Re: Ur ltr: 3/10/67

Frank E. Johnson
Chief, Office of
Minerals Exploration

OME-6602 (Cu,Au,Ag)

Dear Mr. Johnson;

In answer to your letter and requests for additional bids on our project, please find enclosed necessary supporting documents.

Please note that our total drilling program, on a per foot basis, is $14.47.

The drilling bids herewith submitted do not include the following, which would necessarily be under our control:

Assays, etc.:	@ $2.00/ft	
Mapping,etc.:	@ 1.20/ft	
Accounting, etc.:	@ 1.00/ft	
Supervision:	@ 1.10/ft	
Total:	$5.30/ft	

	$14.47
less	5.30
Our base cost	9.17/ft

Our bit allowance is comparable.
Our site preparation is comparable.
Our standby time is non-credible.

If we can be of any further assistance, please contact us.

It was our understanding that where we were planning to conduct our own drilling, other bids were not necessarily required. We didn't mean to cause any delay.

Very truly yours,

Henry J. Hudspeth Jr.

Henry J. Hudspeth Jr.
Sect - Treas.
Wyoming Mining & Exploration Co.

PROPOSAL

SUBMITTED TO:

Date March 16, 1967

Name: Wyoming Mining & Exploration Co.

Street: Box 785

City: Lander

State: Wyoming 82520

Job Name: Excavation on May Claims

Street: located in South Pass Area

City: Fremont County, Wyo.

State

Architect

Date of Plans

We hereby submitt plans, specifications, and estimates for:

Cleaning - out of eight prospect holes to an approximate depth of 15 ft. located in the above claim area.

Includes Transportation to and from site, standby time during sampling and blasting.

Does not include any drilling or blasting or blasting powder.

I hereby order and authorize the above listed work and materials. You and your employees may enter my property to execute this order and for inspecting, measuring and testing the work and materials. An express Materialmens', Mechanics' and Builders' Lien enforceable as such a lien under the laws of Wyoming, is given and acknowledged on all the described and adjoining and adjacent property to be benefitted, to secure your charges, costs and expenses hereunder. Charges not paid when due shall bear interest at the highest lawful rate from date due, and if collection is made by suit or otherwise, I agree to pay such interest until paid plus collections costs including reasonable attorney's fees. Charges are due the first day of the month following the date of charge.

We hereby propose to furnish labor and materials to complete in accordance with attached specifications, for the sum of: One thousand Dollars and no/cents dollars ($ 1000.00) with payment to be made as follows:

All material is guaranteed to be as specified. All work to be completed in a workmanlike manner according to standard practices. Any alteration or deviation from above specifications involving extra costs, will be executed only upon written orders, and will become an extra charge over and above the estimate. All agreements contingent upon strikes, accidents, or delays beyond our control. Owner to carry fire, tornado and other necessary insurance, and to pay for all construction inspection fees and permits. Our workers are fully covered by Workmen's Compensation Insurance. A contract for construction shall be signed by both parties when requested by either party.

Contractor: Archie D. Clay - Excavating and Ditching

Authorized Signature: Archie D. Clay

Note: This proposal may be withdrawn by us if not accepted within _____ days.

ACCEPTANCE OF PROPOSAL

The above prices, specifications and conditions are satisfactory and are hereby accepted. You are authorized to do the work as specified. Payment will be made as outlined above.

ACCEPTED: Signature _____

Date _____ Signature _____

March 17, 1967

To: Wyoming Mining & Exploration Co.
Box 785 Lander, Wyo. 82520

Subject: Bid on backhoe excavation on May Claim Complex located in South Pass Area near Lander, Wyo.

Excavation to an approximate depth of fifteen feet each of eight old prospect holes located within the claim area.

Bid Price ----------$1300.00

Includes transportation and standby time.
Does not include drilling and blasting, if any.

Thank you for the opportunity to bid.

March 16, 1967

Wyoming Mining and Exploration Co.
Box 785
Lander, Wyoming

Dear Sirs:

Following is a bid on your May Claim Complex Near South Pass, Wyo.

