Gentlemen:

Regarding Docket No. DMEA-4649 (Uranium)

After further careful study and continued work we have revised our original application. Would you accept this as either an amendment to or in lieu of the original application.

Yours Truly,

Harold F. Bruschwein

Gentlemen;

I want you toconsider this as a bid on the approximate 50,000 feet of drilling to be done on your property near Douglas, Wyoming.

My bid is for seventy four cents (74¢) per foot of drilling. Drilling to be 150 feet or less per hole as advertised.

Yours truly,

Vernon Bauer

Docket No. DMEA-4649
Metal or Mineral URANIUM
Date Received Apr. 8, 1957
Estimated Cost $27,590.00
Participation (Government %)

APPLICATION FOR AID IN AN EXPLORATION PROJECT, PURSUANT TO DMEA ORDER 1, UNDER THE DEFENSE PRODUCTION ACT OF 1950, AS AMENDED

INSTRUCTIONS

1. *Name of applicant.*—(*a*) State here your full legal name, in the form in which you will wish to contract, and your mailing address: Dakota-Wyoming Uranium Company, Inc., Lehr, North Dakota

(*b*) If other than an individual, add to your name above whether a corporation, partnership, etc., and the name of the State in which incorporated or otherwise organized.

(*c*) If a corporation, add to above statement, titles, names and addresses of officers. See Attached Schedule.

(*d*) If a partnership, add to the above statement the names and addresses of all partners.

2. *General.*—Read DMEA Order 1, "Government Aid in Defense Exploration Projects," before completing this application. Submit this application and all accompanying papers in quadruplicate (four copies), with your name and address on each sheet of the application and on all accompanying papers. Where sufficient space is not provided on the form for all required information, state it on an accompanying paper, with a reference in each case to the instruction to which it refers by number. Comply with all applicable instructions; or, if not applicable, so state. File the application with Defense Minerals Exploration Administration, Department of the Interior, Washington 25, D. C., or with the nearest field executive officer thereof.

3. *Applicant's property rights.*—(*a*) State the legal description of the land upon which you wish to explore, including all land which you possess or control that may be benefited by the exploration, and excluding any land or interest in land which is not to be included in the exploration project contract See Attached Schedule

(*b*) State any mine name by which the property is known. None

(*c*) State your interest in the land, whether owner, lessee, purchaser under contract, or otherwise Lessee, Purchaser under contract.

(*d*) If you are not the owner, submit with this application a copy of the lease, contract, or other document under which you control the property. Contract submitted.

(*e*) If you own the land, describe any liens or encumbrances on it $2,000.00 May 1, 1957: $5000.00 October 1, 1957: $5000.00 June 1, 1958: Due Chester Humphrey, Douglas, Wyoming

(*f*) If the land consists of unpatented claims, add to the description above, the book and page numbers for each recorded location notice. See Schedule

4. *Physical description.*—(*a*) Describe in detail any mining or exploration operations which have been or now are being conducted upon the land, including existing mine workings and production facilities. State your interest, if any, in such operations. Also describe accessibility of mine workings for examination purposes. See Attached Schedule

(*b*) State past and current production, and ore reserves, if any, giving quantities and grades. Attached.

(*c*) Describe the geologic features of the property, including mineralization, type of deposit (vein, bedded, etc.), and your reasons for wishing to explore. Illustrate with maps or sketches. Send with your application (but not necessarily as a part of it) any geologic or engineering report, assay maps, or other technologic information you may have, indicating on each whether you require its return to you. Attached.

(*d*) State the facts with respect to the accessibility of the project: Access roads, distances to shipping, supply and residence points. Attached.

(*e*) State the availability of manpower, materials, supplies, equipment, water, and power. Attached.

16—66551-1

5. *The exploration project.*—(*a*) State the mineral or minerals for which you wish to explore Uranium

(*b*) Describe fully the proposed work, including a map or sketch of the property showing a plan (and cross sections if needed) of any present mine workings, and the location of the proposed exploration work as related to such features as contacts, veins, ore-bearing beds, etc. See Attached.

(*c*) The work will start within 30 days and be completed within 24 months from the date of an exploration project contract.

(*d*) State the operating experience and background of the applicant with relation to the ability to carry out such exploration project, and also that of the person or persons who will supervise the operations. See Attached

6. *Estimate of costs.*—Furnish a detailed estimate of the costs of the proposed work (you will have to use a separate sheet), under the following headings. Add the totals under all headings to give the estimated total cost of the project: Attached.

(*a*) *Independent contracts.*—(Note.—If the applicant does not intend to let any of the work to contractors, write "none" after this item. To the extent that the work is to be contracted, do not repeat the cost of the contract-work in subsequent items.) State the cost of any proposed independent contracts for the performance of all or any part of the work, expressed in terms of units of work (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved, etc.). See Attached

(*b*) *Labor, supervision, consultants.*—Include an itemized schedule of numbers, classes and rates of wages, salaries or fees for necessary labor, supervision and engineering and geological consultants. See Attached

(*c*) *Operating materials and supplies.*—Furnish an itemized list, including items of equipment costing less than $50 each, and power, water and fuel. None.

(*d*) *Operating equipment.*—Furnish an itemized list of any operating equipment to be rented, purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or suggested use-allowance based on present value, as the case may be. Attached.

(*e*) *Rehabilitation and repairs.*—Furnish a detailed list showing the cost of any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and which will be devoted to the exploration project. Not Applicable

(*f*) *New buildings, improvements, installations.*—Furnish a detailed list showing the cost of any necessary buildings, fixed improvements, or installations to be purchased, installed or constructed for the benefit of the exploration project. Not Applicable

(*g*) *Miscellaneous.*—Furnish a detailed list showing the cost of repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance, and payroll taxes. See Attached.

(*h*) *Contingencies.*—Give an estimate of any necessary allowances for contingencies not included in the costs stated above. See Attached

NOTE.—No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes), or any other indirect costs, or work performed or costs incurred before the date of the contract, should be included in the estimate of costs.

7. (*a*) Are you prepared to furnish your share of the cost of the proposed project in accordance with the regulations on Government participation (Sec. 7, DMEA No. 1)? Yes.

(*b*) How do you propose to furnish your share of the costs?

[X] Money [ ] Use of equipment owned by you [ ] Other

Explain in detail on acompanying paper.

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief.

Sec. 28: E 1/2 E 1/2:
Sec. 30: SE 1/4:
Sec. 31: NE 1/4:

and sixty-three unpattented mining claims described as follows:

Fox Claims No. 1 to 5 inclusive located in the South Half of the Northeast Quarter of Section 30, Township 37, Range 72.

Ore Claims No. 1 to 10 inclusive located in the Southeast Quarter and Northwest Quarter of Southwest Quarter (NW 1/4 SW 1/4) in Section 31, Township 37, Range 72.

Mill Claims No. 1 to 12 inclusive located in the West Half of Section 30, Township 37, Range 72.

Dakota Wyoming Uranium Company, Inc.,
Lehr, North Dakota

Supplement to DMEA Order 1, Form MF-103.

3. (a) Odd Claims No. 1 to 18 inclusive located in the South Half, the Northwest Quarter, and the West Half of the Northeast Quarter (W 1/2 NE 1/4) of Section 29, Township 37, Range 72.

Call Claims No. 1 to 18 inclusive located in the West Half and West Half of East Half (W 1/2 E 1/2) of Section 32, Township 37, Range 72.

3. (f) Odd Claims, 1 through 18, recorded in Book 297 at Pages 297 through 332, of the Records of Converse County, Wyoming.

Fox Claims, No. 1 through No. 5, Recorded in Book 297 at pages 373 through 381, of the Records of Converse County, Wyoming

Ore Claims, No. 1 through No. 10, Recorded in Book 297 at Pages 384 through 402, Recorded in the Records of Converse County, Wyoming.

Call Claims, No. 1 through 18, Recorded in Book 294 at pages 481 through 516, of the Records of Converse County, Wyoming.

Mill Claims No. 1 through No. 12, Recorded in Book 297 at pages 273 through 296 of the Records of Converse County, Wyoming.

4. (a) No mining has been conducted on the property. A portion of the claims have been checked with a scintillator for anomalous radio activity. Three anomalies have been located. (see map for location and intensity) Five holes have been drilled around the anomolies with negative results. A small cut was made into one of the areas and near ore was removed, but no material of commercial value was found. The exploration cut was made before the company acquired the property. The drilling was done by the present controlling company.
The property is accessable from Highway 59 by good to fair ranch roads turning West from the Highway 59, 33 miles North of Douglas, Wyoming.

4. (b) There has been no past production from the property. There are no known ore reserves on the leases and claims.

