End Uses of Beryllium

Beryllium End-Use Worksheet Notes

Data Sources

The sources of data for the beryllium end-use worksheet are the Commodity Data Summaries and the Mineral Commodity Summaries, annual mineral statistics publications of the U.S. Bureau of Mines, and the report Beryllium Recycling in the United States in 2000, U.S. Geological Survey.

End Use

End use is defined as the use of the mineral commodity in a particular industrial sector or product. End-use data are derived by applying estimated percentages of end-use consumption to the calculated U.S. apparent consumption. For beryllium end-use categories are aerospace, electrical components, electronic components, and other industrial uses.