Total Aggregate Footage	900 Feet
One 500 Ft. Hole, 2 two Hundred Ft. Holes At least 4½" in Diameter, Grave yard sampling	
Drilling Cost per Ft.	$9.50
Site work, Setting up, Moving in and Etc.	$500.00
You are to furnish All bit, mud, lost circulation material, core barrels and Etc. Estamated to be	$1000.00
Stand By time for any purpose, other than normal drilling procedure, in an eight hour day	$20.00 per Hour

The above bid price is due to dense Quarts formations that are apparent in the area, and would be drilled thru.

Sincerly Yours,

Bill F. Young

March 15, 1967

A bid is hereby submitted for an aggregate drilling program of 900 ft. of 4½" exploration hole for YMECO on their MAY Claims in the South Pass area. This bid is considerably higher than average due to the formation to be drilled.

Our bid on this type of drilling is on a per foot basis of $9.00

The following are not included:

Drill Bits (by owner) estimated $1000 to $1200.00

Site preparation and erection time -- $500.00

Standby time: at $20.00 per hour, maximum of 8 hours per day.

Time schedule to be set 2 months in advance.

Thank you for the opportunity to bid.

GENERAL INSTRUCTIONS

Before filling out this application, please read the *OME Regulations for Obtaining Federal Assistance in Financing Explorations for Mineral Reserves* (30 CFR Chap. III). To assure prompt action, your application must provide all applicable material and information specified on the back of this application form. Avoid unnecessary correspondence and delays by submitting complete and accurate information. *Please submit two copies of this application and all accompanying papers* except as otherwise noted. Place your name and address on each sheet. Each item of information, maps, and reports required as a part of this application is described on the back of this form. Identify each attached statement by the item number to which it applies. If an item does not apply to your application, show the item number on your statement and after it write "not applicable." Maps or sketches should be used to supplement narrative descriptions of the property location and boundaries in item 2, existing mine workings and geology in item 3, and the proposed exploration work in item 5. When this information is not too complex, all of it may be shown on one map or sketch. All documents and other attachments submitted as a part of this application, except those in item 3(g) which you mark to be returned, become the property of the Government and will not be returned to the applicant. Send true copies, *not originals*, of leases, contracts, and other documents which are an essential part of your business records. *File this application with the Office of Minerals Exploration, Department of the Interior,* ~~Washington, D. C., or with the nearest OME Field Office~~ Washington, D. C., 20242, or with the nearest OME Field Office.

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief, and that he would not ordinarily undertake the proposed exploration under current conditions and circumstances at his sole expense.

TITLE

A wilfully false statement or certification to any Department or Agency of the United States Government is a criminal offense. U. S. Code, Title 18, Sec. 1001.

INFORMATION REQUIRED WITH THIS APPLICATION

1. Financial Eligibility:

(a) Submit evidence of efforts made within 90 days preceding the filing of this application to obtain credit from your bank of account and at least one other banking institution or other private source of credit. Such evidence shall include true copies of correspondence which show: (1) date of loan request, (2) amount and terms requested, (3) proposed use of loan funds, and (4) the replies from credit sources. If the loan was offered under terms which you consider unreasonable, state why you consider them so.

(b) List names and addresses of affiliated, parent, or controlling companies or organizations and state extent and nature of their interest.

(c) State how you propose to furnish your share of the cost of the exploration work.

2. Applicant's Rights in Land:

(a) State your interest in the land and mineral rights, whether owner, lessee, purchaser under contract, or other. If you are not the owner, submit one true copy of the lease, contract, or other document (with address of owner) under which you control the property. Describe all liens, mortgages, or other encumbrances on the land and state book and page number and official place where recorded.

(b) State the legal description (section, township, and range; metes and bounds; patent number of claims) of the land upon which you wish to explore and all adjacent land which you own or control. Describe any part of the land or workings which should not be subject to Government royalty and liens. If the land consists of unpatented claims, state book and page number for each recorded location notice, including amended locations, and official place where recorded. State all the names by which you know the property.

(c) For all land or mineral rights encumbered or not owned, submit five copies of Lien and Subordination Agreements on MME Form 52. If the agreements cannot be obtained, state reasons and provide copies of letters of refusal.