4. (c) The property lies in the Southern part of the Powder River Basin, 10 to 12 miles East of the anticlinal axis. The claims and leases are on a slightly rolling dissected plain. The out-croping formation is Wasatch, of Eocene Age, with possible Fort Union, of Poleocene Age, at the lower elevations. The mineralization occurs in pods and stringers at/or near the Wasatch-Fort Union Contact.
The mineralizations seem to be controlled by the crenulations of the sandstone-shale contact and by the presents of carbon at/or near these contacts. Mineralization is indicated by the bleaching of the red sandstone and the contained carbon and mud pellets.

OFFICIAL FILE COPY
D M E A
RECEIVED APR 8 1957

DATE	INITIALS	CODE

Dakota Wyoming Uranium Company, Inc.,
Lehr, North Dakota

Supplement to DMEA order 1, Form MF-103.

4. (c) The property lies within a good mineralized area with eight producing mines within a radius of 15 miles. One of the mines have a known ore reserve of over 50,000 ton. All are producing from the Wasatch Formation or from the Wasatch-Fort Union contact. This favorable hoast rock lies at a shallow depth (0' to 150') under most of the companies property. Exploration drilling cost to this depth would not be excessive and in the event ore is discovered, mining costs would be proportionally lower.

4. (d) The property is accessable from Highway 59 by good to fair ranch roads turning West from Highway 59, 33 miles North of Douglas, Wyoming. The nearest resident and supply point would be Douglas, Wyoming, 33 miles South.

4. (e) Sufficient manpower, materials, supplies, equipment, water and power are available.

5. (b) The proposed exploration consists of an initial drilling of 165 holes, covering the controlled property on one thousand foot centers, to pick out the most favorable areas. The average depths of the holes, in the initial drilling, would be 100 feet, or approximately 16,500 total for the initial phase. (see map of property for locations)
The secondary phase would consist of 33,500 feet of drilling on 50 and 100 foot centers in the favorable areas, as picked from the initial drilling on the criteria of sandstone shale contact, sandstone color contacts, percentage of contained carbon and mud pellets in the sandstone and on mineralization or anomolous radioactivity readings of cuttings.

5. (d) Mr. Albert Erbele, President of the Company, has had six years mining experience. The experience has been in Nome, Alaska and with the Howe Sound Mining Company, Chelan, Washington. The company intends to hire a supervisor with experience in Wyoming uranium mining.

6. (a) Estimate of costs:

(a) Independent contracts: -

Bulldozor work to prepare some of the drill locations; 20 hours at $12.00 per hour.-----	$ 240.00
50,000 feet of drilling at .60¢ per foot.---	30,000.00

(b) Labor , supervision, consultants: -

Labor: man to watch drilling and log holes at $500.00 per month for six months.--	3,000.00
Surveyor: 100 hours at $5.00 per hour. ----	500.00
Geologist: 20 days at $75.00 per day.--------	1,500.00

(c) Operating materials and supplies: None.

(d) Operating equipment.

1. Chevorlet pick-up truck for use of person overseeing drilling and logging. At .10¢ per mile estimated 10,000 miles: ------- 1,000.00

Dakota Wyoming Uranium Company, Inc.,
Lehr, North Dakota

Supplement to DMEA order 1, Form MF-103.

Page 4.

6.	(d)	Operating equipment: -	
		2. Geiger counter and probe; cost $600.00, one years usage:	$ 120.00
		3. Scintillator; cost $400.00, one years usage:	80.00
6.	(g)	Miscellaneous: -	
		Sample assays; 100 samples at $3.50:	350.00
		Workmans Compensation:	300.00
6.	(h)	Contingencies: -	500.00
		Total:	$37,590.00

Supplement to DMEA Order 1, Form MF-103 3. (d)
Dakota Wyoming Uranium Company, Inc.,
Lehr, North Dakota

CONTRACT

THIS AGREEMENT is made this 3rd day of January, 1957, by and between Chester Humphrey of 949 South 5th, Douglas, Wyoming, hereinafter known as party of the first part and Dakota-Wyoming Uranium, Inc., a North Dakota corporation, of Lehr, North Dakota, hereinafter known as party of the second part.

WHEREAS, first party is the owner of 63 lode mining claims located in Converse County, Wyoming, hereinafter more specifically described; and

WHEREAS, first party is also the owner of a mining lease from Carl L. Manning and Genevieve Manning, husband and wife, dated May 14, 1956, and covering 3200 acres more or less in Converse County, Wyoming, hereinafter more specifically described; and

WHEREAS, first party desires to sell said 63 lode mining claims and said mining lease to second party and second party desires to purchase the same from first party as set forth hereinafter.

NOW THEREFORE, first party does hereby agree to grant, bargain, sell, remise, release and quit claim to second party and second party does hereby agree to purchase from first party the following lode mining claims in Converse County, Wyoming, described as follows:

Fox Claims No. 1 to 5 inclusive located in the South Half of the Northeast Quarter of Section 30, Township 37, Range 72.

OFFICIAL FILE COPY
DMEA
APR 8 1957
INITIALS CODE

Ore Claims No. 1 to 10 inclusive located in the Southeast Quarter and Northwest Quarter of Southwest Quarter (NW¼SW¼) in Section 31, Township 37, Range 72.

Mill Claims No. 1 to 12 inclusive located in the West Half of Section 30, Township 37, Range 72.

Odd Claims No. 1 to 18 inclusive located in the South Half, the Northwest Quarter, and the West Half of the Northeast Quarter (W½NE¼) of Section 29, Township 37, Range 72.

Call Claims no. 1 to 18 inclusive located in the West Half and West Half of East Half (W½E½) of Section 32, Township 37, Range 72.

And first party does hereby agree to sell, assign and transfer to second party and second party does hereby agree to purchase from first party that certain mining lease from Carl L. Manning and Genevieve Manning, husband and wife, to Chester Humphrey, dated May 14, 1956, and covering 3200 acres more or less in Converse County, Wyoming, described as follows:

Twp. 37 N., Rge. 72 W. 6th P.M.

Sec. 11:	SE¼	Sec. 21:	E½NE¼; W½E½; SE¼SE¼
Sec. 12:	SW¼ SW¼;	Sec. 22:	S½N½; N½S½; SW¼SW¼
Sec. 13:	W½	Sec. 23:	N½
Sec. 15:	S½	Sec. 27:	S½NE¼; SE¼; NW¼; NW¼SW¼;
Sec. 17:	S½S½; NW¼SE¼; NE¼SW¼	Sec. 28:	E½E½
Sec. 18:	S½SE¼;	Sec. 30:	SE¼;
Sec. 19:	E½NE¼;	Sec. 31:	NE¼;

On the following terms:

$2,000 payable in cash on date hereof, the receipt of which is hereby acknowledged, and
$2,000 on March 1st, 1957,
$2,000 on May 1st, 1957,
$5,000 on October 1st, 1957, and the final payment of
$5,000 on June 1st, 1958.

First party agrees to execute and deliver good and proper instruments of transfer to said 63 lode mining claims and said mining lease after the $2,000 due May 1st, 1957, has been paid and concurrent with the delivery of said $2,000 due May 1st, 1957.

Second party shall have the right to cancel this agreement on or before any payment date above provided and in that event, those payments due on such payment date or thereafter shall thereby become cancelled. In the event that second party shall cancel this agreement on or before any payment date, but subsequent to May 1st, 1957, and after first party has executed and delivered proper instruments of transfer of said 63 lode mining claims and said mining lease, then and in that event second party must execute and deliver to first party proper instruments of transfer of 63 lode mining claims and said mining lease. It is further understood and agreed that the $2,000 payment due March 1st, 1957 must be paid by second party to first party regardless of whether or not second party exercises its option to cancel this agreement so that first party shall in any event have received at least $4,000 in consideration of the execution of this agreement.

First party agrees to furnish free of charge to second party a title memo from the abstracter or a title opinion from a reputable attorney showing a good and merchantable title in first party to the 63 lode mining claims and mining lease aforesaid and to do this on or before March 1st, 1957.

First party covenants that he has a good and merchantable title to said 63 lode mining claims and to said mining lease.

IN WITNESS WHEREOF the parties hereto have hereunto set their hands and second party has affixed its corporate seal the day and year first above written.

Memorandum

To: Secretary to the Operating Committee, DMEA

From: Executive Officer, DMEA Field Team, Region III

Subject: Application for DMEA Aid (Uranium) Dakota-Wyoming Uranium, Inc. (Fox, Ore, Mill, Odd, Call claims and leased land T. 37 N., R. 72 W. 6 P.M.) Converse County, Wyoming

Enclosed are the original and two copies of the subject application in the amount of $75,000.00. One copy is being retained in the Denver office file.

