims. Please advise us when this is accomplished and we will continue to process your application.

Very truly yours,

INSTRUCTIONS

1. *Name of applicant.*—(*a*) State here your full legal name, in the form in which you will wish to contract, and your mailing address: **E. E. Wakeman, one of and Agent for R. D. Rudolph, C. R. Rudolph, E. A. Rudolph, Tenna Thoeming, B. H. Thoeming, Mary Wakeman, E. E. Wakeman and S. H. Rudolph, Jr., Claim Owners, all of Newcastle, Wyoming.**

(*b*) If other than an individual, add to your name above whether a corporation, partnership, etc., and the name of the State in which incorporated or otherwise organized.

(*c*) If a corporation, add to above statement, titles, names and addresses of officers.

(*d*) If a partnership, add to the above statement the names and addresses of all partners.
Partnership - Names and addresses given under (a).

2. *General.*—Read DMEA Order 1, "Government Aid in Defense Exploration Projects," before completing this application. Submit this application and all accompanying papers in quadruplicate (four copies), with your name and address on each sheet of the application and on all accompanying papers. Where sufficient space is not provided on the form for all required information, state it on an accompanying paper, with a reference in each case to the instruction to which it refers by number. Comply with all applicable instructions; or, if not applicable, so state. File the application with Defense Minerals Exploration Administration, Department of the Interior, Washington 25, D. C., or with the nearest field executive officer thereof.

3. *Applicant's property rights.*—(*a*) State the legal description of the land upon which you wish to explore, including all land which you possess or control that may be benefited by the exploration, and excluding any land or interest in land which is not to be included in the exploration project contract

Placer Claim Locations on Public Domain

(*b*) State any mine name by which the property is known. **Lost Creek Claims**

(*c*) State your interest in the land, whether owner, lessee, purchaser under contract, or otherwise
Locators

(*d*) If you are not the owner, submit with this application a copy of the lease, contract, or other document under which you control the property.

(*e*) If you own the land, describe any liens or encumbrances on it **None**

(*f*) If the land consists of unpatented claims, add to the description above, the book and page numbers for each recorded location notice. **(Rider)**

4. *Physical description.*—(*a*) Describe in detail any mining or exploration operations which have been or now are being conducted upon the land, including existing mine workings and production facilities. State your interest, if any, in such operations. Also describe accessibility of mine workings for examination purposes. **No operations, no workings.**

(*b*) State past and current production, and ore reserves, if any, giving quantities and grades. **None**

(*c*) Describe the geologic features of the property, including mineralization, type of deposit (vein, bedded, etc.), and your reasons for wishing to explore. Illustrate with maps or sketches. Send with your application (but not necessarily as a part of it) any geologic or engineering report, assay maps, or other technologic information you may have, indicating on each whether you require its return to you. **(Rider)**

(*d*) State the facts with respect to the accessibility of the project: Access roads, distances to shipping, supply and residence points. **(Rider)**

(*e*) State the availability of manpower, materials, supplies, equipment, water, and power.
Manpower, materials, equipment, is obtainable at Rawlins. Water for drilling on the claims is available from shallow wells. There is no electric or other power available near the claims.

16—66551-1

5. *The exploration project.*—(*a*) State the mineral or minerals for which you wish to explore **Uranium minerals**

(*b*) Describe fully the proposed work, including a map or sketch of the property showing a plan (and cross sections if needed) of any present mine workings, and the location of the proposed exploration work as related to such features as contacts, veins, ore-bearing beds, etc. **(Rider)**

(*c*) The work will start within **90** days and be completed within **4** ~~months from the date of an exploration project contract.~~ **five months after date of contract**

(*d*) State the operating experience and background of the applicant with relation to the ability to carry out such exploration project, and also that of the person or persons who will supervise the operations. **(Rider)**

6. *Estimate of costs.*—Furnish a detailed estimate of the costs of the proposed work (you will have to use a separate sheet), under the following headings. Add the totals under all headings to give the estimated total cost of the project:

(*a*) *Independent contracts.*—(Note.—If the applicant does not intend to let any of the work to contractors, write "none" after this item. To the extent that the work is to be contracted, do not repeat the cost of the contract-work in subsequent items.) State the cost of any proposed independent contracts for the performance of all or any part of the work, expressed in terms of units of work (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved, etc.). **None**

(*b*) *Labor, supervision, consultants.*—Include an itemized schedule of numbers, classes and rates of wages, salaries or fees for necessary labor, supervision and engineering and geological consultants. **(Rider)**

(*c*) *Operating materials and supplies.*—Furnish an itemized list, including items of equipment costing less than $50 each, and power, water and fuel. **Sample containers $250; gasoline & oil for automobile & water pump $250.**

(*d*) *Operating equipment.*—Furnish an itemized list of any operating equipment to be rented, purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or suggested use-allowance based on present value, as the case may be. **(Rider)**

(*e*) *Rehabilitation and repairs.*—Furnish a detailed list showing the cost of any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and which will be devoted to the exploration project. **None**

(*f*) *New buildings, improvements, installations.*—Furnish a detailed list showing the cost of any necessary buildings, fixed improvements, or installations to be purchased, installed or constructed for the benefit of the exploration project. **None**

(*g*) *Miscellaneous.*—Furnish a detailed list showing the cost of repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance, and payroll taxes. **(Rider)**

(*h*) *Contingencies.*—Give an estimate of any necessary allowances for contingencies not included in the costs stated above.

