Idm- E1136 Little Mo.

REMARKS:

1. The Postmaster at Shoshoni, Wyoming, informed me that P. O. Box 321 (shown on the contract) is no longer held by Little Mo Mining, Inc; there was no forwarding address. He understands that the property changed hands and that Millard Dickey, P. O. Box 41, Moorecroft, Wyoming should be able to provide details. The Postmaster further stated that this information was confidential; therefore his position should not be implicated in any inquiries we make.

2. Inspection of the property disclosed no sign of activity. No one was around. I observed no stockpile.

3. Mr. M. Clifford Smith, Assistant Chief, Casper Office, AEC, could not verify the reported change in property status.

4. The production reported on Page 2 of the semiannual report is the only production to come from the land subordinated to DMEA. According to Mr. Smith, the production came from the Arrowhead No. 2 claim in the second quarter of 1958. Sporatic mining operations have been carried on the Arrowhead No. 1 as an open pit operation. Evacuation is down the Granite-Granite debris contract. However, early in 1958, operations had reached a point where the pit face or wall was a hazard. Therefore, the Operators moved south on to the Arrowhead No. 2 claim where the anomalous zone was closer to the surface. Employing a 5/8 cu. yd. shovel, the Operator attempted to strip and mine. However, the granite boulders encountered were too large to move. Breaking the boulders with powder proved uneconomical. Accordingly, the operations are presently shut down and future exploitation is questionable.

5. There has been no stockpiling of production subject to DMEA royalty.

Dear Mr. Conners:

Enclosed is our schedule of ore sold by lot and also payment liability data for the Arrowhead #2 Claim.

Included is a copy of each ore settlement to date and our check in the amount of $5,964.96 for D.M.E.A. Royalty.

I enjoyed our recent chat and appreciate your cooperation in settling the Titan Mining question.

Very truly yours,

SUSQUEHANNA-WESTERN

DMEA-4709 (Uranium)
Contract No. IDM-E1136
Little Mo Mining Inc.
Fremont County, Wyoming

Dear Mr. Connors:

We enclose at this time our check in the amount of $1,869.16 payable to the Office of Minerals Exploration to cover royalty payments on production under the captioned contract for the period during which Hilmer-Cummings Mining Company was the operator of the claims.

The period of Hilmer-Cummings operations was from July 8, 1960, through July 31, 1961. We also enclose a settlement sheet evidencing the calculation of the royalty due for such period under the DMEA contract. The settlement sheet is self-explanatory, but in the event you have any questions as to it, please feel free to contact us.

In accordance with a letter from the Director, Office of Minerals Exploration, Washington, D. C., this payment is being made to you, as will be all future payments. We were advised by the Director of OME that $158.66 had previously been repaid by the operator, and that the balance due under the contract prior to the payment enclosed with this letter, was $11,851.25.

Very truly yours,

SUSQUEHANNA-WESTERN, INC.

									$1869.16

The above is a recap of total mill receipts from the Arrowhead #2 claim during the period under which this property was being operated by the Hilmer Cummings Mining Company. Settlements prior to these dates, on which a royalty of 5% was payable to the Defense Minerals Exploration Division, were paid by the Little Mo Mining Company, its operator. Subsequent to the final settlement date of July 31, 1961, Susquehanna-Western, Inc. has been the sole operator and, as accrued, DMEA royalties will be paid on all production.

From: Alternate Acting Executive Officer, DMEA Field Team, Region III

Subject: Docket DMEA-4709 (Uranium) Contract Idm-E1136, Little Mo Mining, Inc. (Mint, et al. claims) Fremont County, Wyoming. FINAL PAYMENT

Reference is made to our memorandum of April 24, 1958, whereby we forwarded the final Form MF-104, Operator's Monthly Report and Voucher, for March 1958, and requested that you withhold an amount of $500.00 from reimbursement to the Operator pending resolution of matters prerequisite to closing the account.

The Operator's final report has been received, therefore we recommend that final payment to the Operator be made on the following basis, which is in conformance with the Report of Review of reported project costs by the Contract Administration and Audit Division, dated June 11, 1958.

<u>Basis for Final Payment</u>

Total accepted cost - - - - - - - - - - - -	$16,013.22
Government participation at 75 percent- -	$12,009.91
Total prior payments - - - - - - - - - - -	11,509.16
Balance due the Operator - - - - - - - - -	$ 500.75

Date: April 25, 1958
Payee's Reference: March 1958

DMEA-4709

Gentlemen:

Upon examination of the above Payee's Reference a difference was found which made it necessary to suspend your account accordingly:

Amount Claimed $ 3,066.75

Difference $

Amount Approved $ 3,066.75

The reason for the difference was due to:

Withhold an amount of $500.00 from reimbursement to the Operator, pending resolution of matters prerequisite to closing the account.

April 24, 1958

Memorandum

To: T. A. Christensen

From: Acting Executive Officer, DMEA Field Team, Region III

Subject: Docket No. DMEA 4709 (Uranium) Contract Idm-E1136, Little Mo Mining, Inc. (Mint et al. claims) Fremont County, Wyoming - Operator's Monthly Progress Report for the month of March, 1958

Enclosed are the original and four copies each of Forms MF-104 and MF-104A, Operator's Narrative Report, and Engineer's Report for the above period.