The application was submitted to Mr. Ernest E. Thurlow, Manager, Denver Area Office, AEC, who in turn forwarded it to this office. It is deficient in many respects and will, no doubt, require correspondence on the part of the Washington office to obtain an outline of the Applicant's program, maps, drill bids, etc. They apparently propose to drill radioactive anomalies.

P. O. Box 7647
Lakewood Branch
Denver 15, Colorado

Dear Sir;

We enclose herewith in quadruplicate DMEA applications together with supplement sheets, copies of agreement and map showing location of land on which exploration will be done.

As stated in our application, we have commenced exploration work, but, realize that it will require more finances than we had anticipated, and therefor would appreciate your early consideration of our application

Yours very truly,

Harold F. Bruschwein

Metal or Mineral Uranium
Date Received 2-25-57
Estimated Cost $75,000.00
Participation (Government %)

INSTRUCTIONS

1. *Name of applicant.*—(*a*) State here your full legal name, in the form in which you will wish to contract, and your mailing address: DAKOTA-WYOMING URANIUM, INC. LEHR, NORTH DAKOTA, A NORTH DAKOTA CORP. ALBERT ERBELE, PRESIDENT; JOHN KRANZLER, VICE PRESIDENT; HAROLD F. BRUSCHWEIN, SECRETARY; VERNON J. SCHERBENSKE, TREASURER. ADDRESS OF ALL OFFICERS BEING LEHR, NORTH DAKOTA

(*b*) If other than an individual, add to your name above whether a corporation, partnership, etc., and the name of the State in which incorporated or otherwise organized.

(*c*) If a corporation, add to above statement, titles, names and addresses of officers.

(*d*) If a partnership, add to the above statement the names and addresses of all partners.

2. *General.*—Read DMEA Order 1, "Government Aid in Defense Exploration Projects," before completing this application. Submit this application and all accompanying papers in quadruplicate (four copies), with your name and address on each sheet of the application and on all accompanying papers. Where sufficient space is not provided on the form for all required information, state it on an accompanying paper, with a reference in each case to the instruction to which it refers by number. Comply with all applicable instructions; or, if not applicable, so state. File the application with Defense Minerals Exploration Administration, Department of the Interior, Washington 25, D. C., or with the nearest field executive officer thereof.

3. *Applicant's property rights.*—(*a*) State the legal description of the land upon which you wish to explore, including all land which you possess or control that may be benefited by the exploration, and excluding any land or interest in land which is not to be included in the exploration project contract

(*b*) State any mine name by which the property is known.

(*c*) State your interest in the land, whether owner, lessee, purchaser under contract, or otherwise

(*d*) If you are not the owner, submit with this application a copy of the lease, contract, or other document under which you control the property.

(*e*) If you own the land, describe any liens or encumbrances on it

(*f*) If the land consists of unpatented claims, add to the description above, the book and page numbers for each recorded location notice.

4. *Physical description.*—(*a*) Describe in detail any mining or exploration operations which have been or now are being conducted upon the land, including existing mine workings and production facilities. State your interest, if any, in such operations. Also describe accessibility of mine workings for examination purposes.

(*b*) State past and current production, and ore reserves, if any, giving quantities and grades.

(*c*) Describe the geologic features of the property, including mineralization, type of deposit (vein, bedded, etc.), and your reasons for wishing to explore. Illustrate with maps or sketches. Send with your application (but not necessarily as a part of it) any geologic or engineering report, assay maps, or other technologic information you may have, indicating on each whether you require its return to you.

(*d*) State the facts with respect to the accessibility of the project: Access roads, distances to shipping, supply and residence points.

(*e*) State the availability of manpower, materials, supplies, equipment, water, and power.

5. *The exploration project.*—(*a*) State the mineral or minerals for which you wish to explore .....

(*b*) Describe fully the proposed work, including a map or sketch of the property showing a plan (and cross sections if needed) of any present mine workings, and the location of the proposed exploration work as related to such features as contacts, veins, ore-bearing beds, etc.

(*c*) The work will start within ..... days and be completed within ..... months from the date of an exploration project contract.

(*d*) State the operating experience and background of the applicant with relation to the ability to carry out such exploration project, and also that of the person or persons who will supervise the operations.

6. *Estimate of costs.*—Furnish a detailed estimate of the costs of the proposed work (you will have to use a separate sheet), under the following headings. Add the totals under all headings to give the estimated total cost of the project:

(*a*) *Independent contracts.*—(Note.—If the applicant does not intend to let any of the work to contractors, write "none" after this item. To the extent that the work is to be contracted, do not repeat the cost of the contract-work in subsequent items.) State the cost of any proposed independent contracts for the performance of all or any part of the work, expressed in terms of units of work (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved, etc.).

(*b*) *Labor, supervision, consultants.*—Include an itemized schedule of numbers, classes and rates of wages, salaries or fees for necessary labor, supervision and engineering and geological consultants.

(*c*) *Operating materials and supplies.*—Furnish an itemized list, including items of equipment costing less than $50 each, and power, water and fuel.

(*d*) *Operating equipment.*—Furnish an itemized list of any operating equipment to be rented, purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or suggested use-allowance based on present value, as the case may be.

(*e*) *Rehabilitation and repairs.*—Furnish a detailed list showing the cost of any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and which will be devoted to the exploration project.

(*f*) *New buildings, improvements, installations.*—Furnish a detailed list showing the cost of any necessary buildings, fixed improvements, or installations to be purchased, installed or constructed for the benefit of the exploration project.

(*g*) *Miscellaneous.*—Furnish a detailed list showing the cost of repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance, and payroll taxes.

(*h*) *Contingencies.*—Give an estimate of any necessary allowances for contingencies not included in the costs stated above.

NOTE.—No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes), or any other indirect costs, or work performed or costs incurred before the date of the contract, should be included in the estimate of costs.

7. (*a*) Are you prepared to furnish your share of the cost of the proposed project in accordance with the regulations on Government participation (Sec. 7, DMEA No. 1)? Yes

(*b*) How do you propose to furnish your share of the costs?

[X] Money [X] Use of equipment owned by you [ ] Other

Explain in detail on acompanying paper.

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief.

CONTRACT

Chester Humphrey to Dakota-Wyoming Uranium, Incorporated.

This agreement is made this 3rd day of January, 1957, by and between Chester Humphrey of 949 South St., Douglas, Wyoming, hereinafter known as party of the first part and Dakota-Wyoming Uranium, Inc., a North Dakota corporation, of Lehr, North Dakota, hereinafter known as party of the second part.

Whereas, first party is the owner of 63 lode mining claims located in Converse County, Wyoming, hereinafter more specifically described; and

Whereas, first party is also the owner of a mining lease from Carl L. Manning and Genevieve Manning, husband and wife, dated May 14, 1956, and covering 3200 acres more or less in Converse County, Wyoming, hereinafter more specifically described; and

Whereas, first party desires to sell said 63 lode mining claims and said mining lease to second party and second party does desire to purchase the same from first party as set forth hereinafter,

Now Therefore, first party does hereby agree to grant, bargain, sell, remise, release and quit claim to second party and second party does hereby agree to purchase from first party the following lode mining claims in Converse County, Wyoming, described as follows:

Fox Claims No. 1 to 5 inclusive located in the South Half of Northeast Quarter of Section 30, Township 37, Range 72.

Ore Claims No. 1 to 10 inclusive located in the Southeast Quarter and Northwest Quarter of Southwest Quarter in Section 31, Township 37 Range 72.

Mill Claims No. 1 to 12 inclusive located in the West Half of Section 30, Township 37, Range 72

Odd Claims No. 1 to 18 Inclusive located in the South Half, the Northwest Quarter, and the West Half of the Northeast Quarter of Section 29, Township 37 Range 72.

Call Claims No. 1 to 18 Inclusive located in the West Half and West Half of East Half of Section 32, Township 37, Range 72.

And party of first part does hereby agree to sell, assign and transfer to second party and second party does hereby agree to purchase from first party that certain mining lease from Carl L. Manning and Genevieve Manning, husband and wife, to Chester Humphrey, dated May 14, 1956, and covering 3200 acres more or less in Converse County, Wyoming, described as follows:

On the following terms:

$2,000 payable in cash on date hereof, the receipt of which is hereby acknowledged, and
$2,000 on March 1st, 1957
$2,000 on May 1st, 1957
$5,000 on Oct. 1, 1957 and the final payment of
$5,000 on June 1st, 1958

First party agrees to execute and deliver good and proper instruments of transfer to said 63 lode mining claims and said mining lease after the $2,000 due May 1st, 1957, has been paid and concurrent with the delivery of said $2,000 due May 1st, 1957.

