CEMENT IN FEBRUARY 2017

This report provides monthly data on the shipments of cement to final customers and the production of clinker in the United States from January 2016 through February 2017.¹ Data on the imports of cement and clinker for February 2017 are also provided.

Total shipments of portland and blended cement in the United States and Puerto Rico in February 2017 were about 6.0 million metric tons (Mt), essentially unchanged from sales in February 2016 (tables 2A and 2B). The leading producing States for portland and blended cement in February 2017 were Texas, California, Missouri, Florida, and Alabama, in descending order (table 1A). The leading cement-consuming States (Texas, California, Florida, Georgia, and North Carolina, in descending order) received 46% of the February shipments (tables 2A and 2B). Shipments for the year through February were nearly 11.5 Mt, slightly higher than for the same period in 2016.

Clinker production totaled 4.7 Mt in February 2017, down by 7.6% from the output in February 2016 (table 4). The leading clinker-producing States in February were, in descending order, Texas, California, Missouri, Florida, and Alabama. Clinker production for the year through February totaled 9.1 Mt, down by 11.7% from that of the same period in 2016.

Masonry cement shipments of about 188,000 metric tons (t) in February 2017 were up by 8.5% from those in February 2016 (table 2C). The leading masonry-cement-consuming States were, in descending order, Florida, Texas, California, North

Carolina, and Tennessee; these received about 55% of February's shipments. Masonry cement shipments for the year through February were 373,000 t, up by 12.4% from those of the same period in 2016.

Tables 5, 6, and 7 contain import data from the U.S. Census Bureau; however, data for clinker imports into the Seattle, WA, and the Detroit, MI, customs districts do not include material trucked in from Canada on an informal entry basis. Likewise, imports of cement into the El Paso, TX, district are missing significant informal entries. For some time, imports have been increasing at rates generally higher than those for cement sales overall. In part, this reflects the collapse of imports during the recession (hence a low basis for comparison), but also the relatively low cost of imports resulting from a combination of low bunker fuel costs, modest ship chartering rates, increased ship availability, and a strong dollar. In some regions, imports are offsetting domestic production constraints related to difficulties in bringing long-idle extra kilns back online. Also, clinker imports have increased, likely temporarily, ahead of expected disruptions to kiln output at certain plants that are undergoing upgrades. February 2017 imports of cement and clinker of about 813,000 t were 23.9% higher than those in February 2016. As listed, imports for the year through February totaled 1.52 Mt, up by 20.3% from those of the same period in 2016; however, within the 2017 total, the January imports were understated by nearly 28,000 t of gray portland cement imported into the San Francisco Customs district under a tariff code for another commodity.

¹Footnoted revisions to the historical data are those received since the publication of the previous month's edition of this report. Data for the current month may contain revisions (not indicated by footnotes) received since the publication of the preliminary edition of the current month's report.

¹Includes white cement and clinker.

²Although imports are reported from Malta, Malta has no cement plants; the import source is thought to be Turkey.

³Value = c.i.f. (cost, insurance, and freight).

⁴Data for the Detroit and Seattle districts for imports from Canada are thought to be underrepresented with respect to clinker.

⁵Data for the El Paso district for imports from Mexico are believed to be underrepresented with respect to cement.

⁶Data for the San Francisco Customs district exclude a January 2017 entry of 27,816 metric tons, worth \$1,068,000 c.i.f., of gray portland cement from China that was misregistered by the importer under a tariff code for a different commodity.