The work is being performed partly under independent subcontract, and partly at fixed unit costs. The drilling rates are as low or lower than the rates contained in the lowest and best bid submitted with the application. Bids were not submitted for bulldozer work; however, the bulldozing rates are in line with the standard rates prevailing in the project locality for the size and make of bulldozer used on the project. Under the circumstances, the rates for the work performed under independent subcontract are considered to be reasonable.

We consider that the Operator has complied with the intent of the contract, and the work for which payment is recommended is acceptable to the Government. Payment is recommended for 75 percent of the amount reported on Form MF-104 for March, 1958, contingent on your verification of the correctness of applicable rates and arithmetical accuracy of computations, except for the following deduction:

<u>Withhold</u> an amount of $500.00 from reimbursement to the Operator, pending resolution of matters prerequisite to closing the account. All currently approved project work has been completed, and termination of the contract has been requested by the Operator. The Operator's final report has been received.

Notes: Correction has been made by the Operator under "Totals to Date" for an arithmetical error of $1.00, in Incidental Allowance, which error was made on the January 1958 Voucher. The necessary correction has not been made under "Monthly Total" on the form, therefore adjustment cannot be made by the Government at this time, but presumably can be considered during the subsequent Audit or Review by the Contract Administration and Audit Division.

As noted in the Engineer's Report, Form MF-104 also contains a typographical error in the amount previously reported for Standby Time. This error is not reflected under "Totals to Date".

Remarks:

Memorandum

To: Acting Executive Officer, DMEA Field Team, Region III

From: E. O. Binyon

Subject: Docket DMEA 4709 (Uranium) Contract Idm-E1136,
Little Mo Mining, Inc. (Mint et al claims)
Fremont County, Wyoming -- Progress report for March 1958

An inspection of the drilling completed during the period was made April 17, 1958. There was no one at the property at the time of the inspection. This completes the Stage II drilling thus far approved.

The holes were checked as to depth and location and were found to be as reported. A check of the samples from the mineralized holes was made with a geiger counter and the results were approximately the same as shown on the operator's logs. The mineralized holes with the radiometric results are as follows:

Hole No.	Depth	Depth of Mineralization	eU_3O_8 Probe Results	U_3O_8 Chemical Results
5E	100	38.5-41.5	.33 aver.	.31 aver.
6E	100	32 -33.25	.12	
		37.5-38.25	.13	.17 38-40
		52 -53	.09	.12 52-54
7E	100	60 -64	.01-.02	.03
		76 -78	.20 aver.	.26 aver.
8E	100	56 -59	.05-.07	
		67.5-71.25	.08 aver.	.16 68-70
				.09 68-72

A check of the MF-104 and MF-104A forms show them to be correct except that in the column "Totals Previously Reported" the entry opposite Stand by time is $106.25 and it should be $100.00. The Monthly total and total under Totals to Date are correct.

The work was done in conformance with the terms of the contract and the charges for drilling, analyses and dozer work are properly documented.

It is recommended that the operator be paid $3,066.75 or the Government's share at 75 percent of $4,089.00 the amount claimed. The contract expires June 1, 1958.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

DMEA
DEPARTMENT OF THE INTERIOR
APR 3 - 1958
REGION III
DENVER, COLORADO

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

GPO 872894

ARTICLE 7 (b) (3) NARRATIVE REPORT FOR MARCH 1958

STAGE II DMEA 4709

This report covers work involved in drilling holes "1W, 2W, 3W, 4W, 5E, 6E, 7E & 8E" under Stage II.

Holes 1W, 2W, 3W, 4W are 125 feet deep. Holes 5E, 6E, 7E, 8E are 100 feet deep. (See Cross Section Chart, Figure 5B and Radiometric Log Sheets.)

Beavers & Harris Drilling Co. of Riverton, Wyoming were the drilling contractors. (See Equipment list, Annex II.)

John Kummerfeld (Contractor) was the contractor for the building of the access roads and drill sites. (See Equipment List, Annex II.)

Uranium Center Laboratory, of Riverton, Wyoming were the assayers. This assay office is an A.E.C. Umpire Analyst. (See Assay Sheets, Exhibit B.)

All holes covered by this report were drilled dry.

A radiometric log recording has been made of the holes covered by this report using an "Esterline-Angus" Graphic ammeter and "Babbel" Geiger Counter. (See Radiometric Log sheets and Radiometric Equipment List, Annex II.) All recordings were made on the five scale of the "Babbel" geiger counter, this is the most sensitive scale.

Samples of the drill cuttings were collected for every two foot of hole and sacked and marked with the hole No. and the depth represented and are stored at the office of Little Mo Mining Inc. in Shoshoni, Wyoming. Unsacked samples of the cuttings are piled in rows near the hole, two foot to the pile, in the order of a printed page, viewed from the hole.