Second party shall have the right to cancel this agreement on or before any payment date above provided and in that event, those payments due on such payment date or thereafter shall thereby become cancelled. In the event that second party shall cancel this agreement on or before any payment date, but subsequent to May 1st, 1957, and after first party has executed and delivered proper instruments of transfer of said 63 lode mining claims and said mining lease, then and in that event second party must execute and deliver to first party proper instruments of transfer of 63 lode minging claims and said mining lease. It is further understood and agreed that the $2,000 payment due March 1st, 1957 must be paid by second party to first party regardless of whether or not second party exercise its option to cancel this agreement so that first party shall in any event have received at least $4,000 in consideration of the execution of this agreement.

First party agrees to furnish free of charge to second party a title memo from the abstractor or a title opinion fram a reputable attorney showing a good and merchantable title in first party to the 63 lode mining claims and mining lease aforesaid and to do this on or before March 1st, 1957.

First party covenants that he has a good and merchantable title to said 63 lode mining claims and to said mining lease.

In Witness Whereof the parties hereto have hereunto set their hands and second party has affixed its corporate seal the day and year first above writtern.

DAKOTA-WYOMING URANIUM, INC.

LEHR, NORTH DAKOTA

SUPPLEMENTAL SHEET AND ANSWERS TO INSTRUCTION 4 AND SUB-PARTS (A)-(B)-(C) (D) AND (E).

(A)- The Dakota-Wyoming Uranium, Inc. has commenced exploration work by drilling on Feb. 11, 1957. The land is carefully checked with Geiger counter to ascertain the most radioactive areas. These areas are then drilled to find their uranium contents and geological formations. Work commenced on Call Claim No. 5 and will proceed to other claims or areas as circumstances permit. There has been no previous work on this area under our control.

(B)- No Production or Ore Reserves.

(C)- We wish to explore this region because we believe that there is a very good possibility of finding commercial quality Uranium Ore. This property lies in the area found to be highly radicactive by the A. E. C. The geological formation is identical to that found in nearby mines, namely, Kerr-McGee; Little Star, Loma and other smaller mines now in production. We have found definite mineralization and can expect to find bedded or veined deposits. The deposits are most likely to be bedded. The high radioactivity in various parts of our property tend to point to the preserves of bodies of uranium ore.

(D)- The property the Dakota-Wyoming Uranium, Inc. wishes to explore is approximately 47 miles north of Douglas, Wyoming. This consists of about 14 miles of gravel road and 33 miles of bitiminous highway. The distance to nearest shipping point is approximately 100 miles by truck, unless, a buying station was set up in the immediate area.

(E)- The City of Douglas having a population of approximately 5000 gives us a very good center for supplies, ~~an~~ materials, equippment, and manpower. So far as power and water are concerned, these would have to be provided for in form of wells and mobil power units.
In event that certain materials and supplies were not available in Douglas, the City of Casper is the next nearest, distance being 50 miles west.

DAKOTA-WYOMING URANIUM, INC.

LEHR, NORTH DAKOTA

SUPPLEMENTAL SHEET AND ANSWERS TO INSTRUCTION 5 AND SUB-PARTS (A)-(B)-(C)-(D).

(A)- Uranium

(B)- Our plans call for exploration drilling beginning on Call Claim No. 5 located on the West Half and West Half of East Half of Sec. 32, Twp. 37, Range 72 Converse County, Wyoming. Will continue exploration on other claims and areas as circumstance permit. There are no existing mines on our holdings. It is our intention to do drilling in such areas indicating high readings first, and then further our exploration work on other areas.

(C)- We ~~mit~~ Plan to commence work on or about March 1, 1957 and expect to complete same within 24 months from date of exploration project contract.

(D)- This Corporation is owned and controlled by seven stock holders, out of which the officers were appointed as indicated in instruction 1. The president, who is also operation supervisor, has 12 years of actual mining experience, is acquainted with, and also knows how to operate such equipment used in mining. Two of the Directors of the Corporation have Degrees in Engineering. The rest of the officers and Directors are presently in active business operations, namely, Banking, Implement, Hardware.

UNITED STATES
DEPARTMENT OF THE INTERIOR
OFFICE OF THE SECRETARY
WASHINGTON 25, D. C.

MAY 9 - 1958

Dear Harold:

This is in response to your letter of April 26, 1958, relating to obtaining DMEA assistance in exploring the Dakota-Wyoming Uranium, Inc., property.

Mr. Mittendorf, Administrator, Defense Minerals Exploration Administration, has suggested that your corporation submit a new application for exploration aid since, possibly, the work done on your property and that done on adjacent properties has developed more favorable geologic information than was available during the first DMEA field examination. He also informed me that a copy of your original application is not available here in Washington, but he is requesting the Executive Officer, DMEA Field Team, Region III, 224 New Customhouse Building, Denver 2, Colorado, to send you a copy.

For your convenience, enclosed are five copies of the DMEA application for aid form. The extra copy may be retained for your file. Also enclosed is a copy of DMEA Order 1, Revised, for your information.

If I can be of any further aid in this matter, please advise me.

Sincerely yours,

(sgd) Fred G. Aandahl

Re: Dakota-Wyoming Uranium, Inc.
D. M. E. A. #4649

Dear Fred,

Our representative, Mr. Eldon Goebel, from the 36th legislative distric has corresponed with you several times in regards to a D. M. E. A. loan for the Dakota-Wyoming Uranium Co., Inc. of Lehr, N. Dak.

We are presently out of funds and cannot continue any exploration work. Unless we get D. M. E. A. funds we must dis-continue exploring operations and let a large investment lie idle.

Recently a good uranium strike was made about 1½ miles from our property, and there are several operating mines in the immediate vicinity including: (1) Loma Mining Co. (2) Sodak Mining Co. (3) Kerr-McGee Co.

We need your help in getting this loan processed and request you to send us information and give us advise to get action on our previously submitted application.

If you want us to submit another application we request you return our initial application for use in compiling another application.

An early reply is requested.

H F Bruschwein, Sec.

Yours very truly,
Dakota-Wyoming Uranium, Inc.

OFFICE OF THE SECRETARY

PRS 2210

OCT - 8 1957

Dear Aldon:

This is to acknowledge your letter of October 1, 1957, and the attached copy of a letter, dated September 24, 1957, from Mr. Matfield Chilson, in response to your letter of September 7, 1957, relating to the Dakota-Wyoming Uranium, Inc., application for exploration assistance.

I was out of Washington when your letter arrived and Mr. Chilson, believing you would like an immediate answer, consulted the DMEA as to why the application was denied and what procedure should be followed to have it reinstated. His letter to you of September 24 supplied this information.

Upon receiving your letter of October 1, I again contacted Mr. Rittendorf, Administrator, Defense Minerals Exploration Administration, to inquire about the possibility of obtaining aid, since you mentioned that you had completed a considerable amount of initial prospecting.

Mr. Rittendorf informed me that Mr. Chilson's letter outlined the DMEA position in regard to the Dakota-Wyoming Uranium, Inc., property; also, that if you have disclosed any additional new geologic information by your prospecting that might materially alter the DMEA decision concerning the property, a new application would certainly be given every consideration.

It has been a pleasure to receive your letters. If I can be of any further aid in this matter, please advise me.

Sincerely yours,

(sgd) Fred G. Aandahl

Mr. Fred G. Aandahl
Department of the Interior
Washington 25, D. C.

Dear Fred,

As per attached copy of letter from Mr. Hatfield Chilson our DMEA application was refused, and explanation is contained in this letter.

In bottom paragraph of first page he suggests that Dakota-Wyoming Uranium, Inc. continue prospecting for further developments.

Our prospecting funds are depleted, and in order for us to continue development we must have assistance from DMEA.

We have completed a considerable amount of initial prospecting in the form of test drilling and found favorable signs of uranium ore, but we cannot continue without financial assistance from DMEA.

We have considerable amounts of money invested in exploration and drilling equipment, and we have the manpower to go ahead with your help.

Please re-consider our application and advise. We desperately need you assistance.

Sincerely yours,

/s/ E. L. Goebel

UNITED STATES
DEPARTMENT OF THE INTERIOR
OFFICE OF THE SECRETARY
WASHINGTON 25, D. C.

SEP 24 1957

Dear Mr. Goebel:

This is in response to your letter of September 7, inquiring why the application for exploration assistance of Dakota-Wyoming Uranium, Inc., was denied and what procedure might be required to obtain favorable Government consideration of a project to explore the claims and leased land in Converse County, Wyoming, that were listed under this application.

