CEMENT IN JUNE 2017

This report provides monthly data on the shipments of cement to final customers and the production of clinker in the United States from January 2016 through June 2017.¹ Data on the imports of cement and clinker for June 2017 are also provided.

Total shipments of portland and blended cement in the United States and Puerto Rico in June 2017 were about 9.4 million metric tons (Mt), essentially unchanged from shipments in June 2016 (tables 2A and 2B). The leading producing States for portland and blended cement in June 2017 were Texas, California, Missouri, Florida, and Michigan, in descending order (table 1A), and these accounted for 41% of the month's total sales. The leading cement-consuming States (Texas, California, Florida, Ohio, and Illinois, in descending order) received about 37% of the June shipments (tables 2A and 2B). Shipments for the year through June were 44.7 Mt, up slightly from those during the same period in 2016.

Masonry cement shipments of about 219,000 metric tons (t) in June 2017 were down by 3.6% from those in June 2016 (table 2C). The leading masonry-cement-consuming States were, in descending order, Florida, Texas, California, North Carolina, and Tennessee; these States received 54% of June's shipments. Masonry cement shipments for the year through June were 1.21 Mt, up slightly from those of the same period in 2016.

Clinker production totaled 6.8 Mt in June 2017, down slightly from the output in June 2016 (table 4). The leading clinker-producing States in June were, in descending order, California, Texas, Missouri, Florida, and Michigan, and these States

accounted for 50% of the month's total production. Clinker production for the year through June totaled 35.8 Mt, down slightly from that of the same period in 2016.

Tables 5, 6, and 7 list import data from the U.S. Census Bureau; however, data for clinker imports into the Seattle, WA, and the Detroit, MI, customs districts do not include material trucked in from Canada on an informal entry basis. Likewise, imports of cement into the El Paso, TX, district are missing significant informal entries from Mexico. For some time, imports have been increasing at rates generally higher than those for cement sales overall. In part, this reflects the collapse of imports during the recession (hence a low basis for comparison), but also the relatively low cost of imports resulting from a combination of low bunker fuel costs, modest ship chartering rates, increased ship availability, and a strong dollar. In some regions, imports are offsetting domestic production constraints related to difficulties in bringing long-idle extra kilns back online. Also, clinker imports have increased, likely temporarily, ahead of expected disruptions to kiln output at certain plants that are undergoing upgrades. June 2017 imports of cement and clinker of about 1.4 Mt were almost 8% higher than those in June 2016. As listed, imports for the year through June totaled 6.3 Mt; this was only slightly higher from those of the same period in 2016 because of a large and uncharacteristic relative decrease in April. Also, the 2017 total is understated by January imports of nearly 28,000 t of gray portland cement imported into the San Francisco Customs district under a tariff code for another commodity.

¹Footnoted revisions to the historical data are those received since the publication of the previous month's edition of this report. Data for the current month may contain revisions (not indicated by footnotes) received since the publication of the preliminary edition of the current month's report.

^rRevised.

¹Data are unrounded but are believed to be accurate to no more than three significant digits.

²Includes cement manufactured from imported clinker.

³Data may not add to totals shown because of independent rounding.

⁴Beginning with July 2016, data for Indiana and Ohio have been combined to avoid disclosing proprietary data.

⁵As reported by domestic and Canadian cement manufacturers and other importers.

¹Revised.

²Data are unrounded but are believed to be accurate to no more than three significant digits.

³Includes imported cement and cement manufactured from imported clinker.

⁴As reported by domestic and Canadian cement manufacturers and other importers.

⁵Data may not add to totals shown because of independent rounding.

-- Zero.

¹Data are unrounded but are believed to be accurate to no more than three significant digits.

²Includes imported cement and cement manufactured from imported clinker.

³Blended cement defined per ASTM standard C595.

⁴Includes U.S. possessions and territories.

⁵Data may not add to totals shown because of independent rounding.

Value ^{3,4,5}	\$110,996,031	\$523,369,208			

-- Zero.

¹Includes white cement and clinker.

²Although imports are reported from Malta, Malta has no cement plants; the import source is thought to be Turkey.

³Value = c.i.f. (cost, insurance, and freight).

⁴Data for the Detroit and Seattle districts for imports from Canada are thought to be underrepresented with respect to clinker.

⁵Data for the El Paso district for imports from Mexico are believed to be underrepresented with respect to cement.

⁶Data for the San Francisco Customs district exclude a January 2017 entry of 27,816 metric tons, worth \$1,068,000 c.i.f., of gray portland cement from China that was misregistered by the importer under a tariff code for a different commodity.

Source: U.S. Census Bureau.