Materials encountered All holes have been drilled in a bed of precambrain granite boulders and associated materials which is the "Tepee Trail" formation. (Also see lithology notes on Radiometric Log Sheets.)

Access roads and drill sites were made with an "Allis Chalmers HD*6". (See Equipment List, Annex II.)

Elevation at the holes will be found on the Cross Section Chart, Figure 5B.

Cross Section Chart, Figure 5 in our report for February 1958 may be referred toalong with Cross Section Chart, Figure 5B of this report. The row of drill holes shown on Figure 5 belongs between the two rows of drill holes shown on Figure 5B of this report. Both charts use the same scale in feet and the same radiometric log scale.

Holes 5E, 6E, 7E and 8E all show ore grade mineralization in the unoxidized zone. (See Radiometric Log Sheets, Assay Sheets, ExhibitIV, Cross Section Chart, Figure 5B and Map, Figure 2A.

Holes 1W and 2W show some mineralization, perhaps the halo of the mineralization in holes No. 5 and No. 6 drilled under Stage I. (See Cross Section Chart, Figure 5B, Assay Sheets, Exhibit IV and Radiometric Log Sheets.

Our report for December 1957 did not include documentation for one half hour of Standby Time which we reported and an arithmetical error was made in the amount reported for Incidental Allowance on our Janurary 1958 report. A correction of these errors has been made on Forms MF-104 and MF-104A of this report.

L. A. Henderson

L.A.Henderson - Consultant for,
Little Mo Mining Inc.

ANNEX II

EQUIPMENT LIST

1 - "MAYHEW" 1000 ROTARY DRILL
1 - "Gardner Denver" 585 cu. ft. Air Compressor
1 - "Gardner Denver" 5 X 6 inch Mud Pump
Above equipment mounted on a R-190 "International" truck

1 - 1000 gal. exhaust heated water tank mounted on a R-180 "international" truck

A "Ford" ½ ton pickup truck is used for transportation for the drill crew and supplies for the operation.

The above listed equipment is the property of Beavers & Harris Drilling Co. of Riverton, Wyoming.

****

RADIOMETRIC EQUIPMENT

Radiometric logging equipment

1 - Geiger counter "Babbel" Model 610
1 - Probe mounted on 500 foot cord on reel and stand
1 - Graphic Ammeter (Recorder) "Esterline-Angus" Model AW

Also on hand if needed are the following radiometric instruments.

2 - Geiger counters "Detectron"
1 - Geiger counter "Babbel" Model 600A
1 - Scintillation counter "Mt. Soprus"
1 - Scintillator "Precision" Model 111

Tractor with dozer

1 - "Allis Chalmers" HD 6 Property of John Kummerfeld a contractor from Moorcroft, Wyoming.

Memorandum

To: T. A. Christensen

From: Acting Executive Officer, DMEA Field Team, Region III

Subject: Docket No. DMEA 4709 (Uranium) Contract 1dm-E1136, Little Mo Mining, Inc., (Mint et al. claims) Fremont County, Wyoming - Operator's Monthly Progress Report for the month of February, 1958

Enclosed are the original and four copies each of Forms MF-104 and MF-104A, Operator's Narrative Report, and Engineer's Report for the above period.

The work is being performed partly under independent subcontract, and partly at fixed unit costs. The drilling rates are as low or lower than the rates contained in the lowest and best bid submitted with the application. Bids were not submitted for bulldozer work; however, the bulldozing rates are in line with the standard rates prevailing in the project locality for the size and make of bulldozer used on the project. Under the circumstances, the rates for the work performed under independent subcontract are considered to be reasonable.

We consider that the Operator has complied with the intent of the contract, and the work for which payment is recommended is acceptable to the Government. Payment is recommended for 75 percent of the amount reported on Form MF-104 for February 1958, contingent on your verification of the correctness of applicable rates and arithmetical accuracy of computations.

Remarks:

Date of Report----------February 21, 1958

Memorandum

To: Executive Officer, DMEA Field Team, Region III

From: E. O. Binyon

Subject: Docket DMEA 4709 (Uranium) Contract Idm-E1136
Little Mo Mining, Inc. (Mint et al claims)
Fremont County, Wyo. -- Progress report for February 1958

An inspection of the drilling completed during the subject period was made March 14, 1958, in company with L. A. Henderson, consultant for the operator. The holes are located according to the terms of the contract as shown on the operator's map and the depths were found to be as reported on the radiometric logs.

A check of the samples from the holes with a geiger counter showed a slight radioactivity in hole 16 and 17. In one of the holes, hole 17, at a depth of 64 to 68 and 74 to 76, the radiometric reading showed a maximum of about .05 percent eU_3O_8 at 67 - 68 feet. A surface anomaly at depth 6 - 8 feet in hole 16 gave a reading of about .08 eU_3O_8. Three holes No. 14, 16 and 17 were drilled a total of 450 feet and hole No. 6 was deepened 84 feet to a total depth of 234 feet. This completes Stage I drilling.