The Defense Minerals Exploration Administration has informed me that in general its reasons for denying the above-mentioned application were based on the following information:

1. The limited drilling done by the Dakota-Wyoming Uranium, Inc., in the anomalous areas cited in the application, failed to disclose significant uranium mineralization;

2. No other radioactive zones or occurrence of uranium minerals are evident within the property area and no subsurface prospecting has been done except the above-mentioned drilling; and

3. The property does not exhibit geologic features that might mark any target for physical exploration. Therefore, Stage I of the program presented in the application must be considered as prospecting to determine if geolgic features favorable for the localization of uranium deposits are present on the property.

The DMEA program does not contemplate prospecting to develop geologic information. Therefore, it has suggested that if Dakota-Wyoming Uranium, Inc., performs the initial prospecting, and if such prospecting is successful, then the company could submit a new application based on such work in specific favorable target areas selected for exploration.

I trust the above answers your questions, however, please feel free to call upon me if there is anything further I can do to help you in this matter.

Sincerely yours,

(sgd) Hatfield Chilson

Converse County, Wyoming

Dear Mr. Erbele:

We have again reviewed the above-cited application for exploration aid and all of our information relating thereto, including that contained in a report based on a recent field examination of the subject property.

This second study did not disclose anything that would alter our previous decision. Therefore, we regret to inform you that we can only reaffirm our denial of May 9, 1957.

Sincerely yours,

C. O. Mittendorf (for)

Dear Mr. Erbele:

A review of the above-referenced application, including the information contained in the report of a field examination which was recently concluded on the subject property, does not disclose any additional information which might favorably alter the decision expressed in my letter of May 9, 1957.

I regret, therefore, to advise you that we must consider this application as closed. If, as a result of additional preliminary exploration work on the property, you desire to re-open this case, you may do so by filing a new application and supplying the new information. You may refer to the captioned application by its DMEA docket number. Material in the subject docket need not be duplicated in a new application.

Sincerely yours,

Administrator

August 21, 1957

Docket No. DMEA-4649

ADDENDUM TO "SUMMARY OF PROPOSED PROJECT"- DATED MAY 7, 1957

In response to a request, dated May 27, 1957, by Mr. Elson L. Goebel, State Representative, 36th Legislative District, forwarded through the Secretary's Office, Department of the Interior, the Field Team, on June 13, was requested to make a field examination of the subject property.

The property was examined July 10, 1957, by William N. Sharp, USGS, and E. O. Binyon, USBM, accompanied by C. J. Humphrey, the corporation's representative.

Excerpts from the Field Team Report of Examination, received August 15, 1957 follow:

The property has no history and has had no production.

> Work on the property is limited to a very small cut on the Call No. 1 claim, five shallow holes drilled around the anomalies and cut on this claim, and a few holes drilled on the Mill No. 10 claim. The anomaly and cuttings from the drill holes were checked with a counter; the readings ranged from 0.02 to 0.07 mr per hour as reported in the application.
>
> No other radioactive zones or occurrences of uranium minerals are evident within the property area and no subsurface prospecting has been done except that mentioned in connection with the radioactive spots in the thin drab-colored sandstone.
>
> Note: The surface geology reported by W. N. Sharp, (see Summary) agrees with findings reported as a result of the present examination.
>
> The field examiners state, that, the subject property does not exhibit geologic features considered to mark any target for physical exploration; and that, Stage I of the Applicant's proposed program is considered prospecting to determine if geologic features favorable for the localization of uranium deposits are present on the property.

The field examiners and Field Team again recommend that application DMEA 4649 should be denied, since there is little possibility of discovering significant deposits of uranium on the property.

Commodity Member's Comments:

James Paone, USBM, and W. P. Williams, USGS, in memoranda, dated August 20, and 21, 1957, respectively, concur in the Field Team's recommendation.

Division of Rare & Misc. Metals, F. M. Murphy, 8-21-57:

This Division agrees with the field examiner's conclusions, with respect to the favorability of the subject property for uranium ore deposition. Therefore, there is no reason to alter our previous decision to deny application DMEA-4649 on May 9, 1957.

Docket

Murphy

May 7, 1957

Summary of Proposed Project*

* See addendum, dated MAY 7, 1957

Object: Denial of application for exploration aid.

Docket No.: DMEA-4649

Commodity: Uranium

Applicant: Dakota-Wyoming Uranium, Inc.
Lehr, North Dakota

Property: Lessee of about 3,200 acres in a number of separated parcels, all within T. 37 N., R. 72 W., Converse County, Wyoming.

Date of Application: March 27, 1957

Amount of Application: $37,590.00

Referred to Region 3: April 15, 1957 with the suggestion that if the Field Team had favorable information on the area, a field examination might be warranted, otherwise the application should be denied as prospecting.

F. T. Report Received: April 29, 1957 Note: Report recommends denial of application without prejudice, and without making a field examination.

Work Proposed:

Phase I: 165 holes totaling 16,500 feet on 100-foot centers.

Phase II: 33,500 feet of drilling on 50- and 100-foot centers.

Estimated Costs:

Bulldozer, 20 hrs. @ $12/hr.	$240.00
50,000 ft. drilling @ $0.60/ft.	30,000.00
Labor, supervision, consultants	5,000.00
Pickup truck, use @ $0.10/mile	1,000.00
Geiger Counter & scintillator (depreciation)	200.00
Miscellaneous	650.00
Contingencies	500.00
TOTAL	$37,590.00

Excerpts from Field Team Report:

W. N. Sharp, Chief, USGS, Powder River Basin Studies, has mapped the proposed project area in some detail. He reports that:

"Uranium in the Wasatch formation is associated with reddish-drab sandstone lenses. Some of the claims (in secs. 29, 30, 31, and 32) overlie reddish sandstone either in outcrop or at shallow depth. However,

the sandstone appears to be reddish throughout and no change to drab color is apparent within the area of the claims. Small occurrences of uranium minerals could be present but geological features that are considered guides to possible ore deposits are not apparent. The remaining claims lie outside the zone of reddish sandstones and are not considered favorable for uranium deposits.

Based on Mr. Sharp's report, the Field Team notes that there are no geologic factors presently known on the property upon which a drilling project could be based, and therefore the chance of finding ore would be remote.

The Field Team recommends denial of the application without prejudice.

Commodity Member's Comments:

USBM, James Paone, May 2, 1957:

Mr. Paone concurs in the Field Team's recommendation.

UBGS, N. E. Nelson, May 3, 1957:

Mr. Nelson agrees with the findings noted by Mr. Sharp, and concurs in the Field Team's recommendation to deny the application without prejudice, awaiting the discovery of a less general target.

Rare & Miscellaneous Metals Div., F.M. Murphy, May 7, 1957:

Although Mr. Sharp states that a part of the claim area has a partially favorable sandstone structure, there appears to be no specific target area for the proposed work.

The Applicant's drilling around two anomalous areas showed negative results, which in itself is not too encouraging.

Conclusions and Recommendations:

Based on Mr. Sharp's report, this Division recommends that the subject application be denied without prejudice. If additional new and more favorable information is presented by the Applicant, a new application should receive consideration.

August 22, 1957

Memorandum

To: E. W. Ellis, Defense Minerals Exploration Administration

From: W. P. Williams, U. S. Geological Survey

Subject: Review of field examination report, DMEA 4649, (uranium), Dakota-Wyoming Uranium Company, Inc., Fox et al claims, Converse County, Wyoming

The Field Team had previously recommended denial of the application without field examination. N. E. Nelson concurred, on May 3, 1957, with the Field Team's recommendation.

A field examination of the property was made, nonetheless, which did not result in any change in the recommendations of the Field Team. The field examiners report that favorable lithologic and color changes are not present in the rocks on the claims and that the chances for making a significant ore discovery are not good.

Because of unfavorable geological conditions on the property, the Field Team again recommends denial of the application; and I agree with their decision.

Memorandum

To: Secretary to the Operating Committee, DMEA

From: DMEA Field Team, Region III

Subject: Docket DMEA 4649 (Uranium) Dakota-Wyoming Uranium Company, Inc. (Fox et al. Claim Groups and Leased Land), Converse County, Wyoming - Joint Report of Examination

Enclosed are the original and two copies of the Joint Report of Examination on the subject property by E. O. Binyon, USBM, and W. N. Sharp, USGS.

The field examiners conclude that the probability for making a significant discovery is not sufficiently promising to justify Government participation. Accordingly, they recommend that the Applicant's work proposal be denied in which the Field Team concurs.

Please note that this application was denied without a field examination by the Administrator's letter of May 9, 1957. The property was examined as instructed in the Chairman's letter of June 13, 1957.

To: Executive Officer, DMEA Field Team, Region III

From: E. N. Harshman

Subject: DMEA Docket 4649 (Uranium) Dakota-Wyoming Uranium Company, Inc. (Fox et al. claim groups and leased land), Converse County, Wyoming

Enclosed are the original and eight copies of a joint examination report by W. N. Sharp, U. S. Geological Survey, and E. O. Binyon, U. S. Bureau of Mines, covering their examination of the subject property.