3. Physical Description:

(a) Describe in detail and illustrate with maps or sketches all mining or exploration operations which you know have been or are being conducted upon the land. Include existing mine workings and all production facilities.

(b) State your interest, if any, in operations described in (a).

(c) State, if you know, the past and current production, supporting your statement with copies of settlement sheets, mine records, or published data if available.

(d) Describe known ore reserves, giving quantities and grades and sampling methods used. Support your statement with copies of assay certificates and assay maps if available.

(e) Describe by narrative and maps or sketches the geologic features of the property, including ore minerals, geologic formations if known, and type of deposit (vein, bedded, etc.).

(f) State your reasons for expecting to find ore, and if you have sampled the area you propose to explore, show where the samples were taken, describe sampling methods used, and provide copies of assay certificates.

(g) Send with your application at least *two* copies of all geologic or engineering reports, assay maps, or technologic information which you have, indicating whether you require their return.

4. Accessibility of Property:

(a) To aid the OME representative who may examine the property, state name and address of person who will meet him; give directions for reaching the property; and describe accessibility of property and of any mine workings.

(b) Name the shipping and supply points and state the distances to the property.

5. Exploration Work:

(a) Describe fully the proposed exploration work giving individual footages and sizes of openings *for each item of work.* Use narrative, maps, plans, and sections as necessary. Show location of the proposed work as related to geologic features such as veins, ore-bearing beds, contacts of rock formations, etc. Show also the relation of the proposed work to any existing mine workings and to *land boundaries* or to the closest identifiable corner.

(b) If an access road must be built, show the proposed location on the property map and state the length, type and construction methods proposed.

(c) If an OME contract is executed, state how soon thereafter work would be started and finished. State your anticipated average daily or monthly rate of progress for each type of work.

6. Experience:

State your operating experience and background to conduct this exploration work and also that of the person who will supervise the work.

7. Estimate of Costs:

Furnish detailed estimates of the necessary costs *for each item of the work proposed in 5(a)* under the headings listed below with a total for each heading and the estimated total cost of the work. Costs for any work to be performed by an independent contractor should be listed separately under category (a) below. Costs for any work that is not to be performed by an independent contractor should be listed under categories (b) through (g).

(a) Independent contracts. State the total cost of any proposed independent contract for all or any part of the work, and the number of units and the unit cost for each type of work, such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, or per cubic yard of material moved. Cost estimates should be supported by bids from three contractors if possible. (*Note*—If none of the work is to be contracted, write "none" after this item.)

(b) Personal services. The cost of supervision, engineering and geological services, outside consultants, and labor should be itemized by numbers and classes of employees; rates of wages, salaries or fees; and periods of employment. State whether these services are available.

(c) Operating materials and supplies. List items of material and supplies giving quantity and cost of each. Include under this heading power, water, and fuel, and units of equipment and tools costing less than $50 each.

(d) Operating equipment. List items of equipment and tools costing $50 or more per unit. Give specifications and indicate how each item is to be acquired—i.e., rented, purchased or provided by the applicant. If rented or purchased, state the estimated rental or purchase price. If furnished by the applicant, state condition and present fair market value.

(e) Initial rehabilitation and repairs. Describe the type and the cost of *initial* rehabilitation or repair of existing buildings, fixtures, installations (exclusive of mine workings), and movable operating equipment now owned by the applicant which will be used in the exploration work.

(f) New buildings, fixtures, installations. Describe each building, fixed improvement, and installation to be purchased, constructed, or installed for the exploration work, stating specifications and cost including labor, materials, and supervision.

(g) Miscellaneous. Describe the type and estimate the cost of repairs and maintenance of the operating equipment listed in 7(d). Do not repeat initial repairs listed in 7(e). Show also the costs of analytical work, accounting, workmen's compensation and employees' liability insurance, payroll taxes, and other required costs that do not fall within the previous categories. [*Note*—The Government will not contribute to costs incurred before the date of the contract, or to costs of or incident to: (1) acquiring, using, or possessing land and any existing improvements, facilities, buildings, installations, and appurtenances, or the depreciation and depletion thereof; (2) general overhead, corporate management, interest and taxes (other than payroll and sales taxes); (3) insurance (other than employees' liability insurance); and (4) damages to persons or property (other than authorized repair to or replacement of equipment or other property used in the work).]