A check of the MF-104 and MF-104A forms showed them to be correct except that the operator has not made the corrections in the "totals previously reported "$581.04 instead of $580.04, and $100.00 instead of $106.25 which are the correct amounts for Incidental Allowances and Standby time. The correct total under Totals to Date should be $11,924.22 with these corrections.

It is recommended that the operator be paid $1976.38, or the Governments's share at 75 percent of $2635.18, the total amount claimed.

The contract expires April 1, 1958.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this report is correct and complete to the best of their knowledge and belief.

Date 2/21/58 Operator Little Mo Mining Inc.

Per Millard M. Dudley Title Secretary

REMARKS: Hard loose boulders of precambrian granite and associated materials make drilling in this area slow and costly.
Some footage and costs will have to be taken from Stage II

→ NOTE.—Title 18, U. S. Code (Crimes), section 1001, makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.

(Instructions on reverse)

E. Binyon

(For Government use only)

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc.". The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

GPO 872894

ARTICLE 7 (b) (3) NARRATIVE REPORT FOR FEBRUARY 1956

STAGE I DMEA 4709

This report covers.

1- relocated holes Nos. 14, 16 & 17 (Amendment No. 2, Map Fig ure 2 A and radiometric log sheets).
2- deepening of hole No.6 from 150' to 234' (Amendment No.2 1,(b).
3- bulldozing of access roads and drill sites. (Amendment No.2, 1,(a).
4- 21 chemical assays of drill cuttings from holes No. 4,5 &6. (See assay sheets, Exhibit B).

This completes the work under Stage I with 20 holes drilled making a total of 2686 feet and an average depth of over 134 feet. Hole No. 11 was drilled into base granite at 64 feet while 234 feet was necessary to reach base granite in hole No.6.

Beavers & Harris were the drilling contractors, (see Equipment List, Annex II.).

John Kummerfeld (Contractor) was the contractor for the building of access roads and drill sites. (See Equipment List, Annex II).

Uranium Center Laboratory of Riverton, Wyoming were the assayers. This assay office is an A.E.C. Umpire Analyst. (See Assay Sheets, Exhibit B).

Holes were drilled non-core using a rotary drill and compressed air with the exception of hole No. 14 which was drilled with water from 112 feet to 150 feet. Water was also used to deepen Hole No.6 from 150 feet to 234 feet.

Holes No. 14,16 & 17 were drilled as relocated under Amendment No.2, (see Map Figure 2 A).

Hole No. 6 showed some fifty feet of mineralization but the original drilling of 150 feet did not reach base granite. This was the maximum allowed under the original contract. Amendment No. 2, 1,(b) allowed the holes to be deeper so we moved the drill rig back onto this hole and drilled it to base granite so Hole No. 6 is now 234 ft. deep and 9 feet in base granite. We believed this hole should be drilled to the base granite since this information would be of value to the contract in determining what relation, if any, base granite might have to the mineralization in the area. The mineralization in Hole No. 6 is unoxidized and such ore bodies that were encountered in the mine about 600 feet to the North West and on the same hill were found two to four feet above base granite. No further mineralization was noted in this hole which leaves the only mineralization over 100 feet above the granite, the same is true in hole No. 5.

A radiometric log recording has been made of all holes drilled under this contract using an "Esterline-Angus" Graphic Ammeter and "Babbel" geiger counter. (See radiometric log sheets and radiometric equipment list, Annex II). All recordings were made on the five scale, ("Babbel" geiger counter, this is the most sensitive scale.

Samples of the drill cuttings were collected for every two feet of holeand sacked and marked with the Hole No. and depth represented and are stored at the office of Little Mo Mining Inc. in Shoshoni, Wyoming. Unsacked portions of the cuttings are piled in rows near the hole, two feet to the pile, in the order of a printed page viewed from the hole.

BOULDERS Materials encountered All holes have been drilled in a bed of precambrian granite and associated materials which is the "Tepee Trail" formation. (Also see lithology notes on radiometric sheets.)

Access roads were made with an "Allis Chalmers" HD 6, also the drill sites.

Elevations at holes No. 3,4,5 & 6 will be found on Cross Section chart, Figure 5.

L. A. Henderson

L.A.Henderson *** Consultant
Little Mo Mining Inc.

ANNEX II

EQUIPMENT LIST

1 - Mayhew 1000 Rotary Drill
1 - Gardner-Denver 585 cu.ft. Air Compressor
1 - Gardner-Denver 5 X 6 inch mud pump
Above equipment mounted on a R-190 International Truck

1 - 1000 gal. exhaust heated water tank mounted on a R-180 International truck

A Ford half ton pickup truck is used for transportation for the drill crew and supplies for the operation.

This equipment is the property of Beavers & Harris Drilling Co. of Riverton, Wyoming.

****

RADIOMETRIC EQUIPMENT

Radiometric Logging Equipment

1 - Geiger Counter "Babbel" Model 610
1 - Probe mounted on 500 ft. cord on reel and stand
1 - Graphic Ammeter (Recorder) "Esterline-Angus" Model AW

Also on hand if needed are the following radiometric instruments.

