Figure 3.2 Bear quartz monzonite (central and lower part) cuts McCleod Hill quartz monzodiorite (upper part, dark). North is to right. The Bear quartz monzonite truncates E-W foliation, in the McCleod Hill quartz monzodiorite, and in the upper left it truncates a slightly less mafic layer parallel to the foliation. Below center is a deformed xenolith of quartz monzodiorite with foliation oriented nearly N-S. Field station 78+, eastern Luhr Hill. Scale in cm.