INT.-DUP. SEC., WASH., D.C

WYOMING MINING AND EXPLORATION COMPANY
P. O. BOX 785
LANDER, WYOMING 82520

1 (a). Letters of denial for loan requests enclosed.

1 (b). We have no affiliated or controlling company.

1 (c). As to how we propose to furnish our share of the expense in the project-All members of the five man limited partnership formulating the Wyoming Mining and Exploration Company (YMECO), are willing to devote their time and labor at a reduced rate for the duration of the testing and deep drilling program. Our costs are based on what we actually charge for drilling under these particular circumstances. The material to be drilled is a very hard, disseminated quartz and dense chlorite schist. Our initial validation on these claims was undertaken last season, at our own expense. We drilled an aggregate total footage of 1936 feet, consisting mostly of shallow validation holes. Fairly close cost factors were kept on the drilling of this particular type of formation and our estimates for the cost of drilling an aggregate depth of 900 feet in the strike zone are reasonably accurate, therefore. We own, with no encumberances, most of the necessary equipment, as found listed in 7 (d). All of this equipment would be furnished and used on the project by YMECO as an additional part of our expense. During the past year of 1966, we have spent close to $12,000.00 on this project and are now short of funds to complete it to the point we feel it merits. With the completion of our maps and data, the results of our assays being so promising, the taking into consideration the size of the surface exposure, and the high feasibility of the entire project, we feel the costs of deep exploration are surely justified.

2 (a). We are the sole owners of the May Claim complex through legal and valid lode and placer claims discovered, claimed, located, staked, validated, and filed upon through the proper filing and posting of legal claim notices and performing all necessary on-site field work as is required.

2 (b). All the following are properly documented and recorded in the Mining Record Books at the County Clerk's Office in the Fremont County Court House in Lander, Wyoming:

May Lode Claims, 1 through 28 are located in Sec. 30, Twp. 30N., Rng. 99W, and NW¼ Sec. 31, Twp. 30N., Rng. 99W,6th. P.M.
May Lode, 1 through 12 - pgs 617 through 628 Bk 196
May Lode, 13 through 27 - pgs 63 through 77 Bk 199
May Lode, # 28-Pg 129 Book 200
Jump Lode Claims, 1 through10 are located in SE¼, Sec. 19, Twp. 30N., Rng. 99 W., 6th P.M., and recorded on Pg. 700 Bk 200
May Placer, 160 acres, <u>amended</u>. Pg. 121-Book 200
May Placer, as amended, 120 acres, located in Sec. 30, Twp. 30N, Rng. 99W, 6th PM, and recorded on pg 128 Bk 200
Maybee Placer, 120 acres, is located on Sec. 30, Twp. 30N, Rng. 99W, 6th PM, and recorded on pg 128 Bk 200
Maycee Placer, 120 acres, is located in Sec. 30, Twp. 30N., Rng. 99W, 6th PM, and recorded on pg 127 Bk 200
Maydee Placer, 120 acres, is located in Sec. 30, Twp. 30N., Rng. 99W, 6th PM, and record on page 127, Book 200

2 (c). None

3 (a). Enclosed and furnished in detail.

3 (b). Wyoming Mining and Exploration Co. is sole owner.

3 (c). None available

3 (d). Any appreciable ore reserves will be determined or indicated through deep drilling

3 (e). For this information, our assay data map and legend are enclosed, and they are explanatory. Also enclosed is a copy of the new USGS Geological Quadrangle Overlay Map of the area.

3 (f). The extreme amount of sulphides present on the surface, lead us to emphatically believe that within 500 feet of the surface we will encounter positive indications of a large, uniform ore body of above average percentage content of the three major minerals shown on our assays, Cu, Au, Ag., Sites, methods and assay data are enclosed.

3 (g). One complete set of maps is enclosed. In the event our request for exploration assistance is not granted, we would appreciate having our maps returned.