2 - Geiger Counters "Detectron"
1 - Geiger Counter "Babbel" Model 600A
1 - Scintillation Counter "Mt. Soprus"
1 - Scintillator "Precision" Model 111

****

TRACTOR WITH DOZER

1 - Allis Chalmers H D 6 Property of John Kummerfeld a Contractor from Moorcroft, Wyoming.

Memorandum

To: T A. Christensen

From: Executive Officer, DMEA Field Team, Region III

Subject: Docket No. DMEA 4709 (Uranium) Contract Idm-E1136, Little Me Mining, Inc., (Mint et al claims) Fremont County, Wyoming - Operator's Monthly Progress Report for the month of January, 1958

Enclosed are the original and four copies each of Forms MF-104 and MF-104A, Operator's Narrative Report, and Engineer's Report for the above period.

The work is being performed partly under independent subcontract, and partly at fixed unit costs. The drilling rates are as low or lower than the rates contained in the lowest and best bid submitted with the application. Under the circumstances, the rates for the work performed under independent subcontract are considered to be reasonable.

We consider that the Operator has complied with the intent of the contract, and the work for which payment is recommended is acceptable to the Government. Payment is recommended for 75 percent of the amount reported on Form MF-104 for January, 1958, contingent on your verification of the correctness of applicable rates and arithmetical accuracy of computations.

Note: As stated in the engineer's report, the amount reported on Forms MF-104 and MF-104A, for Incidental Allowance is in error by the amount of $1.00. The Operator will be advised to correct the error on a subsequent report.

The Operator has not yet made adjustment on Forms MF-104 and MF-104A for the amount of $6.25, which was disallowed from the December, 1957 Voucher. The Operator

did not receive notice of the disallowance until after the January Voucher has been prepared.

Remarks:

Date of Report----------February 14, 1958

Feb. 20, 1958

Memorandum

To: Executive Officer, DMEA Field Team, Region III

From: E. O. Binyon

Subject: Docket DMEA 4709 (Uranium) Contract Idm-E1136,
Little Mo Mining, Inc. (Mint et al claims)
Fremont County, Wyoming -- Progress report for January 1958

The inspection made on February 5, 1958 included the holes completed in December and also the holes drilled in January 1958.

Location and depths of the 5 holes, Holes 1, 8, 9, 10 and 11, were found to be as shown on the operator's map and radiometric logs. The total footage drilled however, is reported at 578 feet instead of 580 feet shown on the driller's invoice, the 2 feet difference being in Hole No. 1 which was overdrilled into the base granite.

A check with a geiger counter showed no radioactivity in any of the holes.

The MF-104 and 104A Forms are in error in the amount claimed ($155.06) for incidental allowances. The correct amount should be $156.06. This would make the correct totals under "Monthly Total" on the MF-104 and "Costs this Month" on the MF-104A $2,499.31 instead of $2,498.31 as shown. Also the "Costs to Date" and "Units to Date" for standby time with the disallowance in December of ½ hour should be $100.00 and 8 hours respectively.

The work is properly documented and was done in conformance with the terms of the contract. It is recommended that the operator be paid $1,873.73 or the Government's share at 75 percent participation of $2,498.31 the amount claimed on the voucher.

I certify that the above bill is correct and just and that payment therefor has not been received.

Date 2/14/58 *Payee Little Mo Mining Inc.

Per Millard M Dickey Title Secretary

*When a voucher is signed or receipted in the name of a company or corporation, the name of the person writing the company or corporate name, as well as the capacity in which he signs, must appear. For example: "John Doe Company, per John Smith, Secretary," or "Treasurer," as the case may be.

NOTE.—Title 18, U. S. Code (Crimes), section 1001, makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.

U Withholding Deduction (Instructions on reverse)

Pursuant to authority vested in me, I certify that this account is correct and proper for payment in the amount of:

$ 1873 73

Signature
(Authorized Certifying Officer)

Date 3/3/58 Vou. No. DMA 58-94

(See other side)

(For Government use only)

CERTIFICATION BY GOVERNMENT REPRESENTATIVE:

I certify that to the best of my knowledge and belief the contractor submitting this voucher is operating a Defense Minerals Exploration Administration project under Contract No. DMEA 1136 in accordance with the terms of the contract.

Signature E. O. Simpson ($1873.73) Title Mining Engineer Date 2/20/58

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Checked for Engineering Accuracy

Signature C. H. King Title Executive Officer Date FEB 26 1958

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Date 2/14/58 Operator Little Mo Mining Inc.

Per Millard M. Dickey Title Secretary

REMARKS: Hard loose boulders of precambrian granite and associated materials make drilling in this area slow and costly.

NOTE.—Title 18, U. S. Code (Crimes), section 1001, makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

GPO 872894

ARTICLE 7 (b) (3) NARRATIVE REPORT FOR JANUARY 1958

STAGE I AREA A709

This report covers five drill holes completed to the objective as outlined in the contract. (See radiometric log sheets and map, Figure 2).

Reavers & Harris Drilling Co. are the drilling contractors. (See equipment list, Annex II).

