## CEMENT IN JULY 2017

This report provides monthly data on the shipments of cement to final customers and the production of clinker in the United States from January 2016 through July 2017.<sup>1</sup> Data on the imports of cement and clinker for July 2017 are also provided.

Total shipments of portland and blended cement in the United States and Puerto Rico in July 2017 were about 8.5 million metric tons (Mt), up by 3.4% from shipments in July 2016 (tables 2A and 2B). The leading producing States for portland and blended cement in July 2017 were Texas, Missouri, California, Florida, and Michigan, in descending order (table 1A), and these accounted for 42% of the month's total sales. The leading cement-consuming States (Texas, California, Florida, Ohio, and New York, in descending order) received about 38% of the July shipments (tables 2A and 2B). Shipments for the year through July were 53.2 Mt, up by 2.0% from those during the same period in 2016.

Masonry cement shipments of about 202,000 metric tons (t) in July 2017 were essentially unchanged from those in July 2016 (table 2C). The leading masonry-cement-consuming States were, in descending order, Florida, Texas, California, North Carolina, and Georgia; these States received 54% of the July shipments. Masonry cement shipments for the year through July were 1.42 Mt, up slightly from those of the same period in 2016.

Clinker production totaled 7.2 Mt in July 2017, up by 4.6% from the output in July 2016 (table 4). The leading clinker-producing States in July were, in descending order, Texas, California, Missouri, Florida, and Pennsylvania, and these States

accounted for 48% of the month's total production. Clinker production for the year through July totaled 43.0 Mt, significantly unchanged from that of the same period in 2016.

Tables 5, 6, and 7 list import data from the U.S. Census Bureau; however, data for clinker imports into the Seattle, WA, and the Detroit, MI, customs districts do not include material trucked in from Canada on an informal entry basis. Likewise, imports of cement into the El Paso, TX, district are missing significant informal entries from Mexico. For some time, imports have been increasing at rates generally higher than those for cement sales overall. In part, this reflects the collapse of imports during the recession (hence a low basis for comparison), but also the relatively low cost of imports resulting from a combination of low bunker fuel costs, modest ship chartering rates, increased ship availability, and a strong dollar. In some regions, imports offset domestic production constraints related to difficulties in bringing long-idle extra kilns back online. Also, clinker imports had increased temporarily to maintain cement output at certain plants that were undergoing kiln line upgrades. With the recent completion of one such major project, clinker imports have returned to more normal levels. July 2017 imports of cement and clinker of about 1.4 Mt were almost 5% lower than those in July 2016. As listed, imports for the year through July totaled 7.7 Mt, essentially unchanged from those of the same period in 2016. The 2017 total is understated by January imports of nearly 28,000 t of gray portland cement imported into the San Francisco Customs district under a tariff code for another commodity.

<sup>1</sup>Footnoted revisions to the historical data are those received since the publication of the previous month's edition of this report. Data for the current month may contain revisions (not indicated by footnotes) received since the publication of the preliminary edition of the current month's report.

<sup>p</sup>Preliminary. <sup>r</sup>Revised.

<sup>1</sup>Data are unrounded but are believed to be accurate to no more than three significant digits.

<sup>2</sup>Includes cement manufactured from imported clinker.

<sup>3</sup>Data may not add to totals shown because of independent rounding.

<sup>4</sup>Beginning with July 2016, data for Indiana and Ohio have been combined to avoid disclosing proprietary data.

<sup>5</sup>As reported by domestic and Canadian cement manufacturers and other importers.

<sup>P</sup>Preliminary.

<sup>1</sup>Data are unrounded but are believed to be accurate to no more than three significant digits.

<sup>2</sup>Includes imported cement and cement manufactured from imported clinker.

<sup>3</sup>As reported by domestic and Canadian cement manufacturers and other importers.

<sup>4</sup>Data may not add to totals shown because of independent rounding.

<sup>1</sup>Revised. -- Zero.

<sup>2</sup>Data are unrounded but are believed to be accurate to no more than three significant digits.

<sup>3</sup>Includes imported cement and cement manufactured from imported clinker.

<sup>4</sup>Blended cement defined per ASTM standard C595.

<sup>5</sup>Includes U.S. possessions and territories.

<sup>6</sup>Data may not add to totals shown because of independent rounding.

Value <sup>3,4,5</sup>	\$125,321,911	\$648,691,119			

-- Zero.

<sup>1</sup>Includes white cement and clinker.

<sup>2</sup>Although imports are reported from Malta, Malta has no cement plants; the import source is thought to be Turkey.

<sup>3</sup>Value = c.i.f. (cost, insurance, and freight).

<sup>4</sup>Data for the Detroit and Seattle districts for imports from Canada are thought to be underrepresented with respect to clinker.

<sup>5</sup>Data for the El Paso district for imports from Mexico are believed to be underrepresented with respect to cement.

<sup>6</sup>Data for the San Francisco Customs district exclude a January 2017 entry of 27,816 metric tons, worth \$1,068,000 c.i.f., of gray portland cement from China that was misregistered by the importer under a tariff code for a different commodity.