4 (a). Representative contact:
A. E. (Gene) Edwards PH. AC 307 332-4363
138 North 7th Street, Lander, Wyoming 82520

E. C. Winters, PH: AC 307 332-5260
Baldwin Building, Lander, Wyoming 82520

Access is designated on Quadrangle Map
Accessibility is good in the summer, automobile OK.
In adverse weather conditions, transportion will be arranged.

4 (b). See feasibility map enclosed.

5 (a). This item has been generally described in item 1 (c), and further description of the drill sites are noted on the enclosed maps. The deep drill at Site "A" is projected to the 500 feet level, the extent of our existing drill rod available. The holes at Site "B" and "C" will each be to the 200 feet level. The hole diameter will be 4-plus inches. 3 7/8" rock bits are to be used. "Graveyard" sampling at 5 foot intervals is planned unless, of course, a visible increased richness of ore is encountered, then additional sampling and assaying will be taken intermediately. In conjunction with the deep hole program, we would also like to reopen eight old prospect holes to a depth of 15 feet. These have all sunk in through the years, but through hand work and close examination last season, all are showing interestingly strong copper characteristics, and have been verified with assay reports. These prospects, and there are many others of less extent in the area, have exposed the continuity of the strike zone in length and breadth. To make a salable package, we feel the exposure of the ore in these pits is also necessary, so any prospective buyer may see all the ore indicators actually in place, and also the particular formation in which they occur. For this part of the exploration, we have set up cost factors on a hydraulic backhoe rental schedule.

5 (b). No access roads are needed.

5 (c). This property is located close to the continental divide and snows lay quite late usually. Work could start possibly in May and no later than the first of June. Two months time should complete this phase of exploration. Backhoe work, at the rate of cleaning-out, exposing and completing one prospect per day, would take 10 days, including two days for transportion of the equipment both ways. Drilling at the anticipated rate of 40 feet per day average, would take 52 calendar days, with extra time for moving, pulling and changing bits, and possible repair time allowed. We would absorb any repairs encountered and found imperative.

6 Three of the members of YMECO have had lengthy experience in prospecting and mining. The backhoe operator has had 10 years experience. The driller has had 6 years experience, drilling with various types of drills. The driller's helper, also a partner in the firm, worked all last season with us. Drilling supervision will be undertaken by the driller. Over all suspervision and sampling will be conducted by the exploration manager. Procurement and accounting can be ably handled by the remaining staff.

7 (a). None, except our own cost basis.

7 (b). Cost of assays. One every 5 feet proposed. Graveyard sampling; for Copper, Gold, Silver-180 assays at $10.00 each, which included related cost equals $1800.00. No professinnal services or outside consultation is anticipated. Other applicable costs are on the accompanying breakdown sheet.

7 (c). Gas, oil, grease and etc.,-$1.50 lineal foot. All miscellaneous hand tools and equipment to be furnished by applicant.

7 (d). 1-43S Failing Rotary Drill, rebuilt, mtd on 1956 Dodge Power Wagon, 1 ton, separate drill motor, w/ air compressor, condition-very good. ----------$7000.00
1-400psi Gardner-Denver Mud Pump, separate motor, trailer mtd, rebuilt-very good---------- 1500.00
1-Water Truck w/550 gal tank and 2"pump good--------- 1000.00
1-Chev 1/2T PU, HD, LWB-1962, very good---------- 1300.00
1-Ford 1/2T, PU, 1959 Fair---------- 500.00
1-IH Scout 1/4T, 1958 good---------- 700.00
1-200 Amp DC Welder, w/separate 3000W AC generator, trailer mounted, good---------- 800.00
1-1955 32 ft. trailer house, good---------- 700.00
1-Schram-100 CFM Air Compressor, w/accessories-------- 800.00
All above equipment is company owned and unencumbered, and will be furnished to the program by Wyoming Mining and Exploration Company.

7 (e). No buildings are involved. All above listed equipment is in good operating condition having been re-built and completely overhauled last season. No initial repairs are necessary. In the event they become imperative, the company will stand the expense.

7 (f). No new buildings or structures are needed at this time.

7 (g). All employees will be owners, and will carry their own taxes, Social Security contributions and accident insurance as self-employed individuals. Accounting costs are on breakdown sheet.