Drill holes as per contract are drilled nonscore to 150 feet depth or base granite which ever is encountered first. The five holes covered by this report were drilled dry with compressed air.

Samples of the cuttings were collected for every two feet of hole and sacked and marked with the hole number and depth represented and are stored at the office of Little Mo Mining Inc. in Shoshoni, Wyoming where they may be examined by the Government. Unsacked portions of the cuttings are piled in rows near the hole, two feet to the pile, in the order of a printed page, viewed from the hole.

All holes covered by this report were drilled in a bed of loose boulders of precambrian granite and associated materials typical of this Tepee Trail formation. All holes required several roller type rock bits to complete them to the objective. At times a new bit of this type would not drill two feet.

Materials encountered have been precambrian granite boulders, quartz, biotite shist, feldspar, arkosic sand and some bentonite and clay layers. (See lithological notes on radiometric log sheets).

A radiometric log recording has been made of all holes using an "Esterline-Angus" graphic ammeter and "Babble" geiger counter (see radiometric equipment list Annex II and radiometric log sheets. All recordings were made on the five scale of the "Babbel" geiger counter. This is the most sensitive scale.

No radiometric count above normal background has been noted in any of the holes covered by this report, either in the cuttings or on the radiometric log.

Original radiometric logs are on file at the office of Little Mo mining Inc. in Shoshoni, Wyoming where they may be examined by the Government.

John Rumserfeld- President
Little Mo Mining Inc.

L.A.Henderson - Consultant
Little Mo Mining Inc.

ANNEX II

EQUIPMENT LIST

1 - "Mayhew" 1000 Rotary Drill
1 - "Gardner-Denver" 585 cu.ft. Air Compressor
1 - "Gardner-Denver" 5 X 6 inch Mud Pump
Above equipment mounted on a R- 190 "International" Truck.

1 - 1000 gal. exhaust heated water tank mounted on a R-180 "International Truck.

A "Ford" half ton pickup truck is used for transportation for the drill crew and supplies for the operation.

The above equipment is the property of Beavers and Harris Drilling Co. of Riverton, Wyoming.

****

Radiometric Equipment

Radiometric Logging Equipment

1 - Geiger Counter "Babbel" Model 610
1 - Probe mounted on 500 ft. cord on reel and stand
1 - Graphic Ammeter (Recorder) "Esterline-Angus" Model AW

Also on hand if needed are the following radiometric instruments.,

2 - Geiger counters "Detectron"
1 - Geiger counter "Babbel" Model 600A
1 - Scintillation counter "Mt. Sopyus"
1 - Scintillator "Precision" Model 111

Little Mo Mining, Inc.
Post Office Box 321
Sheridan, Wyoming

Date: February 14, 1958

Payee's Reference: December, 1957

Gentlemen:

Upon examination of the above Payee's Reference a difference was found which made it necessary to suspend your account accordingly:

Amount Claimed $ 3,393.72

Difference $ 6.25

Amount Approved $ 3,387.47

The reason for the difference was due to:

Disallowance:

Cost of three hours of Standby Time has been reported; however, documentation is included for only 2½ hours. The reported cost for one-half hour Standby Time is to be disallowed.

Amount reported 3 hours at $12.50 per hour	$37.50
Documented cost, 2½ hours at $12.50 per hour	$31.25
Amount disallowed	$ 6.25

Any reclaim for deductions made above must be supported by the ORIGINAL of this form.

Very sincerely yours,

N. E. Stokes

Memorandum

To: T. A. Christensen

From: Executive Officer, DMEA Field Team, Region III

Subject: Docket No. DMEA 4709 (Uranium) Contract Idm-E1136, Little Mo Mining, Inc., (Mint et al. claims) Fremont County, Wyoming - Operator's Monthly Progress Report for the month of December, 1957

Enclosed are the original and four copies each of Forms MF-104 and MF-104A, Operator's Narrative Report, and Engineer's Report for the above period.

The work is being performed partly under independent subcontract, and partly at fixed unit costs. The drilling rates are as low or lower than the rates contained in the lowest and best bid submitted with the application. Under the circumstances, the rates for the work performed under independent subcontract are considered to be reasonable.

Except as otherwise indicated below, we consider that the Operator has complied with the intent of the contract, and the work for which payment is recommended is acceptable to the Government. Payment is recommended on the following basis contingent on your verification of the correctness of applicable rates and arithmetical accuracy of computations.

As noted in the inspecting engineer's report, some copies of Forms MF-104 and MF-104A contain a typographical error of $100.00 in the amount reported under Incidental Allowance. The original and one copy of Form MF-104 have been corrected by the Operator. Payment is to be made on the basis of the total amount reported for December, 1957, which is arithmetically correct on all copies of each form.

Disallowance, Standby Time

The Operator has reported the cost of three hours of Standby Time; however, documentation is included for only 2½ hours. The reported cost for one-half hour Standby Time is to be disallowed.