NOTE.—No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes), or any other indirect costs, or work performed or costs incurred before the date of the contract, should be included in the estimate of costs. **10% of total for contingencies.**

7. (*a*) Are you prepared to furnish your share of the cost of the proposed project in accordance with the regulations on Government participation (Sec. 7, DMEA No. 1)? **Yes**

(*b*) How do you propose to furnish your share of the costs? **Money and use of automobile.**

☐ Money ☐ Use of equipment owned by you ☐ Other

Explain in detail on acompanying paper.

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief.

Mr. Jack East
Chief, Bureau of Mines
224 New Custom House Bldg.
Denver 2, Colorado

Dear Mr. East:

Enclosed herein are the original and three copies of M.F. 103 covering an exploration project for uranium located on claims approximately 35 miles north of Wamsutter, Sweetwater county, Wyoming.

As Mr. Lincoln Page, U. S. G. S., Federal Center, Denver, has been in charge of the extensive exploration for A. E. C. in this area, it is assumed that there is available to you sufficient data at his office to be of material assistance in the processing of this application.

The applicant has engaged my services for this project and it is requested that all correspondence from you on the project be directed to:

3(f). Placer Claims, 160 acres each recorded in Book 183, County Clerk Records of Sweetwater Co., Green River, Wyoming, designated as Lost Creek Claims Nos. 375 in Sec. 33, 386 in Sec. 32, T. 24 N., R. 95 W., 391, 392, 393, 394 in Sec. 5, 395, 396 in Sec. 4, T. 23 N., R. 95 W., and respectively entered on pages 189, 195, 183, 198, 199, 199, 200 of Book 183.

4(c). The area to be explored is known as Lost Creek Lake bed, which is a closed basin in which the waters of Lost Creek discharge and are contained. This lake bed is dry 10 months of each year and the sediments a few feet below the surface show radioactivity, and contain fractional percentages of uranium in the form of water soluble minerals. It is believed that a large tonnage of sediment, at some horizon within 100 feet below the surface, may contain a high concentration of uranium minerals and be of economic and commercial importance. The source of these uranium minerals is believed to be the waters of Lost Creek, in the watershed of which there are extensive deposits of schuoekingerite situated 10 to 11 miles north and upstream from the Lost Creek Lake. These schuoekingerite deposits have been extensively explored by the U.S.G.S. for the Atomic Energy Commission, and reference is made to A.E.C. reports thereon and p. 166, Bulletin 45, Geological Survey, Wyoming, in which it is stated that the waters of Lost Creek are uraniferous.

4(d). These claims are located approximately 35 miles Northeast of the village of Wamsutter, located on the main line of the U.P.RR and on U. S. Highway 30, and is the nearest residence point. Rawlins, 40 miles East of Wamsutter, is the nearest supply point.

5(b). Attached map shows location and pattern of exploratory borings in Lost Creek Lake bed. These borings, 3 to 6 inches in diameter, will be drilled with a portable rotary rig such as is commonly used for shot hole drillings in geophysical work. Fifty borings each 100 feet deep are planned. Representative samples of drilling sludge (including liquid) will be cut to make up one gallon per ten feet of hole. These will be preserved in sealed metal cans, properly labeled, and sent to a recognized laboratory for sampling and analysis for uranium content. All drilling water will be supplied from one or more shallow wells drilled on Claim 375 for that purpose and sampled for analysis of uranium content daily. Drilling water will not be recirculated.

5(d). Operators have had many years successful experience in petroleum, gas and bentonite production. The supervising engineer has had wide and varied experience in mining and metallurgy over a period of 35 years.

6(b). It is planned to rent the small portable rotary well rig previously described with owners operating crew for $150 per shift. It is estimated that one boring 100 feet deep, plus moving and setup on new location can be completed per shift. It is believed that no casing will be required other than at the collar. The 50 borings are estimated to be completed within 60 shifts. Moving rig from yards to claims and return will require 4 days. Water tank truck to be rented at $35 per shift. In addition there will be employed one sample man at $1.50 per hour and a supervisor at $700 per month.

6(d). To be purchased 1 water well pump, engine, tank and piping to furnish drilling water. Estimated cost $1000. Will rent these if possible.

6(g). Analytical work, uranium determinations $1500. Workmen's Compensation, Public Liability Insurance, PR tax $250.

MF 103
E. E. Wakeman, Agent
Newcastle, Wyoming

SUMMARY OF COSTS

Rental of drill rig and crew - 60 shifts @ $150 each . .	$9,000.00
Rental of Water Tank Truck - 60 shifts @ $35 each . .	2,100.00
Four days moving equipment in and out @ $185 each . . .	740.00
Sample man - 60 shifts @ $12 each	720.00
Supervisor	1,500.00
Sample containers	250.00
Gasoline and oil	250.00
Use allowance, automobile	250.00
Purchase and installation water pump	1,000.00
Chemical analysis (500 @ $3 each)	1,500.00
Workmen's Comp., Public Liability Ins., P.R. Tax . . .	200.00
Contingencies 10% of total	1,751.00
	$19,261.00

Govt. participation (90%) $19,261.00, Operator's (10%) $1926.10
Unit cost (5000 feet) - $3.85 per foot