Remarks:

We have invited and have had preliminary on-site visits with respective geologists, last fall, from three major mining companies: Phelps-Dodge Corp., Cyprus Mines, and Homestake Mining Co. All of the representative geologists where highly interested and all were of the opinion that we should undertake at least one deep test. They are still in contact with us. Early adverse weather conditions last fall prevented us from continuing any further work at that time at normal costs. The companies extended their commendation for the way we have conducted the project, our mapping and assaying, and for our general thoroughness and accuracy. All indicated their interest to return in the spring for more extensive field tests. Six other company representatives are asking to be scheduled to visit the claims this summer. We sincerely believe we have a worthwhile prospect and are sure that if we can be honored with a visitation and on-site inspection from your OME representative, that our application will be considered in the affirmative. Please find following, our cost breakdown. This is the manner we have used up to now for cost factor breakdowns. To breakdown the costs of contract work, if all were hired or contracted, would be simple; but considering our owning and furnishing the equipment and the fact that we would do our own work at a reduced rate, we present a slightly different situation than is indicated in the application. If you have some method of acknowledging a situation similar to ours, we would certainly like consideration. We feel we are being more than fair on our part. After your inspection of our enclosed data and maps, if a field trip can be arranged with an OME representative, we are certain the feasibility of this program will be confirmed; and with some type of arrangement, our application can be considered and forthwith granted.

Yours very truly,

Henry J. Hudspeth Jr.

Henry J. Hudspeth, Jr.,
Secretary-Treasurer
Exploration Manager
Wyoming Mining & Exploration Company.

COST BREAKDOWN SHEET

COST PER FOOT		TOTAL COST
$6.00	500 feet at Site "A" 200 feet at Site "B" 200 feet at Site "C" An aggregate total ~~of~~ footage of 900 feet at $6.00/ft, includes drilling rig, mud pump, water truck, driller's wages, driller's helper's wages and other related costs.	$5400.00
$1.17	25 4" high shoulder rock bits at $42.00 each	1050.00

Re: OME-6602 (Copper-Gold-Silver)
Nuclear Exploration and Development Co. (NEDCO)
May and Jump Claims
Fremont County Wyoming

Dear Mr. Hudspeth:

This will acknowledge your letter of June 24 to our Denver office, requesting that we continue to hold the subject application in our active files an additional year pending outcome of the proposed exploration which the company plans to do on its own account.

For administrative and fiscal reasons this office does not hold action on an application for that length of time. Therefore, under these circumstances, we shall consider the application as having been withdrawn and placing it in our inactive files.

We shall be pleased to reopen this case at anytime in the future. It will be necessary for you to file a new application, referring to this OME docket number, and furnishing the information requested in the application form pertinent to the new proposal. This information should include new bank letters dated within 90 days of the filing of the new application. Information alreay submitted need not be repeated.

The six (6) maps submitted with the application are being returned to you as requested.

Sincerely yours,

FRANK E. JOHNSON

Your letter of May 16, 1968

Dear Mr. Robertson:

This is to acknowledge, in writing, our phone conversation at 3:30 p.m. on Monday June 24, 1968, advising you of the cancellation, at our request, of your scheduled visit to the above captioned property. Our original application is over a year old and we realize the delay has been inevitable and we appreciate your position; however, in the meantime, we have been contemplating a public stock issue for further exploration and development of our mining properties, and this particular property will be appropriated a given sum for exploration. After further study should we feel this property merits more expenditures, than alloted, we might ask for exploration assistance. With this in mind, will you hold our portfolio in abeyance for one year, and during this time we might want to re-vamp and re-activate our application.

Yours sincerely,

Henry J. Hudspeth, Jr.

Dear Mr. Edwards:

We have been unable to contact you by telephone. The number on your letter head is Lander, Wyoming 332-4363, but we understand this has been changed to 332-2496. We have been unable to get an answer the past 2 days at that number.

I would like to make a field examination of the above-stated property on June 3. My present plans are to take Frontier Air Lines Flight No. 520 at 5:00 PM June 2, 1968 (Sunday), arriving in Riverton, Wyoming at 6:30 PM. I will then pick up a Hertz vehicle and drive to Lander, Wyoming that evening.