Amount reported 3 hours at $12.50 per hour------$37.50
Documented cost, 2½ hours at $12.50 per hour---- 31.25

Amount to be disallowed----------$ 6.25

Reconciliation with Amount Reported by the Operator on Form MF-104 for December, 1957

Amount reported on Form MF-104 for December, 1957----------	$3,393.72
Amount to be disallowed----------	6.25
Acceptable cost for December, 1957----------	3,387.47

Government participation at 75 percent----------$2,540.60

Remarks:

Date of Report----------January 14, 1958

February 6, 1958

Memorandum

To: Executive Officer, DMEA Field Team, Region III

From: E. O. Binyon

Subject: Docket DMEA 4709 (Uranium) Contract Idm-E1136, Little Me Mining, Inc. (Mint et al claims) Fremont County, Wyoming -- Progress report for December 1957.

An inspection was made of the property on February 5, 1958, in company with L. A. Henderson, consultant.

The holes were located as shown on the map accompanying the operators report and the depths are as reported in the narrative report.

A check with a geiger counter was made of the cuttings from the holes and the radioactivity of the cuttings were substantially the same as shown on the hole logs, however some readings were slightly lower.

Of the five holes drilled (holes No. 2, 4, 5, 6, and 7), holes 4, 5, and 6 showed mineralization that gave a count somewhat above normal background. In hole No. 4 the mineralization occured at a depth below the collar from 73 to 76 feet. The probe reading was about twice background or approximately .03 percent eU_3O_8 . Hole 5 showed about 2 feet of mineralization at depth 64 to 65.8 feet with a reading of about 0.17 percent eU_3O_8. In hole 6 there are two mineralized horizons, one at depth 56 to 59 feet and the other at 75.5 to 77 feet. Probe reading at the upper (56-59) horizon was approximately 0.20 percent eU_3O_8 and at the lower .07 percent eU_3O_8.

In checking the MF104 and MF104A forms typographical errors were found on three copies of form MF104 and on all five of the MF104A. On the MF104 under "Totals Previously Reported" the amount opposite "incidental" should be $212.76 and under the "Monthly Total" the amount charged for the Incidental Allowance should be $212.22. The totals in both columns are correct if the corrected amounts are used. On the MF104A, $112.22 is shown under "Costs this Month" opposite "incidental" whereas the correct amount should be $212.22.

The charges for drilling are documented.

The work was performed in conformance with the terms of the contract and it is recommended that the operator be paid $2,545.29, which

is the Government's share at 75 percent of $3,393.72, the amount claimed.

The contract expires January 1, 1958.

E. O. Binyon
Mining Engineer

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

GPO 872894

ARTICLE 7 (b) (3) NARRATIVE REPORT FOR DECEMBER 1957

STAGE I DMSA 5709

This report covers six completed drill holes for December 1957. See radiometric log sheets and map "figure 2".

Beavers & Harris Drilling Co. have taken over the drilling contract from Lawrence Materi. See equipment list, "Annex II".

Drill holes, as per contract are drilled non-core to 150 feet in depth or base granite which ever is encountered first. All holes except No. 5 were drilled to the objective with compressed air. Water was used on the last 15 feet of hole No. 5.

Samples of the cuttings were collected for every two feet of hole and sacked and marked with the hole No. and depth represented and are stored at the office of Little Mo Mining Inc. in Shoshoni, Wyo. Unsacked portions of the cuttings are piled in rows near the hole, two feet to the pile, in the order of a printed page, viewed from the hole.

Extra samples have been sacked of cuttings containing sufficient increase in radiometric count above normal background, part of which will be assayed.

Holes No. 2,4,5,6 & 7, (see Map Figure 2), are on the east side of the property. These holes have encountered considerably more boulders making it necessary to use all roller type rock on all holes drilled in December. Nine of these bits were required to complete hole No. 4.

Materials encountered have been precambrian granite boulders, quartz, biotite shist, feldspar, arkosic sand and some clay layers. (See lithological notes on radiometric log sheets).

A radiometric log recording has been made of all holes using an "Esterline-Angus" graphic ammeter and "Nebbel" geiger counter. (See radiometric log sheets and radiometric equipment list, Annex II). All recordings are five scale on the "Nebbel" geiger counter. All

ANNEX II

Equipment List

1-"Winter-Weiss" 1500 Rotary Drill
1- 500 cu. ft. Air Compressor
1- 4½ X 6 inch Mud Pump
1- Cutting Sample Catcher
Above equipment mounted on a "Ford" F-8 Truck.

1- 500 gal. exhaust heated water tank mounted on a "Ford" F-7 truck

A "Chevrolet" ½ ton pickup truck is used for transportation for the drilling crew and supplies for the operation.

The above equipment is the property of Lawrence Lateri Exploration Drilling Co. of Upton Wyoming.