The applicant proposes to explore for uranium in the Wasatch formation on the property by a two-stage drilling program estimated to cost $37,590.

The examiners conclude that there are no known geologic features that indicate favorable targets on the claims or leased land and that the proposed work is in effect prospecting to determine the presence or absence of favorable targets. They recommend denial of the application.

I concur with the conclusions and recommendations.

DAKOTA WYOMING URANIUM COMPANY, INC.
FOX ET AL. CLAIM GROUPS AND LEASED LAND
CONVERSE COUNTY, WYOMING

INTRODUCTION AND SUMMARY

Dakota Wyoming Uranium Company, Incorporated, Lehr, North Dakota, has applied to the Defense Minerals Exploration Administration for assistance in exploration of the Fox et al. claims groups and leased deeded land for uranium. These claims and leased land are in secs. 29, 30, 31, and 32 and secs. 11, 12, 13, 15, 17, 18, 19, 21, 22, 23, 27, and 28, T. 37 N., R. 72 W., 6th principal meridian, Converse County, Wyoming. Exploration of the property was proposed on the basis of geologic favorability of the Wasatch formation as a host rock for uranium ore deposits. The applicant has proposed a two-stage program of non-core rotary drilling consisting of a total of 50,000 feet of drilling at a total estimated cost of $37,590.00.

The property was examined July 10, 1957, by William N. Sharp, geologist, U. S. Geological Survey, and E. O. Binyon, mining engineer, U. S. Bureau of Mines. C. J. Humphrey, the company representative, accompanied the team on the examination.

Although the property is underlain by the Wasatch formation, the formation within the property area does not exhibit the geologic features considered as favorable for uranium deposition. That part of the property

covered by the claims groups is within the "red sandstone zone"; however, this feature alone is not indicative of favorability of the sandstone as a host for uranium deposits. It is doubtful that a significant discovery of uranium would be found on the property, and therefore a denial of the application is recommended.

ACKNOWLEDGMENTS

Acknowledgment is due Chester J. Humphrey for directing the team over the property, and to Howard Geslin of the Atomic Energy Commission, Casper, Wyoming, for giving his time to discuss the geology and economic potential of the property.

LOCATION, TOPOGRAPHY, AND PHYSICAL FEATURES

The five claim groups, the Fox, Mill, Ore, Call, and Odd claims, are in secs. 29, 30, 31, and 32, and the leased lands cover a part of secs. 11, 12, 13, 15, 17, 19, 21, 22, 23, 27, and 28, all in T. 37 N., R. 72 W., 6th principal meridian, Converse County, Wyoming (fig. 1). To reach the property from Douglas, Wyoming, take U. S. highways 20 and 87 toward Casper, go 2.8 miles to the Orpha road, turn right and continue for 18 miles to a junction with the Highland Loop road, turn right onto the Highland Loop road and continue for 15.8 miles to the Carl Manning ranch which is on a part of the property. The approximate center of the claim group is 2-1/4 miles due south of the ranch and the northernmost parcel of leased land is due east and about 2 miles distant from the ranch.

FIGURE 1 - LOCATION MAP, DAKOTA WYOMING URANIUM, INCORPORATED, FOX ET AL CLAIMS GROUPS AND LEASED LAND, CONVERSE COUNTY, WYO. DMEA 4649

Douglas, Wyoming, a railpoint on the Chicago, Burlington, and Quincy and the Chicago and Northwestern railroads is the nearest sizeable community and a center for labor, small supplies, and equipment.

Relief in the area included by the property is moderate; altitudes range from about 4,950 to about 5,300 feet. There are no outstanding topographic features. The land surface in the vicinity of the property is gently rolling terrain incised in the high land areas by steep walled gullies. Relief in a few places marked in part by prominent cut banks is abrupt and may be as much as 200 feet. Major drainage of the area flows north and northwest through wide valleys to join the Dry Fork of the Cheyenne River.

The climate is moderate in summers and fairly severe in winters, typical of the north central plains. Blizzard conditions are not uncommon and outside operations may be difficult if not impossible for short periods. During the spring the snow and rainfall may make travel over the dirt roads extremely difficult.

There is no electric power on the property. Water for drilling or small mine use would have to be obtained from stock reservoirs or from the ranches. Vegetation consists predominantly of grasses, sage, and cacti. Along the creeks there is some growth of cottonwood trees.

HISTORY, PRODUCTION, AND OWNERSHIP

The property has no history and has had no production.

The Fox Nos. 1 through 5, Ore Nos. 1 through 10, Mill Nos. 1 through 12, Odd Nos. 1 through 18, and Call Nos. 1 through 18, unpatented lode mining claims are owned by Chester J. Humphrey, Douglas, Wyoming, and are held by the applicant under a contract to purchase. The owners of the leased land are Carl L. Manning and Genevieve Manning, Douglas, Wyoming, who have leased the following parcels of land to Chester J. Humphrey:

T. 37 N., R. 72 W., 6th principal meridian

Sec. 11:	SE¼	Sec. 21:	E½W½, W½E½, SE¼SE¼
Sec. 12:	SW¼SW¼	Sec. 22:	S½N½, N½S½, SW¼SW¼
Sec. 13:	W½	Sec. 23:	N½
Sec. 15:	S½	Sec. 27:	S½NE¼, SE¼, NW¼, NW¼SW¼
Sec. 17:	S½SE¼	Sec. 28:	E½E½
Sec. 18:	S½SW¼	Sec. 30:	SE¼
Sec. 19:	E½NE¼	Sec. 31:	NE¼

The applicant now holds these leased lands under a contract to purchase from Chester J. Humphrey.

PRESENT STATUS

Work on the property is limited to a very small cut on the Call No. 1 claim, five shallow holes drilled around the anomalies and cut on this claim and a few holes drilled on the Mill No. 10 claim. The anomaly and cuttings from the drill holes were checked with a counter; the reading ranged from 0.02 to 0.07 mr per hour as reported in the application.

A rotary drill and a compressor were the only pieces of equipment on the property.

GEOLOGY

The Powder River Basin in northeastern Wyoming is a physiographic as well as a structural basin, bounded by the Bighorn Mountains and the Laramie Range on the west and south and by the Black Hills and Hartville uplift on the east. The basin is underlain predominantly by the Wasatch formation of Eocene age. The Fort Union formation of Paleocene age underlies the Wasatch formation and crops out around the periphery of the Basin.

The Wasatch formation is a sequence, about 500 to 1,000 feet thick in the southern Basin, of flat-lying claystone and siltstone beds which are interbedded with randomly spaced sandstone lenses. Coal and carbonaceous shale beds are also numerous.

The amount of sandstone in the formation is much greater in the center of the basin than at the margins. This change in predominant lithology from the center to the margin enables the Wasatch to be divided into two facies (fig. 2). Around the margin of the basin the formation is characterized by gray claystone and siltstone and numerous coal and carbonaceous shale beds. Sandstone lenses are few and are generally inconspicuous.

In the central part of the basin the formation is characterized by much sandstone in the form of broad lenses and narrow channel-fillings. Sandstone in this facies constitutes as much as one-third of the formation.

The sandstone of the Wasatch formation in the Powder River Basin is generally drab, yellowish-gray to yellowish-brown but sandstone units in a zone along the axis of the basin are commonly to predominantly reddish, pink and grayish-red. Not all the sandstones within this area are red; many lenses are red only in part and some are entirely drab. Where it is found in a lens, the red tint affects a large continuous mass of the rock; it does not occur as isolated splotches of color. The contact of red color within any partly red sandstone lens is generally very sharp but irregular in plan and cross section. The contacts are generally convex into the drab sandstone. Lobes and large arms of red color extending into drab sandstone are common contact features.

The restrictive occurrence of reddish sandstone in a definite portion of the Wasatch outcrop has suggested outlining a "red sandstone zone," that is, the smallest continuous area which will contain all known

Twf / Tws — Wasatch formation: Twf, dominantly claystone and siltstone with numerous coal beds; Tws, dominantly sandstone as lenses in claystone and siltstone sequence.

Tfu — Fort Union formation

Fault

Outline of "red sandstone zone"

X — Uranium deposit

FIGURE 2.-LITHOFACIES AND COLOR IN SANDSTONE AS RELATED TO URANIUM DEPOSITS IN WASATCH FORMATION

outcrops of red sandstone. The boundary is developed by circumscribing the mapped positions of all red sandstone occurrences as closely as possible with a single smooth line.

The "red sandstone zone" thus delineated is about 70 miles long and 5 to 20 miles wide. The long axis of the zone closely parallels the axis of the basin. It extends from near Douglas, at the southern edge of the basin, to several miles north of the Pumpkin Buttes in the central part of the basin (fig. 2).