Please call me as soon as possible to confirm these plans and to arrange to meet you. Our telephone number in Denver, Colorado is: 303-233-3611, extensions 8598, 8731, or 8546.

Dear Mr. Hasler:

Reference is made to your letter of March 28, 1968, concerning the above.

We are truly sorry we did not get in touch with you in the month of January, concerning an application for financial assistance in minerals exploration on the above property, but the weather conditions made it impossible to do so.

We would, however, like a field examination, on the above property, on June 1, 1968, if possible.

Please let me know if this date would be convienant with you.

Very truly yours,

NUCLEAR EXPLORATION & DEVELOPMENT CO.

Dear Mr. Hasler

We are pleased that you are still considering the May and Jump claims located South of Lander, Wyoming, and fully understand the work load you have in covering the area in your district.

We are also pleased to let you know that the property has been sold on a stock transfer basis to a much larger Company. I am also the president of NEDCO. and the company is still interested in the OME Loan. We will be in Denver in January, and I'll make sure that we get you fully informed at that time.

As you know weather conditions here during the winter are not conducive to field examinations. I would think that sometime arount the first part of May would be the earliest you could get a good examination.

Very Truly Yours

AIRMAIL

Memorandum

To: Field Officer, Region III

From: Chief, Office of Minerals Exploration

Subject: OME-6602 (Copper, Gold, Silver)
Wyoming Mining and Exploration Company
May and Jump Claims
Fremont County, Wyoming

The Applicant has furnished us with copies of the bids requested in our letter of March 10, and we are now referring the subject application to you for further study, a field examination, if warranted, and recommendations.

Our main comment at this time concerns costs. Rotary drilling with a rig similar to the one mentioned in the application is currently costing $3.25 per foot in Nevada. Although the structure in Wyoming may be more difficult to drill, it still appears that the average bid of over $9.00 per foot is excessive. Please note that estimated costs for assaying, mapping, and accounting services are also exceedingly high.

Re: OME-6602 (Copper, Gold, Silver)
Wyoming Mining and Exploration Company
May and Jump Claims
Fremont County, Wyoming

Gentlemen:

This will acknowledge receipt of the bids for drilling and backhoe work that we had requested from you in order to continue the processing of your application.

Please note that allowable costs under an OME contract do not include full book value allowances to the operator for his equipment used on a contract. Rather, for each piece of his equipment used on a project the operator is compensated by allowing depreciation to the extent of 1/60th of the fair market value of the equipment or its book value, whichever is less, for each month used. If the equipment is rented, a fair rental charge per month is allowed.

Your application is now being referred to Mr. J. William Hasler, Field Officer, Region III, Office of Minerals Exploration, U. S. Geological Survey, Building 25, Federal Center, Denver, Colorado 80225. Mr. Hasler will notify you if additional information concerning the application is needed, and possibly to make arrangements for a field examination.

As Mr. Hasler is responsible for making OME field examinations in eleven states, a visit to your property necessarily will have to be scheduled well in advance.

Sincerely yours,

Frank E. Johnson

Re: OME-6602 (Copper, Gold, Silver)
Wyoming Mining and Exploration Company
May and Jump Claims
Fremont County, Wyoming

Gentlemen:

Our review of your application for exploration assistance indicates that additional information is required to continue its processing.

Although the partnership intends to perform the proposed drilling with its own equipment and personnel, it will be necessary for you to submit bids from at least two independent contractors to support your estimated costs for this work. Please note that we require all applicants proposing a drilling program to submit this supporting information.

Because the rental of a backhoe including operator and supplies amounts to an independent contract, please submit bids from at least two independent contractors for this work also.

For your information, the Government pays its share of the costs at the end of each month after a voucher for the costs incurred has been submitted and approved. It usually takes two or three weeks to process such a voucher. An applicant, therefore, should have sufficient funds available to pay for all the costs of the project for the first two or three months.

Upon receipt of the requested information we will be glad to continue the processing of your application. Please note that nothing in this letter should be construed as a commitment by the Government to grant an exploration contract.

Sincerely yours,

FRANK E. JOHNSON