[illegible]

1- "Mayhew" 1000 Rotary Drill
1- "Gardner-Denver" 505 cu.ft. Air Compressor
1- "Gardner-Denver" 5 X 6 inch Mud Pump

FINAL DISTRIBUTION

MADE JAN 7 1958

224 New Customhouse
Denver 2, Colorado

December 20, 1957

Memorandum

To: T. A. Christensen

From: Executive Officer, DMEA Field Team, Region III

Subject: Docket DMEA-4709 (Uranium) Contract Idm-E1136, Little Mo Mining, Inc. (Mint, et al., claims) Fremont County, Wyoming - Operator's Monthly Progress Report for the month of November 1957

Enclosed are the original and four copies each of Forms MF-104 and MF-104A, Operator's Narrative Report and Engineer's Report for the above period.

The work is being performed partly under independent subcontract and partly at fixed unit costs. The drilling rates are as low or lower than the rates contained in the lowest and best bid submitted with the application. Under the circumstances, the rates for the work performed under independent subcontract are considered to be reasonable.

We consider that the Operator has complied with the intent of the contract, and the work for which payment is recommended is acceptable to the Government. Payment is recommended for 75 percent of the amount reported on Form MF-104 for November 1957, contingent on your verification of the correctness of applicable rates and arithmetical accuracy of computations.

REMARKS:

Date of Report ---------- December 14, 1957
Date Received in Field Office --------- December 18, 1957

Dec. 19, 1957

Memorandum

To: Executive Officer, DMEA Field Team, Region III

From: E. O. Binyon

Subject: Docket DMEA 4709 (Uranium) Contract Idm-E1136, Little Mo Mining Inc. (Mint et al claims) Fremont County, Wyoming -- Progress report for November 1957

An inspection of the work completed during November 1957 was made December 18, 1957, in company with L. A. Henderson, consultant, and Millard Bickey, superintendent. No drilling was in progress at the time of the inspection. Hole locations and depths were checked and found to be as reported. There was no radioactivity in the 6 holes drilled.

The work was done in conformance with the terms of the contract and is properly documented.

It is recommended that the operator be paid $2,551.69 or the Government's share at 75 percent of $3,402.26, the amount claimed on the MF-104.

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature W H King Title Executive Officer Date DEC 20 1957

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

E O Bunyon

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

ARTICLE 7 (b) (3) NARRATIVE REPORT for NOVEMBER 1957

STAGE I DMEA 4709

Drilling started November 19, 1957 and six holes were completed in compliance with the contract for November 1957. See map figure 2.

Lawrence Materi is the drilling contractor. See drilling equipment list. Annex II.

Holes are drilled non-core with a rotary drill to either base granite or 150 feet, which ever is encountered first as per contract. Holes are drilled dry if possible but water is used if necessary.

Radiometric logs are made on all holes completed with a "Babbel" geiger counter and deep hole probe using an "Esterline-Angus" graphic ammeter recorder. See radiometric equipment list., Annex II.

Samples of cuttings are collected for every two feet of hole from a sample catcher box built onto the drill truck. A part of each sample is sacked and marked with hole number and depth represented. These sacked samples are stored at the office of "Little Mo Mining Inc." in Shoshoni, Wyoming. Unsacked portions of samples are piled in rows, two feet to the pile and in the order of a printed page, near the hole.

Assays of cuttings No hole completed for this report has shown sufficient increase in radiometric count above normal background to warrant assay.

Materials encountered have been sedimentary granitic rubble of the Tertiary "Tepee Trail" formation. Associated with this granitic material are black diorite boulders and smaller pieces. Also some biotite shist and the pegmatite minerals are to be noted in the cuttings from the holes. The above minerals are to be found in the area in dikes. Layers of gritty bentonite, red clay and fine arkosic sand have been penetrated. Some boulders of precambrian granite are ten to fifteen feet through, most of them are smaller but drilling in this type of material is slow going and hard on bits. Loose chunks sometimes fall in the hole or drill stem may be turned in striking the slanting hard surface of a boulder resting in loose material. It has been necessary to move over a few feet and start a new hole quite often to get a completed hole.

Bulldozing of access roads and drill sites We have had to use another size bulldozer other than the contract calls for on this work so no claim for dozer time will be in this report.

John Kummerfeld

ANNEX II

EQUIPMENT LIST

1-"Winter-Weiss" 1500 Rotary Drill
1- 500 cu. ft. Air compressor
1- 4½" X 6" Mud Pump
1- Cutting Sample Catcher
Above four items are mounted on a "Ford" F-8 Truck.

1- 500 Gallon Exhaust Heated Water Tank, Mounted on a "Ford F-7 truck serves the above drill.

A "Chevrolet" ½ ton pick up truck is used for transportation for the drilling crew and supplies for the operation.

The above equipment is the property of Lawrence Materi Exploration Drilling Co. of Upton, Wyoming who has the drilling contract.

RADIOMETRIC EQUIPMENT

Radiometric logging equipment

1- Geiger Counter "Babbel" Model 610
1- Probe Mounted on 500' cord on Reel and Stand
1- Graphic Ammeter (recorder) "Esterline-Angus" Model A W

Also on hand if needed are the following Radiometric Equipment.

2- Geiger counters " Detectron"
1- Geiger counter "Babbel" Model 600A
1- Scintillation counter " Mt. Soprus"
1- Scintillator "Precision" Model 111