The uranium deposits of the Wasatch formation are in sandstone units in the "red sandstone zone." They are mostly in units that are only partly red because the bulk of the uranium minerals in the deposits are concentrated in the drab sandstone at and close to red color contacts and appear to form larger concentrations where the color contact is highly irregular. Without exception, the major uranium deposits that have been mined in the basin are not only at a color change within a sandstone unit, but also very near the boundary of the red sandstone zone in the basin (fig. 2).

The deposits consist largely of yellow uranium minerals, tyuyamunite, carnotite, uranophane, and locally liebigite that are disseminated in the sandstone. At places they contain small masses of uraninite- and pyrite-cemented sandstone, usually rimmed by thick halos of yellow oxidized minerals. The pyrite and uraninite appear to have been localized by coalified wood fragments.

Black, sub-metallic nodules and irregular masses of manganese-oxides occur near and at the surface in many deposits. Some of these masses also contain yellow uranium minerals. A few small deposits consist almost entirely of such uraniferous manganese-oxide concretions.

The land under lease and claim by Dakota-Wyoming Uranium Company covers terrain underlain predominantly by the Wasatch formation although Fort Union strata are exposed in a minor part (fig. 3). The part of the property in the southwest corner of the township, covered by the Mill, Fox, Ore, Odd, and Call claims, is within the "red sandstone zone" of the Wasatch formation (fig. 3), and is in part underlain by relatively thick (10 to 30 feet) red sandstone units. The fact that red sandstones are exposed is not considered sufficient reason for predicting an ore deposit.

The red sandstone units exposed within the property boundaries cap and outcrop along the flanks of a highland area and on several ridge noses between gullies that drain the highland.

The red sandstone units are apparently continuously red; that is, no color contact or change is exposed. With this fundamental feature missing in the areas of interest, no specific program for exploration is feasible.

One small zone of "high" radioactivity on the Call No. 1 claim (fig. 3) has been explored by a small shallow (3-foot) shoveled pit, and several shoveled holes 1' x 2' x 1' deep. A small showing of thinly disseminated yellow uranium minerals in clay matrix is evident in the pit,

closely related to carbonaceous trash. The host unit for these "hot spots" which are only moderate to weakly radioactive is a thin grayish-brown, medium-grained sandstone lens. This thin lens underlies a thick clay-coal sequence that in turn lies stratigraphically above the thick red sandstone units of the general area. The thin drab sandstone is not extendable to thicker parts within the claims area nor is that part which is exposed considered significant in terms of hidden ore grade deposits.

No other radioactive zones or occurrences of uranium minerals are evident within the property area and no subsurface prospecting has been done except that mentioned in connection with the radioactive spots in the thin drab sandstone.

ORE RESERVES

The property has no known ore reserves.

APPLICANT'S PROPOSED EXPLORATION PROGRAM

The applicant proposes to explore the Wasatch formation by a two-stage non-core drilling program.

Stage I is to consist of 165 non-core holes, at an average depth of 100 feet (without consideration of local relief) or a total drilling footage of 16,500 feet. The holes are to be spaced on 1,000-foot centers, evenly distributed over the property.

Under Stage II 33,500 feet are to be drilled on 50- and 100-foot centers in favorable areas disclosed by Stage I drilling. Estimated cost of the entire program is $37,590.00.

A breakdown of the applicant's cost estimate is as follows:

Stage I and Stage II

Independent Contracts		
Bulldozer work to prepare some of the drill locations: 20 hours @ $12.00/hr.	$ 240.00	
Non-core drilling		
50,000 feet @ $.60 per foot	30,000.00	
Total Independent Contracts		$30,240.00
Labor, supervision, consultants		
Labor: Man to watch drilling and log holes @ 500.00/mo. for 6 mos.	3,000.00	
Surveyor: 100 hours @ 5.00/hr.	500.00	
Geologist: 20 days @ $75.00/day	1,500.00	
Total Labor, supervision, consultants		5,000.00
Operating Material and supplies		none
Operating equipment		
1 Chevrolet pickup truck for use of person overseeing drilling and logging at 10¢ per mile, 10,000 (estimated) miles	1,000.00	
Geiger counter and probe cost $600.00 one year's usage	120.00	
Scintillator cost $400.00 one year's usage	80.00	
Total operating equipment		1,200.00

Miscellaneous		
Sample assays: 100 samples @ $3.50	$ 350.00	
Workman's compensation	300.00	
Total Miscellaneous		$ 650.00
Contingencies		500.00
Total		$37,590.00

The proposed program is poorly conceived; no alternative program is recommended.

CONCLUSIONS AND RECOMMENDATIONS

The Dakota-Wyoming Uranium Company property, leased and claimed in T. 32 N., R. 72 W., does not exhibit geologic features considered adequate to mark any target for physical exploration. Stage I of the applicant's proposed program is considered to be prospecting to determine if geological features favorable for the localization of uranium deposits are present on the property.

From data available to the examiners, it is concluded that there is little possibility of discovering significant deposits of uranium on the property, and denial of the application is recommended.

Re: Docket No. DMEA-4649 (Uranium)
Dakota-Wyoming Uranium, Inc.
Fox, et al., Groups and Leased Land
Converse County, Wyoming

Dear Mr. King:

Enclosed are two copies of a letter, dated May 27, by Mr. Goebel to Assistant Secretary Aandahl, and Mr. Aandahl's response, dated June 7, 1957, which are self-explanatory.

Will you kindly make arrangements for the field examination mentioned in Mr. Aandahl's letter. The subject application has been denied and the docket closed; therefore, in the event a project to explore the property appears to be warranted, the application will require a new docket number.

Kindly let us have your report and recommendations as promptly as possible.

Sincerely yours,

George C. Selfridge

Chairman, Operating Committee (JHB)

JUN - 1957

Dear Eldon:

This is with reference to your letter of May 27, 1957, which relates to an application under Docket No. DMEA-4649 by Dakota-Wyoming Uranium, Inc., covering the Fox, et al., groups of claims and leased lands in Converse County, Wyoming.

Mr. Mittendorf noted that, given additional work on your part had indicated a definite exploration target, he would request the DMEA Field Team to schedule a field examination of the subject property.

The date of the examination will be arranged with you by Mr. E. B. Harstman, Acting Executive Officer, DMEA Field Team, Region III, 826 New Customhouse Building, Denver 2, Colorado.

If there is anything additional I can do in this matter, please call upon me.

Sincerely yours,

(sgd) Fred G. Aandahl

Re: Docket #DMEA-4649 (Uranium)
Fox, et al., Groups and Leased Land
Converse County, Wyoming

Dear Fred,

A group of us local men organized into a company, namely, Dakota-Wyoming Uranium, Inc. and invested considerable funds for uranium exploration work. Above docket will give you all the details.

We have a large area under lease and in government lode claims in Converse County, Wyoming. We have invested in a complete drilling unit and have done some preliminary work which appears promising.

We need and must have Defense Minerals Exploration Program financial assistance to continue with the exploration. We received a letter dated May 9, from Mr. O. O. Mittendorf, Adminstrator of DMEA, and he refused to give us any financial assistance. Since our application was submitted our geologist and drilling crew have advised that there are indications of commercial uranium ore.

We cannot continue without DMEa help, and all our investments and equipment are at a stand still until we get your financial aid.

We are a North Dakota concern, and we certainly would appreciate any help you could give us.

Would it help if I wrote to Otto or Milt, or made a trip to Washington, D.C. to see you personally?

Please advise immediately.

Yours very truly,

/s/ Eldon L. Goebel

MAY - 9 1957

Mr. Albert Erbele, President
Dakota-Wyoming Uranium, Inc.
Lehr, North Dakota

Re: Docket No. DMEA-4649 (Uranium)
Fox, et al., Groups and Leased Land
Converse County, Wyoming

Dear Mr. Erbele:

Your application for aid in an exploration project and other information available to us in Washington concerning your above-named property have been reviewed.

Projects approved by the Defense Minerals Exploration Administration must, in its judgment, show definite promise of yielding materials of acceptable grade in quantities that will significantly improve the mineral supply position for the National Defense Program.

Careful study of all our information indicates that the probability of disclosing significant ore reserves is not sufficiently promising to justify Government participation. We regret to advise you that, under these circumstances, your application for exploration assistance is denied. Such denial, however, is made without prejudice to the property. In the event further work on your part discloses new and more favorable evidence of ore deposition on the property, we shall be pleased to consider a new application.

We wish to thank you for your interest in the Defense Minerals Exploration Program and for bringing your property to our attention.

Sincerely yours,

C. O. Mittendorf (for)

Re: DMEA 4649
Dakota-Wyoming Uranium Co., Inc.
Odd, et al. Claims
Converse County, Wyoming
$37,590.00 - Uranium

Memorandum

To: E. W. Ellis, Defense Minerals Exploration Administration

From: N. E. Nelson, U. S. Geological Survey

Subject: Review of Field Team memorandum

The applicant requested assistance in exploring by plug drilling a large area, on a map of which 2 anomalies were plotted as spots. Drilling around the anomalies had shown negative results.

The proposed drilling lacked a target other than that a large part of the project area is underlain by Wasatch rocks which, in some areas, are uranium bearing.

The application was referred to Mr. W. N. Sharp, a Project Chief of the Geological Survey, who has mapped the project area in some detail.

Based on Mr. Sharp's comment on the probability of finding material of ore grade, the Field Team recommends that the application be denied without prejudice awaiting the discovery of a less general target.

I concur with the recommendation.

Memorandum

To: 220 Acting Executive Officer, DMEA Field Team, Region III

From: E. N. Harshman
John F. Shaw

Subject: DMEA Docket 4649 (Uranium), Dakota Wyoming Uranium Company, Inc. (Odd, etc. claims), Converse County, Wyoming

In a letter of April 15, 1957, transmitting the subject application to the field, the Chairman of the Operating Committee states--"The application is referred to the Field Team with the thought that it may have information regarding the favorableness of the proposed project area and possible ore trends. Without such data, a field examination cannot be justified, and the proposed work should be denied without prejudice as essentially prospecting for possible ore trends."

W. N. Sharp, Project Chief of the U. S. Geological Survey Powder River Basin Studies has mapped the proposed project area in some detail and was therefore asked for his comments on the aspects of the proposed work and the ore potential of the area. He reports as follows:

"Uranium in the Wasatch formation of the Powder River Basin has a conspicuous and consistent association with reddish color in

Reviewed by
DMEA OPERATING COMMITTEE
5-1-57
(date)

generally drab sandstone lenses. The boundary of reddish color in any sandstone lense is particularly favorable for concentrations of uranium minerals.

"The property controlled by the Dakota-Wyoming Uranium Company, Inc., for the exploration for and mining of uranium, is a number of separated parcels all within T. 37 N., R. 72 W., Converse County, Wyoming. That component covered by unpatented claims in the southwest corner of the township (sections 29, 30, 31, and 32) is the only component that overlies ground considered geologically to be favorable for prospecting.

"Some of the claims overlie reddish sandstone either in outcrop or at shallow depth. However, the sandstone appears to be reddish throughout and no change to drab color is apparent within the area of the claim. Small occurrences of uranium minerals could be present but geologic features that are considered guides to possible ore deposits are not apparent.

"The remaining components of the controlled property lie outside the zone of reddish sandstones in the Wasatch formation and are not considered favorable for uranium deposits. Sandstones as a conspicuous part of the lithologic sequence (which is essential as an adequate host for the uranium minerals) as well as color features (that generally accompany any deposition of uranium) are both missing.

"Some of the property overlies a coal zone that marks the Wasatch-Fort Union contact. This feature alone is not considered a favorable guide for prospecting in Powder River Basin."

From Mr. Sharp's comments it appears that there are no geologic factors upon which to base an exploration program on the Dakota Wyoming Company's property, that the probability of finding significant deposits of uranium ore are remote, and that any work approved at this time would be prospecting.

Denial of the application for exploration assistance, DMEA Docket 4649, without prejudice is recommended.

From: DMEA Field Team, Region III

Subject: Docket DMEA-449 (Uranium) Dakota-Wyoming Uranium, Inc. (Fox, et al., groups and Leased Land) Converse County, Wyoming

Enclosed is the following material relating to the subject docket.

1. Copy of amended application for Government assistance in exploration work under the DMEA program.

2. Memorandum of Review by James Paone, USBM.

3. Memorandum of Review by N. E. Nelson, USGS.

4. Letter of transmittal of the foregoing to this office, dated April 15, 1957, from the Chairman, Operating Committee, DMEA.

5. Routing control sheet.

Please note the comments made by the Chairman in the third paragraph of his letter regarding the need for additional information before a field examination is justified. Only in the event a field examination is warranted should a joint report of findings and recommendations be submitted; otherwise, notify us in the usual manner, and we will concur in your recommendations and notify the Washington Office.

Twelve extra copies of each map used in the joint report which show the land to be subordinated and the location and extent of recommended work, relative to property boundaries, should be submitted if Government participation is recommended.

The Bureau of Mines' copy of the application should be returned to this office with the joint report of examination. Mr. Harshman will forward the Survey's copy of the application to the Washington Office.

Dakota-Wyoming Uranium Inc.
Fox, et al., Groups and Leased Land
Converse County, Wyoming

Dear Mr. Harshman:

The captioned application is referred to Region III Field Team for investigation, a field examination if deemed advisable, and recommendations.

Enclosed are copies of memoranda, dated April 9 and 10, 1957, by N. E. Nelson, USGS, and James Paone, USBM, respectively. Their comments cover a review of the amended application which was received in response to Mr. Ellis' letter of February 27, 1957, requesting additional information. Also enclosed, for Field Team use, are three copies of the amended application mentioned above and one copy of the original application.

The application is referred to the Field Team with the thought that it may have information regarding the favorableness of the proposed project area and possible ore trends. Without such data, a field examination cannot be justified, and the proposed work should be denied without prejudice as essentially prospecting for possible ore trends.

Sincerely yours,

George C. Selfridge

Chairman, Operating Committee (GCS)

Dear Mr. Bruschwein:

Your letter of April 3, 1957, submitting four sets of an amended application, under the captioned docket number, has been received. Your application, as amended, is now being referred to Mr. E. N. Harshman, Acting Executive Officer, DMEA Field Team, Region III, 224 New Customhouse Building, Denver 2, Colorado, for further consideration.

The Regional Office will contact you at an early date if additional information is required.

Sincerely yours,

C. O. Mittendorf (for)
Administrator

Re: DMEA 4649
Dakota Wyoming Uranium Co., Inc.
Odd, etc. claims
Converse County, Wyoming
$37,590.00 - Uranium

Memorandum

To: ~~E. W. Ellis,~~ Defense Minerals Exploration Administration

From: N. E. Nelson, U. S. Geological Survey

Subject: Review of revised application

The applicant requests assistance in exploring by plug drilling a large area, 3,200 acres, subject to lease and several groups, 63 claims, of unpatented mineral claims.

In support of the application is a map showing three so-called anomalies. Two of the anomalies, actually plotted as spots, show .05 MR/Hr and one shows .07 MR/Hr. Drilling is said to have been done around the anomalies with negative results.

Perhaps the large acreage is underlain by the oft times uranium-bearing Fort Union-Wasatch rocks, and an examination may be warranted, but, as presented, such is not the case.

Referral of the application to the Field Team for appropriate action is recommended. If the Lux Group (4716) is examined, the referenced acreage could be looked at on the same trip.

Re: Docket No. DMEA-4649 (Uranium)
Fox, et al., Groups and ~~Leased Land~~
Converse County, Wyoming

Dear Mr. Erbele:

A review of your above-referenced application discloses that it lacks essential information which would enable us to judge the merits of the proposed project.

In order that we may process your application in a satisfactory manner, it is suggested that you submit as much of the following additional information as possible:

1. A map or sketch showing the individual claims (with names) and the leased land. The map should be drawn on a large enough scale to show:

   a. The location of radioactive areas;
   b. The location of the holes previously drilled;
   c. The location of the proposed holes and their collar elevations; and
   d. The outline of the rock formations cropping out in the project area and their classification.

2. A narrative report containing the following:

   a. The sequence of rock formations covering the area and the inferred potential ore-bearing horizon or zone to be explored;
   b. The estimated average depth of the holes required to penetrate the ore zone; and
   c. The geologic logs, radioactivity probing data, and assay data, relating to the holes previously drilled on the property.

3. Copies of bids from three independent contractors for the proposed drilling.

Kindly forward four complete sets of all data submitted.

C

8623

We will hold your application in abeyance pending receipt of the above-requested data. If you anticipate that it will require more than 30 days from the date of this letter to compile and submit this information, please advise this office the approximate date we may expect to receive it.

Sincerely yours,

Ernest Wm. Ellis, Chief
Rare and Miscellaneous
Metals Division

Dear Mr. Erbele:

Receipt is acknowledged of the captioned application transmitted to this office by Mr. Ernest E. Thurlow, Manager, Denver Area Office, AEC.

The application is being forwarded to the DMEA Washington, D. C. office for review. You will, no doubt, be advised in the near future by them of its disposition.

Very truly yours,
